

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

#### **About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

### REPORT

OF

### THE SECRETARY OF WAR.

1865.

WAR DEPARTMENT, Washington City, November 22, 1865.

Mr. PRESIDENT: The military appropriations by the last Congress amounted to the sum of five hundred and sixteen millions two hundred and forty thousand one hundred and thirty-one dollars and seventy cents, (\$516,240,131 70.) The military estimates for the next fiscal year, after careful revision, amount to thirty-three millions eight hundred and fourteen thousand four hundred and sixty-one dollars and eighty-three cents, (\$33,814,461 83.) The national military force on the first of May, 1865, numbered one million five hundred and sixteen men. It is proposed to reduce the military establishment to fifty thousand troops, and over eight hundred thousand have already been mustered out of service. What has occasioned this reduction of force and expenditure in the War Department it is the purpose of this report to explain.

At the commencement of the last session of Congress much had been accomplished towards suppressing the rebellion and restoring federal authority over the insurgent States. But the rebels still held Richmond as the capital of their so-called confederate government, and the semblance of State government existed in Virginia, North Carolina, South Carolina, Georgia, Alabama, Florida, Mississippi, and Texas, while a strong military force occupied a considerable portion of Arkansas and Louisiana. Their principal army, under its favorite commander, General Lee, defended with undaunted front impregnable positions around Petersburg and Richmond. Another army, under General Hood, was moving north, with purpose to invade Tennessee and Kentucky. West of the Mississippi, a large force, under General Kirby Smith, threatened Arkansas, Kansas, and Missouri. The chief seaports of the rebel States-Wilmington, Charleston, Savannah, and Mobile-were strongly garrisoned and fortified, and our blockading squadrons were unable to prevent trade and supplies reaching the enemy. Pirate steamers, built in foreign ports for rebel cruisers, armed, manned, equipped and supplied by foreign capital, roamed the high seas, burning our ships and destroying our commerce. Marauders, hired by the rebel government and harbored on our northern frontier, were setting on foot piratical expeditions against our commerce on the lakes, planning to burn and plunder our towns and cities, and were plotting murder against the President and Vice-President of the United States, in hopes of overthrowing our government by anarchy. Faith in their final success and hope of open recognition by foreign governments still animated leading traitors.

But now the approaching session of Congress will find the authority of the federal government effectually and peacefully exercised over the whole territory of the United States. All the armies heretofore arrayed against the national government have laid down their arms, and surrendered as prisoners of war. Every hostile banner has been hauled down; the so-called confederate government is overthrown; its president is a prisoner in close custody, awaiting trial; while its vice-president and three of its chief executive officers have been recently enlarged from prison by your elemency. All the ordinances, laws. and organizations created or existing under or by virtue of the so-called confederate government have been swept away, and, by your sanction, the people of the insurgent States have organized, or are busily engaged in organizing, State governments, in subordination to the federal authority. In harmony with this new condition of affairs, the military force of the federal government has been reduced, large armies disbanded, and nearly a million of brave men, lately soldiers in arms, paid and honorably mustered out of service, have gone from camps. garrisons and posts to their homes, and most of them are engaged already in the peaceful pursuits of civil life.

Among the causes which, under Divine Providence, have brought about these wonderful results, successful military operations stand first in order.

A clear comprehension of these operations requires a brief glance at the military position just before the spring campaigns of 1864.

Notwithstanding the successful campaigns on the Mississippi, in 1863, by the reduction of Vicksburg and Port Hudson, severed in twain the rebel territory and restored to us the navigation and commerce of the Mississippi, while the victory at Gettysburg drove back the rebel invaders from the northern States, yet the military strength of the rebels continued formidable. The army of Virginia, under General Lee, recovered from its disaster at Gettysburg, occupied its former lines in Virginia, protecting the rebel capital, and holding inactive and in check the army of the Potomac. Another large army, under General Bragg, re-enforced by Longstreet's corps, threatened the reconquest of Tennessee. After the disastrous battle of Chickamauga, our army of the Cumberland, shut up and surrounded at Chattanooga, unable to move by reason of the inclemency of the weather and impassable roads, was in extreme jeopardy.

At this discouraging juncture a change of military organization was made. The departments of the Ohio, the Tennessee, and the Cumberland were united in one military division, called the division of the Mississippi, under Major General Grant. Command of the army of the Cumberland was given to Major General George H. Thomas, relieving General Rosecrans. A winter campaign was immediately directed against Bragg's army. The battles of Wauhatchie, Lookout Mountain, Missionary Ridge, and Chattanooga opened our communications, and routed Bragg's army with heavy loss. The movement of Longstreet 8

corps against Knoxville, to recover East Tennessee, also proved a disastrous failure to the rebels, who were driven off and forced back to the mountains.

In the month of February, 1864, General Sherman's movement, with a large force, from Vicksburg, into the interior of the State of Alabama, as far as Meridian, inflicted heavy loss upon the enemy by the destruction of railroads and supplies, the capture of prisoners, and the escape of negroes and refugees. This operation demonstrated the capacity of an invading army to penetrate the rebel States and support itself on the country, and was the forerunner of the great movements in Georgia.

The arrangements for the spring campaigns of 1864 were made, on the part of the government, to put forth its strength. In all the bureaus of the War Department supplies were provided on a scale of great magnitude, to meet any exigency that could be foreseen. The estimates were based upon an army organization of one million of men. The States were called upon to strengthen the armies by volunteers; new drafts were ordered and put in execution throughout all the loval States: vast supplies of arms, ammunition, clothing, subsistence, medical stores, and forage were provided and distributed in depots, to meet the wants of the troops wherever they might operate; horses, mules, wagons, railroad iron, locomotives and cars, bridge timber, telegraph cable and wire, and every material for transportation and communication of great armies under all conditions, were supplied. Congress, with unstinting hand, voted large appropriations for recruiting, paying, and supplying the troops. The office of lieutenant general, to command all the armies, was created by law. Ulysses S. Grant was appointed to that rank by the President, and assumed command, as Lieutenant General, on the 17th day of March, 1864, from which time the operations of all the armies were under his direction.

The national forces engaged in the spring campaign of 1864 were organized as armies or distributed in military departments as follows:

The army of the Potomac, commanded by Major General Meade, whose headquarters were on the north side of the Rapidan. This army was confronted by the rebel army of Northern Virginia, stationed on the south side of the Rapidan, under General Robert E. Lee.

The 9th corps, under Major General Burnside, was, at the opening of the campaign, a distinct organization, but on the 24th day of May, 1864, it was incorporated into the army of the Potomac.

The army of the James was commanded by Major General Butler, whose headquarters were at Fortress Monroe.

The headquarters of the army of the Shenandoah, commanded by Major General Sigel, were at Winchester.

Three armies were united under Major General William T. Sherman, viz: the army of the Cumberland, Major General Thomas commanding; the army of the Tennessee, Major General McPherson commanding; and the army of the Ohio, Major General Schofield commanding. General Sherman's headquarters were at Chattanooga. The effective strength of these three armies was nearly one hundred thousand men, and two hundred and fifty-four guns, to wit:

| Army of the Cumberland, Major General Thomas commanding:   |        |
|--|--------|
| Infantry   | 54,568 |
| Artillery  | 2,377  |
| Cavalry  | 3,828  |
| Total  | 60,773 |
| Number of guns   | 130    |
| Army of the Tennessee, Major General McPherson commanding: |        |
| Infantry   | 22,437 |
| Artillery  | 1,104  |
| Cavalry  | 624    |
| Total  | 24,165 |
| Number of guns   | 96     |
| Army of the Ohio, Major General Schofield commanding:      |        |
| Infantry   | 11,183 |
| Artillery  | 679    |
| Cavalry  | 1,697  |
| Total  | 13,559 |
| Number of guns   | 28     |
| Grand aggregate number of troops:                          | 98,497 |
| Grand aggregate number of guns                             | 254    |

About these figures were maintained during the campaign; the number of men joining from furlough and hospitals compensating for the loss in battle and from sickness.

In the department of Kentucky there was likewise a large active force, under command of Major General Burbridge, and also in East Tennessee, under Major General Stoneman. Adequate forces were reserved in the department of Washington, under Major General Augur, to protect the capital and the immense depots of military supplies at Washington and Alexandria, and also in the Middle military department under Major General Lewis Wallace, to cover Baltimore and the important lines of supply and communication in that department. Besides the armies operating actively in the field, troops were assigned to garrison exposed and important strategic points, to guard hospitals, recruiting stations, prison camps, supply depots, railroad lines, and to defend border States and the northern frontier from rebel raids.

In the department of the south a force was operating against Charleston and in Florida, under General Gillmore.

West of the Mississippi the forces were under the respective departmental commanders. In the department of the Gulf, embracing Louisiana and Texas, Major General Banks had his headquarters at New Orleans. The department of Arkansas was in command of Major General Steele. Major General Curtis commanded the troops assigned for the department of Kansas and the Indian Territory. The troops in the department of the Missouri were under command of Major General Rosecrans. The defence of the northwestern States and Territories against Indians, expeditions to check incursions and reduce hostile tribes, and to protect the overland route to California, employed a considerable force under Major General Pope, in the northwest department, General Carleton in New Mexico and Arizona, and General Connor in the Indian Territory. The States and Territories on the Pacific coast required but a small force, under Major General McDowell.

The headquarters of the Lieutenant General commanding all the armies were with the army of the Potomac in the field.

Official reports show that on the first of May, 1864, the aggregate national military force of all arms, officers and men, was nine hundred and seventy thousand seven hundred and ten, to wit:

| Available force present for duty                          | 662,345 |
|---|---------|
| On detached service in the different military departments | 109,348 |
| In field hospitals, or unfit for duty                     | 41,266  |
| In general hospitals or on sick leave at home             | 75,978  |
| Absent on furlough, or as prisoners of war                | 66,290  |
| Absent without leave                                      | 15,483  |
| Grand aggregate   | 970,710 |

The aggregate available force present for duty May 1, 1864, was distributed in the different commands as follows:

| in the different commands as follows.             |         |
|---|---------|
| Department of Washington                          | 42,124  |
| Army of the Potomac                               | 120,384 |
| Department of Virginia and North Carolina         | 59,130  |
| Department of the South                           | 18,169  |
| Department of the Gulf                            | 61,865  |
| Department of Arkausas                            | 23,666  |
| Department of the Tennessee                       | 74,170  |
| Department of the Missouri                        | 15,775  |
| Department of the Northwest                       | 5,296   |
| Department of Kansas                              | 4,798   |
| Headquarters military division of the Mississippi | 476     |
| Department of the Cumberland                      | 119,948 |
| Department of the Ohio                            | 35,416  |
| Northern department                               | 9,546   |
| Department of West Virginia                       | 30,782  |

| Department of the East        | 2,828  |
|-------------------------------|--------|
| Department of the Susquehanna | 2,970  |
| Middle department             | 5,627  |
| Ninth army corps              | 20,780 |
| Department of New Mexico      | 3,454  |
| Department of the Pacific     | 5,141  |
|                               |        |
|                               |        |

662,345

Active military operations west of the Mississippi commenced in the month of March, 1864. The principal rebel forces beyond the Mississippi were concentrated under General Kirby Smith, at Shreveport, on the Red river. Against this force an expedition was undertaken by Major General Banks, with a large army from New Orleans, to be co-operated with by troops from the department of Arkansas, under General Steele, and from the division of the Mississippi, under General A. J. Smith, and also a large naval force under Admiral Porter. General Banks with his forces reached Alexandria about the 20th of March. Advancing thence towards Shreveport, a series of disasters commenced, that ended in the failure of the expedition with heavy loss of men and material. The cause of this failure is still a subject of discussion, not material to the present report. Although by this mishap the enemy was enabled to occupy the attention of a large force designed and that might have been employed in other fields, he was himself kept in check and hindered from taking part in the great campaigns east of the Mississippi.

The campaigns in Virginia opened on the 4th day of May. By simultaneous movements the army of the Potomac crossed the Rapidan, and City Point, on the south side of the James, was seized and occupied by General Butler. The crossing of the Rapidan was effected without resistance from the enemy. The movement against City Point took him by surprise. The army of the Potomac was directed at Lee's army, while the city of Richmond was the objective point of the army of the James.

Minute details of the subsequent campaigns are given in the accompanying reports of the Lieutenant General, and other distinguished commanders, so that nothing more than a cursory view of the main results is here required.

The antagonist armies of Meade and Lee met in conflict near Mine Run on the 5th day of May. Forty-three days of desperate fighting or marching by day and night forced back the rebel army from the Rapidan to their intrenchments around Richmond, and carried the army of the Potomac to the south side of the James river. The strength of the enemy's force when the campaign opened, or the extent of his loss, is not known to this department. Any inequality of numbers between Lee's army and the army of the Potomac was fully compensated by the advantage of position. Resolute purpose and desperate valor were exhibited on both sides. In the battles of the Wilderness, Spottsylvania Court House, Jericho Ford, Hawe's Shop, and Cold Harbor, many brave soldiers and gallant officers perished. Among them were Brigadier General

Wadsworth, Brigadier General Hays, and Major General Sedgwick. Lieutenant General Grant in his report observes:

"The battles of the Wilderness, Spottsylvania, North Anna, and Cold Harbor, bloody and terrible as they were on our side, were even more damaging to the enemy, and so crippled him as to make him wary ever after of taking the offensive. His losses in men were probably not so great, owing to the fact that we were, save in the Wilderness, almost invariably the attacking party, and when he did attack, it was in the open field."

Although expectations of destroying Lee's army, and the speedy capture of Richmond and Petersburg, were disappointed, and the enemy had found refuge behind impregnable fortifications, the campaign was still prosecuted with determined purpose towards the same object. While the rebel army was sheltered in his intrenchments the national forces were busy at work outside strengthening and advancing their position, breaking the communications of the enemy, cutting off and destroying his supplies, narrowing his limits, harassing him by raids, and occupying his attention to prevent detachments or re-enforcements being sent to operate elsewhere.

Active operations were also going on in the valley of the Shenandoah. On the first of May an expedition, under Generals Crook and Averill, was sent out by General Sigel, which reached Wytheville and accomplished the destruction of much rebel property. General Sigel advanced, on the 8th day of May, with his force, from Winchester to New Market, where, met by the enemy under General Breckinridge, he was defeated and fell back to Cedar creek. General Hunter was then placed in command of the department. He marched with a strong force towards Staunton, and in a brilliant engagement at Piedmont defeated the enemy with severe loss. Advancing to Staunton, he was joined there by Crook and Averill, and moved against Lynchburg. Re-enforcements from the enemy having arrived before him, General Hunter retired by way of the Kanawha. Meanwhile, in order to repair the losses of the army of the Potomac, the chief part of the force designed to guard the middle department and the department of Washington was called forward to the front. Taking advantage of this state of affairs, in the absence of General Hunter's command, the enemy made a large detachment from their army at Richmond, which, under General Early, moved down the Shenandoah valley, threatening Baltimore and Washington. Their advance was checked at Monocacy, where a severe engagement was fought by our troops under General Wallace, re-enforced by a part of the 6th corps under General Ricketts. After this battle the enemy continued to advance until they reached the intrenchments around Washington. Here they were met by troops from the army of the Potomac, consisting of the 6th corps, under General Wright, a part of the 8th corps, under General Gillmore, and a part of the 19th corps, just arrived from New Orleans, under General Emory. By these troops the enemy were driven back from Washington, and retreated hastily to Virginia, pursued by our forces under General Wright.

On the 7th day of August, 1864, General Sheridan was placed in command of the military division comprising the department of Washington, the depart-

ment of West Virginia, the department of the Susquehanna, and the middle department. In two great battles, at the crossing of the Opequan on the 19th of September, and at Fisher's Hill on the 22d of September, the rebel army under Early was routed and driven from the valley with immense loss of prisoners, artillery, and stores. A desperate effort was made by the enemy to recover their position. Early was strongly re-enforced, and on the morning of the 19th of October, in the absence of General Sheridan, his lines were surprised, his position turned, and his forces driven back in confusion. At the moment when a great disaster was impending, Sheridan appeared upon the field, the battle was restored, and a brilliant victory achieved. The routed forces of the enemy were pursued to Mount Jackson, where he arrived without an organized regiment of his army. All his artillery and thousands of prisoners fell into Sheridan's hands. These successes closed military operations in the Shenandoah valley, and a rebel force appeared there no more during the war.

Major General William T. Sherman began the brilliant series of his campaigns early in May. The first objective point was Atlanta. To reach that city his armies must pass from the northern limit to the centre of the great State of Georgia, forcing their way through mountain defiles and across great rivers, overcoming or turning formidable intrenched positions defended by a strong, well-appointed veteran army, commanded by an alert, cautious, and skilful general. The campaign opened on the 6th day of May, and on the 2d day of September the national forces entered Atlanta. This achievement is thus described in General Sherman's Field Order No. 68:

"On the first of May our armies were lying in garrison seemingly quiet from Knoxville to Huntsville, and our enemy lay behind his rocky-faced barrier at Dalton, proud, defiant, and exulting. He had had time since Christmas to recover from his discomfiture on the Mission Ridge, with his ranks filled, and a new commander-in-chief, and second to none in the confederacy in reputation for skill, sagacity and extreme popularity. All at once our armies assumed life and action and appeared before Dalton. Threatening Rocky Face we threw ourselves upon Resaca, and the rebel army only escaped by the rapidity of its retreat, aided by the numerous roads with which he was familiar, and which were strange to us. Again he took post in Allatoona, but we gave him no rest, and, by our circuit towards Dallas and subsequent movement to Acworth, we gained the Allatoona Pass. Then followed the eventful battles about Kenesaw, and the escape of the enemy across the Chattahoochee river.

"The crossing of the Chattahoochee and breaking of the Augusta road was most handsomely executed by us, and will be studied as an example in the art of war. At this stage of our game our enemies became dissatisfied with their old and skilful commander, and selected one more bold and rash. New tactics were adopted. Hood first boldly and rapidly, on the 20th of July, fell on our right at Peach Tree creek, and lost. Again, on the 22d, he struck our extreme left, and was severely punished; and finally, again on the 28th, he repeated the attempt on our right, and that time must have become satisfied, for since that date he has remained on the defensive. We slowly and gradually drew our

lines about Atlanta, feeling for the railroad which supplied the rebel army and made Atlanta a place of importance.

"We must concede to our enemy that he met these efforts patiently and skillfully, but at last he made the mistake we had waited for so long, and sent his cavalry to our rear far beyond the reach of recall. Instantly our cavalry was on his only remaining road, and we followed quietly with our principal army, and Atlanta fell into our possession as the fruit of well-concerted measures, backed by a brave and confident army."

For military reasons, stated in the report of the Lieutenant General, it was determined that Atlanta should be destroyed, and Sherman's armies push forward to Savannah or some other point on the Atlantic coast.

Shortly before the fall of Atlanta, General Johnston had been superseded in command of the rebel army by General Hood, who, adopting a different system from that pursued by his cautious predecessor, boldly assumed the offensive, with a view to force General Sherman from Georgia, by cutting off his communications, and invading Tennessee and Kentucky. Pursuant to this plan, Hood, by a rapid march, gained and broke up, at Big Shanty, the railroad that supplied Sherman's army, advanced to Dalton, and thence moved towards Tennessee. Hood was followed from Atlanta by General Sherman far enough north to cover his own purpose and assure him against Hood's interrupting the contemplated march to the sea-coast. Sherman turned back suddenly to Atlanta. That city, and all the railroads leading to it, were destroyed, and on the 15th of November the march commenced for Savannah. Advancing in three columns, and living upon the country, the capital of the State and other large towns were occupied without resistance. General Sherman's command, on the 10th of December, "closed in on the enemy's works which covered Savannah." Fort McAllister was gallantly carried by assault on the same day. The city of Savannah, strongly fortified, and garrisoned by a large force under General Hardee, was summoned, but surrender was refused. Preparations for assault were made, and in the night of the 20th of December Hardee evacuated the city, and, with a large part of his garrison, escaped under cover of darkness. The United States troops entered the city early in the morning of the 21st of December. Immense quantities of arms, ammunition, ordnance, and military stores were captured, and the cotton that fell into our hands amounted in value to many millions of dollars.

While General Sherman's army was marching south from Atlanta to the seaccase the rebel army under Hood, strongly re-enforced, was moving north, threatening Tennessee. The task of encountering this formidable foe, and defending the border States from invasion, was intrusted to Major General George H. Thomas, who was ably assisted by his second in command, Major General Schofield. In his report General Thomas says:

"I found myself confronted by the army which, under General J. E. Johnston, had so skilfully resisted the advance of the whole active army of the military division of the Mississippi from Dalton to the Chattahoochee, re-enforced by a well-equipped and enthusiastic cavalry command of over 12,000 men, led by one of the boldest and most successful cavalry commanders in the rebel army. My

information from all sources confirmed the reported strength stated of Hood's army to be from forty to forty-five thousand infantry and from twelve to fifteen thousand cavalry. My effective force at this time consisted of the 4th corps. about 12,000, under Major General D. S. Stanley: the 23d corps, about 10,000. under Major General Schofield: Hatcher's division of cavalry, about 4.000: Croxton's brigade, 2.500; and Capron's brigade, of about 1.200. The balance of my force was distributed along the railroad, and posted at Murfreesboro', Stevenson, Bridgeport, Huntsville, Decatur, and Chattanooga, to keep open our communications and hold the posts above named, if attacked, until they could be re-enforced, as up to this time it was impossible to determine which course Hood would take, advance on Nashville or turn towards Huntsville. Under these circumstances. it was manifestly best to act on the defensive until sufficiently re-enforced to justify taking the offensive. On the 12th of November communication with General Sherman was severed, the last despatch from him leaving Cartersville. Georgia, at 2.25 p. m. on that date. He had started on his great expedition from Atlanta to the seaboard, leaving me to guard Tennessee, or to pursue the enemy if he followed the commanding general's column. It was, therefore, with considerable anxiety that we watched the force at Florence, to discover what course they would pursue with regard to General Sherman's movements, determining thereby whether the troops under my command, numbering less than half those under Hood, were to act on the desensive in Tennessee, or take the offensive in Alabama."

When the possibility of Hood following Sherman was over, General Thomas took measures to act on the defensive. Re-enforcements of new regiments were hurried forward to him by the governors of the western States. All troops fit for any military duty were collected and sent forward from the hospitals; absentees on leave were called in; the employés in the quartermaster's department were armed and organized for duty in the intrenchments, and two divisions of veteran infantry, under command of General A. J. Smith, that had been serving on the Red river, and afterwards in Missouri, were pushed forward to General Thomas. By these means his forces were speedily swelled, when concentrated, to an army nearly as large as that of the enemy. The public property and garrisons were drawn in from exposed positions and points not required to be held, the fortifications of Nashville were strengthened, and every preparation was made for a struggle of no ordinary magnitude. Hood advanced to Columbia, where his attempt to cross Duck creek was checked for a while by General Schofield, who repulsed the enemy many times with heavy loss. Schofield's main force in front of Columbia was withdrawn on the night of the 29th of November, and a position taken at Franklin on the morning of the 30th. Here took place one of the most fierce and bloody battles of the war. "The enemy," says General Thomas, in his report, "followed closely after General Schofield's rear guard in the retreat to Franklin, and upon coming up with the main force, formed rapidly and advanced to assault our works, repeating attack after attack during the entire afternoon, and as late as 10 p. m. his efforts to break our lines were continued. General Schofield's position was excellently chosen, with both flanks resting on the river, and his men firmly held their ground against an overwhelm-

ing cuemy, who was repulsed in every assault along the whole line. Our loss, as given by General Schofield in his report, transmitted herewith, (and to which I respectfully refer,) is 189 killed, 1,033 wounded, and 1,104 missing, making an aggregate of 2.326. We captured and sent to Nashville 702 prisoners, including one general officer and 33 stands of colors. General D. S. Stauley, commanding 4th corps, was severely wounded at Franklin while engaged in rallying a portion of his command which had been temporarily overpowered by an overwhelming attack of the enemy. At the time of the battle the enemy's loss was known to be severe, and was estimated at 5,000. The exact figures were only obtained, however, on the reoccupation of Franklin by our forces, after the battles of December 15 and 16, at Brentwood Hills, near Nashville, and are given as follows: Buried upon the field, 1.750; disabled and placed in hospital at Franklin, 3,800; which, with the 702 prisoners already reported, makes an aggregate loss of 6,252, among whom were six general officers killed, six wounded, and one captured. The important results of this signal victory cannot be too highly appreciated; for it not only seriously checked the enemy's advance, and gave General Schofield time to remove his troops and all his property to Nashville, but it also caused deep depression among the men of Hood's army, making them doubly cautious in their subsequent movements."

On the night after the battle of Franklin, General Schofield, by the direction of General Thomas, fell back to Nashville, in front of which city, on the heights, a line of battle was formed by noon of the 1st of December. Hood's army appeared before Nashville on the 2d of December. The intense severity of the weather prevented operations for several days. Both armics were icebound for a week previous to the 14th of December, when the weather moderated, and General Thomas, having completed his preparations, issued orders for battle the ensuing day. At an early hour on the morning of the 15th of December General Thomas moved against Hood's army. The battle was furiously contested until nightfall. "The total result was the capture of 16 pieces of artillery and 1,200 prisoners, besides several hundred stands of small arms and about 40 wagons. The enemy had been forced back at all points, with heavy loss, and our casualties were unusually light. The behavior of the troops was unsurpassed for steadiness and alacrity in every movement, and the original plan of battle, with but few alterations, was strictly adhered to. The whole command bivouacked in line of battle during the night on the ground occupied at dark, while preparations were made to renew the battle at an early hour on the morrow."

The battle was renewed on the 16th, at six o'clock in the morning. At three o'clock in the afternoon the enemy's strong position on Overton's Hill was assaulted by the 4th corps. "Immediately following the effect of the 4th corps, Generals Smith's and Schofield's commands moved against the enemy's works in their respective fronts, carrying all before them, irreparably breaking his lines in a dozen places, and capturing all his artillery and thousands of prisoners, among the latter four general officers. Our loss was remarkably small, scarcely mentionable. All of the enemy that did escape were pursued over the

tops of Brentwood or Harpeth Hills. General Wilson's cavalry dismounted, attacked the enemy simultaneously with Schofield and Smith, striking him in reverse, and, gaining firm possession of Granny White pike, cut off his retreat by that route. Wood's and Steedman's troops, hearing the shouts of victory coming from the right, rushed impetuously forward, renewing the assault on Overton's Hill, and although meeting a very heavy fire, the onset was irresistible, artillery and innumerable prisoners falling into our hands. The enemy, hopelessly broken, fled in confusion through the Brentwood Pass, the 4th corps in a close pursuit, which was continued for several miles, when darkness closed the scene, and the troops rested from their labors. During the two days' operations there were 4,462 prisoners captured, including 287 officers of all grades from that of major general, 53 pieces of artillery, and thousands of small-arms. The enemy abandoned on the field all of his dead and wounded."

At the battle of Nashville, Hood's army, which at one time was considered the best drilled and most formidable rebel force set on foot during the war, disappeared as an army organization. Commanded successively by Bragg, Johnston, and Hood, many bloody fields proved the courage of the soldiers and the skill of its commanders. The shattered fragments of this army were pursued from Nashville to the Tennessee river by the main forces of General Thomas, and were followed and harassed for two hundred miles by detached commands. In his report General Thomas remarks: "To Colonel Palmer and his command is accorded the credit of giving Hood's army the last blow of the campaign, at a distance of over two hundred miles from where we first struck the enemy on the 15th of December, near Nashville." What troops escaped from the pursuit were afterwards united with other fragments of rebel forces under General Johnston, and finally laid down their arms to General Sherman at Raleigh.

While the events that have been mentioned were transpiring in the main armies, other military operations of less magnitude, but contributing to the general result by harassing and weakening the enemy, were in progress. A large rebel force, under John Morgan, invaded Kentucky, and was defeated by General Burbridge in a severe engagement at Cynthiana on the 12th day of June. John Morgan was surprised and killed, and his staff captured by General Gillem on the 4th day of September, 1864. In the month of November a rebel expedition, under Breckinridge, Duke, and Vaughn, was repulsed by General Ammon, and driven from East Tennessee. An expedition, under General Stoneman and General Burbridge, penetrated to Saltville, in southwestern Virginia, destroyed the works at that place, broke up the railroads, and inflicted great destruction upon the enemy's supplies and communications.

After the withdrawal of our troops from the Red river, a large rebel force advanced under Sterling Price into Kansas, and penetrated thence into the department of the Missouri. But they were at length driven back with heavy loss.

Other military operations, of greater or less magnitude. occurred during the year—some attended with disaster, some with brilliant success. Of the former class were Kilpatrick's raid against Richmond, the capture of Plymouth and its

garrison, at the commencement of the year, by the rebels under Hoke; the defeat of the expedition from Memphis, under General Sturgis; the capture of Fort Pillow by Chalmers and Forrest; and Stoneman's expedition to Andersonville. On the other hand, the raids of Grierson from Memphis, in December, of Stoneman and Burbridge into Virginia, of Wilson into Alabama, inflicted sore distress upon the enemy, and brought the rebels to a solemn sense of the sufferings caused to themselves by the war they had undertaken against their government.

At the commencement of the year 1865 all hearts were more anxious than ever to bring the war to a speedy close. Every preparation to that end was made by the department and by the military commanders in the field. Adequate appropriations were voted and new popular loans authorized by Congress. Further measures for recruiting the army, prompted by experience, were enacted. A new draft for half a million of men was put into prompt execution. The State executives renewed their labors in calling for volunteers. The people responded to the demands of the occasion, and rapid recruitment began in all the States, and was at its height when Richmond fell. Troops were at that time being raised, organized, armed and equipped as fast as they could be conveniently transported to the field. To the coming campaigns through the Carolinas and in Virginia all eyes looked for a speedy and decisive result that should end the war. The military position is thus stated by the Lieutenant General:

"In March, 1865, General Canby was moving an adequate force against Mobile and the army defending it, under General Dick Taylor; Thomas was pushing out two large and well-appointed cavalry expeditions—one from Middle Tennessee, under Brevet Major General Wilson, against the enemy's vital points in Alabama; the other from East Tennessee, under Major General Stoneman, towards Lynchburg—and assembling the remainder of his available forces, preparatory to offensive operations from East Tennessee; General Sheridan's cavalry was at White House; the armies of the Potomac and James were confronting the enemy under Lee in his defences of Richmond and Petersburg; General Sherman, with his armies, re-enforced by that of General Schofield, was at Goldsboro'; General Pope was making preparations for a spring campaign against the enemy under Kirby Smith and Price, west of the Mississippi; and General Hancock was concentrating a force in the vicinity of Winchester, Va., to guard against invasion, or to operate offensively, as might prove necessary."

Official reports show that on the first of March, 1865, the aggregate national military force of all arms, officers and men, was nine hundred and sixty-five thousand five hundred and ninety-one, to wit:

| Available force present for duty                          | 602, 598 |
|---|----------|
| On detached service in the different military departments | 132, 538 |
| In field hospitals or unfit for duty                      | 35, 628  |
| In general hospitals or on sick leave at home             | 143, 419 |
| Absent on furlough or as prisoners of war                 | 31, 695  |
| Absent without leave                                      | 19, 683  |
|   |          |

Grand aggregate...

..... 965, 591

This force was augmented on the first of May, 1865, by enlistments, to the number of one million five hundred and sixteen of all arms, officers and men, (1,000,516.)

The aggregate available force present for duty on the first of March was distributed in the different commands as follows:

| Army of the Potomac                                    | 103, 273 |
|--|----------|
| Headquarters military division of the Mississippi      | 17       |
| Department of the Cumberland                           | 62, 626  |
| Department of the Tennessee                            | 45, 649  |
| Left wing army of Georgia                              | 31,644   |
| Cavalry corps military divisions of the Mississippi    | 27, 410  |
| Headquarters military division of West Mississippi     | 24       |
| Reserve brigades military division of West Mississippi | 13, 748  |
| Department of the Gulf.                                | 35, 625  |
| Department of Arkansas                                 | 24, 509  |
| Department of the Mississippi                          | 24, 151  |
| Sixteenth army corps                                   | 14, 395  |
| Headquarters military division of the Missouri         | 12       |
| Department of the Missouri                             | 18, 557  |
| Department of the Northwest                            | 4, 731   |
| Headquarters middle military division                  | 841      |
| Cavalry forces middle military division                | 12, 980  |
| Nineteenth army corps                                  | 6, 612   |
| Middle department                                      | 2, 089   |
| Department of Washington                               | 26, 056  |
| Department of West Virginia                            | 15, 517  |
| Department of Pennsylvania                             | 820      |
| Department of the East                                 | 7. 462   |
| Department of Virginia                                 | 45, 986  |
| Department of North Carolina                           | 34, 945  |
| Department of the South                                | 11,510   |
| Department of Kentucky                                 | 10, 655  |
| Northern department                                    | 11, 229  |
| Department of the Pacific                              | 7,024    |
| Department of New Mexico                               | 2, 501   |
| Grand total  | 602, 598 |

The active operations of 1865 began with the reduction of Fort Fisher, by a combined expedition of land and naval forces. The port of Wilmington, North Carolina, during the whole war, had been a principal point of foreign trade with the rebels. The advantage of its position defied the most rigorous blackade, and, after the fall of Savannah, it was the only gate through which foreign supplies could pass to the rebels. The strong works and garrison of Fort Fisher, at the mouth of Cape Fear river, were the main defence of Wilmington. On

the 13th of December a force of about 6,500 men, under Major General Butler. started from Fortress Monroe to operate in conjunction with a naval force under Admiral Porter, against Fort Fisher. General Butler effected a landing on the 25th of December, but re-embarked on the 27th, and returned with his troops to Fortress Monroe. The Lieutenant General ordered the enterprise to be renewed by General Terry, who, on the 2d of January, was placed in command of the same troops, with a re-enforcement that made the whole number about eight thousand. On the morning of the 13th of January the troops were disembarked, under cover of a heavy effective fire from the fleet. ' An assault was made in the afternoon of the 15th of January, and, after desperate hand-to-hand fighting for several hours, the works were carried, the enemy driven out, and about midnight the whole garrison, with its commander, General Whiting, surrendered. The fall of Fort Fisher carried with it the other defences of Cape Fear river. Fort Caswell and the works on Smith's island fell into our hands on the 16th and 17th, Fort Anderson on the 19th, and, General Schofield advancing, the enemy were driven from Wilmington on the 21st of February.

Early in the month of January Major General Sherman, having refitted his army, entered upon his campaign from Savannah, through the States of South Carolina and North Carolina, the incidents of which are detailed in his accompanying report. Its result is thus stated in his special Field Order No. 76:

"Waiting at Savannah only long enough to fill our wagons, we again began a march, which, for peril, labor and results, will compare with any ever made by an organized army. The floods of the Savannah, the swamps of the Combahee and Edisto, the 'high hills' and rocks of the Santee, the flat quagmires of the Pedee and Cape Fear rivers, were all passed in mid-winter, with its floods and rains, in the face of an accumulating enemy; and after the battles of Averysboro' and Bentonville we once more came out of the wilderness to meet our friends at Goldsborough. Even then we paused only long enough to get new clothing, to reload our wagons, and again pushed on to Raleigh and beyond, until we met our enemy suing for peace instead of war, and offering to submit to the injured laws of his and our country."

The operations in General Canby's military division also exercised an important influence at this juncture. After the disaster upon the Red river, a change of the military organization west of the Mississippi was made to meet the emergency. The departments of Arkansas and the Gulf, including Louisiana and Texas, were united in one military division—West Mississippi, under command of Major General Canby. His efforts were directed to the organization and concentration of the forces and material within his division, and in measures to prevent the rebel troops west of the Mississippi from re-enforcing the armies operating east of that river. In the month of July Fort Gaines, Fort Powell and Fort Morgan, constituting important defences of Mobile bay, were reduced by a combined movement of land forces, under General Gordon Granger, detached by General Canby, and co-operating with a naval force under Admiral Farragut. Early in the spring of 1865 a large force, under Generals A. J. Smith, Gordon Granger and F. Steele, was directed against the city of Mobile. The

enemy were driven out of Spanish Fort by bombardment, Fort Blakely was taken by assault, and the city of Mobile was evacuated by the enemy on the 12th of April. The brilliance of these achievements has been overshadowed by the grander scale of operations in other quarters, but their skill and success are worthy of high admiration. After the fall of Savannah, Charleston and Wilmington, the enemy had placed his last hopes on retaining a foothold in the cotton States at Mobile. It was strongly fortified and garrisoned, and orders were issued to hold it at every hazard.

In the latter part of February General Sheridan, under direction of the Lieutenant General, moved from Winchester to Staunton, which place he captured on the 2d of March, taking prisoners, artillery and military stores. He thence moved on Charlottesville, and destroyed the Richmond and Lynchburg railroad, and the bridges across the Rivanna river. Dividing his forces, one column moved to New Market and destroyed the James river canal; the other column pushed towards Lynchburg, destroying the railroad to Amherst Court House. These columns, reuniting, moved to the White House, on the Pamunkey, effecting great destruction of the canal on their route, and thence put themselves in communication with the forces around Richmond.

The month of March, 1865, opened the great campaign against Richmond and the army that had so long defended the rebel capital.

Instructions were given by the Lieutenant General on the 24th of March for a general movement of the national forces around Richmond. It commenced on the morning of the 29th of March. Ten days' marching and fighting finished the campaign. Richmond, Petersburg, the army of Virginia and its commander were captured. Jefferson Davis and his so-called confederate government were fugitives or prisoners of war. Davis fled from Richmond on the afternoon of Sunday, the 2d day of April. The national forces occupied Petersburg and entered Richmond Monday morning. Lee's army was pursued until it reached Appomattox Court House, where on Sunday, the 9th day of April, it laid down its arms on the terms prescribed by General Grant.

From this period the history of the war is but an enumeration of successive surrenders by rebel commanders. On the 26th day of April General Johnston surrendered his command to Major General Sherman, at Raleigh, North Carolina. General Howell Cobb, with twelve hundred militia and five generals, surrendered to General Wilson, at Macon, Georgia, on the 20th of April. General Dick Taylor, on the 14th of May, surrendered all the remaining rebel forces east of the Mississippi to General Canby. On the 11th of May Jefferson Davis, disguised and in flight, was captured at Irwinsville, Georgia. On the 26th of May, General Kirby Smith surrendered his entire command, west of the Mississippi, to Major General Canby. With this surrender the organized rebel force disappeared from the territory of the United States.

The flag of the United States was lowered at Fort Sumter on the 14th of April, 1861, by Major Anderson, who, long besieged by overwhelming rebel forces, was compelled, with his small garrison, to evacuate the works. On the anni-

versary of that day, four years later, the rebel forces having been driven from Charleston, the national banner was planted again upon Fort Sumter, under the orders of the President, by the hands of General Anderson, with appropriate military and naval ceremonies, and a commemorative address delivered by the Rev. Henry Ward Beecher.

Their victorious campaigns ended, the armies of the Tennessee and the Cumberland and the army of the Potomac marched through Richmond to the federal capital, where they were reviewed by the President and the distinguished commanders under whom they had so long and so gallantly served in the field. After this national ceremony they and their fellow-soldiers in other commands were paid, and, as rapidly as the condition of affairs would admit were released from the military service of the country; and, returning to their homes in the several States, they were welcomed with the thanks and rejoicings of a grateful people.

One other event may properly be noticed in this report, as a part of the military history of the rebellion. While our armies, by their gallantry and courage and the skill of their commanders, were overcoming all resistance in the field to the national authority, a swift and sudden blow was aimed at the national existence and at the life of the commander-in-chief of the army and navy, which, for atrocity in its circumstances, the cruel art that designed it, and the peril to which it exposed the government, is unsurpassed in the history of nations. Shortly before the Richmond campaign opened President Lincoln went to the headquarters of Lieutenant General Grant at City Point, where he remained until the capture of Petersburg and Richmond. After their occupation by our forces he visited those cities, and returned to Washington on the evening of Sunday, the 9th day of April. The despatch of the Lieutenant General, announcing General Lee's surrender, was communicated to him about eleven o'clock Sunday night. From that time until he was assassinated his attention was earnestly directed to the restoration of peace and the reorganization of civil government in the insurgent States. In a public address to an assemblage that met at the Executive Mansion on the evening of Wednesday, the 12th of April, to congratulate him on the success of our arms, his views and some of his measures were explained. On the night of the following Friday the President was shot by an assassin, and expired at about seven o'clock on the morning of Saturday, the 15th of April. This assassination appeared to be part of a deliberate, comprehensive conspiracy to assassinate the President, Vice President, Secretary of State, Lieutenant-General, and other officers of the government, with a view to its disorganization. About the same hour of the President's murder, an effort was made to assassinate the Secretary of State, who was then confined to his bed by serious injuries, accidentally received a few days before. He and other members of his family were dangerously wounded. Some of the parties engaged in this conspiracy were tried, convicted, and executed; others are still under sentence of imprisonment for life. The details are given in the report of the Judge Advocate General. The designs upon the Vice President and the Lieutenant General failed; and upon the death of the President, the Vice President was sworn into office, and assumed the duties of President of the United States. These events were promptly communicated to the armies by general orders, and from thenceforth until the present time the government has been administered by Andrew Johnson as Chief Executive and Commander-in-Chief of the army and navy.

The destruction of the rebel military power opened the way to re-establish civil government in the insurgent States. From that period the functions of the military department became simply co-operative with other branches of the federal government.

Nashville, Tennessee, was the first capital of an insurgent State in which the federal authority was re-established. The rebel army was driven out on the 23d day of February, 1862, and that city occupied by the Union forces. On the 3d day of March, 1862, Andrew Johnson, then senator in Congress from the State of Tennessee-the only senator from an insurgent State who retained his seat in Congress—was appointed military governor of the State of Tennes-He accepted the appointment, and promptly entered upon his duties, and continued to exercise them until his resignation on the 3d day of March, 1865. In all the vicissitudes of the war his administration was directed to the establishment and maintenance of the Constitution and laws of the United States within and over the State of Tennessee. Without entering upon details it is sufficient to remark that extension of civil authority kept pace with the reduction of the rebel power. The federal courts were opened, and justice administered. Under his direction, against many discouragements and much opposition, great advance was made towards the full re-establishment of civil authority, and the restoration of the State to its practical relations to the federal government. He issued a proclamation on the 6th of January, 1864, for the election of township and county officers, justices of the peace, constables, trustees, sheriffs, clerks, registers, and tax collectors. In the month of May a convention was held at Knoxville, East Tennessee, to devise measures for restoring civil government in the State. In the month of August another convention was called to meet at Nashville on the 5th of September, to reorganize the A full convention being prevented by the condi ion of military affairs, this body recommended that another convention, "elected by the loval people," should assemble at an early day to revise the State constitution. The governor issued a proclamation on the 7th of September, announcing that he should proceed to appoint officers and establish tribunals "in all the counties and districts of the State whenever the people gave evidence of loyalty and a desire for civil government, and a willingness to sustain the officers and tribunals." vention was called to meet on the 9th of January, 1865, at Nashville, to revise the State constitution. This convention met, amendments to the State constitution were adopted, slavery was abolished, and provision made for submitting the amendments to the people, and for holding elections. The amendments were ratified by popular vote. A governor, legislature, and members of Congress were subsequently (on the 4th of March) elected by the people. The legislature assembled on the first Monday of April; the abolition of slavery was enacted, senators to Congress elected, and a State government was fully

organized, and has since continued in action. This system of reorganization having been found practicable by actual experience, it was adopted by the President, with such modifications as he deemed proper, for all the insurgent States, and is now in course of execution.

The disposition exhibited after the surrender of their armies in all the insurgent States to submit to the national authority dispensed with the necessity of keeping large armies on foot, and indicated the degree to which the war power might be reduced. So much only of the national military force has been kept in each State as is needed to keep the peace, protect the public property, and enforce the laws.

It was apparent that by the surrender of General Lee and his army, the military power, on which alone the rebellion rested, was irretrievably broken, no doubt being entertained that Lee's surrender would be followed by that of Johnston, and perhaps by all other commanders of the insurgent forces. The attention of the department was immediately directed to the following objects, and on the 13th of April, four days after Lee's surrender, public notice was given that orders would be speedily issued to carry them into effect, viz:

First. To stop all drafting and recruiting in the loyal States.

Second. To curtail purchases of arms, ammunition, quartermaster and commissary supplies, and reduce the expenses of the military establishment in the several branches.

Third. To reduce the number of general and staff officers to the actual necessities of the service.

Fourth. To remove all military restrictions upon trade and commerce, so far as might be consistent with the public safety.

These measures have been carried into effect from time to time, as the exigencies of the service would admit. It will be seen from the report of the Adjutant General that troops to the number of 800,963 have already been mustered, paid off, and disbanded. Further reduction is contemplated. Upon the discharge of troops the services of a great number of staff, field, and general officers were no longer required. Of these some have resigned, and others were honorably mustered out. No doubt in many instances it has been painful for gallant and accomplished officers to leave that service to which they have been accustomed, and where they have won honorable distinction. But it is to the credit of the volunteer service that they have recognized the obligation of the government to reduce the military establishment with the occasion that called it into existence, and that their own wishes or interest have not been importunately urged against the necessities of the service.

The disposition of the veteran reserve corps presented some considerations of peculiar nature. It was the inclination of the department to retain it in service until the meeting of Congress. But inquiry showed that a very small per cent. of enlisted men were content to remain in service. All who desired have therefore been discharged, and supernumerary officers mustered out.

Recruiting to fill the regular regiments has continued. Several thousand applications for commissions in the regular service are on file. These commis-

sions, hitherto, have been conferred only by promotion from the ranks. But to secure the requisite number of competent officers, a board has been appointed to examine applicants and determine their relative merit. From the list selected by the board, and in the order of merit, appointments are to be made. Two years' actual service in the war is indispensable for appointment.

The establishment of a well-organized militia system is one of the most important subjects that will demand the attention of Congress. This subject has already received careful consideration, and it is believed that, after conference with the appropriate committees, a practical system may be agreed upon.

Measures for the establishment of homes, and some provisions for the aid and relief of wounded and disabled soldiers, is also a subject that will commend itself strongly to every patriotic heart. Whether this duty, which the country owes to patriots who have suffered in the national defence, can best be performed by the national government or administered by the respective State authorities, and whether relief can best be afforded by an increase of pension, or by establishing homes, are points on which opinions differ, and which can only be settled by the wisdom of Congress.

The Board of Visitors to the Military Academy at West Point, in June last, made an elaborate report, which is herewith submitted. They recommend a reorganization, and a number of measures which, in their opinion, will enhance the benefits of that national institution. To these the attention of Congress is respectfully invited, with the recommendation that the number of cadets be increased, as recommended, and that the superintendence of the institution be no longer confined to the engineer bureau. It is believed that the Military Academy is at present well conducted, and that their responsible duties are efficiently performed by the officers, professors, and instructors charged with the institution.

The war appropriations at the last session of Congress, as has been stated, amounted to the sum of \$516,240,131 70. The estimates for the next fiscal year, commencing June 30, 1866, are \$33,814,461 83.

These estimates are based upon a standing force of fifty thousand men, so organized as to admit of an increase, without additional organizations, to 82,600 troops of all arms.

This estimate has been made after conference and careful consideration, and is believed to be adequate for any national exigency, if the country should be blessed with peace. The reduction of the national military force, in its rapidity and numbers, is without example, and if there be any alarm in the public mind because this reduction is made while grave questions at home and abroad are unsettled, a brief consideration of the subject will show that there is no cause for appreheusion.

The force to be retained is small compared with that which was organized to subdue the rebellion. But the only reasons demanding greater force are—1st, renewal of the insurrection; 2d, a foreign war. For either or both emergencies the national resources remain ample. The chief demands for war, as shown by our experience, are, 1st, troops; 2d, arms and ammunition; 3d, clothing; 4th, transportation; and 5th, subsistence supplies

The troops disbanded were chiefly volunteers, who went to the field to uphold the system of free government established by their fathers, and which they wean to bequeath to their children. Their toils and sufferings, their marches. battles, and victories, have not diminished the value of that government to them: so that any new rebellion would encounter equal or greater force for its reduction; and none can ever spring up with such advantages at the start, or be conducted with superior means, ability, or prospect of success. A foreign war would intensify the national feeling, and thousands, once misled, would rejoice to atone their error by rallying to the national flag. The question of time in which armies could be raised to quell insurrection or repel invasion is, therefore, the only question relating to troops. Our experience in this point is significant. When Lee's army surrendered, thousands of recruits were pouring in, and men were discharged from recruiting stations and rendezvous in every State. several occasions, when troops were promptly needed to avert impending disaster, vigorous exertion brought them into the field from remote States, with incredible speed. Official reports show that after the disasters on the Peninsula. in 1862, over eighty thousand troops were enlisted, organized, armed, equipped and sent into the field in less than a month. Sixty thousand troops have repeatedly gone to the field within four weeks. And ninety thousand infantry were sent to the armies, from the five States of Ohio, Indiana, Illinois, Iowa, and Wisconsin, within twenty days.

When the rebellion commenced, the nation was a stranger to war. Officers had little experience, privates had none. But the present generation of men in this country are now veteran soldiers. For the battle, the march, or the siege, they are already trained. They are as much at home in the tented field as in the farm-house, the manufactory, or the shop. No time is required to train them; and the speed of the railroad and telegraph determines the time required to raise an army in the United States.

Second. As to arms and ammunition. The disbanded armies were allowed to take home their arms at a nominal price. Rust is not likely to gather on the musket or sabre borne through the campaigns of 1864 and 1865. The government retains in its arsenals more than a million of the best quality of arms and equipments. The artillery on hand tasks the department for its means of storage. The manufacture of ammunition requires materials for which we have in some degree relied upon other countries, because they could be had cheaper. For this reason, and to guard against any mischance, three years' stock of material for ammunition has always been kept in store, and the supply on hand is ample for any war that can be waged against us by any nation.

Third. Clothing, transportation, and subsistence. After selling or distributing among freedmen and refugees all damaged or irregular clothing, the stock of clothing and material in the quartermaster's depots is sufficient for any armies that may be called into service. The water transports and rolling stock, mules, wagons and horses held by the government were adequate to the movement and supply of larger forces, in less time, than had heretofore been known in war. The government has disposed or is disposing of this transportation, but it remains in this country, and can answer any exigency.

Army subsistence is derived from the country in which military operations are carried on, or supplied from other markets. During the war this most vital branch of the service never failed. It answers to the demand, and is ever ready to meet the national call.

It is plain, therefore, that the abundance of our means for war enables the government of the United States to reduce the standing force to a lower degree than any other nation. Unless war be actually raging, the military force can be brought within very narrow limits. However sudden the exigency calling for an exhibition of military power, it can be promptly met. With our education, habits, and experience, the nation, while in the midst of peace, is prepared for war.

The present military organization comprehends nineteen departments, embraced in five military divisions, as follows:

- 1. The department of the East, Major General Joseph Hooker to command, to embrace the New England States, New York, and New Jersey. Head-quarters at New York city.
- 2. The middle department, Major General W. S. Hancock to command, to embrace the States of West Virginia, Maryland, (excepting the counties of Montgomery, that part of Anne Arundel lying south of the Annapolis and Elk Ridge railroad, and excluding the city of Annapolis, Prince George's, Calvert, Charles and St. Mary's,) the county of Loudon, and the Shenandoah valley as far south as and including Rockingham county, in Virginia, the States of Delaware and Pennsylvania. Headquarters at Baltimore.
- 3. The department of Washington, Major General C. C. Augur to command, to embrace the District of Columbia, the counties of Montgomery, that part of Anne Arundel lying south of the Annapolis and Elk Ridge railroad, and including the city of Anuapolis, Prince George's, Calvert, Charles, and St. Mary's, in Maryland, and Alexandria and Fairfax counties, in Virginia. Head-quarters at Washington.
- 4. The department of the Ohio, Major General E. O. C. Ord to command, to embrace the States of Ohio, Indiana, Illinois, Wisconsin, and Michigan. Headquarters at Detroit.
- 5. The department of the Tennessee, Major General George Stoneman to command, to embrace the State of Tennessee. Headquarters at Knoxville.
- 6. The department of Kentucky, Major General John M. Palmer to command, to embrace the State of Kentucky, and Jeffersonville and New Albany, in Indiana. Headquarters at Louisville.
- 7. The department of the Missouri, Major General John Pope to command, to embrace the States of Minnesota, Iowa, Missouri and Kansas, and the Territories of Colorado, Utah, Nebraska, Dakota, New Mexico and Montana. Headquarters at St. Louis.
- 8. The department of Virginia, Major General Alfred H. Terry to command, to embrace the State of Virginia, excepting Alexandria, Fairfax and Loudon counties, and the Shenandoah valley as far south as and including Rockingham county. Headquarters at Richmond.

- 9. The department of North Carolina, Major General J. M. Schofield to command, to embrace the State of North Carolina. Headquarters at Raleigh.
- 10. The department of South Carolina, Major General Daniel Sickles to command, to embrace the State of South Carolina. Headquarters at Charleston.
- 11. The department of Georgia, Major General James B. Steedman to command, to embrace the State of Georgia. Headquarters at Augusta.
- 12. The department of Florida, Major General John G. Foster to command, to embrace the State of Florida. Headquarters at Tallahassee.
- 13. The department of Mississippi, Major General Thomas J. Wood to command, to embrace the State of Mississippi. Headquarters at Vicksburg.
- 14. The department of Alabama, Major General C. R. Wood to command, to embrace the State of Alabama. Headquarters at Mobile.
- 15. The department of Louisiana, Major General E. R. S. Canby to command, to embrace the State of Louisiana. Headquarters at New Orleans.
- 16. The department of Texas, Major General H. G. Wright to command, to embrace the State of Texas. Headquarters at Galveston.
- 17. The department of Arkansas, Major General J. J. Reynolds to command, to embrace the State of Arkansas and the Indian Territory. Head-quarters at Little Rock.
- 18. The department of the Columbia, Brigadier General F. Steele to command, to embrace the State of Oregon, and Territories of Washington and Idaho. Headquarters at Fort Vancouver.
- 19. The department of California, Major General Irvin McDowell to command, to embrace the States of California and Nevada and Territories of New Mexico and Arizona. Headquarters at San Francisco.
- 1. The military division of the Atlantic, Major General George G. Meade to command, to embrace the department of the east, middle department, department of Virginia, department of North Carolina and department of South Carolina. Headquarters at Philadelphia.
- 2. The military division of the Mississippi, Major General W. T. Sherman to command, to embrace the department of the Ohio, department of the Missouri and department of Arkansas. Headquarters at St. Louis.
- 3. The military division of the Gulf, Major General P. H. Sheridan to command, to embrace the department of Louisiana, department of Texas and department of Florida. Headquarters at New Orleans.
- 4. The military division of the Tennessee, Major General G. H. Thomas to command, to embrace the department of the Tennessee, department of Kentucky, department of Georgia, department of Mississippi and department of Alabama. Headquarters at Nashville.
- 5. The military division of the Pacific, Major General H. W. Halleck to command, to embrace the department of the Columbia and department of California. Headquarters at San Francisco.

Indian hostilities upon the plains and the overland routes to the Pacific coast have given much annoyance, required the employment of many troops, and occasioned great expense to the military department. Several Indian councils payd been held during the past season, and large military expeditions sent out

against hostile tribes and bands. What has been accomplished by treaty or by fighting will doubtless be exhibited in the official reports of the Indian campaigns, which have not yet reached the department.

Disbanding the troops reduces at once the amount to be expended in some items of appropriation, but in others requires larger immediate expenditures. Upon their discharge the soldiers became entitled to all the instalments of bounty which would have fallen due at later periods, and in many cases exceeding a year's pay. The transportation of large armies from the field, in southern States, to their remote homes in the west, or in eastern and northern States, made extraordinary drafts on the quartermaster's department, beyond what would be required for armies marching or encamped. The vast amount of live stock on hand requires forage until sales can be made. These are effected with the utmost diligence; but still this large item of expenditure continues through a large part of the fiscal year. The financial effects, therefore, of the reduction of the army and retrenchment of expenditures can only operate to any great extent on the next fiscal year.

To accomplish the great object of promptly reducing the military expenditures, the following general order was made by the Secretary of War on the 28th of April:

#### For reducing expenses of the military establishment.

GENERAL ORDERS, No. 77.—Ordered—I. That the chiefs of the respective bureaus of this department proceed immediately to reduce the expenses of their respective departments to what is absolutely necessary, in view of an immediate reduction of the forces in the field and garrison, and the speedy termination of hostilities, and that they severally make out statements of the reduction they deem practicable.

II. That the Quartermaster General discharge all ocean transports not required to bring home troops in remote departments. All river and inland transportation will be discharged except that required for necessary supplies to troops in the field. Purchases of horses, mules, wagons and other land transportation will be stopped; also purchases of forage, except what is required for immediate consumption. All purchases for railroad construction and transportation will also be stopped.

III. That the Commissary General of Subsistence stop the purchase of supplies in his department, except for such as may, with what is on hand, be required for the forces in the field, to the first of June next.

IV. That the Chief of Ordnance stop all purchases of arms, ammunition, and materials therefor, and reduce the manufacturing of arms and ordnance stores in government arsenals as rapidly as can be done without injury to the service.

V. That the Chief of Engineers stop work on all field fortifications and other works, except those for which specific appropriations have been made by Congress for completion, or that may be required for the proper protection of works in progress.

VI. That all volunteer soldiers (patients) in hospitals, except veteran volunteers, veterans of the First Army Corps (Hancock's) and enlisted men of the l'eteran Reserve Corps, who require no urther medical treatment, be honorably discharged from service, with immediate payment.

All officers and enlisted men who have been prisoners of war, and now on furlough or at the parole camps, and all recruits in rendezvous, except those for the regular army and the First Army Corps (Hancock's,) will likewise be honorably discharged.

Officers whose duty it is, under the regulations of the service, to make out rolls and other
final papers connected with the discharge and payment of soldiers, are directed to make
them out without delay, so that this order may be carried into effect immediately. Commanding generals of armies and departments will look to the prompt execution of this work

VII. The Adjutant General of the army will cause immediate returns to be made by all commanders in the field, garrisons, detachments and posts, of their respective forces, with a view to their immediate reduction.

VIII. The quartermaster's, subsistence, ordnance, engineer, and provost marshal general's departments will reduce the number of clerks and employees to that absolutely required for closing the business of their respective departments, and will, without delay, report to the Secretary of War the number required of each class or grade.

The Surgeon General will make similar reductions of medical officers, nurses, and attendants in his bureau.

IX. The chiefs of the respective bureaus will immediately cause property returns to be made out of the public property in their charge, and a statement of the property in each that may be sold, upon advertisement and public sale, without prejudice to the service.

X. The commissary of prisoners will have rolls made out of the name, residence, time and place of capture and occupation of all prisoners of war who will take the oath of allegiance to the United States, to the end that such as are disposed to become good and loyal citizens of the United States, and who are proper objects of executive elemency, may be released upon the terms that to the President shall seem fit and consistent with public safety.

The administrative details of the department during the great military operations that have been mentioned, and what has been done towards a reduction to a peace establishment, will appear in the reports of the respective chiefs of

Adjutant General's Report — From the report of the Adjutant General, it will be seen that the recruiting service of the regular army is progressing favorably; the number of recruits enlisted for all arms, from October 31, 1864, to October 1, 1865, having been 19, 555. The regiments comprising it have been distributed to stations, and their ranks are rapidly filling up, thus enabling the department to relieve regiments of volunteer troops. The present authorized strength of the regular regiments is 1,570 officers and 41,819 enlisted men. This estimate is made on the basis of 42 privates to a company, the number now allowed by law at all except frontier posts.

It is recommended in the report that the maximum standard be fixed at 100 enlisted men to a company.

The Adjutant General recommends that provisions be made by law for enlisting one hundred boys, not under twelve years of age, as musicians, as was done before the laws of 1864 and 1865 prohibited the enlistment of minors under the age of sixteen years; that the laws by which one-half of their pay, during the period of absence, is lost by officers absent with leave for more than thirty days in one year, except from wounds or sickness, be repealed; and that an act be passed providing for the enlistment of meritorious disabled soldiers as superintendents of the national cemeteries, numbering about forty, each to receive the pay and allowance of an ordnance sergeant.

Eight volumes of reports of battles, with maps and indexes, prepared under the resolution of Congress of May 19, 1864, have been completed and sent to the government printing office. The publication of the greater part of the remaining reports is only deferred until the receipt of others not yet rendered, and which are required to preserve the chronological order observed in the

preparation of the volumes already completed. The register of volunteer officers called for by resolution of June 30, 1864, and embracing some 200,000 names, will be completed by the time Congress assembles.

The aggregate of volunteers, drafted men, and substitutes ordered to the field between the 1st of November, 1864, and 30th of April, 1865, was 202,117. The number of volunteers, drafted men, and militia mustered out and discharged within the same period was 61,000. In disbanding the forces no longer required after the cessation of hostilities, the same machinery of mustering officers and depots has been used as in recruiting. Regiments have been sent home as fast as they could be transported and paid, the officers being held responsible for the good behavior of the men. Instances have been rare of any disorders. Much credit is due to mustering officers, paymasters, and railroad companies, through whose efforts troops, numbering in the aggregate 800.963 men, have been transported, mustered out and paid.

On the 28th of April, 1865, it was ordered that returns be made of the volunteer forces in the field, with a view to their immediate reduction, and in connexion with this order regulations were prepared and promulgated for their muster out and discharge. In executing this work, promptness and a proper protection of the interests of the government and the troops were held in view; and among other measures necessary to its completion, rendezvous were established in the field, as well as in most of the States. At the field rendezvous all surplus property was taken possession of by the staff officers of the respective supply departments, and the muster-out rolls and other discharge papers prepared under the direction of corps commissaries of musters and their assistants. Corps and department commanders were instructed to see that the work was pushed with energy, using for that end the division and brigade commanders, with their respective staff officers to superintend it. As soon as a regiment or other organization had its muster-out papers prepared, it was placed en route to its State for payment and final discharge. At the State rendezvous was located the chief mustering officer of the State, or one or more of his assistants, with paymasters, quartermasters, commissaries of subsistence and ordnance officers, whose duties were with the payment and final discharge of the troops; their care whilst awaiting the same; the reception of the public property turned in by them, and their transportation to their homes after discharge.

By the foregoing arrangements the entire force of commissaries and assistan commissaries of musters for troops in the field have been made available for the work, in connexion with the chief and other State mustering officers. The most experienced mustering officers and those most familiar with the regimental records were secured; the records from which the mustering out data was to be obtained were readily accessible, and the loss of records, (so common through the neglect of regimental officers,) whilst the regiments were en route from the field to their States, was avoided. Regimental officers have been held to a rigid accountability in preparing the records, and the interests of the enlisted men thus protected. Order and discipline has been maintained whilst troops were

en route to the States and after arrival therein. Troops have been comfortably cared for up to the moment they were paid off and ready to start for their homes. Dissatisfaction among them has been obviated and causes for complaint removed, and all public property has been easily secured and readily accounted for.

The arrangements for the care of discharged troops being completed, orders to muster out and discharge the forces from service were issued as follows:

April 29.—All recruits, drafted men, substitutes, and volunteers remaining at the several State depots.

May 4.—All patients in hospitals, except veteran volunteers and veterans of the first army corps, (Hancock's.)

May 8.—All troops of the cavalry arm whose terms of service would expire prior to October 1.

May 9.—All officers and enlisted men whose terms would expire prior to May 31, inclusive.

May 17.—All organizations of white troops in the army of the Potomac whose terms of service would expire prior to September 30, inclusive.

May 18.—All organizations of white troops in Major General Sherman's command, whose terms of service would expire prior to September 30, inclusive.

May 29.—All light artillery in the army of the Potomac, ninth army corps, army of Georgia, and army of the Tennessee.

May 29.—All organizations of white troops whose terms of service would expire prior to September 30, inclusive, in armies and departments, except departments of the east, New Mexico, Pacific, and northern.

June 2.—All surplus light artillery; that only absolutely required by the necessities of the service in the respective armies and departments to be retained.

June 5.—All dismounted cavalry, all infantry in the northern department and department of the east, and all cavalry in the department of the east.

June 16.—All troops in the department of the Pacific whose terms of service rould expire prior to October 1.

June 17.—All enlisted men of the veteran reserve corps who would have been cauted to their discharge had they remained with their regiments.

June 28.—18,000 veterans (infantry) of the army of the Potomac; 15,000 of the army of the Tennessee, (then consisting of the remaining regiments of the army of Georgia and army of the Tennessee;) and 7,000 of the middle military division.

June 30.—All surplus troops, except in the department of the Gulf, army of the Tennessee, provisional corps army of the Potomac, and 1st army corps. Strength of commands, for all arms, to be reduced to the minimum necessary to neet the requirements of the service.

July 1.—All remaining veteran regiments of the army of the Tennessee and provisional corps; army of the Potomac, (that corps was the remnant of the army of the Potomac.)

July 6.—The remainder of the army of the Tennessee.

July 7.—The remainder of the provisional corps army of the Potomac.

July 21.—All cavalry in the department of Virginia except two regiments, all in the department of North Carolina except one regiment, and all in the middle department except one regiment.

August 1.—All white troops, infantry, cavalry, and artillery, in the department of Texas, which, in the judgment of Major General Sheridan, could be dispensed with.

August 3.—'The same order was extended to the department of Louisiana.

August 14.—Additional infantry and heavy artillery (white) in military departments, as follows: Virginia, 5,000; North Carolina, 8,000; Washington, 8,000; Mississippi, 2,000; Kentucky, 5,000; middle, 6,000.

August 21.—3,000 additional white troops in the department of Arkansas.

September 8.—All surplus troops in the department of Washington, so as to reduce that command to 6,000 officers and men of all arms.

September 8.—All organizations of colored troops which were enlisted in northern States.

October 9.—All the remaining forces (white) of the cavalry arm east of the Mississippi.

October 9.—All troops on the Pacific coast, as many as possible immediately; the remainder on the arrival of the last battalion of the fourteenth United States infantry.

October 10.—All troops in New Mexico; one regiment immediately, the remainder on the arrival of certain regular troops.

In addition to the foregoing, and from time to time, as the services of the troops could be dispensed with, sixty-eight regiments, seven companies, and six battalions were ordered mustered out.

The rapidity with which the work has been executed will be apparent from the fact that to August 7, 640,806 troops had been mustered out; August 22, 719,338; September 14, 741,107; October 15, 785,205; November 15, 800,-963.

The command of Major General Sherman (army of the Tennessee and army of Georgia) and the army of the Potomac were first to complete their musters-out entirely. Regiments commenced leaving General Sherman's command, then numbering, present and absent, 116,183 officers and men, from the rendezvous, near Washington, on the 29th of May, and on the 1st of August the last one of the regiments mustered out left Louisville, Kentucky, to which point the command (after the musters-out therefrom were partly completed,) was transferred, and the armies composing it merged into one, called the army of the Tennessee. The work of mustering out the troops was not continuous, it having been interrupted and delayed by the transfer of the two armies from this city to Louisville, and their subsequent consolidation.

Regiments commenced leaving the army of the Potomac (when numbering, including 9th corps, 162,851 officers and men, present and absent,) from the rendezvous near this city on the 29th of May, and about six weeks thereafter

(July 19) the last regiment started for home. During the interval the work, like that from General Sherman's command, was not continuous, it being interrupted and delayed by the movement of the 6th corps from Danville, Virginia, to Washington, and the consolidation, by orders of June 28, of the remaining portion of the army into a provisional corps, numbering, present and absent, 22.699 officers and men.

Thus, for the two commands in question, and between the 29th of May and the 1st of August, (two months.) 279,034 officers and men, present and absent, were mustered out and placed en route to their homes. Including other armies and departments, the number was increased by August 7 (two months and seven days) to 640,806 officers and men.

From the foregoing it will be seen that the mass of the forces discharged were mustered out by September 14, or within two and half months from the time the movements of troops homeward commenced. The average per month during that time is 296,442.

By reference to the report of the officer in charge of the bureau for the organization of colored troops, it will be seen that the increase in the number of these troops since his last annual report is 49,509, of which 4,244 were recruited in the States in rebellion, and credited to the loyal States, under the provisions of the act of July 4, 1864. The whole number of colored men enlisted into the service of the United States during the rebellion was 178,975. The largest number in service was on the 15th of July, 1865, viz., 123,156. The loss during the war from all causes, except muster out, was 68,178. There have been 33,234 colored troops mustered out. The number remaining in service after existing orders for muster-out shall have been executed will be 85,024. The number of applicants for commissions in colored troops amounted to 9,019, of which 3,790 were examined. Of this number 1,472 were rejected, and 2,318 received appointments. The number of soldiers discharged from regiments, etc., of white troops to accept appointments in organizations of colored troops, was 1,767. It is ascertained, from the reports of inspecting officers, that the morale of the organization is good.

Provost Marshal General.—On the 1st day of November, 1864, the date to which the last annual report of the provost marshal general was brought up, the business of recruiting and the draft under the call of July 18, 1864, was in morress:

|                           | 8         |         |
|---------------------------|-----------|---------|
| Reduced by credits on for | mer calls | 265,673 |
| To be obtained            |           | 934 397 |

| The whole number of voluntary enlistments under that call we   | ıs 188,1  | 72, viz: |
|--|-----------|----------|
| Volunteers, (white)  |           | 146,392  |
| Volunteers, (colored)  |           | 15,961   |
| Regulars   |           | 6,339    |
| Seamen   |           | 17,606   |
| Marine corps   |           | 1,874    |
| Total  |           | 188,172  |
| The whole number of drafted men and substitutes obtained uncall was 54,707, viz:   | der that  |          |
| Number held to personal service  | 26 205    |          |
| Number of substitutes for drafted men  |           |          |
|  | 54,707    | •        |
| Number of substitutes for enrolled men   | 29,584    |          |

| Total  |           | 37,577   |
| Whole number raised under December call was  | 1         | 94,635   |
|  |           | ===      |

The suspension of active military operations occurred while the business of the draft, under this call, was in progress, and orders were issued on the 13th of April, 1865, to discontinue the business of recruiting and drafting; and on the next day all drafted men who had not been forwarded to general rendezvous, were ordered to be discharged, and soon after all who had not been forwarded to the field were discharged by orders through the Adjutant General.

The terms of service varying from three months to three years, as shown in detail by the books of the Provost Marshal General's office.

Leaving a deficiency on all calls, when the war closed, of .......... 102,496

Which would have been obtained in full if recruiting and drafting had not been discontinued.

This number does not embrace the "emergency men" put into service during the summer of 1863, by the States of New York, New Jersey, and Pennsylvania, nor those furnished by the States of Ohio, Indiana, and Illinois, during the "Morgan raid," amounting in all to over 120,000 men, who served periods of about two or three weeks.

In estimating the number of troops called into service, it has been the rule of the department to take into account the whole number of men mustered, without regard to the fact that the same persons may have been previously discharged, after having been accepted and credited on previous calls.

Under the different calls, volunteers have been accepted for various terms of service, viz: three, six, and nine months, and one, two, and three years respectively; and a large number of persons who had served under one call have subsequently enlisted under another. Thus a portion of those who enlisted under the call in April, 1861, for 75,000 three-months men, again enlisted under the succeeding call in July following for three years; others re-entered the service for time months, or for one or two years, and at the expiration of these periods again re-enlisted for three years, and the entire "veteran volunteer" force consisted of those who, having served two years, re-enlisted for three years more.

It will be observed, therefore, that a large portion of the number counted in filling calls has been furnished, first, by the re-enlistment of those in service, and, second, by those who have re-entered the service after a discharge from a former enlistment under which they had been credited; that is, the different calls were filled by crediting each accepted enlistment, instead of limiting the credit to the actual number of persons who entered the service anew; and hence to determine the number of men actually entering the service for the first time,

under the different calls, the number credited should be reduced in the same ratio that the enlistments of the same persons have been repeated. The extent of this reduction cannot be calculated at this time, or even estimated with sufficient accuracy to be useful.

It follows, therefore, that on account of a necessary repetition of credits, incident to enlistments, the tax upon the military basis of the country has been less than would appear by considering simply the number of men embraced in the different calls for troops, or the number of credits allowed upon these calls.

The amount of commutation money received from November 1, 1864, to November 1, 1865, was:

| On account of draft and substitute fund   | <b>\$</b> 317,130 | 00        |
|---|-------------------|-----------|
| under section 17 of the act of February 24, 1864)   | 340,987           | <b>53</b> |
| T'otal  | 658,117           | <u>53</u> |
| The total amount of "draft and substitute fund" received under the act approved March 3. 1863, is | \$25.902.029      | 25        |
| The total amount expended   |                   |           |
| Balance remaining in treasury to credit of this fund  | 9,514,893         | 45        |

There are just claims still outstanding which have to be met from this fund. The regiments of the veteran reserve corps have been performing garrison duty in Washington and its defensive works, at the various depots for recruits and drafted men, at the provost marshal's rendezvous, escorting recruits to the field, and more recently performing garrison duty at the several rendezvous for muster-out of the volunteer forces.

Since the termination of active operations no transfers have been made to this corps, nor have any officers been appointed.

The amount expended from the appropriation for "collecting, drilling, and organizing volunteers," from November 1, 1864, to November 1, 1865, was \$1,422,281 73.

The balance of this appropriation remaining in the treasury is \$12,163,386 09, and about half a million dollars is still in the hands of the disbursing officers, which is needed to pay outstanding accounts and expenses incurred in mustering out the volunteer forces of the United States.

As fast as the exigencies of the service permitted, the force employed has been reduced. The surgeons and commissioners of boards of enrolment in all the districts, 370 in number, have been discharged. The different districts have been consolidated, and but thirty-three provost marshals are now in service, all of whom will be discharged as soon as their services can be dispensed with.

No appropriation of money will be required for the support of this bureau during the next fiscal year.

The full report of the operations of the Provost Marshal General's bureau will contain much statistical and other valuable information, which will be submitted when completed.

Paymaster General.—The Paymaster General reports that during the fiscal year ending June 30, 1865, \$7,839,225 47 were paid to the regular army, while \$300,738,635 95 were paid to volunteers, and that the total disbursements since June 30, 1864, to the date of his report, amount in the aggregate to \$524,054,946 37. Payments amounting to \$270,000,000 have been made to about 800,000 mustered-out troops. The highest number of additional paymasters in service during the fiscal year was 447; the number now in service is 210. All the troops retained in service have been paid to June 30, 1865, and many organizations to August 31, 1865, and to all discharged troops in full to date of discharge.

The anticipated payments of bounties to soldiers, and three months' additional pay to officers mustered out that has fallen due by reason of muster out, amount to ninety-one millions seven hundred and fifty thousand dollars, (\$91,750,000.)

The whole sum disbursed by the pay department since the commencement of the war, viz., f.om July 1, 1861, to July 1, 1865, amounts to one thousand and twenty-nine millions two hundred and thirty-nine thousand dollars, (\$1,029,239,000.)

The total losses and defalcations during the same period, if nothing should be recovered, amount to the sum of five hundred and forty-one thousand dollars, (\$541,000,) and it is believed that not less than half of this amount will be recovered. The total expenses of disbursement, including all pay and allowances, commutation of quarters, fuel, and travelling expenses, for four years and four months, amount to six millions four hundred and twenty-nine thousand six hundred dollars, (\$6,429,600.)

Thus it is seen that the costs of disbursement to armies in the field, and amid all the hazards of unexampled war, and including all losses and expenses, are less than three-fourths of one per cent.

Commissary General of Subsistence.—The subsistence stores required during the year for distribution to the armies in the field, have, as during the earlier years of the war, been purchased in the principal markets of the northern States. The facilities and cost of transportation to the various points where they were required for issue, the relative prices of the different markets, and a due regard to the general commercial interests of the country, have governed the subsistence department in apportioning those purchases among the several market centres of the country. As New Orleans is gradually resuming a healthy commercial condition, a considerable portion of the supplies required for distribution from that point can be obtained in that market. Although the present general condition of the southern States is not such as to afford a large amount of supplies, still subsistence officers are able, in some parts of those States, to enterinto contracts for the partial supply of the troops serving therein.

The principal purchasing officers have exhibited much ability in the performance of their duties, and great fidelity to the interests of the country. The principal commissaries immediately responsible for the subsistence of the several armies in the field have discharged the important and often difficult duties of receiving, protecting, and distributing the supplies forwarded to them with commendable efficiency and success. They have also, by great energy, been able to a considerable extent to subsist the troops upon the resources of the country in which the armies were operating, or through which they were passing. It is believed that during the entire war no campaign, contemplated movement, or expedition has failed on account of the inability of the subsistence department to meet its proper requirements, and that the troops, wherever stationed or operating, have, with rare exceptions, been supplied with rations in good and wholesome condition.

The muster out of a large part of the army, consequent upon the sudden close of active military operations, unavoidably left on hand in some of the depots an excessive supply of subsistence stores. These have been sent to other points where they were required. Surplus and damaged stores will be disposed of by sale. A sufficient quantity of hard broad and other articles have been kept from earlier sale with the view of meeting, in an economical manner, the wants of those people, white and colored, who, by the events of the war, have been reduced to a suffering condition.

Under orders of June 29, 1865, the whiskey ration was discontinued, and the sale of the supply on hand has already taken place at many points, and will soon be completed.

During the past year, as in previous years of the war, a very considerable income has been derived from the sale of the hides, tallow, and other parts of beef cattle not issuable as beef to the troops.

Prisoners of war, held at thirty-two forts, prison-barracks, camps and hospitals, have been well subsisted, having received a sufficient portion and variety of the ration to insure health, leaving in the hands of the several issuing commissaries, as "savings," that portion of the ration not deemed necessary for persons living in entire idleness. The pecuniary value of these "savings" has constituted a prison fund, available, under the instructions of the commissary general of prisoners, for the purchase of articles necessary for the prison-barracks and hospitals, and for meeting other necessary expenses of the prisons. There has been transferred to the subsistence department a "savings" credit of the amount of \$1,507,359 01, and there remains yet to be transferred an amount not less than \$337,766 98, making a total amount of \$1,845,125 99.

Under section 3 of the act of July 4, 1864, 1,470 claims have been submitted, of which 50 have been approved for payment, and 413 disallowed; 650 are awaiting explanation, and 357 remain to be examined.

It is proposed to ascertain and exhibit, in a tabular form, the total quantity of each article of subsistence stores purchased for the use of the army during each year of the war, from 1861 to 1865, inclusive. Such a statement, it is be-

lieved, would prove an interesting addition to the commercial statistics of the country.

The officers of the subsistence department, regular and volunteer, have, with but few exceptions, discharged their duties with fidelity and success.

Surgeon General.—The surgeon general reports that the receipts from all sources and available for the expenses of the medical department during the fiscal year ending June 30, 1865, were \$20,489,680 47. Disbursements during the year, \$19,328,499 23, leaving a balance in the treasury on June 30, of \$1,161,181 24.

The ample provision for sick and wounded existing at the date of the last annual report was increased during the ensuing months until a maximum of 204 general hospitals, with a capacity of 136,894 beds, was reached.

Upon the termination of active military movements, immediate measures were taken to reduce the expenses of the medical department. Of the 201 general hospitals open on January 1, 1865, 171 have been discontinued. Three of the sea-going hospital transports have been discharged; the fourth is now constantly engaged in transfer of sick and wounded from southern ports to the general hospitals in New York harbor. All of the river hospital-boats have been turned over to the quartermaster's department, and but a single hospital train is retained in the southwest. The vast amount of medicines and hospital supplies made surplus by the reduction of the army has been carefully collected at prominent points, and is being disposed of at public auction, most of the articles bringing their full value, and in some instances their cost price.

Two hundred and fourteen surgeons and assistant surgeons of volunteers have been mustered out, and of the 265 hospital chaplains appointed during the war 29 only are still in commission.

The returns of sick and wounded show that of white troops 1,057,423 cases have been treated in general hospitals alone, from 1861 to July 1, 1865, of which the rate of mortality was 8 per cent. In nearly all sections of the country, the health of the troops has been fully equal to that of preceding years, though military movements of unprecedented magnitude have been pushed to successful termination, without regard to seasons. An epidemic of yellow fever prevailed at Newbern, N. C., in the fall of 1864, and the released or exchaged prisoners arriving at Wilmington, N. C., from rebel prisons, suffered from an epidemic of typhoid fever. With these exceptions no serious epidemics have appeared, and it is interesting to note that quarantine regulations, strictly enforced by military authority, have proven, during the occupation of southern seaports and cities by our troops, to be an absolute protection against the importation of contagious or infectious diseases. In view of the apprehensions entertained in regard to the Asiatic cholera, now devastating the shores of the Mediterranean, this becomes a significant fact.

In addition to the alphabetical registers of dead, not yet fully completed, the records of the medical department contain 30,000 (thirty thousand) special reports of the more important forms of surgical injuries, of diseases and opera-

tions. These reports, with statistical data, and a pathological collection numbering 7,630 specimens, furnish a mass of valuable information, which is being rapidly arranged and tabulated, as a medical and surgical history of the war, for the publication of the first volume of which an appropriation will be asked.

In this connexion, and as illustrating more in detail the importance of this work, the Army Medical Museum assumes the highest value. By its array of indisputable facts, supported and enriched by full reports, it supplies instruction otherwise unattainable, and preserves for future application the dearly bought experience of four years of war. Apart from its great usefulness, it is also an honorable record of the skill and services of those medical officers whose contributions constitute its value, and whose incentive to these self-imposed labors has been the desire to elevate their profession. A small appropriation has been asked to continue and extend this collection.

For recommendation of measures tending to the greater efficiency of the medical department, reference is made to the special report from the Surgeon General's office, which will be submitted to the appropriate congressional committees.

Quartermaster General.—The report of the Quartermaster General contains a statement of the operations and expenditures of the department under his control during the fiscal year ending 30th June, 1865. The principal movement of troops by the quartermaster's department during that time are described. They have been made promptly and with few accidents, and are striking illustrations of the improvements in the art of war which have been developed during the late contest.

The twenty-third army corps, after fighting at Nashville, in the midst of ice and snow in December, 1864, was, on the conclusion of the campaign in the west, transferred from the valley of the Tennessee to the banks of the Potomac, moving by river and rail down the Tennessee, up the Ohio, across the snow-covered Alleghanics, a distance of 1,400 miles, and in the short space of eleven days was encamped on the banks of the Potomac, then blocked up with the ice of a most severe winter. Vessels were collected to meet this corps, the obstacles interposed by the ice were overcome, and early in February the troops composing it were fighting before Wilmington, on the coast of North Car lina.

The transfer of the eleventh and twelfth corps, under General Hooker in 1863, from the Potomac to the Tennessee, is the only parallel to this movement. That was an almost unexampled operation at the time. General Hooker's command contained 23,000 men, and was accompanied by its artillery and trains, baggage and animals, and accomplished the distance from the Rapidan, in Virginia, to Stevenson, in Alabama, a distance of cleven hundred and ninety-two miles, in seven days, crossing the Ohio river twice. The twenty-third army corps moved 15,000 strong.

Other important operations are described, among which are the supply of the army of Lieutenant General Grant before Richmond; of the army of General Sherman at Atlanta, preparatory to his march to Savannah; of the same army

at the depots on the Atlantic, on his communicating with the coast, first at Savannah and afterwards at Gold-borough, at both of which places depots were established, and his army re-enforced and equipped with everything necessary to make successful campaigns.

The transfer of the twenty-fifth army corps, 25,000 strong, in the month of May, from the James to the coast of Texas, is fully described, and the extent and cost of the fleet used in this movement are set forth in full.

Transportation was promptly supplied from all parts of the south to their homes in the north, for the immense army which has been disbanded, and the organization of the department which has made it possible to meet these demands so promptly is believed to have been at least as perfect as that of any other nation.

The report gives tables of the quantities of the principal military supplies, clothing, forage, fuel, horses, mules and wagons, which have been purchased, transported, and used during the fiscal year. It contains full statements of the vessels which have been in the service during that time upon the western rivers and upon the ocean and bays. Many of them have now been discharged from service or advertised for sale, orders for the reduction of the transport fleet having been given as soon as hostilities ceased.

The return of the armies from the south, the transportation of the discharged soldiers to their homes, the transfer of troops to Texas, the return of refugees expelled from the south by General Sherman, and of rebel prisoners released at the termination of the war, have, however, taxed the resources of the quarter-master's department heavily during the last spring and summer.

The transport service has been most satisfactorily performed. Upon the ocean a fleet of over 700 vessels has been constantly employed, with the reported loss by storm, by collision, and by fire, of only three; one steamship was destroyed in each of these modes.

The repair of the railroads from Chattanooga to Atlanta by the military railroad branch of the quartermister's department, under the charge of Brevet Brigadier General D. C. McCallum, was referred to in the last annual report. Upon the advance of General Sherman from Atlanta, he destroyed the railroad in his rear, blew up all the railroad buildings at Atlanta, sent back his surplus stores and all the railroad machinery which had to that time supplied his army. The stores and the railroad stock were safely withdrawn to Nashville, and after the dispersion of the army of Hood, which had broken the railroad in Georgia and Tennessee in its advance, the railroad construction corps again took the field, and reopened railroad communication with Chattanooga, Atlanta, and Decatur. After the fall of Macon and Augusta it became necessary, in order to supply the army of Major General Wilson, to open railroad communication between Augusta and Atlanta, and Macon. This was successfully accomplished.

A division of the construction corps, fully organized, under the command of Colonel Wright, with tools and equipments, was transferred, in December and January, from the Tennessee to Savann th, by way of Baltimore. As General

Sherman did not repair the railroads of Georgia and South Carolina, but marched northward, lightly equipped, living upon the supplies in his wagon trains, and by foraging upon the enemy, this division of the construction corps was transferred to Beaufort, North Carolina, and after its fall to Wilmington, where it repaired and restocked the railroads from these ports to Goldsborough and to Raleigh. General Sherman's army was thus quickly provisioned, reclad, reshod, and equipped for a march to the James.

The surrender of the rebel armies and pacification of the southern States have enabled the quartermaster's department to return to their former possessors most of the railroads which have been in military possession during the war. The department, in transferring them to their boards of directors—reorganized upon a loyal footing—delivers up the roads and bridges in whatever condition they may be at the time of the transfer.

The great accumulation of railroad engines and cars upon the western military railroads is being disposed of to the railroads of the southwest, which have suffered severely from the operations of both armies during the war. Under the orders of the Executive this stock is being delivered to the companies, who are to pay for it within two years, at a valuation fixed by a board of officers and experts, assembled by the government.

The reconstruction of these roads and their successful operation are of great importance, not only to the districts in which they are located, but to the general commerce and prosperity of the country; and the liberal policy pursued towards them will react favorably upon the revenue and credit of the nation.

The agreement made early in the war with the railroad companies of the loyal States, fixing reduced rates of military transportation, remains in force, and has been extended to the railroads in the southern States since the termination of hostilities.

Full reports are given of the quantities of clothing, camp and garrison equipage furnished to our armies during the past year, and also during the war. The tables accompanying the quartermaster general's report give information on these points, which shows in a favorable light the manufacturing power of the country.

The vast supplies of forage required for the armies have been promptly furnished and transported to the depots. While moving through the southern country the armies found ample quantities, and it was only when lying still in camp that they had any difficulty in supplying themselves.

During the year over 29,000,000 bushels of grain and 400,000 tons of hay have been provided by the depots of the quartermaster's department; 336,000 cords of wood and 832,000 tons of coal have also been supplied by the depots. Troops in the field have supplied themselves with fuel from the forests in which they have operated. The depots of the quartermaster's department have, during the war, furnished the army with 23,000,000 bushels of corn, 78,000,000 bushels of oats, 93,000 bushels of barley, 1,500,000 tons of hay, 20,000 tons of straw, 550,000 cords of wood, and 1,600,000 tons of coal, all of which have

been purchased, measured, transported, issued and accounted for by its officers and agents. At the depot of Washington alone there have been issued during the year 4,500,000 bushels of corn, 29,000,000 bushels of oats, 490,000 tons of hay, 210,000 cords of wood, and 392,000 tons of coal.

The supply of horses and mules for the army has been regular and sufficient. There were purchased during the fiscal year 141,632 cavalry horses; from September 1st, 1864, to 30th June, 1.65, 20,714 artillery horses; and from 1st July, 1864, to 30th June, 1865, 58,818 mules. Prices of horses varied during the year from \$144 to \$185; of mules, from \$170 to \$195.

The reduction of the army has enabled the quartermaster's department to dispense with large numbers of horses and mules, and to the 17th October the sales of animals are estimated to have produced \$7,000,000.

The teams and animals of the armies have, as during previous fiscal years, averaged about one wagon to twenty-four men in the field, and one horse or mule to every two men.

The burial records of the quartermaster's department, which do not include the names of those who fell in battle and were buried immediately on the field by their comrades, show the interment in cemeteries of 116,148 persons, of whom 98,827 were loyal, 12,596 disloyal, and of whom 95,803 were whites and 20,345 colored persons.

The military cemeteries at Washington, Alexandria, Arlington and Chattanooga, have been carefully tended and decorated.

An officer, with material and men, to mark the graves of our brethren who fell victims to rebel barbarity at Andersonville, was despatched from Washington as soon as the country was opened to us, and reports that he has enclosed the cemetery and marked the graves of 12,912 soldiers buried therein. Of these the captured records of the prison hospital enabled him to identify 12,461, and their names were recorded upon head-boards, painted white, and planted at the head of their graves. On 451 graves he was compelled to put the sad inscription, "Unknown U. S. soldier." The list of these names is in course of publication. The names of those who have been interred in the military cemeteries of the District of Columbia and at Arlington have already been published and distributed to State authorities and public institutions, as well as to newspapers which publish official advertisements, so as to be made accessible to their friends.

The military organization of the operatives and agents of the quartermarter's department, referred to in the last annual report, was kept up until the close of the war. It did good service in the fortifications, at the attack on Washington in July, at the attack on Johnsonville in the fall, and bore a part in the battle of Nashville, on the 15th and 16th of December, 1864, which gave the final blow to the rebellion in the west. Upon the cessation of hostilities this organization was disbanded, its arms restored to the arsenal, and most of its members have returned to peaceful pursuits.

The employment of colored men in the quartermaster's department, in connexion with the trains of the army, as laborers at depots and as pioneers of the

troops of the western army, continued to the close of the war. In all these positions they have done good service and materially contributed to the final victory which confirmed their freedom.

The great cost of transportation of supplies across the western plains and mountains to the depots and posts of the wilderness, and for the supply of troops operating against the Indians, is reported, and the Quartermaster General calls attention to the importance, in this view, of the vigorous prosecution of the work of the railroads to connect the Mississippi valley with the Pacific coast, as a military precaution and a measure of economy, deserving the fostering care of the government.

Retrenchment in the Quartermaster General's Burcau.—The Quartermaster General reports that immediately on the termination of active hostilities, under orders from the Secretary of War, he took measures to reduce expenditures; to discharge operatives and agents; to discharge chartered transports, and to sell those belonging to the United States not needed to bring home troops for muster-out; to reduce the number of horses in reserve at the depot; to stop the purchase of horses and mules, and to sell those belonging to the troops disbanded; to cease making contracts and purchases of clothing and equipment; to stop the repair and construction of military railroads; to return all such railroads to their former owners, and to sell or dispose of the rolling stock and other material used thereon.

He reports sales of 128,840 horses and mules, for which the sum of \$7,500,000 was received.

Of 5,355 persons employed in the cavalry bureau, three-fourths have been discharged. Those still employed are engaged in receiving, caring for, and selling the animals turned in by the armies.

The purchase and manufacture of clothing, which during the past fiscal year had caused an expenditure of between eight and nine millions per month, has ceased entirely, and, by compromise with merchants, contracts for clothing and equipment, amounting to four millions of dollars, have been cancelled.

Twenty-five hundred buildings, vacated, have been ordered for sale.

The sales of buildings, wagons, harness, tools, iron and other like material, have realized thus far a million of dollars.

Over seventeen hundred miles of military railroad, operated for the department by twenty-three thousand seven hundred workmen and agents, at a monthly cost of one and a half million of dollars, have been restored to their former owners, and the number of persons employed in completing the accounts, in taking care of and disposing of the railroad property not yet sold or transferred, has been reduced to less than five hundred, the rest having been discharged.

The rolling-mill at Chattanooga, its product, and the scrap iron there collected, have been sold: the mill for one hundred and seventy-five thousand dollars; the rolled iron for two hundred thousand dollars, and the old iron for about one hundred thousand dollars.

Eighty-three engines and one thousand and nine cars have been sold for a million and a half of dollars. Over two hundred locomotives and two thousand cars have been sold at appraised values, on credit, to the southern railroads.

Of five hundred and eighty-eight steamboats and other box's employed on the western rivers all but eleven have been put out of commission. The sales of many of those owned by the United States have been effected. These sales are not yet concluded; they will produce about eleven hundred thousand dollars.

Of the transport fleet upon the ocean on the 1st of January last, four hundred and sixty steamers and vessels of all kinds have been discharged or laid up for sale, and many of them have already been sold. The fleet has been reduced over one hundred thousand tons, and vessels are daily arriving at home ports to be discharged or sold. The monthly expenses of the transport fleet have been reduced \$1,814,130.

A million of dollars has been received from the sales of vessels belonging to the department, which will be increased by future sales.

In all, 83,887 persons, employed on wages, had been discharged from the service of the quartermaster's department at the end of September, 1865, reducing its expenses per month \$4,086,093.

The sales of property of all kinds reported and recorded on the books of the Quartermaaster General's office, from the 20th of April to the 8th of November, 1>65, amount to \$13,357,345.

The cost of forage issued to the armies during the month of March last is estimated at three millions two hundred and ninety-four thousand dollars. In the month of September it is estimated at one million one hundred and thirty-four thousand dollars, a reduction in monthly expenditure of \$2,160,000. The armies on the eastern coast have been supplied with forage purchased before the end of May last. No considerable purchases have been made in the east since that time. Purchases of forage since May have been confined to the supply of the troops in Georgia and upon the Gulf coast in Texas, and upon the western plains.

The consumption of coal in the month of March last was 90,685 tons, costing \$748,151. In September it had been reduced to 25,592 tons, costing \$204,736, a reduction of monthly expenditure of \$543,415.

Chief Engineer.—The report of the Chief Engineer of the army gives the operations of the department under his charge, and the duries of the officers of the corps of engineers. This corps consisted, on June 30, 1865, of eighty-five officers, the Military Academy, and five companies of engineer troops. Every member of the corps has been on duty uninterruptedly during the year. At the date of the report twelve officers, being generals in command of troops, were on detached service, and others were on staff duty, or detailed for service under the orders of the Light-house Board and the Department of the Interior, the remainder being on duty at the Military Academy, on sea-coast defences, survey of the lakes, with the engineer battalion, and as assistants to the Chief Engineer. The particular services rendered by these officers are recited in the nar-

ratives and other statements accompanying the report, and comprise the professional duties of the engineer, together with those of the various arms of the service to which the officers have been assigned. In general, every army and military expedition has had assigned to it officers of this corps. Their reports give the plans of attack and defence, as well as the outlines of the marches by the armies to which they were attached, and together constitute a comprehensive statement of the last year's operations of the armies.

The sea-coast defences have progressed in proportion to the available means and the number of officers who could be assigned to this branch of duty. The efforts of the engineer department have been principally directed to constructions for mounting the guns of large calibre now essential in consequence of corresponding armaments in iron floating batteries. The permanent forts on the Gulf, since their repossession by the government, have been repaired and put in a defensive condition. The available means of the department will suffice to accomplish all that is required at these works, and at those of the southern Atlantic coast, until plans are matured for modifications adapting them to the existing sea-coast armaments.

The Military Academy has continued to furnish a limited number of graduates for the subordinate grades of the army, a number, however, which has not for years past sufficed to fill the vacancies, in the line and staff, occasioned by the casualties of the service. The Chief Engineer, in view of this fact, recommends an increase of the number of cadets; and, in order to economize in the expenses of the institution, proposes a mode of selecting candidates from nominees for each vacancy, that will, he thinks, with more certainty insure proficiency in studies and the military art, by those aspiring to enter the service.

The survey of the northern lakes has progressed during the year as heretofore. The repairs and preservation of the harbors on the lakes and on the Atlantic have been prosecuted to the full extent of the resources of the department
in officers and available funds. Success in this branch of engineering is attended with greater difficulties than are met in most others in which science and
skill are called upon to promote the interests of the country. Heretofore the
plans of improvement adopted have been directed to secure immediate results,
and the source of the evil having been left to exercise its influence, has rendered constant repetitions of labor and expenditures necessary. The Chief Engineer is now calling upon the officers charged with works of this character for
plans to arrest the cause of constant obstructions to commerce, and it is hoped
that measures may be devised by which these improvements may be made to
endure for a longer period, if not to become permanent in their nature.

The expenditures of the engineer department during the year amounted to \$5,479,420 23.

Ordnance Bureau.—The fiscal resources of the Ordnance bureau for the past year amounted to \$45,783,656 10, and the expenditures to \$43,112,531 27, leaving a balance of \$2,671,124 83 to the credit of disbursing officers, in the government depositarics, on June 30, 1865.

The estimates for the next year are for objects not confined to a state of war, but for such as are required to keep up a proper state of preparation, and to reserve the large and valuable munitions of war now on hand. On the termination of the war, measures were promptly taken to reduce the procurement of supplies, and to provide storage for the munitions returned to the arsenals from the armies, and captured from the enemy. Commodious fire-proof workshops are being erected at Allegheny, Watervliet, and Frankford arsenals, and it is contemplated to erect similar shops at Washington arsenal, for which there is an appropriation. These shops can be advantageously used for storage when their entire capacity for manufacturing purposes is not needed.

From the evident importance of arming the permanent fortifications as fast as they are built, the construction of cannon and carriages for this purpose, so far as existing appropriations warrant, has not been intermitted. It is contemplated to increase the capacity of manufacturing sea-coast carriages in proportion to the readiness of the forts to receive them, and to discontinue the fabrication of wooden carriages for field and siege guns, in favor of iron carriages, which experiments have shown are preferable for that service. Cast-iron smooth bore cannon, of large calibre, as now made, are found to be entirely reliable; but not so the heavy rifled cannon, as heretofore made and tried. The failures, on trial, of the wrought-iron guns made by Mr. Horatio Ames, indicate that these guns can not be relied upon, and that no more of them ought to be made for this department. Two experimental cast-iron eight-inch rifle guns have been made of the model and weight supposed to render them reliable for service. They are now undergoing extreme proof, to test them thoroughly.

The manufacture of arms at the National Armory was reduced at the conclusion of hostilities as rapidly as could be done with economy, and at present no new muskets are being made there. With a view to change the model of small arms from muzzle-loaders to breech-loaders, extensive experiments have been made; but they have not yet resulted in the selection of a model of such decided excellence as to render its adoption for the service advisable. It is hoped that such a model may soon be found. A plan for altering the musket of the present pattern into efficient breech-loaders has been devised, and five thousand of them are being so altered for issue to troops for practical test. There are nearly one million of good Springfield muskets on hand, and upwards of half a million of foreign and captured muskets. The latter will be sold whenever suitable prices can be obtained for them, and also other ordnance stores of a perishable nature, which are in excess of the wants of the service.

The necessity of providing a suitable depository for gunpowder, with proper magazines for its storage and preservation, which was stated in the last annual report, is again mentioned, and the requisite legislation is urged.

A partial provision for this object, as far as respects a supply for the Mississippi valley, has been made on the military reserve at Jefferson Barracks.

The government has not yet acquired a title to the property on Rock Island, taken possession of under the act of July 19, 1864. It is important that this

be done with as little delay as practicable. The importance f having full possession and control of Rock Island, including the adjacent islands, and the right of way, is stated in the report of the Chief of Ordnance, and additional legislation therefor, if necessary, is recommended.

Several of the southern arsenals have been reoccupied, and it is intended to reoccupy them all, except that at Fayetteville, N. C., which has been destroyed. The necessary measures have been taken for the preservation of the powder mill at Augusta, and the laboratory and unfinished armory at Macon, Georgia, which have been captured.

The number of permanent United States arsenals and armories is twenty-eight. The command and supervision of these, together with the inspection services required at the arsenals, the foundries, the powder mills, and other private establishments engaged in work for the Government, furnish constant employment for the whole number of ordnance officers (sixty-four) now authorized by law. The proper discharge of these essential duties requires that that number should be continued as part of the military peace establishment of the country.

The armies in the field have been amply and well supplied with arms and other ordnance stores, and the fortifications have had their armaments kept in order and strengthened and increased by additional guns of heavy calibre and great efficiency.

The Signal Corps.—On the 1st of November, 1864, the signal corps numbered 168 officers and 1,350 enlisted men, distributed in detachments among the armies in the field and the military departments. All that portion of the signal corps on duty east of the Mississippi river has been mustered out of service, the act of Congress under which the corps was organized having limited its organization to the duration of the rebellion. There now remain 9 officers and 37 enlisted men in the military division of the Mississippi, and 15 officers and 99 enlisted men in the military division of the Gulf. These detachments are operating with the troops on the plains, in Texas, and along the southwestern boundary.

The expenditures from appropriations for the signal service amounted to \$8,537 06, during the year ending September 30, 1865. The balance unexpended amounts to \$248,062.

Military Telegraph.—The telegraph has continued to be a most efficient and important instrument in military operations. Its officers have shown the same devotion and fidelity which have signalized their efforts during former years. There have been constructed during the year 3,246 miles of military telegraph; 8,323 miles have been in operation during the year, and at its termination 6,228 miles were still in use. The expenditure upon the military telegraph during the fiscal year was \$1,360,000; since the beginning of the war \$2,655,500. There have been constructed and operated in all during the war about 15,000 miles of military telegraph. Control has been assumed of the telegraphs of the late rebellious districts as fast as they fell into our hands, and arrangements are now

made by which the lines are kept in repair by the stockholders, the United States being at the expense only of purely military lines and stations.

Military Prisoners and Prisoners of War.—The report of the Commissioner of Exchanges exhibits the exchange transactions during the war, with statistical tables and other information respecting the condition and treatment of prisoners on each side.

Frequent inspections of military prisons have been made from time to time, and all military prisoners have been released, except such as were under sentence or awaiting trial for murder, arson, or other grave offences. Clemency has been extended liberally, as was deemed compatible with public security. All persons imprisoned for offences against the draft laws have been released, and all deserters from the volunteer service. Since the surrender of Lee's army the danger to the national safety from combinations and conspiracies to aid the rebellion or resist the laws in the States not declared to be insurgent has passed away; it is therefore recommended that the proclamation suspending the writ of habeas corpus in those States be revoked.

The Commissary General of Prisoners reports that between the 1st of January and the 20th of October, there were in our custody ninety-eight thousand eight hundred and two prisoners of war. Of these nineteen hundred and fifty-five enlisted into the United States service. Sixty-three thousand four hundred and forty-two were released after the cessation of hostilities, and thirty-three thousand one hundred and twenty-seven were delivered in exchange. Besides these, one hundred and seventy-four thousand two hundred and twenty-three prisoners surrendered in the different rebel armies, and were released on parole, viz:

Judge Adrocate General —In the Bureau of Military Justice, since March 2, 1865, there have been received, reviewed, and filed 16,591 records of general courts-martial and military commissions. and 6,123 special reports have been made as to the regularity of proceedings, the pardon of military offenders, the remission or commutation of sentences, and upon the numerous miscellaneous

subjects and questions referred for the opinion of the bureau, including also letters of instruction upon military law and practice to judge advocates, reviewing officers, &c. By comparing these details with those presented in March last, it will be perceived that the business of this bureau, especially as an advisory branch of the War Department, has not yet been diminished or sensibly affected by the altered condition of public affairs.

The "Digest of Opinions of the Judge Advocate General," issued by the bureau in January last, having come into extensive use throughout the army, has proved of considerable advantage to the service in contributing to establish a uniformity of decision and action in the administration of military justice. As the present edition of the work has been very nearly exhausted, it is proposed to prepare during the coming winter an enlarged edition, containing, in connexion with those already published, a selection of the official opinions communicated by the Judge Advocate General during the present year.

The chief of the bureau expresses his satisfaction with the ability and efficiency with which the officers and clerks connected with it have performed their several duties, and, in view of the fact that the business of this branch of the public service will probably not be materially diminished for the next twelve months, is of the opinion that its present organization may well be continued by Congress.

Freedmen's Bureau.-By an act of the last session of Congress a new bureau in the War Department was created, called the Bureau of Freedmen. Refugees, and Abandoned Lands. Its object was to supply the immediate necessities of those whose condition was changed by hostilities, and were either escaping or escaped from slavery to obtain freedom, or were driven from their homes by the pressure of war, or the despotism of the rebellion. Its aid was designed for the needy of both races, white and black, and to administer as well aid from the government and from charitable individuals and associations. No appropriation was made to carry this act into effect, but the condition of the people in the insurgent States required prompt relief. The act of Congress authorized the assignment of military officers to duty in the bureau, and under this provision it was organized. Major General Howard was assigned to duty as commissioner: other officers selected by him were assigned for agents and assistants, and an organized system of relief has gone into operation. The report of the commissioner, which has not yet been furnished to the department, will show the operation of the Freedmen's Bureau during a period of several months, and afford some means to judge what regulations are required. It is plain that some such organization is wanted in the insurgent States to relieve promptly great and pressing need arising from the war, and social disorganization resulting from the war. Proper provision for the colored population whose condition has been changed by direct act of the federal government, to serve its own purposes in the conflict, is a solemn duty. More or less resistance to the performance of this duty is to be expected while any rebellious or hostile spirit remains, but the obligation to perform it cannot be evaded or thrust aside with national honor or safety. A numerous class of white persons who, without fault

in themselves, are suffering want occasioned by the ravages of war, have also a just claim for relief. But while discharging these obligations to needy destitute white persons and the freed colored people, the utmost care must be observed to guard against establishing a national system of pauperism that might foster a horde of idle officials or dishonest agents, and engender vice, sloth, and improvidence among a large class of persons. To avoid this evil and insure strict supervision, it is urgently recommended; first, that all appropriations of money for the Freedmen's Bureau be made in specific terms, distinct from any other purpose; second, that the number of agents and employés, and their compensation, be fixed by law; third, that the duties and powers of the bureau, in respect to persons and property, be defined by law.

By the heads of the respective bureaus of the War Department and their staffs the government has been served with a zeal and fidelity not surpassed by their brethren in the field. To them the honors and distinction of an admiring public have not been opened, but in their respective vocations they have toiled with a devotion, ability, and success for which they are entitled to national gratitude.

Beside the signal success vouchsafed to our arms, other causes contributed to overthrow the rebellion. Among the chief of these may be reckoned:

- 1. The steadfast adherence of the President to the measure of emancipating the slaves in the rebel States. Slavery was avowed by the leaders of the rebellion to be its corner stone. By that system millions of people, constituting nearly the whole working population of the south, were employed in producing supplies on the plantation, in the workshops and manufactories, and wherever labor was required, thus enabling the white population to fill the rebel armies. The hopes of freedom, kindled by the emancipation proclamation, paralyzed the industrial power of the rebellion. Slaves seized their chances to escape, discontent and distrust were engendered, the hopes of the slave and the fears of the master, stimulated by the success of the federal arms, shook each day more and more the fabric built on human slavery.
- 2. The resolute purpose of Congress to maintain the Federal Union at all hazards, manifested by its legislation, was an efficient cause of our success. Ample supplies appropriated for the army and navy, revenue laws for supplying the treasury, careful revision and amendment of the laws for recruiting the army and enforcing the draft, gave practical direction to the patriotic purpose of the people to maintain a national existence that should afford protection and respect by means of the Federal Union.
- 3. Patriotic measures adopted by the governors of loyal States, and the efficient aid they rendered the War Department in filling up the ranks of the army and furnishing succor and relief to the sick and wounded, largely contributed to the national preservation. Of these measures one of the most important was the aid tendered by the governors of Ohio, Indiana, Illinois, Iowa, Wisconsin, and Michigan in the opening of the campaign of 1864.

On the 21st day of April, 1864, Governors Brough, Morton, Yates, Stone, and Lewis made an offer to the President to the following effect:

That these States should furnish for the approaching campaign infantry troops, 30,000 from Ohio, 20,000 from Indiana, the same number from Illinois, 10,000 from Iowa, and 5,000 from Wisconsin; the term of service to be one hundred days; the whole number to be furnished within twenty days; the troops to be armed, equipped, and transported as other troops, but no bounty to be paid, nor any credit on any draft, and the pending draft to go on until the State quota was filled.

After full consideration and conference with the Lieutenant General, this offer was accepted by President Lincoln. The State of Ohio organized within four weeks, and placed in the field, 35,646 officers and men. being 5,646 troops more than the stipulated quota. Other States, less able to meet the contingency, contributed with alacrity all that could be raised.

Although experience had shown that troops raised for a short term were more expensive and of less value than those raised for a longer period, these troops did important service in the campaign. They supplied garrisons and held posts for which experience I troops would have been required, and these were relieved so as to join the armies in the field. In several instances the three-months troops, at their own entreaty, were sent to the front, and displayed their gallantry in the hardest battles of the campaign.

- 4. The result of the presidential election of 1864 exerted an important influence upon the war. Intercepted letters and despitches between the rebel leaders showed that their hopes of success rested greatly upon the presidential election. If the Union party prevailed, the prosecution of the war until the national authority should be restored appeared inevitable, and the rebel cause desperate. Even on the battle-field the influence of the election was felt. The overwhelming voice of the people at the presidential election encouraged the heroic daring of our own troops, and dismayed those who were fighting in a hopeless cause.
- 5. The faith of the people in the national success, as manifested by their support of the government credit, also contributed much to the auspicious result. While thousands upon thousands of brave men filled the ranks of the army, millions of money were required for the treasury. These were furnished by the people, who advanced their money on government securities, and freely staked their fortunes for the national defence.

Looking to the causes that have accomplished the national deliverance, there seems no room henceforth to doubt the stability of the Federal Union. These causes are permanent, and must always have an active existence. The majesty of national power has been exhibited in the courage and faith of our citizens, and the ignominy of rebellion is witnessed by the hopeless end of the great rebellion.

EDWIN M. STANTON, Secretary of War.

#### REPORT OF THE ADJUTANT GENERAL.

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,

Washington, October 20, 1865.

SIR: I have the honor to submit the following report of the operations of this department for the past year:

#### RECRUITING FOR THE REGULAR ARMY.

From October 31, 1864, to October 1, 1865, the number of recruits enlisted, for all arms, is 19,555. (Statement A.)

The recruiting service for the regular army is progressing favorably. The regiments suffered so severely in their many battles, that they were left at the termination of active hostilities, almost without exception, reduced to mere skeleton organizations. They have now been distributed to stations and are rapidly filling up, thus enabling the department to relieve volunteer regiments as fast as they can be transported to their homes and paid.

There are two principal depots for the general recruiting service, one at Fort Columbus, New York harbor, for infantry, and one at Carlisle barracks. Pennsylvania, for mounted troops. The officers detailed from the several regiments for recruiting duty are stationed in such localities as give promise of success, and their recruits are sent in parties to the depots, whence they are forwarded to the regiments to which they may be assigned. Beside this, the several regiments recruit their own ranks as far as practicable, from the country adjacent to their posts.

#### AUTHORIZED STRENGTH AND ORGANIZATION OF THE REGULAR ARMY.

The authorized strength of the regular regiments of the army, supposing each company full, is as follows:

|   | Officers. | Men.    |
|---|-----------|---------|
| Six regiments of cavalry, (seventy-two companies)   | 264       | 7, 248  |
| Six regiments of cavalry, (seventy-two companies)  Five regiments of artillery, (sixty companies)         | 273       | 4,890   |
| Ten regiments of infantry, single battalion, (one hundred companies)                                      | 340       | 8, 360  |
| Nine regiments of infantry, each three battalions of eight companies, (two hundred and sixteen companies) | 693       | 21, 321 |
| Total   | 1,570     | 41, 819 |

This calculation is made on the basis of forty-two privates to a company at all but frontier posts. The total strength, upon the basis of one hundred enlisted men to a company, would be fifteen hundred and seventy officers, forty-five thousand seven hundred and fifty-one men.

By existing acts of Congress, the strength of companies is limited to the following number of private soldiers:

The ten old regiments of infantry and four old regiments of artillery—forty-

two privates per company. (Act August 23, 1842)

Except when serving on the western frontier, or at remote and distant stations, when the allowance is seventy-four privates per company. (Act June 17, 1850.)

The nine new regiments of infantry, three battalions each of eight companies—eighty-two privates per company. (Act July 29, 1861.)

Eight light artillery companies—sixty-four privates per company. (Act June 17, 1850.)

Twelve companies of the fifth artillery—one hundred and twenty-two pri-

vates per company. (Act July 29, 1861.)
Six regiments of cavalry, each twelve companies—seventy-eight privates

per company. (Act July 17, 1862.)

There is no good reason for such dissimilarity in the several organizations, and much inconvenience really arises from it. A company of forty-two privates is not sufficient for the ordinary duties of a garrison, and one hundred and twenty-two privates are not needed except for a battery of six pieces serving in the field. It is recommended that all companies of the regular army be allowed one hundred enlisted men as the maximum standard, leaving to the War Department to regulate the strength of companies within that limit as may be demanded by the nature of the service at the various stations. It is not probable that this maximum would often be reached, but emergencies sometimes arise when it becomes a matter of great importance, and also of economy, to have large companies, instead of mere platoons for immediate active duty.

#### STATIONS OF THE REGULAR ARMY.

The following is the present disposition of the regular artillery regiments:

Second United States artillery.

On the Pacific coast.

# Third United States artillery.

Fort Sullivan, Eastport, Maine, one company.

Fort Preble, Portland, Maine, one company.

Fort Constitution, Portsmouth, New Hampshire, one company.

Fort Warren, Boston, Massachusetts, the regimental headquarters and three companies.

Fort Independence, Boston, Massachusetts, one company.

Fort Adams, Newport, Rhode Island, three companies. One light battery, C, division of the Mississippi.

One light battery, E, department of North Carolina.

Detachments from some of these companies will be placed at the unfinished forts and batteries along the coast near their stations.

# First United States artillery.

Fort Trumbull, New London, Connecticut, one company.

Fort Schuyler, New York, three companies.

Fort Lafayette, New York harbor, one company.

Fort Hamilton, New York harbor, the regimental headquarters and two companies.

Fort Richmond and Batteries Hudson and Morton, New York harbor, two companies.

Sandy Hook, New Jersey, one company.

One light battery, division of the Gulf.

# Fourth United States artillery.

Fort Delaware, Delaware, two companies.

Fort McHenry, Baltimore, Maryland, two companies.

Fort Washington, Maryland, the regimental headquarters and one company.

Fort Foote, Maryland, one company.

Forts around Washington, four companies.

One light battery, division of the Mississippi.

One light battery,

# Fifth United States artillery.

Fort Monroe, Old Point Comfort, Virginia, the regimental headquarters and four companies.

Fort Taylor, Key West, Florida, two companies.

Fort Jefferson, Dry Tortugas, Florida, four companies.

One light battery, F, department of Virginia.

One light battery, G. division of the Mississippi.

All the companies, except two of each regiment of artillery, have been dismounted, and their horses and batteries turned over to the proper staff departments. The dismounted companies have been assigned to permanent fortifications on the seaboard. The two batteries in each regiment are retained, under the provisions of the acts of March 2, 1821, and March 3, 1847.

All sea-coast forts south of Fort Monroe, except Forts Taylor and Jefferson.

Florida, are to be garrisoned by colored troops.

# Of the cavalry regiments.

The 1st, 4th, and 6th regiments are assigned to the division of the Gulf in the southwest;

The 2d and 3d regiments to the division of the Missouri;

The 5th regiment is divided between the departments of Washington, the Middle department, and the division of the Tennessee.

The single battalion infantry regiments are assigned as follows:

# Fourth United States infantry.

Fort Brady, Sault Ste. Marie. Michigan, two companies.

Fort Wayne, Detroit, Michigan, the regimental headquarters and two companies.

Fort Niagara, New York, one company.

Fort Ontario, Oswego, New York, one company.

Madison Barracks, Sackett's Harbor, New York, two companies.

Rouse's Point, New York, two companies.

The 1st regiment United States infantry is in the department of Louisiana

The 2d in the department of Kentucky.

The 3d and 10th are in the division of the Missouri.

The 5th is in New Mexico.

The 6th in the department of South Carolina.

The 7th in the department of Florida.

The 8th in the Middle department.

The 9th on the Pacific coast.

The three battalion regiments of infantry are assigned as follows:

The 11th and 17th regiments are recruiting and organizing preparatory to assignment.

The 12th regiment is assigned to the department of Virginia.

The 13th, 18th, and 19th regiments are assigned to the division of the Mis-

The 14th is on the Pacific coast.
The 15th and 16th regiments are in the division of the Tenuessee.

# RNLISTMENT OF MINORS AS MUSICIANS.

The act of July 4, 1864, section 5, and the act of March 3, 1864, section 18, make it an offence to enlist any minor under the age of sixteen years. It is recommended that this act be modified so far as to authorize a limited number, say one hundred, of boys not under twelve years, as musicians, provided the consent of parent or guardian is previously obtained. Until the passage of the act referred to, a detachment of boys was kept under instruction at each of the recruiting depots. They were not only carefully trained as young soldiers and musicians—i. e., drummers, fifers, and buglers—but were well taught in the common school branches at the post school. Many of these boys have turned out good scholars and excellent soldiers, reaching, as their age matured, to the grades of non-commissioned, and even of commissioned officers.

#### DEDUCTION OF PAY FROM OFFICERS ON LEAVE

By section 31, act of March 3, 1863, and section 11, act of June 20, 1864, it s provided that officers on leave of absence for a longer period than thirty days n one year shall receive only half of the pay and allowances prescribed by aw, and no more. It is recommended that this provision be now repealed. It operates to the serious disadvantage of valuable officers who have earned a longer respite from duty than thirty days, and who probably, through a series of years, may have been absent in all less than thirty days. At the same time it places no restriction on those who serve little with their regiments, but habitually report on surgeon's certificate of ill-health.

#### SERGRANTS FOR SUPERINTENDENTS OF CRMETERIES.

There are now in existence some forty national cemeteries, sad monuments of mortality among our soldiers during the war. It is recommended that an act of Congress shall provide for the enlistment of a disabled soldier as a superintendent for each cemetery, who shall have the same pay and allowances as an ordnance sergeant, and be charged with the care and preservation of the grounds and all their appurtenances. An analogy to this proposed measure may be found in the ordnance sergeants of the army, appointed under the act of April 5, 1832, for the care of ordnance stores at posts.

#### REPORTS OF BATTLES.

Much attention and labor has been expended upon the preparation of the documents relating to the rebellion, required to be printed by resolution of May 19, 1864. Eight volumes, with maps and indexes, have been completed, and sent to the public printer. The greater part of the other reports of battles, marches, &c., have been copied and arranged, but await the receipt of some important reports, which, though repeatedly called for, have not been furnished, and are requisite to preserve the chronological order.

#### REGISTER OF VOLUNTEERS.

The register of volunteer officers called for by resolution approved June 30, 1864, will be completed by the time Congress assembles, and all the manuscript will by that time be in the hands of the public printer. As will be seen by examination, it is a work of considerable magnitude, embracing some two hundred

thousand names of officers. No pains have been spared to make it a full and accurate record of every volunteer regiment received into the United States service during the war.

#### VOLUNTERR SERVICE.

The accompanying statement, marked B, will show the number of volunteer recruits, drafted men, and substitutes, forwarded to the field, (aggregate 202,117,) and of volunteers, drafted men, and militia mustered out and discharged, (aggregate 61,000,) under the direction of this office, from November 1, 1864, until April 30, 1865.

When the work came of disbanding the large armies no longer required by the exigencies of the service, the plan suggested by experience, which had been successful with small bodies, was continued. The same machinery of mustering officers and depots which had been employed in recruiting has been used in discharging. As many regiments as could be at one time furnished with means of transportation, and funds for paying them off, have been sent home with their organization entire, from time to time as they could be spared from the department in which they were serving, beginning with those whose terms of service would soonest expire. The regiments have been mustered out of service on rolls carefully prepared to exhibit the dues from the government to each soldier. The rolls, boxed up and sent under charge of an officer, have arrived at the State rendezvous simultaneously with the regiments. The officers of each regiment have been held to a strict accountability, under pain of forfeiture of an honorable discharge and pay, for the good behavior of the enlisted men until all were finally paid their dues and furnished with discharges within a few miles of their homes. With rare exceptions, the conduct of these gallant regiments, coming from every part of the north, has been most admirable in maintaining the strict discipline which made them successful in battle, until they were released from military restraint and had separated, each to his home and his civil Too much praise cannot be given the numerous corps of mustering officers and paymasters, whose fidelity is attested by the large numbers (800,963) of men discharged and paid within a brief period, as shown in the annexed state-Nor can the extraordinary facilities, offered by the several railroad companies, for transporting such large bodies of men, fail to attract attention. No apology is made for alluding to these matters in this report, for they are facts of the utmost significance, in connexion with the military power and resources of this country. Statement B shows the force in service May 1. 1864, and March 1, 1865, respectively.

#### COLORED TROOPS.

For statistics and information in regard to the colored troops, reference is invited to the accompanying report of the able chief of the Bureau for Colored Troops, attached to this office. The number at present retained in service is about \$5,024, out of 186,097, the whole number, officers and men, mustered in since it was first decided to employ them.

The general orders and circulars, annexed to this report, will give useful in-

formation concerning movements of the army.

By systematic classification of the varied duties of this department, the officers intrusted with each branch have been able promptly and successfully to accomplish all that could in reason be expected of them, and they, together with the admirable clerks—mostly taken from the armies—by whom they were so ably assisted, are entitled to the warmest commendation.

The officers of the Adjutant General's department are employed as follows:

One brigadier general on special service.

One colonel in charge of the Adjutant General's office, War Department.

One colonel and six majors, assistants in the Adjutant General's office.

One licutenant colonel and one major, on duty at the headquarters of the army.

One licutenant colonel and two majors, on duty at headquarters of military divisions and departments.

One lieutenant colonel, provost marshal general.

One lieutenant colonel and one major awaiting orders.

One major on duty in the Provost Marshal General's bureau.

One major on leave of absence.

One major on duty in the War Department.

I have the honor to be, sir, very respectfully, your obedient servant, E. D. TOWNSEND, Assistant Adjutant General.

Hon. EDWIN M. STANTON,

Secretary of War.

#### ۸.

Statement of the number of enlistments and re-enlistments in the regular army from October 31, 1864, to October 1, 1865; compiled from reports forwarded to this office by recruiting officers.

# REMARKS.

The rapidity with which the work of mustering out and disbanding the volunteer army was executed will be apparent from the following, showing the numbers mustered out to the dates set opposite them respectively, viz: 640, 806 719, 338 741, 107 785, 205 800, 963

August 7, 1845. August 22, 1865. Repteter 14, 1865. October 15, 1865. October 15, 1863 November 15, 1863 The command of Major General Sherman (army of the Tennessee and army of Georgia) and the army of the Potomac were the first to complete their musters out entirely. Regiments command—their numbering, present and about, 116.189 of effects and men—from the rendexrons neut this city on the 29th of May, and on the lat of Aquast the last one of the regiments markered out left Louisville, Ry., to which point the command (after the musters out therefrom were partly completed) was transferred, and the armier composing it needed into one, called the army of the Tennessee. The work of mustering out the treops was not continuous, it having been interrupted and delayed by the franker of the Potomane, then numbering, including nith corps, 102.85 officers and men is city to Louisville, and their anabequent consolidation. Degiments commanced leaving the army of the Potomane, then numbering, including nith outry the two work, like that of Queen's Sherman's command, was not continuous, it being interrupted and delayed by the movement of the 6th corps from Danville, Va., to this city, and the case of June 28, of the remaining portion of the army into a provisional corps, numbering, present and absent, 22,639 officers and men. Thus, for the two commands in question, and between the 29th of May and the 1st of August, (two months,) 273,034 officers and men, present and absent, 22,039 officers and men. Thus, for to their homes. Including other armies and departments, the number was increased, by August 7, (two months and seven days,) to 640,806 officers and men. From the foregoing it is seen that the mass of the forces discharged were mustered out by September 14, or within two and a half (24) months from the time the movements of troops homeward commenced. The average per month during that time is 296,412.

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, November 15 1865.

IHOMAS M. VINCENT, Assistant Adjutant General.

### ADJUTANT GENERAL'S OFFICE, Bureau for Colored Troops, Washington, D. C., Oct. 20, 1865.

GENERAL: To the one hundred and one thousand nine hundred and fifty colored soldiers in the service of the United States at the date of my last report, the following additions have been made during the year, namely:

| Seventeen regiments of infantry, aggregate strength           | 16, 201        |
|---|----------------|
| Two regiments of heavy artillery, aggregate strength          | 2,703          |
| Two batteries light artillery, aggregate strength             | 251            |
| One regiment of cavalry, aggregate strength                   | 1,255          |
| Recruits, drafted men, and substitutes, sent to old regiments | <b>29,</b> 099 |
|   |                |
| Total gain  | 49,509         |

Four thousand two hundred and forty-four recruits were enlisted at the rendezvous established in the disloyal States, and credited to loyal States, under section 3 of the act of Congress approved July 4, 1864.

On the 15th of July, 1865, the date on which the last organization of colored troops was mustered in, there were in the service of the United States—

| One hundred and twenty regiments of infantry, numbering in the aggregate  Twelve regiments heavy artillery, numbering in the aggregate  Ten batteries light artillery, numbering in the aggregate | 98, 938<br>15, 662<br>1, 311 |
|---|------------------------------|
| Seven regiments cavalry, numbering in the aggregate   | 7, 245                       |
| Grand aggregate   | 123, 156                     |

The foregoing is the largest number of colored troops in service at any one time during the war.

The entire number of troops, commissioned and enlisted, in this branch of the service, during the war, is one hundred and eighty-six thousand and ninety-

The States in which this force was recruited or drafted are as follows.

| mamery .             |         |                            |          |

| all orders to this date for muster-out of organizations, is as follows, na  Eighty-three regiments of infantry, aggregate strength  Nine regiments of heavy artillery, aggregate strength  Six light batteries artillery, aggregate strength  Six regiments cavalry, aggregate strength  | 66, 073 12, 394 701 5, 856 85, 024        |

For further details respecting examinations, appointments, resignations, and matters of a kindred nature, attention is respectfully invited to appendix marked B, in which will also be found an exhibit of the organizations discontinued by consolidation, muster out, and those remaining in service.

The reputation of the organization for efficiency, good conduct, and reliability, has steadily advanced; and the reports of officers of the Inspector General's department, so far as they have come to the knowledge of this office, are very

satisfactory as to its present condition.

The commission appointed for the State of Delaware, under the provisions of section 24 of the act of Congress approved February 24, 1864, having been dissolved, there is at this time in session, under the provisions of the act referred to, only the commission or board for the State of Maryland, which has been in session since October, 1864.

The whole number of claims for compensation on account of the enlistment of slaves in the service of the United States, filed with the boards, in both the

above States, is three thousand nine hundred and seventy-one.

Compensation, varying in amount, was awarded upon seven hundred and thirty-three of these claims; two hundred and ninety-four have been rejected by the commissions as not being well founded; and the remainder are still before the board. The total amount of compensation awarded loyal owners is two hundred and thirteen thousand eight hundred and eighty-three dollars. Twenty-five claims have been paid, amounting in the aggregate to six thousand nine hundred dollars, leaving seven hundred and eight claims unpaid, amounting to two hundred and six thousand nine hundred and eighty-three dollars. Ninetecn thousand nine hundred and thirty dollars and forty cents have been expended in salaries of members of boards, and to defray the current expenses of the same, including rent of rooms, purchase of fuel, stationery, &c.; making the total expenditures to this date twenty-six thousand eight hundred and thirty dollars and forty cents.

In closing this report it affords me pleasure to acknowledge the important services rendered the bureau by Major F. W. Taggard, assistant adjutant general volunteers, in charge of rolls and returns, and Major A. F. Rockwell, assistant adjutant general volunteers, general assistant and disbursing officer. To their efficient and cordial co-operation may be attributed whatever of suc-

cess has been attained in the management of the bureau.

The employes of the office, all originally detailed from the volunteer service. have zealously and faithfully discharged the duties assigned them.

I have the honor to be, very respectfully, your obedient servant,

C. W. FOSTER.

Assistant Adjutant General Volunteers.

Brevet Brig. Gen. E. D. TOWNSEND, Ass't Adj't Gen. U. S. Army, Washington, D. C.

[General Orders, No. 77.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Washington, April 28, 1865.

#### FOR REDUCING EXPENSES OF THE MILITARY ESTABLISHMENT.

#### ORDERED:

I. That the chiefs of the respective bureaus of this department proceed immediately to reduce the expenses of their respective departments to what is absolutely necessary, in view of an immediate reduction of the forces in the field and garrison, and the speedy termination of hostilities, and that they severally make out statements of the reductions they deem prac-

II. That the Quartermaster General discharge all ocean transports not required to bring home troops in remote departments. All river and inland transportation will be discharged, except that required for necessary supplies to troops in the field. Purchases of horses, mules. wagons, and other land transportation will be stopped: also purchases of forage, except what is required for immediate consumption. All purchases for railroad construction and transportation will also be stopped.

III. That the Commissary General of Subsistence stop the purchase of supplies in his department, except for such as may, with what is on hand, be required for the forces in the

field to the first of June next.

IV. That the Chief of Ordnance stop all purchases of arms, ammunition, and materials are the chief of Ordnance stop all purchases of arms, ammunition, and materials are stopped to the chief of Ordnance stop all purchases of arms, ammunition, and materials are stopped to the chief of Ordnance stop all purchases of arms, ammunition, and materials are stopped to the chief of Ordnance stop all purchases of arms, ammunition, and materials are stopped to the chief of Ordnance stop all purchases of arms, ammunition, and materials are stopped to the chief of Ordnance stop all purchases of arms, ammunition, and materials are stopped to the chief of Ordnance stop all purchases of arms, ammunition, and materials are stopped to the chief of Ordnance stop all purchases of arms, ammunition, and materials are stopped to the chief of Ordnance stop all purchases of arms, ammunition, and materials are stopped to the chief of Ordnance stop all purchases of arms, ammunition, and materials are stopped to the chief of Ordnance s therefor, and reduce the manufacturing of arms and ordnauce stores in government arsenals

as rapidly as can be done without injury to the service.

V. That the Chief of Engineers stop work on all field fortifications and other works, except those for which specific appropriations have been made by Congress for completion, or that may be required for the proper protection of works in progress.

VI. That all volunteer soldiers (patients) in hospitals, except veteran volunteers, veterans of the 1st army corps, (Hancock's,) and enlisted men of the veteran reserve corps, who require no further medical treatment, be honorably discharged from the service, with imme-

All officers and culisted men, who have been prisoners of war, and now on furlough or at the parole camps, and all recruits in rendezvous, except those for the regular army, and the 1st army corps, (Hancock's,) will likewise be honorably discharged.

Officers whose duty it is, under the regulations of the service, to make out rolls and other final papers connected with the discharge and payment of soldiers, are directed to make them out without delay, so that this order may be carried into effect immediately. Commanding generals of armies and departments will look to the prompt execution of this work.

VII. The Adjutant General of the army will cause immediate returns to be made by all commanders in the field, garrisons, detachments, and posts, of their respective forces, with a

view to their immediate reduction.

VIII. The Quartermaster's, Subsistence. Ordnance, Engineer, and Provost Marshal Generai's departments will reduce the number of clerks and employés to that absolutely required for closing the business of their respective departments, and will, without delay, report to the Secretary of War the number required of each class or grade.

The Surgeon General will make similar reductions of medical officers, nurses, and attend-

ants, in his bureau.

IX. The chiefs of the respective bureaus will immediately cause property returns to be made out of the public property in their charge, and a statement of the property in each that

may be sold, upon advertisement and public sale, without prejudice to the service.

X. The commissary of prisoners will have rolls made out of the name, residence, time, and place of capture and occupation of all prisoners of war who will take the oath of allegiance to the United States, to the end that such as are disposed to become good and loyal citizens of the United States, and who are proper objects of executive clemency, may be released upon the terms that to the President shall seem fit and consistent with public safety.

By order of the Secretary of War:

W. A. NICHOLS. Assistant Adjutant General.

[General Orders, No. 79.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Washington, May 1, 1865

FOR REDUCING THE NUMBER OF GENERAL, FIELD, AND STAFF OFFICERS.

It is ordered by the President that resignations of general, field, and staff officers will be received until the fifteenth of this mouth, at which date the Adjutant General is directed to commence mustering honorably out of service all general, field, and staff officers who are unemployed, or whose service is no longer needed.

By order of the President of the United States:

W. A. NICHOLS, Assistant Adjutant General.

[General Orders, No. 82.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Wushington, May 6, 1865.

FOR REDUGING THE NUMBER OF COMPANY AND STAFF OFFICERS OF VOLUNTEER REGIMENTS.

By direction of the President, all company and staff officers of volunteer regiments, absent from their commands on account of physical disability, or by virtue of leaves of absence went merr commanus on account or physical disability, or by virtue of leaves of absence granted them, on their return to loyal States as prisoners of war, will be honorably mustered out of the service of the United States, of date the fifteenth (15th) instant.

Said officers will immediately apply, by letter, to the Adjutant General of the army for their muster-out and discharge papers. In case of physical disability from disease or wounds, the letter must be accompanied by a medical certificate of the usual form.

The next office address of the officer must be given with ages in all cases.

The post office address of the officer must be given with care in all cases.

By order of the Secretary of War:

W. A. NICHOLS, Assistant Adjutant General.

#### [General Orders, No. 83.1

#### WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE. Washington, May 8, 1865.

#### FOR REDUCING THE VOLUNTEER CAVALRY FORCES OF THE ARMY.

- I. Immediately upon receipt of this order by commanding generals of armies and departments, all volunteer soldiers of the caralry arm, whose terms of service will expire prior to October 1, 1865, will be mustered out and discharged the service of the United States. In discharging the said troops, the following will be observed:
- 1. The musters out will be made, in accordance with existing regulations, by the commissaries of musters of divisions, under the directions of commissaries of musters of corps or departments.
- 2. Army and department commanders will forthwith ascertain the number of men within their respective commands to be discharged, and report the same direct to the Paymaster General of the army, forwarding a duplicate of the report to the Adjutant General. report must specify the number for each regiment, or company, if an independent one.

3. The Paymaster General will arrange to make immediate payment to the men discharged, said payments to be made in the armies or departments in which the men may be serving

at date of muster out.

- II. All cavalry remaining in service after the aforesaid discharges have been made will be immediately consolidated into complete maximum regimental organizations, and as follows:
- 1. Army and department commanders will select and designate the organizations to be consolidated.

2. Organizations from the same State will be consolidated with each other.

- 3. All supernumerary commissioned and non-commissioned officers will be mustered out of the date the consolidation of their respective commands is made.
- 4. The commissioned and non-commissioned officers to be retained, not exceeding the
- legal number, will be selected by army and department commanders.

  5. The proper commissaries of musters, and their assistants, will be charged, under existing regulations, with the prompt execution of the details.
- III. Corps and department commanders will see that the work is pushed with energy, and executed accurately and promptly, using to this end division and brigade commanders to superintend it, with their respective staff officers, to aid the mustering officer in collecting the necessary data for the transfer rolls, (see Circular No. 64, series of 1864, Adjutant General's Office,) muster-out rolls, and other necessary discharge papers, as well as the preparation of the same.

IV. Horses and other public property rendered surplus by the reduction in the forces will be turned over to, and cared for by, the proper officers of the supply departments concerned.

V. Regimental and company records, rendered no longer necessary, will be taken charge of by the proper commissary of musters, and forwarded to the Adjutant General of the army. The records of each company or regiment must be arranged by themselves, and the package containing them marked distinctly with the contents.

VI. Commissaries of musters, and their assistants, will be held responsible that the necessary rolls are delivered and forwarded to their destination without unnecessary delay.

By order of the Secretary of War:

E. D. TOWNSEND, Assistant Adjutant General.

[General Orders, No. 94.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Washington, May 15, 1865.

The following regulations are announced, and will be observed, in discharging from service such volunteers as are hereafter to be mustered out with their regimental or company organizations:

I. Army corps, or at least the divisions thereof, will be kept intact, and, immediately upon receipt of an order directing any portion of the forces to be mustered out, commanding generals of armies and departments will order the said troops (if not already thereat) to one of the following rendezvous, viz:

1. Middle military division and troops of other armies or departments arriving therein.— Defences of Washington, D. C., Harper's Ferry, Virginia, and Cumberland, Maryland.

2. Military division of the James.—Richmond and Old Point Comfort, Virginia.

4. Department of the south.—Charleston, South Carolina, and Savannah, Georgia.

5. Military division west Mississippi.—Mobile, Alabama, New Orleans, Louisiana, and Vicksburg, Mississippi.

6. Military division of the Missouri.—Little Rock, Arkansas, St. Louis, Missouri, and Fort Leavenworth, Kansas.

7. Department of the Cumberland.—Nashville, Knoxville, and Memphis, Tennessee.

Department of Kentucky.—Louisville.

9. Middle department .- Baltimore, Maryland.

Commanding generals of armies and departments are authorized to change the aforesaid

places of rendezvous should the public interest so demand.

For the departments of the east, Pennsylvania, northern, northwest, New Mexico, and Pacific, such special orders will be given from the Adjutant General's Office relative to the troops therein serving, as may be demanded by circumstances, as the time for discharge is approached.

II. In case of one or more regiments of a division being mustered out—the division remaining in the field—said regiment or regiments will be mustered out at the place where found serving at the time, and then placed en route to the State as hereinafter directed.

III. The Adjutant General of the army will designate places of rendezvous in the respect-

ive States, to which the regiments, after muster out, will be forwarded for payment.

IV. Upon arrival at the rendezvous where the musters out are to take place, a critical examination of the regimental and company records, books, &c., will be made, and in case of omissions, the proper commanders will be made to supply them and make all the entries as rajoined by the army regulations. At the same time the muster-out rolls will be commenced, and prepared in accordance with existing regulations, under the direction of the assistant commissaries of musters of divisions, superintended by the corps commissaries. department commanders will see that the work is pushed with energy and executed promptly, using to this end division and brigade commanders to superintend it, and their respective staff officers to aid the mustering officers in collecting the data for the muster-out rolls and discharge papers, as well as the preparation of the same. In framing the rolls particular care must be exercised in stating balances of bounty payable. [See General Orders, No. 84, current series, from this office. ]

V. So soon as the rolls of a regiment are completed, the said command, with its arms, colors, and necessary equipage, will be placed en route to its State, and to the rendezvous

therein, at or nearest which it was mustered in.

En route, and after arrival in the State, the following will be observed:

1. Immediately on arrival at the State rendezvous the regiment will be reported to, and taken control of by the chief mustering officer for the State, or his assistant at the point. The said officers will lend all needful assistance in their power to the paymasters, with the view to prompt payment of the troops.

2. The regimental officers will be held to a strict accountability for the discipline of their

commands and preservation of public property.

3. The commissary of musters of the division to which the regiment belonged in the field will take possession of the copies of muster-out rolls intended for the field and staff, companies and paymaster, also the company and regimental records, with all surplus blank rolls, others, discharges, &c., in possession of regimental and company commanders, or other officers, and after bozing them up, place them, whilst en route, under the special charge of a discreet and responsible officer of the regiment. The sole duty of said officer will be to care for and preserve said rolls and records whilst en route, and on arrival at the State rendezvous, where payment is to be made, to turn them over to the chief mustering officer, or his assistant at that place.

4. Paymasters will be designated by the pay department to meet regiments at the designated State rendezvous, and there make final payments, obtaining for that purpose the rolls

from the mustering officer thereat.

5. Whilst troops are awaiting payment supplies will be furnished by the respective supply departments, on the usual requisitions and returns, countersigned by the chief mustering officer

6. Until after payment, and the final discharge of the troops, the chief mustering officer

will look to their being kept together and under discipline.

7. The chief mustering officer will, under regulations to be established by himself, take possession of and carefully preserve the regimental and company records, also the colors with the respective regiments, and hold them subject to orders from the Adjutant General of the army.

E. As soon as practicable, after arrival at the State rendezvous, the chief mustering officer or his assistant will see that the arms and other public property brought to the State by the

troops are turned over to the proper officer of the supply department thereat.

VI. In preparing the muster-out rolls, corps, department, division, and brigade commanders will hold regimental officers to a strict accountability in order to insure accurate and complete records of the enlisted men, and the better to establish the just claims of the

non-commissioned officers and privates who have been wounded, or of the representatives of

those who have died from disease or wounds, or been killed in battle.

VII. Prior to the departure of regiments from the rendezvous where mustered out, all public property (except arms, colors, and equipage required en route) will be turned over to, and cared for by, the proper officers of the supply departments concerned.

VIII. What is prescribed in the foregoing for a regiment will be applicable to a battery

of artillery or an independent company.

IX. At the respective State rendezvous the following is ordered, viz:

1. The Paymaster General will be prepared to have a sufficient force of paymasters to in-

sure prompt payments.

2. The Quartermaster General and Commissary General of Subsistence will be prepared to have a suitable number of officers of their respective bureaus to provide supplies, transportation, &c., and receipt for public property.

3. The Chief of Ordnance will arrange to have a suitable number of officers of his bureau

to receive the arms, accoutrements, &c.

X. The attention of commanding generals of armies and departments is directed to the importance of regimental and company officers having their records so completed and arranged that, at any time, the muster-out rolls may be prepared without delay.

By order of the Secretary of War:

E. D. TOWNSEND. Assistant Adjutant General.

[General Orders, No. 101.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE. Washington, May 30, 1865.

Retention of arms by soldiers, on being honorably discharged from service.

Upon an honorable muster-out and discharge from the service of the United States, all volunteer soldiers desiring to do so are hereby authorized to retain their arms and accountrements, on paying therefor their value to the Ordnance department.

The payments will be made, under the regulations of the Ordnance department, to the officer or representative thereof, at the rendezvous in the State to which the troops are ordered for payment and final discharge.

By order of the Secretary of War:

E. D. TOWNSEND. Assistant Adjutant General.

[General Orders, No. 105.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE. Washington, June 2, 1865.

#### Reduction of volunteer artillery.

Department commanders will at once reduce their batteries of volunteer light artillery to the number absolutely required under existing circumstances by the necessities of the service in their respective departments.

The companies thus relieved will be sent to Washington, Louisville, or Cairo, as may be

most convenient for final payment and muster-out.

All artillery horses that may become surplus under the operation of this order will be sold in the department where they now are, and the guns of the companies that are to be discharged will be retained, for the present, within the department.

The number of public animals retained in service, both for artillery and transportation purposes, will be reduced, as far as possible, throughout the country, and all surplus animals will be sold.

By command of Licutenant General Grant:

E. D. TOWNSEND, Assistant Adjutant General. [General Orders, No. 106.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, June 2, 1865.

Department commanders will immediately, on receipt of this order, relieve all general and staff officers whose services can be dispensed with within their respective commands, and order them to proceed, without delay, to their respective places of residence, and from there report by letter to the Adjutant General of the army.

Department commanders will report the names of all officers relieved by them under this

order to the Adjutant General of the army.

By command of Lieutenant General Grant:

E. D. TOWNSEND,
Assistant Adjutant General.

[General Orders, No. 114.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Woshington, June 15, 1865.

Soldiers honorably discharged will be permitted to retain, without charge, their knapsacks, bayersacks, and canteens.

By order of the Secretary of War:

E. D. TOWNSEND,
Assistant Adjutant General.

[General Orders, No. 119, ]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, June 29, 1865.

Penalties for neglect of duty and disobodience of orders, on the part of commissioned officers in charge of troops about to be discharged the service.

In many instances delays have resulted in paying mustered-out troops, in consequence of regimental and company officers allowing their men to disband, in violation of orders, prior to their commands being reported for payment and final discharge to the chief mustering officer or his assistant, after arrival at the designated State rendezvous. In other cases there has been delay from company and regimental officers neglecting to furnish full data relative to the calisted men, thus rendering the muster-out rolls imperfect, and necessitating corrections.

With the arrangements of the War Department, as now completed, there need be no delay, and consequently no hardship or inconvenience to the enlisted men, if full data for the rolls be furnished in the field, and, if after arrival in their respective States, as well as during transit thereto, commissioned officers look closely after the comfort and interests of their mean and remain constantly with them so as to enforce orders and control them.

their men, and remain constantly with them, so as to enforce orders and control them. It is therefore ordered that chief mustering officers and their assistants report by telegram the names of all neglectful officers, with the charges against them, to the Adjutant General of the army, (witholding, in the mean time, their final payments and honorable discharges,) with a view to their summary and dishonorable dismissal from the service, with forfeiture of ail pay. The report, by telegraph, will be sent promptly upon cases of neglect being brought to notice, and at the same time the facts, in full, will be reported by mail.

Governors of States are requested to report delinquencies coming to their notice to the chief mustering officer of the State and to the Adjutant General of the army, so that a prompt remedy may be applied.

By order of the Secretary of War:

E. D. TOWNSEND,

Assistant Adjutant General.

[General Orders, No. 121.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, July 1, 1865.

The assignment of medical officers as medical directors, assistant medical directors, and acting medical inspectors of armies, army corps and divisions, is discontinued.

Digitized by Google

Medical directors will be assigned to the headquarters of military geographical departments

only, and by the order of the Secretary of War.

Owing to the reduction of the army, the act of Congress approved February 25, 1865, becomes inoperative, and no increase of rank, pay or emoluments pertains to such assignment.

By order of the Secretary of War:

E. D. TOWNSEND. Assistant Anjulant General.

## [General Orders, No. 141.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Washington, October 7, 1865.

I. Commanding generals of military departments and districts will be allowed the following staff officers and no others:

## Generals commanding military departments.

One assistant adjutant general.

One assistant inspector general.

One chief quartermaster.

One chief commissary of subsistence.

One medical director.

One judge advocate.

Two aides-de-camp, to be selected from officers of their commands.

## Generals commanding districts.

Two aides-de-camp, to be selected from officers of their commands.

II. General officers without military command are not allowed aides-de-camp or other staff officers.

III. All officers serving on the staff of general officers not included in the above allowance will be immediately relieved from such duty; the officers of the regular and volunteer regiments so relieved will be ordered to join their regiments without delay, and the staff officers of volunteers will be ordered to their homes to report thence by letter to the Adjutant General for instructions.

By order of the Secretary of War:

E. D. TOWNSEND, Assistant Adjutant General.

## [General Orders, No. 146.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Washington, October 9, 1865.

The allowance of means of transportation at all posts east of the Mississippi, and imme-

diately west of the Mississippi, will be—
For posts garrisoned by one company, and for every two companies at a post, one fourmule wagon.

All other public animals, wagons, spring wagons and ambulances will be immediately

turned in, and disposed of by the quartermaster department. By command of Lieutenant General Grant:

E. D. TOWNSEND, Assistant Adjutant General.

[General Orders, No. 155.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Washington, October 26, 1865.

Order for discharging certain officers and men of the Veteran Reserve Corps.

In view of the very numerous and pressing applications for discharge by members of the Veteran Reserve Corps, department commanders will cause all organizations of that corps,

Digitized by Google

within the geographical limits of their command, to be paraded before a general or general

staff officer, as soon after the receipt of this order as practicable.

Any general or general staff officer on duty within the limits of the department, whose services can be spaced, may be detailed for this purpose. The officer will question each officer and enlisted man so paraded, as to whether he wishes to be discharged, or to remain in the service, and will make out separate lists of those who wish a discharge, and of those who wish to remain in service. Each list will then be read before the officers and men, who will have an opportunity to correct it, so that it will be a true expression of their wishes on the subject. The officer will visit all those who may be absent from the parade, and in a similar manner obtain their wishes, and enter their names on the proper rolls.

The rolls of officers and men who wish to be discharged will then be turned over to the proper commissary of musters, who will immediately muster out of service those whose names are on the rolls of such as desire discharge. He will obtain from regimental officers the necessary data, and complete the rolls of those who desire to remain in service, so as to exhibit their rank and degree of disability. These rolls, when completed, will be forwarded

to the Adjutant General.

Names of officers and men belonging to different companies or regiments will not be borne on the same rolls in any of the above cases. The rolls of those who wish to remain in service, as well as those who wish for discharge, will be made on the prescribed blanks for muster and descriptive rolls, and will contain full information, according to the form of the

Department commanders will see that this order is executed with promptness.

By order of the Secretary of War:

E. D. TOWNSEND, Assistant Adjutant General.

## [Circular No. 19.1

## WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Washington, May 16, 1865.

I. Under paragraph III, General Orders No. 94, May 15, current series, from this office, the following State rendezvous, to which troops mustered out will be forwarded for payment, are announced, viz:

Maine. - Augusta, Portland, and Bangor.

New Hampshire .- Concord and Manchester.

Vermont. - Montpelier, Brattleboro', and Burlington.

Massachusetts.—Boston, (Readville and Galloupe's island.)
Rhode Island.—Providence.
Connecticut.—Hartford and New Haven.
New York.—New York city, (Hart's island,) Albany, Elmira, Buffalo, Rochester, Syracuse, Sackett's Harbor, Plattsburg, and Ogdensburg.

New Jersey .- Trenton.

Pennsylvania. - Philadelphia, Harrisburg, and Pittsburg.

Delaware.—Wilmington.
Maryland.—Baltimore and Frederick.

West Virginia .- Wheeling.

Ohio.—Cincinnati, (Camp Dennison,) Cleveland, (Camp Cleveland,) Columbus, (Camp. Chase and Tod barracks.)

Indiana.—Indianapolis.

Minois.—Springfield and Chicago.

Michigan.—Detroit and Jackson.

Wisconsin .- Madison and Milwaukie.

Munesota. - Fort Snelling.

lows. - Davenport and Clinton.

Kassas .- Lawrence and Leavenworth.

Missouri.—St. Louis, (Benton barracks.)
Kentucky.—Louisville, Lexington, and Covington.

II. When the muster-out of a regiment has been completed, and it is ready to start for the State, (see paragraph 5, General Orders No. 94, current series, Adjutant General's office,) the assistant commissary of musters for the division to which it belonged will immediately report by telegram when practicable) to the Paymaster General of the army, Washington, D. C., its numerical designation, number of commissioned officers, number of enlisted men, and rendezvous in the State where ordered to for payment and final discharge.

By order of the Secretary of War:

E. D. TOWNSEND, Assistant Adjutant General.

## [Circular No. 22.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, June 5, 1865.

Orders and instructions relative to the muster-out and discharge of certain troops, viz: recruits in rendezvous, deserters, soldiers in hospital, and troops whose terms expire prior to May 31, 1865.

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Washington, May 29, 1865.

## Telegram to chief mustering officers.

By direction of the Secretary of War, all recruits—drafted, substitutes, and volunteers—for old regiments, remaining in rendezvous, will be immediately mustered out and honorably discharged the service, under your direction.

So soon as mustered out, report them to pay department for payment.

Arrange with rendezvous commanders accordingly.

Please acknowledge this by telegram, and inform me of the number to be discharged.

THOMAS M. VINCENT,

Assistant Adjutant General.

## WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Washington, May 3, 1865.

## Telegram to chief mustering officers.

Deserters who have reported, or who may yet report, under the President's proclamation, promulgated in General Orders No. 35, current series, from this office, and not yet forwarded to their proper commands, will be mustered out and discharged the service, with forfeiture of all pay and allowances due at date of desertion, or which may have accrued since.

Arrange with rendezvous commanders accordingly.

Under the foregoing, care must be taken not to discharge any deserters who have been arrested and delivered up.

· Please acknowledge this.

By command:

THOMAS M. VINCENT,
Assistant Adjutunt General.

WAR DEPARTMENT, ADJUTANT GENERAL'S OPPICE, Washington, D. C., May 4, 1865.

#### Telegram to all department commanders and chief mustering officers.

All soldiers, patients in hospitals, (except veteran volunteers, veterans of the 1st army corps, Major General Hancock's, and soldiers of the regular army,) will, as soon as they shall cease to require medical treatment, be at once mustered out of service in the usual manner. Should the commissary of musters and his assistants be insufficient to perform this duty promptly, you are authorized to appoint such additional assistants as you may consider necessary, and to avail yourself of such mustering officers within the geographical limits of your command as, in the judgment of the chief mustering officer, can be spared from their present duties.

as, in the judgment of the chief mustering officer, can be spared from their present duties.

The commissary of musters must take especial pains to see that the commanding officers of the regiments, and chief mustering officers of the States to which the soldiers belong, are each furnished with a copy of the muster-out roll.

An extra copy may be made for this purpose,

if necessary.

Soldiers whose claims for pensions are entitled to consideration should be discharged on the

usual surgeon's certificate of disability.

Soldiers absent on furlough from hospitals will be notified by the surgeon in charge to report to the nearest chief mustering officer for muster-out, and required to acknowledge the receipt of the notification. As soon as their acknowledgment of the notification is received, their descriptive lists will be sent to the chief mustering officer to whom they report. Should they return before receiving such notifications, they will be nustered out as others.

A copy of the muster-out roll of all men will be furnished to the adjutants general of the

States to which the regiments belong.

It is expected that department commanders will use every exertion to have this duty performed promptly and correctly.

Acknowledge receipt.

Ry order of the Secretary of War:

W. A. NICHOLS,
Assistant Adjutant General.

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, May 9, 1865.

#### Circular to all army and department commanders.

Upon receipt hereof, you are authorized to cause the immediate muster-out and discharge from service of all officers and soldiers of your commands whose terms of service will expire prior to May 31, 1865.

In discharging the said troops, the following will be observed:

1. The musters-out will be made, in accordance with existing regulations, by the commissaries of musters of divisions, under the directions of commissaries of musters of corps or departments.

2. Army and department commanders will forthwith ascertain the number of men within their respective commands to be discharged, and report the same direct to the Paymaster General of the army, forwarding a duplicate report to the Adjutant General. Said report must specify the number for each regiment, or company. if an independent one.

3. The Paymaster General will arrange to make immediate payment to the men discharged, said payments to be made in the armies or departments in which the men may be serving at

date of muster-out.

By order of the Secretary of War:

E. D. TOWNSEND,

Assistant Adjutant General

E. D. TOWNSEND,

Assistant Adjutant General

## [Circular No. 26.]

# WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Washington, June 17, 1865.

Orders and instructions relative to the muster-out and discharge of certain volunteer troops, viz: White troops (except veteran reserve corps) whose terms expire prior to October 1, 1855; artillery in the armies of the Potomac, (including 9th corps.) Tennessee, and Georgia; dismounted cavalry in all armies and departments; all cavalry in the department of the East, and certain infantry in the Northern department and department of the East.

## [ Felegram.]

## WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Washington, May 17, 1865.

Major General GEORGE G. MEADE,

Commanding Army of the Potomac:

The Secretary of War directs that all volunteer organizations of white troops in your command, whose terms of service expire between this date and September thirtieth (30th) next, inclusive, be immediately mustered out of service.

The musters-out will be made with existing regimental and company organizations, and under the regulations promulgated in General Orders number ninety-four, (94,) of the fifteenth

(15th) instant, from this office.

All men in the aforesaid organizations whose terms of service expire subsequent to October first, (1st.) 1865, will be transferred to other organizations from the same State; to veteran regiments when practicable, and, when not practicable, to regiments having the longest time

It is proper to edd that this order will discharge as follows:

First, (1st.) The three (3) year regiments that were mustered into service under the call of July second, (2d.) eighteen sixty-two, (1862,) and prior to October first (1st) of that year. Second, (2d.) Three (3) year recruits mustered into service for old regiments between the same dates.

Third, (3d.) One (1) year men for new and old organizations, who entered the service between May seventeenth (17th) and October first, (1st,) eighteen sixty-four, (1864.)

Please acknowledge receipt of this.

THOMAS M. VINCENT,
Assistant Adjutant General.

NOTE.—Orders and instructions, as in the foregoing, were applied to the army of the Tennessee and army of Georgia, under the command of Major General Sherman, June 18, 1865.

#### [Telegram.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE. Washington, May 18, 1865.

Major General GEORGE G. MEADE, Commanding Army of the Potomac:

In connexion with the telegram order of vesterday, relative to the discharge of troops whose terms expire prior to October first, (1st.) and referring to paragraph four, (4.) General Orders ninety-four, (94.) current series, I am directed to say that it is of importance that the muster-out rolls should be ready in the shortest time possible.

Extra clerks should be detailed to assist the commissation of musters and their assistants. In the absence of rooms for use as offices, hospital and wall tents should be provided for the use of mustering officers in making out the necessary papers. All other proper facilities at command should also be afforded.

The attention of corps, division, and brigade commanders should be particularly directed

to what is required of them under paragraph four, (4,) General Orders ninety-four, (94.)

Assistant inspectors general should be directed to frequently visit regiments and companies. to see in person if the data for the rolls and other papers are promptly and accurately furnished by regimental and company officers, conferring with the commissaries of musters and their assistants with the view of correcting at once any delinquencies they may find to exist.

THOMAS M. VINCENT,

Assistant Adjutunt General.

NOTE.—The foregoing instructions were applied to the army of the Tennessee and army of Georgia, May 18, 1865; and to other armies and departments, except department of the East, Northern department, departments of the Pacific and New Mexico, June 2, 1865.

## WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Washington, May 29, 1865.

Te egram to commanding generals of all armies and departments, except armies of the Potum c, Tennessee, and Georgia, and departments of the East, Pacific, New Mexico, and Northern depurtment.

The Secretary of War directs that all volunteer organizations of white troops in your command, whose terms of service expire between this date and September thirtieth (30th) next, inclusive, be immediately mustered out of service.

The musters-out will be made with existing regimental and company organizations, and under the regulations promulgated in General Orders number ninety-four, (94,) of the fifteenth (15th) instant, from this office.

All men in the aforesaid organizations whose terms of service expire subsequent to October first. (1st.) will be transferred to other organizations from the same State: to veteran regiments when practicable, and, when not practicable, to regiments having the longest time to Serve.

It is proper to add that this order will discharge as follows:

First, (1st.) The three (3) year regiments that were mustered into service under the call of July second, (2d,) eighteen sixty-two, (1862,) and prior to October first (1st) of that year. Second, (2d.) Three-year recruits mustered into service for old regiments between the same dates.

Third, (3d.) One (1) year men for new and old organizations who entered the service prior

to October first, (1st,) eighteen sixty-four, (1864.)

Should your command be reduced, prejudicially to the service, by this order, you are authorized to suspend it in whole or in part, promptly notifying the Adjutant General of the army, with a view to receiving further instructions.

Please acknowledge receipt of this.

THOMAS M. VINCENT, Assistant Adjutant General.

Assistant Adjutant General.

MENORANDA.—See General Orders No. 116, of June 17, for the discharge of certain enlisted men of the Veteran Reserve Corps.

E. D. TOWNSEND. Assistant Adjutant General. [Circular No. 35.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, July 22, 1865.

Orders and instructions relative to the muster-out of certain volunteer cavalry in the department of Virginia, department of North Carolina, and Middle department; also, certain volunteer infantry and artillery in other departments.

[Telegram.]

I.—CAVALRY.

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, July 21, 1865.

Major General A. H. TERRY, U. S. Volunteers,

Commanding Department of Virginia, Richmond, Va.:

The Secretary of War directs that the volunteer cavalry forces in your department be

reduced to two (2) regiments of maximum strength.

The musters-out of the surplus will be by entire regiments, and the said musters, discharges and payments made under the regulations promulgated in General Orders No. 94, current series, from this office.

Please forward to this office, without delay, a list of the regiments you may select for discharge under this order, giving therein, for each, the strength, present and absent, respectively.

THOMAS M. VINCENT,
Assistant Adjutant General.

NOTE.—Similar orders sent to the commanding general, department of North Carolina, to reduce the ervalry in that department to one (1) regiment, and to the commanding general, Middle department, to reduce the cavalry in West Virginia to one (1) regiment.

II.—INFANTRY AND ARTILLERY (WHOSE SERVICES ARE NO LONGER NEEDED) ORDERED MUSTERED OUT UNDER SPECIAL INSTRUCTIONS, OF DATES SET OPPOSITE THE ORGANIZATIONS RESPECTIVELY.

Pennsylcania. -202d infantry, July 20, 1865.

Delaware. - Ahl's independent battery, July 20, 1865.

Tennessee.—4th infantry, July 20, 1855.

E. D. TOWNSEND.

Assistant Adjutant General,

[Circular No. 39.]

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, August 2, 1865.

Orders and instructions relative to the muster out of certain volunteer white troops, viz; infantry, cavalry, and artillery, in the department of Texas, and artillery and cavalry in other departments.

[Telegram.]

L-TROOPS IN DEPARTMENT OF TEXAS.

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
Washington, August 1, 1865.

Major General P. H. SHERIDAN, U. S. A.,

Commanding Military division of the Gulf, New Orleans, La.:

You are authorized, by the Secretary of War, to cause all volunteer white troops—cavalry, infantry, and artillery—serving in the department of Texas, that you think can be dispensed with, to be mustered out of service.

The musters-out will be by entire organizations, including all additions thereto, by recruits and from other sources. In selecting the organizations for discharge, preference should be

given to veteran regiments having the shortest time to serve.

The musters-out, discharges, and payments will be made under the regulations promulgated in General Orders No. 94, current series, from this office, except that officers and men who desire to receive their discharges and payments at the rendezvous where mustered out will be permitted to do so.

Please forward to this office, without delay, a list of the regiments and independent companies you may select for discharge under this order, giving therein, for each, the strength, present and absent, respectively. So soon as the list is completed, inform me, by telegraph, of the number, present and absent, for the respective States.

Separate lists of those who may desire to receive their discharges and payments at the rendezvous for muster-out should be placed in the hands of the chief paymaster, so that he can, at once, make arrangements for payments.

Acknowledge receipt of this.

THOMAS M. VINCENT. Assistant Adjutant General.

II.—CAVALRY AND ARTILLERY (WHOSE SERVICES ARE NO LONGER NEEDED) ORDERED MUSTERED OUT UNDER SPECIAL INSTRUCTIONS, OF DATES SET OPPOSITE THE ORGANI-ZATIONS RESPECTIVELY.

New York.—7th artillery, (battalion,) July 24, 1865: 2d provisional cavalry, July 23, 1865. Pennsylvania.—2d provisional cavalry, July 23, 1865; 187th infantry, July 24, 1865.

E. D. TOWNSEND,

Assistant Adjutant General.

## | Circular No. 41.1

## WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE. Washington, August 15, 1865.

Orders and instructions relative to the muster-out of certain volunteer white troops, viz: infantry and heavy artillery in the Middle department, and departments of Washington, Virginia, North Carolina, Kentucky and Mississippi; also, certain infantry, cavalry and artillery in various armies and departments.

## [Telegram.]

## I.—INFANTRY AND HEAVY ARTILLERY IN MIDDLE AND OTHER DEPARTMENTS.

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, Washington, August 14, 1865.

Major General A. H. TERRY, U. S. Volunteers,

Commanding Department of Virginia, Richmond, Va.:

The Secretary of War directs that the volunteer white troops-infantry and heavy artillery-in your department be reduced immediately, by the discharge of five thousand (5,000) men.

The musters-out will be by entire organizations, including all additions thereto by recruits and from other sources. Organizations having the shortest time to serve will be selected for discharge.

The musters-out, discharges, and payments will be made under the regulations promul-

gated in General Orders No. 94, current series, from this office.

Please forward to this office, without delay, a list of the regiments and independent companies you may select for discharge under this order, giving therein, for each, the strength, present and absent, respectively.

So soon as the list is completed, inform me, by telegraph, of the number, present and absent, for the respective States.

Acknowledge receipt of this.

#### THOMAS M. VINCENT, Assistant Adjutant General.

NOTE. Similar orders, dated August 14, were sent the commanding generals of the following departments for the discharge of the number of men set opposite them respectively, viz:

| Middle     | 6,000   | North Carolina | 8,000 |
|------------|---------|----------------|-------|
| Washington | . 8,000 | Mississippi    | 2,000 |
| Kentucky   | . 5,000 | ,              |       |

II .- REGIMENTS OF INPANTRY, CAVALRY AND ARTILLERY (WHOSE SERVICES ARE NO LONGER REQUIRED) ORDERED MUSTERED OUT OF SERVICE UNDER SPECIAL INSTRUC-TIONS, OF DATES SET OPPOSITE THEM, RESPECTIVELY.

New York.—15th heavy artillery, August 8, 1865; 5th infantry, August 9, 1865; 62d infantry, August 14, 1865; 66th infantry, August 14, 1865.

Pennsylvania.—186th infantry, August 8, 1865. Indiana.—9th cavalry, August 10, 1865; 10th cavalry, August 10, 1865.

MEMORANDA—August 3, 1865.—The order of August 2, (Circular No. 39, current series, Adjutant General's Office,) relative to discharge of troops in the department of Texas, was extended to include the department of Louisiana.

## REPORT OF THE PROVOST MARSHAL GENERAL.

WAR DEPARTMENT, PROVOST MARSHAL GENERAL'S BUREAU. Washington, D. C., November 8, 1865.

Six: I have the honor to submit my annual report of the operations of the bureau of the Provost Marshal General of the United States for the year end-

ing November 1, 1865.

188.172-

On the 1st day of November, 1864, the date to which my last annual report was brought up, the business of recruiting, and the draft under the call of July 18, 1864, was in progress. The number called for was.....

Reduced by credits on former calls..... 265, 673 To be obtained..... 234.327 The whole number of voluntary enlistments under that call was

Viz: Volunteers, (white)..... 146, 392 Volunteers, (colored)..... 15, 961 Regulars..... 6,339 Seamen..... 17,606 1,874

> Total..... 188, 172

| The whole number of drafted men and substitutes obtained under that call was 54, 707—  |  |
|--|--|
| Viz: Number held to personal service   | 26, 205                                      |
| Number of substitutes for drafted men  | 28, 502                                      |
| Number of substitutes for enrolled men   | 29, 584                                      |
| Total  | 84, 291                                      |
| Whole number obtained under the July call  | 272, 463                                     |
| On the 19th of December, 1864, a call was made for three hundred thousand (300, 000) men.  |  |
| Under this call the whole number of voluntary enlistments was 157,058—   |  |
| Viz: Volunteers  | 130, 620                                     |
| Volunteers, (colored)  | 10, 055                                      |
| Regulars   | 6, 958                                       |
| Seamen   | 9, 106                                       |
| Marine corps   | 319  |
| Total  | 157, 058                                     |
| The whole number of drafted men and substitutes under that call was 24,580—  |  |
| Viz: Number held to personal service   | 12, 566                                      |
| Number of substitutes for drafted men  | 12, 014                                      |
| Number of substitutes for enrolled men   | 12, 997                                      |
| Total  | 37, 577                                      |
| Whole number raised under December call  | 194, 635                                     |
| The terms of service varying from three months to three years, as shown in detail by the books of the Provost Marshal General's Office.  The aggregate number of men credited on the several calls and put into service of the United States, in the army, navy, and | n the 13th ng, and on al rendez- t been for- |
| Leaving a deficiency on all calls when the war closed of  Which would have been obtained in full, in fact in excess, if recruiting and drafting had not been discontinued.   | 102, 496                                     |

This number does not embrace the "emergency men" put into service during the summer of 1863 by the States of New York, New Jersey and Pennsylvania, nor those furnished by the States of Ohio, Indiana and Illinois during the "Morgan raid," amounting in all to over one hundred and twenty thousand (120,000) men who served periods of about two or three weeks.

In estimating the number of troops called into service, it has been the rule of the department to take into account the whole number of men mustered, without regard to the fact that the same persons may have been previously dis-

charged, after having been accepted and credited on previous calls.

Under the different calls, volunteers have been accepted for various terms of service, viz: three, six, and nine months, and one, two, and three years, respectively, and a large number of persons, who had served under one call, have subsequently enlisted under another. Thus, a portion of those who enlisted under the call in April, 1861, for 75,000 three-months men, again enlisted under succeeding call in July following for three years; others re-entered the service for niue months, or for one or two years, and at the expiration of these periods again re-enlisted for three years, and the entire "veteran volunteer" force consisted of those who, having served two years, re-enlisted for three years.

It will be observed, therefore, that a large portion of the number counted in filling calls has been furnished, first, by the re-enlistment of those in service, and second, by those who have re-entered the service after discharge from a former enlistment under which they had been credited; that is, the different calls were filled by crediting each accepted enlistment, instead of limiting the credit to the actual number of persons who entered the service anew, and hence to determine the number of men actually entering the service for the first time under the different calls, the number credited should be reduced in the same ratio that the enlistments of the same persons have been repeated.

The extent of this reduction cannot be calculated at this time, or even esti-

mated with sufficient accuracy to be useful.

It follows, therefore, that on account of a necessary repetition of credits, incident to enlistments, the tax upon the military basis of the country has been less than would appear by considering simply the number of men embraced in the different calls for troops, or the number of *credits* allowed upon these calls.

## COMMUTATION MONBY.

| The amount of commutation money received from Nove           | mber 1, 1864, to      |
|--|-----------------------|
| November 1, 1865, was:                                       |                       |
| On account of "draft and substitute fund"                    | <b>\$</b> 317, 130 00 |
| On account of sick and wounded soldiers (from non-combat-    |                       |
| ants, under section 17 of the act of February 24, 1864)      | 340, 987 53           |
| Total  | 658, 117 53           |
|  |                       |
| The total amount of draft and substitute fund received under |                       |
| the act approved March 3, 1863, is                           | \$25, 902, 029 25     |
| The total amount expended                                    | 16, 387, 135 80       |
| Balance remaining in treasury to credit of this fund         | 9, 514, 893 45        |
|  |                       |

There are just claims still outstanding which have to be met from this fund.

#### VETERAN RESERVE CORPS.

The regiments of the veteran reserve corps have been performing the same duty during the past year as those specified in my last annual report, viz:

Performing garrison duty in Washington and its defensive works; at the various depots for recruits and drafted men, at the Provost Marshal's rendezvous, escorting recruits to the field, and more recently performing garrison duty at the several rendezvous for muster out of the volunteer forces.

Since the termination of active operations no transfers have been made to this corps, nor have any officers been appointed.

#### DESERTERS.

The number of deserters arrested since my last annual report is 18,120, nearly all of whom were arrested prior to April 30.

The discharge of the deputy provost marshals and special officers, the stoppage of payment of rewards, and the reduction of the army, have occasioned the reduction of this branch of the business of this office.

#### DISBURSEMENTS ON ACCOUNT OF VOLUNTREE RECRUITING SERVICE.

The amount expended from the appropriation for "collecting, drilling and organizing volunteers" from November 1, 1864, to November 1, 1865, was \$1.422.281 73

The balance of this appropriation remaining in the treasury is \$12,163,386 09, and about half a million dollars still in the hands of the disbursing officers, which is needed to pay outstanding accounts and expenses incurred in mustering out the volunteer forces of the United States.

The amount expended from the appropriation for pay of bounty was \$6,643,302 53. The balance of this appropriation remaining in the treasury is \$11,145,392 24 None of this fund remains in the hands of disbursing officers; the several amounts left in their possession, when recruiting for the volunteer forces was discontinued, has been covered into the United States treasury.

# DISBURSEMENTS ON ACCOUNT OF ENROLMENT AND DRAFT, AND APPREHENSION OF DESKRITERS.

| Amount disbursed on account of enrolment and draft, from     |               |    |
|--|---------------|----|
| November 1, 1864, to November 1, 1865, was                   | \$3, 175, 744 | 06 |
| The balance of this "draft and substitute fund" remaining in |               |    |
| the treasury is  | 9, 514, 893   | 45 |
| And about \$250,000 in the hands of disbursing officers,     |               |    |
| which is needed to pay outstanding accounts and current      |               |    |
| expenses of the bureau.                                      |               |    |
| Amount disbursed by officers of this bureau from appropria-  |               |    |
| tion for incidental expenses of quartermaster's department   |               |    |
| for apprehension of deserters                                | 12, 158       | 58 |

#### RETRENCHMENT OF EXPENDITURES.

At the date of my last annual report, the number of officers and employés of this bureau was 4,716, at a cost per month of \$311,868 60. The number now on duty, and in the employ of the bureau, is 383, at a cost per month of \$35,050 32.

As fast as the exigencies of the service permitted, I have reduced the force employed. The surgeons and commissioners of boards of enrolment in all the districts, 370 in number, have been discharged. The different districts have been consolidated, and but thirty-three provost marshals are now in service, all of whom will be discharged as soon as their services can be dispensed with.

#### ESTIMATES.

No appropriation of money will be required for the support of this bureau during the next fiscal year.

I have in course of preparation a full report of the operations of this bureau, which will contain much statistical and other valuable information, and which I beg leave to submit when completed.

I have the honor to be, sir, very respectfully, your obedient servant,

JAMES B. FRY,

Provost Marshal General.

Hon. Edwin M. Stanton, Secretary of War.

#### REPORT.

## QUARTERMASTER GENERAL'S OFFICE, Washington, November 8, 1865.

SIR: I have the honor to submit the annual report of operations of the Quartermaster's department during the fiscal year ending 30th June, 1865.

| On the 1st July, 1864, the balance of appropriation in the     | ·                        |
|--|--------------------------|
| treasury undrawn was   | <b>\$</b> 8, 699, 768 16 |

|  |                          |

A financial statement in detail will be found in a table at the end of this

report.

This department is charged with the duty of providing means of transportation by land and water for all the troops and for all the material of war. It furnishes the horses for artillery and cavalry, and the horses and mules of the wagon trains; provides and supplies tents, camp and garrison equipage, forage, lumber, and all materials for camps and for shelter of the troops. It builds barracks, hospitals, and storehouses, provides wagons and ambulances, harness, except for cavalry and artillery horses; builds or charters ships and steamers, docks and wharves, constructs and repairs roads, railroads and their bridges, clothes the army, and is charged generally with the payment of all expenses attending military operations not assigned by law or regulation to some other department.

While the Ordnance department procures and issues arms and ammunition, and the Subsistence department supplies provisions, and the Medical department medical and hospital stores, the Quartermaster's department is called upon to transport the stores of all these departments from the depots to the camps, upon the march and to the battle-field, where they are finally issued to the troops.

These duties have been efficiently performed during the year.

In the last, as in former years of the war, under the energetic and liberal administration of the War Department, the wants of the troops have been regularly supplied, their comfort, health, and efficiency have been amply and regularly provided for. The army itself does justice to the wise and enlarged administration which has enabled it to move successfully in a field of warfare constantly widening.

Atlanta, the key of the rebel defence, was secured after a campaign involving a line of operations of 300 miles in length, maintained for months through a hostile country so effectually as to enable an army of 90,000 men, with over 40,000 animals, to subsist not only while advancing, but what is much more

difficult, while laying siege for weeks to that advanced position.

The enemy's army driven from Atlanta, but still formidable in numbers and in courage, threw itself upon this long line of operations—two slender rods of iron, crossing wide rivers, winding through mountain gorges, plunging under the mountain ranges, and everywhere exposed to the raids of an enterprising enemy, favored by the thick forests which bordered the railroad throughout nearly its whole extent.

The guards of the posts upon the line of communication did their duty, and

the railroad construction corps of this department, thoroughly organized, strong in numbers, in skill and in discipline, repaired broken bridges and railroads. New engines from the workshops of the north replaced those which torpedoes or broken rails threw from the track. Trains loaded with timber, with iron, with water and fuel for the engines, preceded the trains of subsistence and ammunition, and scarce was the communication broken before it was re-established.

The conquering army followed the desperate garrison of Atlanta, and drove him off the lines of communication. The railroad was worked night and day to its full capacity; supplies for a new campaign for an army of 90,000 men were poured into Atlanta. All surplus stores, all sick and all enfeebled men were sent by railroad to the rear, and the army of General Sherman with its 3,000 wagons, full loaded with every material of war, accompanied by droves of many thousand beef-cattle, re-enforced by the return of those who disabled in the earlier events of the campaign, had been recruited in the hospitals of Nashville, 300 miles to the rear, and forwarded by railroad to resume their places in its ranks, marched out of Atlanta, blew up that depot, destroyed all the railroads which made that city of value in the war, and bent its steps towards the ocean.

In no other country have railroads been brought to perform so important a part in the operations of war. Scarce in any other country could be found the workmen to perform the feats of construction which have illustrated this campaign.

At no time during the march from Chattanooga to Atlanta were the railroad

trains five days behind the general commanding.

The reconstruction of the bridges over the Etowah and the Chattahoochie

are unparalleled feats of military construction.

The Etowah bridge, six hundred and twenty-five (625) feet long, seventy-five (75) feet high, was burned by the rebels, and was rebuilt by the labor of six hundred (600) men of the construction corps in six (6) days.

The Chattahoochie bridge, six miles from Atlanta, is seven hundred and forty (740) feet long and ninety feet high, and was built in four and a half days by

six hundred (600) men of the construction corps.

The army under General Sherman moved southeast from Atlanta; it plunged into the forests and sands of Georgia, and was lost to our view. The rebel army moved into Tennessee, and advanced upon Nashville, to be dashed in pieces against the army of Major General Thomas, and thus perished the last great army of the rebellion in the central south and west, east of the Mississippi.

The rebel press reported defeats, disasters, repulses to the army, with which we had no communication. No anxiety as to their fate oppressed the minds of those who had in the War Department directed the measures and provisions for their equipment for this bold and decisive march. A bare possibility that, by the abandonment of all eastern positions, the rebel army of Virginia might throw itself across Sherman's path, induced the department to order supplies to Pensacola, to relieve any immediate wants should the army be obliged to move southward; but the great work of preparation to meet and refit this army upon the southeastern Atlantic coast was at once commenced and steadily prosecuted. While a few vessels went to Pensacola to await orders, a great fleet of transports was collected at Port Royal, laden with everything that experience indicated as necessary to repair the consumption and the losses of this adventurous march. Clothing, shoes, shelter tents, forage, provisions, spare parts of wagons, wagons complete, harness, leather, wax, thread, needles, and tools for all the trades which are plied on the march and in the camp, were collected in the harbor of Hilton Head.

All this was done in the dead of winter. Light-draught, frail river steamers trusted themselves, under daring Yankee captains and crews, to the storms of the stormiest coast of the world, and all arrived safely at their destination. And here let me pay a tribute to those gallant seamen of the merchant shipping of the nation, who in war entered its transport fleet. No service has been so difficult or so tedious—none so dangerous as to discourage or to daunt them.

No call for volunteers has ever failed to meet a ready response, whether to tempt the shoals and storms of a tempestuous coast, the hidden and mysterious dangers of the dark bayous of the south, strewn with torpedoes by the devilish ingenuity of deserters from our own military and naval service, or to run in frail river steamboats the batteries of the Potomac, the James, and the Pamlico, or the still more formidable works of Vicksburg. Urged by the spirit of adventure, supported by the patriotism of freemen, they have always stood ready, and

have cheerfully obeyed every order, incurred every risk.

On the 13th December Fort McAllister fell before the assault of General Sherman's veterans. The transport fleet was ordered at once to the mouths of the Ogeechee and of the Savannah. The city of Savannah was carried within a few days, and a wrecking party, then employed upon the coast of Florida, with all the ingenious equipment which modern science has contrived for submarine operations, was towed by a steamer to the Savannah river and set to work to remove the formidable obstacles to its navigation. These for four years seemed to have employed all the ingenuity and mechanical skill of a people who had torn up the pavements of their commercial streets to supply material to obstruct the channels of their harbor.

In a few days a passage was cleared, and the steamers and vessels of the transport fleet discharged their cargoes at the long disused and dilapidated wharves of Savannah, and sailed for the north richly freighted with captured cotton.

On the 22d January General Sherman again moved northward.

A division of the railroad construction corps had been ordered from the Tennessee to the Savannah to meet him. It had crossed the Alleghanies in mid-winter and was promptly at the rendezvous with men and officers, and all tools, materials, and machinery for rebuilding the railroads of the coast.

It was decided not to operate directly against Charleston, the great stronghold of the rebellion, which had for four years defied our ships and the forces we could spare for its siege. The wiser and more daring plan of marching inland, cutting of its means of supply, capturing the capital, and devastating

the agricultural portion of the State, was pursued.

Charleston soon fell, and the construction corps was moved to Morehead City, there to open up the railroad from the harbor of Beaufort, North Carolina, toward Kingston, at which point General Sherman, when I parted from him in January, his army reclad, reshod, supplied and ready to resume its march, told me to look out for him next.

His chief quartermaster, General Easton, who had accompanied the army in its march from Chattanooga to Savannah, remained on the coast, taking charge of the fleet loaded with supplies. The fleet and supplies were transferred to the harbor of Beaufort; Fort Fisher fell in January, and the Cape Fear river was opened to our transports. The troops which had captured, with the aid of the navy, the defences at the mouth of this river, re-enforced by the 23d army corps, which, in January, was transferred from the Tennessee to the Atlantic, captured Wilmington, and advanced toward Goldsboro'. The two railroads, each ninety-five (95) miles in length, from Wilmington, and from Morehead City to Goldsboro', were repaired by the construction corps. They were stocked with cars and engines, and when the right wing of General Sherman's

army entered Goldsboro' on the 22d March, it met supplies of previsions brought by the railroads from the transport fleet on the coast, and found Goldsboro' occupied by a corps which, on the 15th January, had been encamped on the banks of the Tennessee.

Again was the army supplied with full equipment of clothing, shoes, and of all the various articles of necessity for itself and its trains, worn out in the long march from Savannah, and by the 10th of April, the appointed day, fully

equipped, it moved against the enemy at Raleigh.

Upon the surrender of the rebel armies in Virginia and North Carolina, the armies of General Sherman and of Lieutenant General Grant marched for Washington, where they were reviewed by the President and cabinet, after which they went into camp on the heights surrounding the capital, and the preparations for their transfer to other fields of operation, and for their disbandment were made.

While the coast was the scene of the efforts of the department to support and supply the army of General Sherman, the armies in front of Richmond also required a vast expenditure. These armies were stronger in numbers than General Sherman's. Their equipment for march, as well as for siege, was constantly kept in the highest state of efficiency. The country in which they lay furnished no supplies, and food and forage and all stores were brought by rail and by sea from the north and northwest. The shipments of forage alone to the armies on the James averaged over \$1,000,000 per month throughout the winter.

The tables at the end of this report give information as to the strength of the fleet and the magnitude of the operations involved in the supply from distant ports, of an army over 100,000 in strength, with, at times, over 5,000 wagons to keep in repair, and over 65,000 animals, horses and mules, to be fed.

From the depots in the west, under the general direction of Brevet Major General Robert Allen, senior quartermaster in the Mississippi valley, the wants of the armies on the Tennessee, the Cumberland, the Mississippi, the Missouri,

the Arkansas, and the Gulf of Mexico were supplied.

The northwest was the storehouse from which were drawn subsistence, forage, and all other material, which, by steamboats and railroad trains, were distributed to the posts.

Lists of steamers employed on the Atlantic, upon the Gulf, and upon the

western rivers are attached to this report.

The transport fleet exceeded a thousand vessels of every variety of construction, impelled by sail or steam. Details of this fleet and its cost will be found

in another part of this report.

Great movements of troops continued to be made. The army of General Thomas having dispersed the rebel army in the campaign which culminated in the battle of Nashville, on the 15th and 16th of December, 1864, and the pursuit which followed it, was divided. The 23d corps, under General Schofield, 15,000 strong, was, in January, as hereinafter detailed, transported to the coast of North Carolina, to co-operate with General Sherman, expected at Kinston. The 16th corps, under General A. J. Smith, 17,000 strong, with artillery and baggage trains, was sent to New Orleans to co-operate with the troops then under General Canby, in the reduction of Mobile.

The cavalry, under Major General Wilson, was refitted, remounted, equipped, and launched into the interior of Alabama, to capture the principal interior cities of Alabama and Georgia; Selma, Montgomery, Columbus, and Macon

fell before them.

In all these movements the troops were kept well supplied with the necessary material; horses, forage, food, and clothing were promptly delivered at the appointed rendezvous and depots, and steamers were ready, on river and coast, to move the troops and their supplies promptly.

During the whole year—I believe I may say during the whole war—no movement was delayed, no enterprise failed, for want of means of transporta-

tion, or the supplies required from the Quartermaster's department.

The close of hostilities made even greater exertions on the part of this department necessary; 233,000 men were distributed from Washington alone to their homes in the north, carried to every hamlet and village, camps of discharge being established in every State, at which the regiments rendezvoused until paid off, when the men dispersed.

Sixty thousand men of the army of General Sherman were moved from Washington to Louisville, from which place, after a short time, they were put in motion for their homes, and discharged; 25,000 men were moved from the James river to the Rio Grande; 7,000 were sent from the Potomac to Sa-

vannah.

Sixty thousand prisoners of war, released, were sent to their homes in the southern States.

Regiments were brought from the Gulf and South Atlantic coasts, and sent to their States to be discharged. Their places were in some cases supplied by the transfer to the south of the regiments which had longer to serve. A large force of cavalry was moved from the Potomac to the Arkansas and to the western plains.

The activity of the transportation branch of this department has never been greater than since the cessation of hostilities; its duty embracing the transportation to their homes of the greater part of an army of a million men, the collection and transportation to depots, for storage or for sale, of the animals

and stores surplus from the rapid reduction in the forces employed.

Officers were sent to inspect the various depots and posts to report what stores should be sold and what preserved. Stringent orders were issued directing reductions in purchases, in lists of persons employed, ordering the sale of surplus material, the reduction of the strength of the trains, and the sale of all surplus animals of the cavalry, artillery, and trains, the discharge or sale of transports not needed for the returning troops. Reports in detail, herewith, contain such information as to these operations as can be collected at this time and embraced within the limits of this report.

The examination, collation, and analysis of the records of this department are not complete. The material is abundant, and I propose, with your approbation, to establish a board of officers, whose business it shall be to collect from the official reports full statistics of the vast operations which, during the last four years, have taxed the fullest energies of every officer of ability and expe-

rience in this department.

The work has been accomplished, the record is in possession of the office, but the labors of execution have not left leisure for that examination and comparison of the records which is necessary for a full statistical report of opera-

tions of this department during the four years of war.

In the last annual report I had the honor to make nominal report of the officers who held the most important and responsible positions in this department during the previous year, and to call attention to their merits and their worth. Many of these officers have received the promotion which they have so well deserved, and which they so highly prize as the recognition by their government of faithful service. I am grateful for the recognition of the service and success of the department under my control, thus given to its officers.

The general distribution of duties has not materially varied during the year. The officers had, in the course of three years of active service, generally found the positions in which their respective qualities made them of the greatest ser-

vice to their country.

Brevet Major General Robert Allen continued to exercise the authority and control with which he had been invested as senior and supervising quarter-

master in the valley of the Mississippi; his duties have remained the same as during the previous years. His annual report is herewith. Had it been more full in detail, it would have given a better idea of the magnitude of his responsibilities, his labors, and his merits. There passed through his hands, during the fiscal year, \$33,933,646 45.

Brevet Major General Rufus Ingalls continued in the field to control the service of the Quartermaster's department, with the armies operating under Lieu-

tenant General Grant against Richmond.

The admirable manner in which the duties of his post were performed is shown in the efficiency of the operations which supplied the troops during the long siege and the rapid marches which, after the enemy was driven from his works, resulted in the capture of his entire army. The disbursements have been (under his direction) \$1,636,759 08, principally for wages of workmen. The supplies for this army were purchased under direction of this office, and shipped to it from the depots at the north, as required.

Brevet Major General D. H. Rucker has continued in charge of the great depot of Washington, the depot through which a great part of the supplies of the armies before Richmond and upon the Atlantic coast passed. Here the animals and the clothing for these armies were collected. To this point their wornout and disabled animals and equipment were returned for recuperation or re-

pair, or to be disposed of and replaced.

Upon this depot, after the fall of Richmond, 250,000 troops were concentrated, and here were made all the arrangements for their transportation to the west and north, before their final dispersion. The expenditures of the year,

under his direction, have been \$8,822,065 33.

Brevet Major General James L. Donaldson has continued in charge of the great base of supplies of the armies of Sherman and Thomas. He is now supervising quartermaster of the military division of the Tennessee, and is engaged in the supply of the troops still quartered in the south, and in returning them, as discharged, to their homes, and in disposing of the vast accumulation of stores no longer needed since the cessation of hostilities and consequent reduction of the army. He has controlled the expenditure of \$24,821,005 79.

Brevet Brigadier General Thomas Swords, senior quartermaster in the department of the Ohio, assisted by Colonel Moulton, has been in charge of the operations of the department at the important depot of Cincinnati, which has furnished nearly one-third of the clothing for the armies of the United States. He has received and distributed to other officers or disbursed during the year

**\$17.402,501 95.** 

Brevet Brigadier General G. H. Crosman, who had been on duty in Philadelphia from 30th of August, 1861, to the 24th of August, 1864, in charge of the Philadelphia depot and the providing of clothing and equipage, was then temporarily relieved by Colonel A. J. Perry, chief of the division of clothing and equipage. He has since been engaged in preparing a manual of the service of the Quartermaster's department, intended to fix the forms, sizes, and construction and qualities of the various articles of equipment which are supplied by the Quartermaster's department, in order that the experience gained in all these details may not be lost, but may be at hand to instruct the officers of the department in future operations. The records and details of these models should be preserved. They have enabled our armies to make unexampled marches with less suffering, privation, sickness, and loss, than we find recorded in the history of the campaigns of other nations. His disbusements have been during the year \$6,274,278 55.

Brevet Brigadier General D. H. Vinton has continued at the head of the depot of clothing and equipage at New York. No officer has more thoroughly and efficiently performed his duty. He has received and expended \$34,637,511 11.

Brevet Brigadier General L. C. Easton, chief quartermaster of the army of General Sherman, accompanied that army in its campaign from Chattanooga, and during the siege of Atlanta superintended its outfit for and accompanied its march to the sea. At Savannah he took charge of the transport fleet, and of the stores sent to meet the army on the coast, conducted them to the coast of North Carolina, and sent forward the supplies which, by the 10th of April, enabled it again to march against the rebels at Raleigh. After the dispersion and reduction of the army he was assigned to duty as chief quartermaster at the headquarters of the major general commanding the military division of the Mississippi, with his post at St. Louis, where he exercises a general supervision and control. He has received and accounted for \$981.822 27.

Brevet Brigadier General Charles Thomas, Assistant Quartermaster General, has aided me in the management of the business of this office, having charge of

the finances and accounts of the office.

Brevet Brigadier General William Myers, as chief assistant to General Robert Allen in the Mississippi valley, has been in charge of the depot at St. Louis. His responsibilities have been great, and have been met to the satisfaction and approbation of his senior officers. General Allen, in his report, speaks of him in the highest terms. He reports the receipt and expenditure or transfer of \$49.871,975 35.

Brevet Brigadier General Stewart Van Vliet has continued at New York in charge of the operations of the department at that important post. His disbursements and transfers during the year have reached the sum of \$20,170,162 60.

Colonel C. W. Moulton has been, during a portion of the fiscal year, in charge of the clothing and equipage depot at Cincinnati. He reports the receipt and

expenditure of \$31,287,324 49.

Brevet Brigadier General George S. Dodge, chief quartermaster of the army of the James, accompanied the naval and military expedition which reduced Fort Fisher, on the coast of North Carolina. He displayed great energy and skill in disembarking upon an open coast men and material for the siege and assault of that formidable work, and was specially rewarded by brevet promotion for signal services on that occasion. He has since been actively employed in extensive inspections, both north and south, which have been most efficiently performed, and have aided this department in enforcing great reductions of expenditure. He is a most deserving officer.

Colonel William W. McKim, for some time in charge of the depot of Cincinnati, has been in charge of the depot of Philadelphia, including the operations of the great depot of clothing and equipage at the Schuylkill arsenal, since the 15th of February last. He is a most efficient and deserving officer. He reports

an expenditure during the year of \$24,986,188 16.

The depot of Baltimore has been in charge of Colonel R. M. Newport since the 24th of September, 1864. In the earlier part of the fiscal year it was under charge of Major C. W. Thomas, Quartermaster's department. Colonel New-

port's expenditures and transfers are reported at \$8,167,971 73.

Colonel S. B. Holabird has continued on duty at New Orleans, where his long experience and his business capacity have made his service most valuable. He accompanied the army of General Banks to Louisiana when that officer first assumed command in the southwest, and has always been zealous and successful in the discharge of the heavy duties which have been imposed upon him. His receipts, transfers, and expenditures during the year were \$15,290,396 67.

Colonel C. G. Sawtelle, as chief quartermaster of the command, first of General Canby, and lately of the troops and military division under Major General Sheridan, has rendered most valuable service. As chief quartermaster of General Canby's army, he directed the operations of the Quartermaster's department in the movements against Mobile. After the fall of Mobile, and the assignment

of Major General Sheridan to command in the southwest, he was attached to his staff as chief quartermaster of the military division, and forwarded the army which was sent from New Orleans to Texas, including the later movements of the 25th army corps which, embarking on the James, rendezvoused on the northern coast of the Gulf of Mexico, before proceeding to Texas. He reports the receipt, transfer, and expenditure during the fiscal year of \$684,857 45.

The principal disbursements in the command to which he is attached have

been made by officers at depots.

The limits of this report will not permit me to notice here all the officers of the department who have held important positions during the extended operations of the last year of this most active and eventful war. I mention the names merely of some of the officers whose merits have promoted them to most important positions.

Lists of officers of the Quartermaster's department who have served as chief quartermasters of armies, of great territorial divisions, and in charge of important depots, and of those who have been specially noted in the records received at

this office for good service, are attached to this report.

The officers who have been my personal assistants in charge of the several divisions of this office are noticed in referring to the branches of the service in which they have had special control.

## HORSES AND MULES.

The purchase and supply of the animals of the army pertains to the Frst Division of this office, of which Brevet Brigadier General James A. Ekin, of the Quartermaster's department, has charge.

| Died at depots in same time  | 7, 336  |

The deaths reported occurred at depots principally among animals sent in from the field as broken down and unserviceable.

The destruction in the field was greater, probably nearly equalling the number supplied by purchase and capture, as neither the trains nor the cavalry of the armies have been materially increased during the last year of the war, and the purchases have been almost entirely to supply losses.

The issues of cavalry horses to the army of the Shenandoah, actively engaged under Major General Sheridan, have been at the rate of three remounts per annum. The service of a cavalry horse under an enterprising commander has therefore averaged only four months.

Of the animals which are sent to the depots for recuperation, about sixty per

cent. recovered, and becoming serviceable, have again been issued.

#### SALPS

There have been sold, so far as reported, to October 17, and since May 8. 1865, and in accordance with General Orders No. 28, of the Quartermaster General's office, dated May 8, 1865, 53,794 horses and 52,516 mules, for the sum of \$6,107,618 14. It is probable that when the full returns are received the total amount of sales from May 8 to October 17 will prove to exceed \$7,000,000.

With few exceptions these sales have been made by persons employed at fixed daily rates by the Quartermaster's department. In a few cases officers who have failed to receive the general order of the Quartermaster General, prescribing this mode of sale, have employed local auctioneers at various rates of compensation. The results in most cases have been less satisfactory than when the sales have been made in the first mode; and such sales have given rise to some complaints of excessive fees. All the officers of the department now, it is believed, have received General Order No. 42, Quartermaster General's office, 1865, and understand their duty in this respect.

General Ekin names the officers who have acted under his orders in the business of providing and disposing of animals of the army, and bears testimony to their good service, for which I respectfully refer to his report, herewith.

He reports the expenditures of the fiscal year as follows:

| On hand July 1, 1864, and received during the fiscal year \$3, 719, 070 13  Transferred to officers |                         |

#### CLAIMS FOR ANIMALS.

Under the law of July 4, 1864, 4,174 claims for animals have been filed in the first division of the Quartermaster General's office; of these 2,792 have been acted on, leaving 1,382 not acted on. This business is increasing rapidly.

General Ekin states, succinctly, some of the difficulties attending just decisions upon these claims. Generally when the animals have been taken by officers of this department, reference to the official records shows that they have been properly reported and accounted for.

But when officers' papers have been captured by the enemy or destroyed, and where the seizure has been made by officers not of the Quartermaster's department, as many of the officers have been discharged from the service, it is difficult

to communicate with them by letter, and to ascertain whether the signatures and memorandum receipts offered in evidence are true or forged. To arrive at certain conclusions upon evidence entirely ex parte, and without cross-examination, is impossible, and this department will be unable to arrive at that conviction necessary to enable it to report many claims, some of them no doubt just, without some further action. It may, after a time, become expedient to create boards of officers to visit the localities in which most of these claims originate, and there take testimony as to the facts, the truth of the documentary evidence presented, and especially as to the loyalty of the claimants and witnesses. Judging from the papers presented with these claims, there are few persons unable to present certificates of loyalty.

Copies of the more important orders regulating the mode of purchasing and

disposing of public animals accompany this report.

They are the result of the experience gained during a great war, in which the consumption of horses and mules has been very large. The specifications have

been amended from time to time as experience has shown defects.

Under the system which these orders and regulations set forth, the army has been well supplied with animals adapted to the military service. The order, regularity, and abundance of supply, the correctness and clearness of the record of this branch of the service, since the organization of the first division of this office, are most creditable to Brevet Brigadier General James A. Ekin, who has been at its head.

## CLOTHING AND EQUIPAGE.

The clothing and equipage of the army are provided by contract, by purchase, and by manufacture at the several principal depots, which during the fiscal year have been:

New York depot, under charge of Brevet Brigadier General D. H. Vinton,

Quartermaster's department.

Philadelphia defot, under charge, successively, of Brevet Brigadier General G. H. Crosman, Colonel A. J. Perry, Colonel and Brevet Brigadier General H. Biggs, and Colonel W. W. McKim, who is still in charge.

Cincinnati depot, under charge of Brevet Brigadier General Thomas Swords, Colonel C. W. Moulton, Colonel W. W. McKim, who on his transfer to Phila-

delphia was relieved by Colonel C. W. Moulton.

Saint Louis depot, under charge of Brevet Brigadier General William Myers,

Quartermaster's department.

There are several branch depots established at points at which the war had collected many destitute women either of the families of refugees or of soldiers, whom employment in making up army clothing relieved from dependence upon public charity.

These depots were supplied with material from the three principal depots of New York, Philadelphia, and Cincinnati, and their operations were confined to

the making up of such material into garments.

Such depots are established at Quincy, Illinois, and Steubenville, Ohio.

The quality of the clothing and equipment furnished to the army has been excellent; very few complaints of inferior quality have been made, considering the immense quantity of material which has been issued to the troops. The marches made from Atlanta to Savannah, and from Savannah to Goldsboro', by armies which during their marches had no opportunity to replace articles of equipment worn out, are evidence of the good quality of the shoes and clothing with which the army is supplied.

Of the principal articles of clothing and equipage, the following quantities have been purchased and manufactured at the three principal depots during the

fiscal year ending June 30, 1865:

| Uniform coats Uniform jackets Uniform trowsers Drawers Shirts, flannel Greatcoats Blankets, woollen Blankets, water-proof | 311, 597<br>410, 667<br>3, 463, 858<br>3, 708, 393<br>3, 268, 166<br>873, 289<br>1, 746, 034<br>625, 624 | Blouses Shoes, pairs Boots, pairs Stockings Hats Caps Knapsacks Haveršacks | 2, 617, 374<br>1, 688, 017<br>959, 543<br>5, 684, 572<br>442, 832<br>1, 151, 948<br>958, 287<br>1, 066, 647 |

For further details of the supply of clothing, camp, and garrison equipage, during the fiscal year, and during the whole war, I respectfully refer to the tables accompanying this report. They give information as to the quantities of the various materials purchased, as well as of the articles manufactured therefrom, or purchased ready-made, in a compact form and with greater precision than is possible in this narrative.

| 84   |

|      |
|      |
|      |
| 13   |
| 1    |

Two of the tables herewith give approximately the quantities of material and of ready-made articles of clothing and equipage, which the three principal depots

have supplied during the war.

At the commencement of the war the department had but one depot for the supply of clothing and equipage, the Schuylkill arsenal, at Philadelphia. This was organized for the equipment of an army of 13,000 men. The material was purchased by contract from manufactories, and the clothing, shoes, &c., were made up at the arsenal.

The sudden increase of the army made it necessary to greatly enlarge the operations of this depot, and to establish new ones, and also to accept the aid of State authorities in providing the clothing of the numerous regiments of volunteers organizing in every district in the country. Eight or ten thousand work-people were employed in Philadelphia in the manufacture of clothing and equipage. The new depots established at New York and Cincinnati went into operation early in 1862, under energetic and able officers. Contracts were made for the supply of clothing ready-made. The manufacturers of the loyal States were urged to turn their machinery upon army goods. The clothing merchants who had, before the war, supplied the southern markets, made contracts with the department for the supply of army clothing, and in a few months the industry and manufacturing power of the country were turned into the new channel, and the difficulties at first experienced in procuring a sufficient supply for the immense army which sprang into being ceased.

The only domestic branch of manufacture which has not shown capacity to supply the army is that of blankets. The department has been obliged throughout the war to use a considerable proportion of army blankets of foreign man-

ulacture.

The condition of the property stored at the Schuylkill arsenal, at Philadelphia, is a source of apprehension. About \$20,000,000 of property are in store there, and it is recommended that alterations and additions be made in the buildings, or within the walls, to enable the department to remove much valuable property now stored in temporary sheds, and exposed to danger from fire, into proper fire-proof buildings.

The prices of clothing and equipage have constantly advanced during the war. A table of the lowest and highest prices paid accompanies this report. It will be seen that, towards the termination of the war, the prices of many important articles had more than doubled; of some articles the price has quad-

rupled.

The Second Division of this office has charge of the provision and distribution of clothing and equipage. It has been under the charge of Colonel A. J. Perry, of the Quartermaster's department, who has in this office had charge of this branch of its business since the commencement of the war. He is an officer of rare merit, and I have taken occasion heretofore to ask that he receive promotion, as a testimony that his services have been recognized and appreciated by his country, as they are by the chief of this department.

Although in the active operations of the past four years, and especially during the unprecedented movements of the last year, very heavy demands have been made upon this branch of the department, it has been able to place the material

needed at the right places and at the right moment.

During the last year large armies have changed their bases. The army of General Sherman from the Tennessee and Ohio to the Atlantic coast, at Savannah; then again to the harbor of Beaufort, North Carolina, several hundred miles distant. Yet, at each of these new bases, this army, from 70,000 to 100,000 strong, found the supplies for a complete new outfit ready for issue. Most of the clothing and equipage for this purpose was sent from New York. Details of the operation are found elsewhere in this report.

So armies of 15,000 to 25,000 men have been during the past year suddenly

moved from the Tennessee to the Atlantic; from the Tennessee to the Gulf coast; from the James to the Rio Grande; but from none of these new fields and bases of operation, in the midst of these sudden and gigantic movements, has the complaint been made of suffering for want of any of the supplies which it is the duty of this department to provide or to transport.

#### OCEAN TRANSPORTATION.

Colonel George D. Wise, in charge of the Third Division of this office, reports that, during the first month of the fiscal year, the office work of the division—that of ocean and lake transportation—was embarrassed by the absence of most of the clerks and officers, who were called to active service in the field during the demonstration and attack on the capital by the rebel army under Early and Breckinridge. During this time, however, the necessary steamer transportation was assembled at City Point, and moved to Washington and Baltimore the 6th army corps in time to meet the advancing enemy at the battles of the Monocacy and the attack on Washington. The 19th army corps was also brought from the Chesapeake, where it was arriving by sea from New Orleans, and reached Washington in time to take part in the operations for its defence and in the pursuit of the baffled enemy.

During the month of July, also, the army of Major General Canby was moved by sea from New Orleans to Mobile bay, co-operating with the navy in

the reduction of the fortifications at its entrance.

From August to December no great movements of troops by sea were made, but a large fleet was constantly employed in supplying the armies before Richmond and the troops at the various stations along the coast from the Chesapeake to New Orleans.

In the inclement month of December the approach of General Sherman's army to the coast required a large fleet to be employed in readiness to supply

and refit that army after its long march from Atlanta.

Transports were despatched to Pensacola with supplies to await the arrival of the troops, should unexpected opposition compel General Sherman to change his course to the south.

The greater part of the stores intended for his use, however, were sent direct to Port Royal harbor, there to await his arrival at some point on the coast of

the Carolinas or Georgia.

When he appeared in rear of Savannah, and, capturing Fort McAllister by a coup de main, communicated with the naval squadron, the transports were sent round to the mouths of the Ogeechee and Savannah rivers, and light-draught steamers, fitted for river and bay service, which had been despatched upon the first news of his approach, arrived in time to transfer to the river landings the clothing, camp and garrison equipage, quartermaster's stores, and forage and provisions which had been of necessity sent in sea-going vessels, both sail and steam, and which were of too heavy draught to enter the Ogeechee or pass through the opening first made in the artificial obstructions of the Savannah.

The army was quickly reclothed, reshod and refitted; its wagons filled with rations and forage.

A large portion of the army was transferred by steamers from the Savannah to Beaufort, South Carolina, or Port Royal harbor, at which place the vessels of heavy draught could land their stores without the labor of transshipment.

After a short and much needed rest, the army, re-equipped, left the coast, and the transports and fleet of light-draught steamers repaired to the harbor of Morehead City, where they awaited the arrival of the troops, who, after a march of five hundred miles through a hostile country, without communication with their

base of supplies, depending solely upon the stores in their wagons and the resources of the enemy's country for their subsistence, were certain to arrive in a condition to require an entire renewal of their clothing and shoes, and a new

supply of provisions.

When I parted with General Sherman at Savannah, on the 19th January, he told me to look out for him at Kingston, and also to be prepared for him lower down the coast, should the rebel army of Virginia, abandoning Richmond, unite with the troops in the Carolinas, and succeed in preventing his passage of the Santee.

During the month of December, also, an expedition was embarked at City Point and Fortress Monroe, which made an unsuccessful attempt, in co-operation with the navy, upon Fort Fisher, at the mouth of Cape Fear river. The troops failing to attack were re-embarked, and returned to Hampton roads. The transportation by sea, the landing and return, were successfully performed.

In January the expedition was re-embarked with a larger force, and successfully landed above Fort Fisher, which place, with the aid of a naval bombard-

ment unexampled in severity, they carried by assault.

The troops of the 23d army corps, under General Schofield, having bome their part in the campaign in Georgia and Tennessee, after the battle of Nashville, which took place on the 15th and 16th December, and the termination of the pursuit of the rebel army on the Tennessee, were moved by rail and river to Washington and Baltimore, where, amid many difficulties from the severity of the season, ice entirely suspending for a time the navigation of the Potomac, they were embarked on ocean steamers and despatched to the Cape Fear river, and to Beaufort, North Carolina, to move, in co-operation with the victors of Fort Fisher, upon Wilmington and Kingston, North Carolina.

In anticipation of the arrival of General Sherman's army, I had ordered to Savannah a portion of the military railroad construction corps. Two divisions of the corps, as organized, with tools and materials, and officers, were brought from Nashville to Baltimore by railroad. At Baltimore they were recaforced, and embarked on ocean steamers, and were promptly at the rendezvous.

As the army moved, however, without depending upon railroad communication, destroying instead of repairing railroads in its march, the construction corps was transferred to Wilmington and Beaufort harbor, and the railroads which, starting from Wilmington and Morehead City, meet at Goldsboro', were repaired and stocked with engines and cars, either captured or sent from the north.

Two hundred miles of railroad were thus repaired and stocked, under the protection of the troops of Generals Schofield and Terry; and when, after the battle of Bentonville, the right wing of General Sherman's army, under Howard, marched into Goldsboro', on the 22d March, ragged from their struggles with the thickets and swamps, and blackened by the smoke of the burning forests of Carolina, they met these railroad trains from the Atlantic, loaded with three days' rations for their immediate wants. I met General Sherman at Morehead City, on the 25th March, when he advised me that he desired to move again on the 10th April.

This army, of nearly 100,000 men, needed to be entirely reclad and reshod, the troops were to be fed while resting, for as soon as the army ceased its march it ceased to supply itself by foraging, and depended upon the supplies from the coast. Nevertheless, on the 7th April I was able to inform General Sherman

that the necessary supplies were in his camps.

Every soldier had received a complete outfit of clothing, and had been newly shod. The wagons were loaded with rations and forage, and each of the three thousand wagons, whose canvas covers had been torn on the march from Chattanooga, was supplied with a new cover. The army moved on the appointed

day against the enemy, interposing between it and the army of the Potomac, then holding the principal rebel army fast behind the lines of Richmond.

A tug-boat of this department, under the command of Captain Ainsworth, had reached Fayetteville by the Cape Fear river on the 12th March, and first bore greeting to the army of the west, from their comrades whom they had left on the banks of the Tennessee, and who, joined with others of the army of the Potomac, were then forcing a communication with them, from the new base which they sought on the Atlantic coast.

The demands upon the department at this time compelled it to take into its service not only the fleet which it had gradually acquired by purchase, but nearly every new steam vessel that had been built in the United States to navi-

gate the ocean.

A fleet of powerful propellers, vessels of 900 to 1,100 tons, swift and staunch, burning twelve to sixteen tons of coal per day, with a speed of 8 to 10 knots, had been created during the war, and nearly the whole of them were at this time in the service of the department.

Large sailing-ships were also employed, loaded with forage and subsistence, and compelled to auchor on the exposed coast of Carolina, where they rode out

the winter storms.

A large quantity of railroad engines and cars were shipped to Beaufort harbor for the railroads in North Carolina, most of which were on the termination of hostilities sent to the James river to be sold.

To aid in the rapid supply of General Sherman, while at Goldsboro', and relieve the railroad, and also to enable the department to supply him at Winton by the shallow waters of North Carolina, in his northern march, a large number of caual-boats and barges was sent to Newbern; some of them were used in the Trent river, carrying supplies to Kingston bridge, but the greater part of them were released from service by the surrender of the rebel armies, and have been returned to the Chesapeake and to their owners, or sold.

In all the active movements by sea during the fiscal year, employing a fleet in which nearly all the sea-going steamers of the country have been employed, but three vessels have been lost while in the service of this department.

The North America, a chartered side-wheel steamer of the first class, perfectly new, went down in a gale off Cape Hatteras, the General Lyon was burned, and

the Admiral DuPont was run down at sea.

After the surrender of the rebel arm es, orders were given to discharge all the chartered steamers, and to sell those which were the property of the department as fast as they could be spared; very heavy movements, however, ordered before much progress in the reduction was made, have delayed the discharge and sale of some of the transports.

In May the 25th army corps was ordered from City Point to Texas. The corps numbered about 25,000 men, with artillery and baggage. Its guns, ambulances, wagons and harness, subsistence and ammunition, went with it; about 2,000 horses and mules also accompanied it. The greater part of its artillery, cavalry and team horses were left behind. This movement required a fleet of fifty-seven ocean steamers, one of which made two voyages. The entire tonnage of the fleet was 56,987 tons. The vessels were all provided for a twelve days' voyage, consuming 947 tons of coal, and fifty thousand gallons of water daily.

The daily expense of this fleet amounted to \$33,311.

The vessels were fitted with bunks for the troops, and with stalls for 2,139 horses and mules, which formed part of the expedition.

The vessels were all rigidly inspected before sailing, and all reached their destination in safety. No accident to any of them has been reported. A list of the vessels accompanies this report.

While this expedition of 25,000 troops was afloat, another, of seven thousand

troops, was sent by sea from Washington to Savannah, and 3,000 rebel prisoners were sent from Point Lookout, on the Chesapeake, to Mobile. Besides this, large numbers of convalescent and discharged men were then returning from the southern ports, and recruits were forwarded to the regiments on the coast.

There were, therefore, more than 30,000 troops and prisoners affoat upon the

ocean, in steam transports, at the same time.

The last annual report of this department gives information as to the army transport fleet owned and employed on the 15th October, 1864.

This list omitted to give the names of the western river steamers, of which

the department then owned a large number.

There were in the employment of the department of ocean and lake transportation, in the spring of 1865, owned by the department—steamers, 106; steam-tugs, 29; sailing vessels, 15; barges, 21—total, 171 vessels, with a tonnage of 49,358 tons. The department also had under charter at that time—steamers, 275; tugs, 91; sailing vessels, 75; barges, 171, with a tonnage of 191.149 tons.

Total number of vessels employed, 783; tonnage, 240,507 tons. Average daily expense of this fleet. \$97.500.

On the 1st of July, 1865, the fleet owned consisted of-steamers, 115; tugs,

23; sail-vessels, 12; barges, 20; tonnage, 55,496 tons.

The chartered fleet consisted of—steamers, 177; tugs, 69; sail-vessels, 74; barges, 100; tonnage, 138,440 tons.

Total number of vessels, 590; tonnage, 193,936 tons; daily cost, \$82,400.

During the fiscal year the average size of the transport fleet was-

| 351 steamers    | 171,081 | tons. |
|-----------------|---------|-------|
| 111 steam-tugs  | 13, 262 | 44    |
| 89 sail-vessels |         |       |
| 168 barges      | 22, 903 | 66    |
|                 |         |       |

Its average daily cost was \$92,414.

The report of Colonel Wise, who is in charge of this branch of the Quartermaster General's office, contains some important observations upon the construction and management of steam ocean transports.

At the beginning of the war the department was imposed upon. Officers and agents had little experience, and inferior vessels were sometimes chartered, and excessive prices were paid for steamers chartered from the regular trade, not then entirely and hopelessly broken up by the war.

Stringent measures of reform were adopted; a scale of prices for the different classes of vessels was fixed, by the order of the Quartermaster General.

The examination and audit of all accounts for charter of vessels was brought to this office; all charters contained provisions to enable the United States to purchase the vessels at a reasonable price, provided that should prove advantageous; and system, order, and regularity were introduced into the service.

This branch of the service, on the reorganization of this office under the law of 4th July, 1864, was assigned to the Third Division of the office, under the direction of Colonel G. D. Wise. The safety, efficiency, despatch, and punctuality with which its affairs have been conducted do him high honor.

At one time 40,000 men have been affoat. The fleet has averaged 719 vessels of all classes, with a burden of 225,000 tons. But three vessels have been lost during the year, though the greatest and most important movements were made during the inclement months of the winter, from January to May.

Very full tables which accompany this report give details in reference to the transport fleet and the operations of the department upon the ocean and upon the waters of the coast.

#### RAIL AND RIVER TRANSPORTATION.

The service of transportation upon the western rivers has been under the direction of the Fourth Division of this office.

Colonel L. B. Parsons, who had been placed in charge of the western river transportation in 1863, just before the preparations for the campaign of Atlanta commenced, was, upon the organization of the division of rail and river transportation in this office, called to its head. He has conducted the service with great efficiency and economy. Of some of the more important movements his report gives details. When he took charge of this service the Mississippi had been opened, and the merchants of the west were in condition to establish lines of steamers to all parts of its navigable waters. The system of time-charter of steamers was as fast as possible abandoned, and contracts were made, on public advertisement, with the lowest responsible bidders, to move the stores of the department at fixed rates per pound. The rapid accumulation at Nashville and at other points of supplies, which enabled General Sherman to move successfully into Georgia, have been detailed in the last annual report of this office.

#### WESTERN RIVER TRANSPORTATION.

In the course of the war a considerable fleet of river steamers and other vessels has become the property of the department upon the Mississippi and its tributaries, by purchase, by construction, or by capture. A list of the steamers accompanies the report. It contains the names of—

| Side-wheel steamers                                      | 34  |     |
|--|-----|-----|

|  |     | 1   |
| Total boats and barges of all kinds                      | -   | 599 |

Nearly all of these have been advertised for sale. Those which have been constructed or purchased by the department have been or will be sold. Those which have been captured or seized will be turned over to the Treasury Department, to be disposed of under the law, or will be returned to their original owners, if pardoned, and, if so ordered, upon full consideration of their claims.

## RAILROAD TRANSPOPTATION.

The agreement made early in the war with a convention of railroad companies has continued in force through all the changes in values which the war has brought. The railroad officers have responded to every demand of the transportation department of the government, and, by their cordial co-operation with the officers of the Quartermaster's department, have made these great movements of troops easy of execution and unexampled in despatch.

To Brigadier General L. B. Parsons, who has been in charge of the Fourth Division of this office, and to Brevet Colonel Alexander Bliss, his assistant, and frequently, in his absence, in charge of the office and the officers at the various posts and depots, charged with the duty of transportation, great credit is due for the safety, order, and speed with which this immense business has been

conducted.

There have been filed in the office of the fourth division, since its organization, 442 claims, amounting to \$268,545 02; 202 have been allowed, amounting to \$68,712 34; 92 have been referred to the Third Auditor or to disbursing officers for examination and settlement, amounting to \$87,462 30; 99 have been rejected, amounting to \$60,138 34; 48 await action, amounting to \$46,891 04; 1 has been withdrawn, amounting to \$5,341.

From the imperfect reports yet received at the office of the fourth division, the number of passages granted to prisoners and refugees who have been transported by the division, during the fiscal year, is 356,541, costing over \$1,300,000.

General Schofield's movement from Clifton, on the Tennessee, by the Tennessee river, the Ohio, and the Baltimore and Ohio railroad, to the Potomac, and thence to the coast of North Carolina, was accomplished in the midst of a very severe winter, during which the navigation of the Ohio and the Potomac was at times interrupted by ice. Within five days after the movement was decided on in Washington, the troops upon the Tennessee, nearly 1,400 mil s distant, were embarking. The movement to Washington occupied an average time of only eleven days. It took place during the month of January.

The special report of Colonel Parsons, of the Quartermaster's department, who was despatched by the War Department to attend to it personally, accompanies this report; it is an interesting detail of the difficulties overcome, and

of the success with which they were surmounted.

On the conclusion of the campaign in Tennessee, while the 23d corps, under General Schofield, was ordered across the Alleghanies, by Washington, to the coast of North Carolina, to co-operate with General Sherman, the 16th corps, under Major General A. J. Smith, was ordered to New Orleans to co-operate with General Canby in the reduction of Mobile. A fleet of 40 steamers was promptly assembled at Eastport, on the Tennessee, below the Muscle Shoals. The entire command, including a brigade of artillery and the seventh division of the cavalry corps, was embarked on the fleet. It consisted of 17,314 men, 1,038 horses, 2.371 mules, 351 wagens, 83 ambulances. The embarcation began on the 5th February, 1865, and was completed on the 8th. The fleet sailed on the 9th, and the command arrived at New Orleans on the 23d, having been moved, in 13 days, 1,330 miles.

#### DISPERSION OF THE ARMIES CONCENTRATED AT WASHINGTON.

The armies of the west and of the Potomac, after the fall of Richmond and the surrender of the eastern rebel armies, marched through Washington, were reviewed by the President and cabinet, and encamping upon the heights surrounding the capital, prepared for their final dispersion and disbandment.

During the forty days between the 27th May and 6th July, 233,200 men, 12,838 horses, and 4,300,850 pounds of baggage were moved from Washington by the Washington Branch railroad to the Relay House, where a large portion of them turned westward. The remainder passed through Baltimore, dividing at that city into two streams, one of which moved north, through Harrisburg, the other northeast, through Philadelphia.

The general instructions of the Quartermaster General, preparing for this movement, will be found among the papers attached to this report. They designate the routes and prescribe certain precautions and preparations for the

comfort and safety of the troops moving by rail.

Of the troops there were returning home for discharge from service 161,403 men, with 4,630 horses, and 1,828,450 pounds baggage, distributed as follows:

To the northeastern States 28,803 men, 1,307 horses, 287,000 pounds bag-

gage.

To the middle States 100,309 men, 2,323 horses, 907,000 pounds baggage. To the western States 32,291 men, 1,000 horses, 634,450 pounds baggage.

The army of the Tennessee, ordered to move to Louisville, from which place they were, in a few weeks, sent to their homes for discharge from service, 60,904 men, 2,657 horses, 2,424,000 pounds baggage.

Cavalry ordered west for active service 10,893 men, 5,757 horses, 308,000

pounds baggage.

Total number in forty days, over the Washington Branch railroad and the various railroads diverging from the Relay House and from Baltimore, 233,200

men, 12,838 horses, and 4,300,850 pounds baggage.

The army of the Tennessee, the troops ordered west for active service, and a portion of those ordered to their western homes for discharge, passed over the Baltimore and Ohio railroad to Parkersburg, its western terminus, on the Ohio river, where boats were provided for their march to Louisville, Lawrenceburg, Camp Dennison, and Cincinnati. Between the 27th May and 6th July, within forty days, during twelve of which no troops arrived at Parkersburg from Washington, there were moved from that place to—

| Louisville            | 78, 450 r | men, | 5, 855 | horses. |
|-----------------------|-----------|------|--------|---------|
| St. Louis             |           |      | 3,314  | 66      |
| Lawrenceburg, Indiana | 8, 424    | 66   | 153    | "       |
| Camp Dennison, Ohio   |           | 46   | 29     | 66      |
| Cincinnati            | 1, 361    | "    | 545    | 44      |
|                       | 96, 796   | "    | 9, 896 | "       |
|                       |           |      |        |         |

In this movement by water ninety-two steamboats were employed an average of seventeen days and a fraction for each boat, at an average compensation of \$175 per day each. Each boat consumed on an average 200 bushels of coal per day.

The total service of all the boats was 1,601 days, costing for charter

\$280,175, and consuming 320,200 bushels of bituminous coal, \$48,030.

Total cost of transportation from Parkersburg by water to various points on the Ohio and to St. Louis, of 96,796 men and 9,896 horses, \$328,205.

The same movement, if performed by railroad at the reduced rates at which

the railroads serve the government, would have cost \$746,964.

Thus 96,000 men and 10,000 horses were, in the short space of forty days, moved from Washington, on the Potomac, across the Alleghanies, and descending the Ohio and ascending the Mississippi, were placed in the several positions to which they had been ordered.

During these same forty days 233,000 men in all were moved by railroad

Digitized by Google

from Washington, 96,000 of them to the posts above named; the others were distributed to every hamlet and village of the States north of the Potomac and Ohio rivers and restored to their homes, the labor of war over, to return to the pursuits of peaceful industry which they had left at the call of their country in her hour of need.

In all these movements there have been few accidents, and the safety and

economy of the service are not less noticeable than its speed.

Had the armies marched to their several places of destination the pay of the men, the subsistence of men and animals, the maintenance of the immense trains which would have accompanied them, considering the time which the march would have consumed, would have far exceeded the cost of this rapid movement by rail and river.

It is understood that, since the close of the war, 800,000 men have been safely brought back from the rebellious districts, transported by this department to the several camps of discharge, established in every loyal State, and finally sent to their homes. Many of these men came from Texas and the Gulf coast—others from the territories of all the lately rebellious States.

Such a movement is unexampled. It illustrates the resources of the country for the operations of war, and the great advantages it possesses in its system of navigable rivers and its forty thousand miles of railroads.

#### MILITARY RAILROADS.

In the winter of 1863, when the rebel armies were driven back from Chattanooga, the immediate repair and almost total reconstruction of the track of the railway from Nashville to Chattanooga became an imperative necessity.

The positions taken up by the troops along the line of the Tennessee river, for the winter, required for their supply that the railroads from Nashville to Decatur, and from Decatur to beyond Knoxville, should also be repaired and equipped. Bridges were rebuilt; new and heavier iron was laid down upon the road from Nashville to Chattanooga; locomotives and cars in great numbers were manufactured at the north, and transported to the scene of active operations.

As the Louisville and Nashville railroad proved insufficient for the heavy traffic thrown upon it, and was sometimes cut by guerillas, the Nashville and Northwestern railroad from Nashville to Johnsonville, on the Tennessee river, was repaired, completed, and opened to trade. This afforded a new avenue by which the products of the northwest were transported to the base of operations at Nashville, the Tennessee river being navigable for light-draught boats from the Ohio to Johnsonville.

Seventeen hundred and sixty-nine miles of military railways were at one time repaired, maintained, stocked and operated by the agents of this department, under the energetic supervision of Brevet Brigadier General D. C. McCallum, general manager of military railways of the United States.

In the repair of so many miles of railway great quantities of iron, burned and twisted by the contending forces, both of which, on occasion, destroyed railroads

which they were obliged to abandon, came into our possession.

To make this iron serviceable in the repair of the railroads towards Atlanta and to the Gulf, should the same stubborn resistance be offered beyond Atlanta as was met with on the advance to that place, I directed the completion of an

unfinished rolling-mill captured at Chattanooga.

For local military reasons Major General Thomas required that the mill should be constructed within the intrenchment of the city of Chattanooga, instead of on the foundations of the mill, some two miles from that town. A rolling-mill capable of re-rolling fifty tons of railroad iron per day was constructed and put in operation. It utilized a large quantity of iron taken from the lines of southern railroads, and was of important aid in restoring the railroad communication

between Chattanooga and Atlanta, broken up by order of General Sherman when, in the fall of 1864, he destroyed the latter city and set forth on his adventurous march to the sea.

The termination of the war having relieved the War Department of the duty of repairs and reconstruction of railroads, this rolling-mill was advertised and sold at a satisfactory price. It will be of great advantage to the southwestern railroads, on all of which the iron is much worn by constant use during the war, with little means of renewal.

Most of their iron will require re-rolling, and this mill is now in full operation

upon the work.

General McCallum reports 1,769 miles of railroad as operated during the fiscal year, with an equipment of 365 engines and 4,203 cars either in use or in reserve, and an expenditure of twenty-two millions of dollars. His report is

among the papers submitted herewith.

The force employed in the repair, construction, and operation of the military railways has been very large. A table herewith shows the strength at several different periods. In April, 1865, the number employed in this branch of the service was 23.533.

### TRANSPER OF MILITARY RAILROADS.

As soon as the surrender of the rebel armies and the cessation of hostilities made it possible, efforts were made to induce the railroad companies of the rebellious territories to reorganize by the election of loyal directors and managers, and to resume the charge of the lines which had fallen into the hands of this department, and been repaired and used for the supply of our armies.

At this date nearly all the roads have been transferred, either to the presidents and directors, or to boards of public works of the States in which they are situated. In the Atlantic States the policy pursued has been to deliver up the roads in whatever condition they were left by the fortune of war at the moment of transfer.

Questions of ownership, claims to material of the road tracks. transferred either by rebel or by United States authority from one road to another, are left for decision of the courts. The United States merely retires, leaving the lawful owners to resume their property. Such material as had been collected for repair or construction, and not used, and such as was in depot, has been sold to the companies at a fair valuation, and upon credit of greater or less extent, as circumstances seemed to require.

The department does not propose to charge the railroads for expenditures or repairs, or for materials actually used on the roads; nor does it propose to allow any charge against it for the use and profits of the roads while occupied as military routes, nor for damages done by its troops or agents under the pressure

of military operations.

A railroad is an engine of war more powerful than a battery of artillery, subject to capture and to use; and there is, it would seem, as little reason for paying damages or rent for its occupation and use as there would be for a captured battery.

The rolling stock and movable machinery have been hired to the railroads desiring their use, until arrangements could be made for a sale. Most of that collected in the Atlantic States has at this date been disposed of at public auction, either for cash or in payment of debts for transportation due by the

department to railroads.

In the southwest the rolling stock belonging to the United States, some two hundred and twenty engines and three thousand cars, was all of the wide gauge, fitted for the southern roads. It could not be used without expensive alterations upon the northern railroads, and these could not be expected, therefore, to purchase it at prices approaching its value.

During these same forty days 233,000 men in all were moved by railroad

The railroads and the territory of the southwest were too much impoverished by the events of the unsuccessful rebellion to be able to purchase for cash the rolling stock and machinery which had cost this department several millions of dollars.

The reconstruction of the southwestern railroads, and their operation, were of the greatest importance to the pacification, restoration, and prosperity of the country, and on the 8th August an Executive order was issued prescribing the terms upon which these railroads should be restored to their lawful owners.

Difficulties having arisen in carrying this into full effect, additional orders

were issued on the 14th October, 1865.

Under these orders the railroads and the railroad property of the department, in the southwest, are being disposed of. Copies of the orders, as published by this department, for the information and guidance of its officers, accompany this report; they are General Orders of the War Department, No. 276, 1863, and Quartermaster General's Office, Nos. 56 and 62, 1865.

This branch of the service has been a very costly one, but its expenditures have accomplished their objects. They have supplied our armies, and have enabled them to move and accomplish in weeks what without them would have

required years, or would have been impossible.

Of the skill and ability of General D. C. McCallum, director and general manager of United States military railroads, and of the able body of engineers, superintendents, and assistants, who have enabled the department to repair, to build, and to manage the railroads during these great operations, it is impossible to speak too highly.

The commanding generals of armies as well as the Quartermaster General

recognize their courage and devotion, their services, and their merits.

### TELEGRAPH

The military telegraph has continued to be a most important instrument in the conduct of military operations. Its officers have shown the same fidelity

and devotion as in former years.

Colonel Anson Stager has been chief of the military telegraph, and Major Thomas T. Eckert, assistant quartermaster, has been assistant superintendent, on duty at the War Department, and in charge of all telegraph lines in the departments of the Potomac, Virginia, North Carolina and the south.

The funds for the support of the military telegraph are furnished from the appropriations of the Quartermaster Department, and are disbursed under the direction of the chief of military telegraphs, whose reports, with those of his

assistants, are submitted herewith.

The duties of these officers have brought them more directly under the notice of the Secretary of War than of the Quartermaster General, and their merits

are well known to the War Department.

Expenditures during the year were \$300,000, for material and supplies, of which about \$130,000 was expended for purchase of 285 miles of submarine telegraph cable for use in case of necessity upon the coast and bays. The greater part of this is still on hand.

Referring to Colonel Stager's report herewith, it appears that the estimated cost of supplying and maintaining and operating military lines now in use is

\$75,000 per month.

|  |        |                 |        |

During the rebellion there have been constructed and operated about fifteen thousand miles of military telegraph

The cost of the military telegraph from 1st May, 1861, to 1st December, 1862, was about \$22,000 per month.

During the year 1863, it averaged \$38,500 per month.

In 1864, the telegraph was greatly extended, and the cost reached \$93,500 per month.

The total expenditure during the year ending 30th June, 1865, has been

\$1,360,000.

The total expenditure from 1st May, 1861, to 30th June, 1865, \$2,655,500.

Upon the fall of the rebellion the telegraph lines throughout the South were taken possession of by the government. The telegraph companies were called upon to repair their lines and put them in good working order, furnishing all labor and material therefor. The United States to be at no ou lay beyond the expense of maintaining purely military lines and military stations. An account of government business is kept, subject to future consideration or settlement.

## PORAGE, PUEL, AND REGULAR SUPPLIES.

From the records in this office it appears that the armies in the field required, under the organization prevailing during the third year of the war, for the use of cavalry, artillery, and for the trains, one half as many horses and mules as they contained soldiers.

The full ration of forage for a horse is fourteen pounds of hay and twelve pounds of grain daily—26 pounds in all. The gross weight of a man's ration of subsistence is three pounds; the forage for an army therefore weighs, when full rations are supplied, about four and a half times as much as the subsistence stores.

The forage, probably, exceeds the subsistence as much in bulk as in weight. With armies marching in the field, the forage is in great part gathered along the line of march.

Thus the army of General Sherman, on its march through the southern States, supplied itself with abundant forage. The moment that the army halted, as at Savannah and at Goldsboro', large shipments of grain and hay were necessary to keep the animals alive.

So the army which operated in the vicinity of Nashville, and General Sherman's army during its slow progress from Nashville to Atlanta, and during the siege of that city, drew immense quantities of grain and hay from the Ohio river, at vast expense.

The armies operating against Richmond during the past fiscal year, occupied a fixed position in the lines of their fortified camps, and drew all their supplies from the north by sea.

The animals of the army have been well supplied throughout the year, notwithstanding the extent of the territory over which they have been scattered, and the sudden and great changes of base, and consequently of lines of supply.

When General Sherman's army reached Savannah, and before the opening of the obstructed channels leading to that city permitted the approach of the fleet which had been despatched to Port Royal, laden with forage and other stores, there was for a short time a scarcity of forage. The rice straw and rice which alone the country about Savannah furnished were soon consumed, and I am

During these same forty days 233,000 men in all were moved by railroad

Digitized by Google

informed that some artillery horses perished. But the opening of the river soon enabled the department to deliver ample supplies, and his army moved north with abundance of animals and of food.

Colonel S L. Brown was placed in charge of the purchase and supply of forage to the armies on the Atlantic coast in December, 1863; and upon the organization of the Fifth Division of this office was transferred to its head. His administration has been successful, and his reports record a business of magnitude and importance seldom equalled. Between the 8th of December, 1862, and the 30th of June, 1865, he purchased and shipped to the depots and armies 2,787,758 bushels of corn, 20,997,289 bushels of oats, 43,311 bushels of barley, 269,814 tons of hay, 8,243 tons of straw; the cost of which was \$31,308,563 98. The grain was purchased at certain points, under the direction of Colonel Brown, and transported to Portland, Boston, New York, and Philadelphia, by rail, canal, river, and lake, making 8,567 car loads, 560 barge loads by canal, and 49 schooner, 29 bark, and 20 propeller cargoes on the lakes. The hay, purchased upon the line of railroad, was transported to the coast in 5,555 car loads. The whole was reshipped from the above-named ports to the depots of the armies on the coast in 2,570 cargoes. The freight paid to these vessels was \$2,576,152 14.

Daily reports from the depots of the various armies, when daily mail or telegraphic communication was open, have been required, and have kept this office advised of the state of supply. Contracts made at a distance have been subjected to a careful examination by Colonel Brown himself, and every effort made to correct and prevent extravagance and fraud, both in the purchase and consumption of forage.

The loss by wastage, fire, and perils of the sea, upon shipments of forage amounting to twenty-five millions of dollars, has been less than seven-eighths of one per cent.—about eighty-three hundredths of one per cent. That there has been waste is undeniable; but in the handling of thirty millions of bushels of grain, and its daily distribution to the mangers or nosebags of every horse or mule in the public service, over a country of two thousand miles in width, this was unavoidable.

The abstracts with the report of the fifth division show, as approximate results, that during the fiscal year there have been supplied to the army—

| that during the usear year there have been supplied to the arm | .y—                      |

| 5, 902, 273 bushels of corn, costing                           | <b>\$8</b> , 558, 296 00 |
| 23, 794, 930 bushels of oats, costing                          | 23, 794, 930 00          |
| 43, 311 bushels of barley, costing                             | 64, 967 00               |
| 407, 799 tons of hay, costing                                  | 13, 049, 568 00          |
| 10,665 tons of straw, costing                                  | 213, 300 00              |
| 146 tous of feed, costing                                      | 219 00                   |
| 614 tons of fodder, costing                                    | 304 00                   |
| Forage   | 45, 681, 584 00          |

Fuel for the troops has, generally, in the field, been cut by themselves. At positions held for some time, and not in the enemy's territory, it is supplied by contract, the labor of troops being employed in different degrees, according as the exigencies of military duty, in the view of commanding generals, will permit.

• Fuel for steam-vessels is procured, by contract, principally at Philadelphia and Pittsburg.

The reports in the fifth division show an aggregate of supplies of fuel during the fiscal year of—

| 336, 169 cords of wood, costing | \$1,680,840 00 |
|---------------------------------|----------------|
| 832, 452 tons of coal, costing  | 8, 324, 520 00 |

These numbers, however, are imperfect, and subject, probably, to important increase upon a complete examination and analysis of the records and reports and accounts of officers.

The reports from the denot of Washington show the issue during the war of—

| The reported from the deport of 11 abilitia son blow the let                                  | ato draining out c was or |
|---|---------------------------|
| Corn  | 4, 500, 000 bushels.      |
| Oats  | 29, 000, 000 "            |
| Hay   | 490,000 tons.             |
| Straw   | 15,000 "                  |
| Coal  | 392,000 "                 |
| Wood  | 210, 000 cords.           |
| Captain E. D. Chapman, forage officer at St. Louis, reforage at that depot during the war of— | ports the purchases of    |
| Corn  | 3, 847, 480 bushels.      |
| Oats  | 17, 403, 778 "            |
| Hay   | 213, 216 tons.            |

| But I am of opinion that there have been many purc  | hases of which Captain    |

that depot is considerably greater than above stated.

Imperfect analyses of contracts and reports in this office indicate a supply of forage during the war exceeding—

Chapman cannot have knowledge, and that the quantity actually purchased at

| 22, 816, 271 | bushels | of corn, costing | \$29, 879, 314 | 00 |
|--------------|---------|------------------|----------------|----|
| 78, 663, 799 | bushels | of oats, costing | 76, 362, 026   | 00 |
| 1, 518, 621  | tons of | hay, costing     | 48, 595, 872   | 00 |
| 21, 276      | tons of | straw, costing   | 425, 520       | 00 |

| Total estimated cost of forage during the war, so far as ascer- |                  |
|---|------------------|
| tained from reports analyzed in this office                     | 155, 262, 732 00 |

But vast quantities of forage were purchased and issued at remote or subordinate posts, the accounts of which cannot be made up without a complete analysis of the vouchers of disbursing officers. Much was purchased or taken on the march by officers subsequently killed or disabled, or by officers not reporting to this department. For much of this, memorandum receipts were given; and these are among the claims continually reaching this office under the law of July 4, 1864.

The wood was generally used near the place of purchase. The coal has been transported, at the expense of the department, from the market in which it was purchased to all the Atlantic, Gulf, and western river ports between St. Louis and Pittsburg.

### CLAIMS FOR REGULAR SUPPLIES.

To the Fifth Division is intrusted the examination of claims for fuel, forage, and other regular supplies, irregularly taken by the armies, and not accounted for of imperfectly reported by officers of this department. Such of these as appear to be just and equitable are referred to the Third Auditor of the Treasury, with a recommendation for settlement, under the law of July 4, 1864.

A copy of General Order No. 35, which contains the rules for examination of these claims, accompanies this report.

These claims are examined as to the actual use of the supplies by the army, as to the past and present loyalty of the claimants and witnesses, and as to the genuineness of the signatures. Information as to loyalty is sought from pro-

Digitized by Google

vost marshals; and a very large number of claims is rejected upon evidence of

disloyalty of both claimants and witnesses.

There have been received and referred to the fifth division from January 1 to October 16, 1865, 4,245 packages, containing 14,455 claims, vouchers given by officers of the Quartermaster's department, and claims presented under the act of July 4, 1864, and General Order No. 35.

## HOSPITALS AND BARRACKS.

At the commencement of the fiscal year the capacity of the hospitals of the army was 120,521 beds. The capacity of the principal hospitals erected during the fiscal year is 7,300 beds.

By the pitching of hospital tents adjacent to the wooden hospitals, great ad-

ditions to their capacity have been made.

Hospital buildings are erected, and hospital tents are furnished by the Quartermaster's department. The hospitals, after being constructed, are turned over to the Medical department, to be administered under direction of the Surgeon General. Repairs and extensions are made upon his requisition, approved by the War Department, as they become necessary.

When the hospitals are vacated they are returned to this department, to be

sold or otherwise disposed of.

The hospitals throughout the country, (and during the war they have been located in almost every State) have been built by the Quartermaster's department upon plans generally prepared or suggested by the Surgeon General.

They are temporary structures built of wood with a view to economy, but

from their magnitude some of them have been costly.

The Mower general hospital, at Chestnut Hill, Philadelphia, with a capacity for nearly four thousand patients; the hospital at David's Island, and that at Willet's Point, New York; the Jarvis and the Patterson Park hospitals, at Baltimore; the general hospital at Jeffersonville, Indiana; the several hospitals in the District of Columbia, and adjacent thereto; the hospitals at Fortress Montice and at City Point, on the James river, and the hospitals at Nashville and at Chattanooga, Tennessee, are among the largest and most expensive which have been constructed by this department.

The material, wood, used in these hospitals is cheaper than any other, cheaper even than tents; but to provide for the cooking, warming, ventilating, and purification, of such numbers of sick men, requires at all these great general hospitals very extensive and costly arrangements for cooking, for laundries, and for supplying water in great abundance. Many of them are heated by steam; some are supplied with water from the pipes of city water-works, at others special provisions have been made for an independent water supply. Most of them have steam machinery for washing and for pumping. At one of these hospitals the daily consumption of water has exceeded 100,000 gallons

The principal barracks erected during the year have been barracks for draft

rendezvous.

| Spring Mills, near Philadelphia                                 | \$84,000 |
|---|----------|
| Slocum, New York  | 25, 000  |
| Johnson's Island, for guard of prisoners of war, Sandusky, Ohio | 15,000   |

A depot for prisoners of war was also constructed on Hart's Island, N. Y.

Necessary repairs have been made from time to time upon these, and upon

the numerous other barracks scattered throughout the country.

As the reduction of the army and cessation of enlistments have vacated the various barracks, they have been inspected and reported to the War Department, most of them with recommendation for sale.

Very large numbers of buildings erected as hospitals, storehouses, offices, and barracks have already been sold, and others are now being advertised for sale.

These sales are at public auction to the highest bidder. The materials generally bring fair prices, and a considerable sum will be realized from this source.

The Sixth Division of this office, which has charge of hospitals and barracks, is also charged with the records and reports of interments. Under General Order No. 40, of July 3, 1865, which, on the conclusion of the war, called upon officers of this department for special reports of the number of interments registered during the war, reports have been received from officers in seventeen States, including the District of Columbia.

They report the interments registered in their offices at 116:148. Of these there were whites, 95,803; colored, 20,345; loyal, 98,827; disloyal, 12,596; refugees, 600; contrabands, 4,125. These include few of the interments made immediately after battles, which are made by details of troops, and are reported by the commanding generals in the lists of killed in battle.

These are the records of those who die in hospitals, camps, and barracks, for whose burial there is time to make decent and orderly provision, under the general orders and regulations.

They do not include the numerous victims of skirmishes and of assassination by bushwhackers and robbers under the guise of guerillas, whose remains bleach by the way-sides and in the woodland paths of the south.

They do include, however, the 12,912 victims of the barbarities of Andersonville, Georgia, and the 1,500 whose graves were marked this spring upon the battle-fields of Spottsylvania and the Wilderness.

The National Soldiers' Cemetery, at Arlington, continues to be used for the interment of the victims of the rebellion who die in Washington or its vicinity. It contains the remains of 5,291 persons. The cemetery at the Military Asylum contains 5,211; Harmony Cemetery, 388; Battle Cemetery, 40; Alexandria Cemetery, 3,600. These cemeteries have been carefully tended and deco-A cometery has been constructed, under order of Major General G. H. Thomas, at Chattanooga, within the walls of which it is intended to collect the remains of all who fell in battle or died in hospital in that vicinity.

Captain J. M. Moore, assistant quartermaster, was, by your order, immediately upon the opening of communication, dispatched in a steamer, loaded with materials, with workmen, and clerks, to identify and mark in a suitable manner the graves of those who died at Audersonville. With the aid of a detail, furnished by Major General Wilson, this duty was performed.

The grounds in which 12,912 of our comrades had been buried in trenches, were enclosed: the bodies, where the earth had been washed from them by rains, were again covered. Headboards, painted white, were placed over each, bearing the name, rank, regiment, and State, with date of death, as ascertained from the captured hospital records.

12,461 were identified, and upon 451 graves Captain Moore was compelled to place the inscription "unknown U. S. soldier." His report is herewith.

The names of those who have been interred in the military cemeteries of the District of Columbia and of Washington have, by your authority, been published in a general order, which has been distributed to State authorities, public libraries, and to newspapers which publish official advertisements. The list is thus made accessible to the friends of those who have fallen.

The lists of interments at Spottsylvania and the Wilderness, and of those who

died at Andersonville, are being printed. As other lists are received at this of-

fice they will be submitted to you for publication.

It is reported unofficially that several thousand of our dead are buried at Florence, South Carolina, and at other prison camps of the south. As soon as arrangements can be made for the purpose, proper and decent attention will be given to their remains. Orders have been given for inspection of the cemeteries of other prison camps and of battle-fields. It is hoped that most of them can, in time, be enclosed and preserved.

### SIXTH DIVISION-CLAIMS.

There have been presented to the Sixth Division two thousand four hundred and seventy-nine claims under the law of July 4, 1864. The amount claimed was \$1,587,181 47. Seven hundred and fifty-one of these claims, amounting to \$183,452 30, have after examination been referred to the Third Auditor, with recommendation for settlement under the law; one thousand and fifty-four have been rejected, amounting to \$446,163 32. Claims amounting to \$957,565 85, still await examination and final action in this division.

The sixth division has, since its organization, been under charge of Colonel J. J. Dana, of the Quartermaster's department, an officer who has in various positions during the war displayed signal intelligence and devotion to his duties. As chief of transportation at the great depot of Washington, as chief quartermaster of the first army corps during the campaign of Chancellorsville and Gettysburg and as assistant in this office, and after its organization chief of the sixth division, he has won the approval and esteem of his commanders.

### MILITARY TRAINS.

The officer in charge of the Division of Military Trains reports from the returns of officers of the department, so far as received, that during the fiscal year ending June 30, 1864, there were purchased 14,549 wagons, 1,229 ambulances, 1,279 carts, 58,144 sets wheel harness, 87,480 sets lead harness, 5,255 sets irregular harness, 335 sets artillery harness, 1,702 sets cart harness, 60 travelling and 824 portable forges. There were captured from the rebels during the same fiscal year 1,541 wagons, 468 ambulances, 245 carts, 6 carriages, 6,661 sets wheel harness, 6,906 sets lead harness, 797 sets irregular harness, 119 sets artillery harness, 406 sets cart harness, 3 travelling and 73 portable forges. There were expended, lost, and sold during the year 2,372 wagons, 277 ambulances, 96 carts, 5 carriages, 17,907 sets wheel harness, 16,732 sets lead harness, 3,453 sets irregular harness, 393 sets artillery harness, 133 sets cart harness, 3 travelling and 229 portable forges.

During the fiscal year ending June 30, 1865, there were purchased 4,762 wagons, 1,436 ambulances, 247 carts, 13,215 sets wheel harness, 18,961 sets lead harness, 2,588 sets irregular harness, 4 sets artillery harness, 328 sets cart harness, 34 travelling and 890 portable forges. There were manufactured in the repair and other shops of the department 1.443 wagons, 79 carts, 14,152 sets wheel harness, 20,767 sets lead harness, 929 sets irregular harness, 34 sets artillery harness, and 173 cart harness. There were captured 1,599 wagons, 174 ambulances, 108 carts, 6,228 sets wheel harness, 7,770 sets lead harness, 867 sets irregular harness, 65 sets artillery harness, and 46 portable forges. There were expended, lost, and sold 2,211 wagons, 679 ambulances, 97 carts, 18,325 sets wheel harness, 23,254 sets lead harness, 1,583 sets irregular har-

ness. 12 travelling and 432 portable forges.

The trains of the army had been brought to a high state of efficiency by the 30th June, 1864, and they were probably not increased in magnitude during the year, the purchase and manufacture serving only to keep them in a com-

plete and efficient state. Much of the harness and many of the wagons having been purchased early in the war, and in continual use, are worn and of little value.

The army of General Sherman and the army of the Potomac uniting at Washington, after four years of active campaign, in which the former had marched from the Mississippi to the Potomac, brought together in the District of Columbia army wagons of the regulation pattern which had been used at the first battle of Bull Run on 21st July, 1861, some of which had made all the campaigns of each army since.

The baggage wagons and harness, the general equipment of the trains of our armies, are probably of models which cannot be improved. They have borne the rough usage of war in the hands of men of little experience at first, and not willing to take that care of them which can be expected from and enforced upon

the veteran soldier.

The experience of this war has convinced all officers of this department that for the army trains mules are much superior to horses, and of late the horses have almost entirely disappeared from the trains, being transferred to the cavalry or artillery and replaced by mules.

A copy of Special Orders No. 44, headquarters armies of the United States, City Point, Virginia, June 28, 1864, accompanies this report. It sets forth in detail and clearly the organization and size of the trains of an active army, as

perfected by four years' experience in the field.

With this report are several reports from officers of this department giving information as to the movement and management of the trains of armics in campaigns. This information is seldom available to the military student. It is of great value, and should be printed for reference and use hereafter.

### SEVENTH DIVISION-CLAIMS.

During the fiscal year ending June 30, 1865, and from the termination of that year to October 10, 1865, there were presented and referred to the seventh division of this office 11,494 claims, amounting to \$2,316,361 53; 4,337 were passed, amounting to \$1,239,872 23; 5,867 were rejected, amounting to \$950,455 66; 1,290 remain on file for further action, amounting to \$126,033 64.

The Seventh and Ninth Divisions of this office have been in charge of Colonel B. C. Card, whose intelligent and prompt discharge of the duties assigned to him have met my entire approbation. I have named him with others to you

for the promotion which he richly merits.

## TRANSPORTATION OVER THE PLAINS.

The troops operating on the great western plains, and in the mountain regions of New Mexico, Colorado, Utah, and Idaho, are supplied principally by the trains of the Quartermaster's department from depots established on the great routes of overland travel, to which depots supplies are conveyed by contract. The contractors are the freighters or merchants of the overland trade. This department has not statistics to show the extent of this traffic, but it has of late years increased with the development of the mines of the central region of the continent, until it has become a most important interest. Travellers by the stage from Denver to Fort Leavenworth, a distance of six hundred and eighty-three miles, in the month of July, 1865, were never out of sight of wagon trains, belonging either to emigrants or to the merchants who transport supplies for the War Department, for the Indian department, and for the mines and settlers of the central Territories.

The cost of transportation of a pound of corn, hay, clothing, subsistence, lumber, or any other necessary, from Fort Leavenworth—

| To Fort Riley is   | <b>\$</b> 0 | 02,46  |
|--|-------------|--------|
| To Fort Union, the depot for New Mexico To Santa Fé, New Mexico To Fort Kearney To Fort Laramie To Denver City, Colorado To Salt Lake City, Utah |             | 14 35  |
| To Santa Fé, New Mexico  |             | 16 85  |
| To Fort Kearney  |             | 06144  |
| To Fort Laramie  |             | 14 100 |
| To Denver City, Colorado   |             | 15 130 |
| To Salt Lake Čity, Utah  |             | 27 000 |

The cost of a bushel of corn purchased at Fort Leavenworth, and delivered at each of these points, is as follows:

| Fort Riley   | <b>\$</b> 2 | 79       |
|--|-------------|----------|
| Fort Union   | 9           | 44       |
| Santa Fé   | 10          | 84       |
| Fort Kearney   |             |          |
|  | -           |          |
| Denver City  | 10          | 05       |
| Great Salt Lake City   | 17          | 00       |
| Fort Laramie Denver City Great Salt Lake City To this last point popular payment | 9<br>10     | 26<br>05 |

To this last point none is now sent.

The expenses of this department will be reduced by the advance of the Pacific railroads, two of which are rapidly moving westward, one from Leavenworth toward Fort Riley, the other from Omaha toward Fort Kearney.

The present general mode of transport is by heavy wagons, each drawn by ten oxen. The loads of these wagons average fifty-five hundred pounds each. Lighter freight and passengers are carried by express in lighter wagons, drawn by mules, which an imals are almost exclusively used in the winter when the grass is covered with snow.

The heavy trains in dry weather move readily over the prairie roads, which, outside the limits of the settlements, follow the best routes, and can make wide detours to avoid sloughs or wet places in the prairies.

The progress of settlement it jures these roads. No laws appear to exist re-

serving the road bed on these great overland routes to the public.

The lines of survey of the public lands cross the trail at all angles, and each farmer is at liberty to fence in his tract according to the unyielding lines of his

rectangular boundaries.

These overland trails, now well-beaten wagon tracks, were originally located upon the high and dry swells of the prairie, the most desirable land for agricultural purposes. They followed the best routes and sought the easiest crossings of the streams, low grounds and swamps. Near Leavenworth the progress of enclosure is driving them into the wet grounds, and greatly increases the difficulties of travel.

It is much to be desired that in all future land sales the great and long established trails, the highways across the continent, should be reserved from sale, and be devoted forever as public highways. A certain width on each side of them should be marked out by actual survey and reserved for this purpose. Wagon roads across the continent will always be needed, even when the rail-roads are completed.

The following is an estimate of the cost of transportation of military stores westward, across the plains, by contract, during the fiscal year ending June 30,

1865:

Digitized by Google

| <b>8</b> 1,52 <b>4</b> ,119 00   |
|----------------------------------|
| 1 490 579 00                     |
| 1, 439, 578 00<br>3, 223, 829 37 |
|                                  |
|                                  |
| 201, 330 00                      |
| 6, 388, 856 37                   |
|                                  |

This expenditure would be reduced by the opening of railroads, by a sum which would aid materially in paying interest upon the cost of their construction.

The present season has been a very wet one upon the plains. In wet weather the heavy wagons are generally compelled to go into camp and wait patiently till dry weather makes the roads practicable. Any effort to move exhausts the animals and destroys the wagons, while the progress of such a train would not average in bad weather, over many portions of the roads, one mile a day. Trains from Fort Leavenworth to Denver City have this year occupied from forty-five to seventy-four days in the march.

# DIVISION OF INSPECTION.

The Eighth Division of this office is the division of inspection. Its duties are delicate and difficult. It receives, registers, analyzes, and prepares for action of the Quartermaster General all reports of the regular inspectors, or of officers acting as inspectors under orders of the Quartermaster's department, and all reports of inspections of that department by the inspectors general of the army which may be referred to this office for action.

It keeps the roster of the officers of the Quartermaster's department, and keeps a careful and minute record of the service of all officers as reported to this office. It also prepares and records the general and special orders of the department, and its nominations for assignment to duty.

The organization of the inspectors of the Quartermaster's department provides for six inspectors, with the rank of colonel, and a chief of the division of inspection. Other officers of the department are placed on inspection duty from time to time, as their services are needed.

Since the cessation of hostilities a number of officers have been thus employed to collect the information necessary to compel great and necessary reductions in the establishment, which had been created during the war.

The report of Colonel G. V. Rutherford, chief of the division of inspection,

which is herewith, gives in detail the operations of the office.

During the fiscal year 216 reports were received from the inspectors. Over eleven thousand inventories and reports of inspection of property recommended for sale or condemnation, and two hundred and ninety-three reports of boards of survey were received and acted on.

A record of the appointment, movements, services, and duties of each officer of the Quartermaster's department, and of reports of commanding officers and inspectors in relation to his performance of duty, has been kept. 591 annual reports of officers were rendered during the fiscal year, and 340 such reports have been received since its termination. From the information given in these reports, tables of quantities and of expenditures by officers have been prepared, which accompany this report.

Several boards for examination of officers of this department have been in session during the year. 243 officers have been examined, of whom 49 were

reported by the boards as disqualified, and 194 as qualified.

On the 30th June, 1865, there were in the Quartermaster's department:

| Regular officers                          | 67 |     |
|---|----|-----|
| Military storekeepers                     | 11 |     |
| •   | -  | 78  |
| Assistant quartermasters of volunteers    |    | 488 |
| -   |    |     |
| Total, including 11 military storekeepers |    | 566 |
|   |    |     |

Many of these officers have, for distinguished services during the war, received revet promotion beyond their lineal rank. Many have been assigned to important positions, to which, under the law, increased, though temporary rank is attached.

The report of the inspection division gives details as to the number of officers who have won such distinction. For the names I must refer to the tables accompanying this report, in which most of them are mentioned, and to the army register. During the fiscal year there were appointed five assistant quartermasters of the regular army, 145 assistant quartermasters of the volunteer army, and two military storekeepers.

During the fiscal year there retired from the service five assistant quartermasters of the regular army, and 203 assistant quartermasters of volunteers. Since the termination of the fiscal year, and to the 1st October, one assistant quartermaster of regulars, and one military storekeeper, and 172 assistant quartermasters of volunteers, have retired from the service, resigned, dismissed, or honorably mustered out.

The reduction is still going on rapidly, as troops are discharged and posts abandoned, and the services of these officers can be dispensed with. 382 officers a all left the service of the Quartermaster's department between the 1st July, 1864, and the 1st October, 1865.

The distribution of general orders to officers of the Quartermaster's department is part of the duty of the inspection division. It distributed during the fiscal year 177.289 copies of general orders, of which 124,177 were general orders of the Adjutant General's office.

Colonel Rutherford's vigilance and promptness in the discharge of his duties have been most important aids in the supervision of the extended operations of this department, and I am happy to acknowledge the recognition which they have met from the Secretary of War.

### ACCOUNTS FOR MONEY AND PROPERTY.

The Assistant Quartermaster General has charge of the examination of the accounts of disbursing officers and of officers responsible for public property, (other than property accounts of clothing, camp, and garrison equipage, which latter accounts are examined in the division of clothing and equipage)

The chief of the Ninth Division reports that there were received at this office in the fiscal year ending 30th of June, 1862, 7,094 accounts, all of which have

been examined and transmitted to the treasury for settlement.

In the year ending 30th June, 1863, there were received 29,153, all of which have been examined and transmitted to the treasury.

In the year ending 30th June, 1864, there were received 67,856 accounts; of these there have been examined and transmitted to the treasury 14,588. There remain to be examined 53,268.

In the year ending 30th June, 1865, there were received 72,299 accounts; of these there have been examined and transmitted to the treasury 12,424. There remain to be examined 59,875.

During the four years, July 1, 1861, to June 30, 1865, there were received in all 176,402 accounts; examined and sent to the treasury 63,259; remaining to be examined 113,143.

These are not single vouchers, but accounts, many of which contain hundreds, and some of them thousands, of single vouchers. They represent the expenditure of over one thousand millions of dollars in money, and the use and application of the property purchased therewith. The delay in their final settlement is injurious alike to the officer and to the government, and it is of great importance that their settlement be expedited by all the means in the power of the government. It is from the final examination and discussion of these accounts that the statist cal information necessary to a proper understanding of the cost of the great war, now happily ended, is to be obtained. These accounts record the purchases of materials; the cost of movements by rail, river, and sea; the application of the materials purchased; the distance men and material were transported; the cost and extent of the hospitals, barracks, storehouses, and camps which have covered the country with buildings and canvas.

Reports made by officers are often imperfect; their accounts for purchases must be complete; and these accounts record the actual cost and the time of purchase of every article provided by the Quartermaster's department during the war, from the ocean steamer of 2,500 tons, to the saddler's or tent-maker's needle and thread.

In the last annual report of this department attention was called to the inadequate force provided by law for the prompt examination of officers' accounts, and a recommendation was made for the increase of that force by the addition of 170 clerks, classified as follows: 70 of class one, 60 of class two, 30 of class three, and 10 of class four. Another year's experience makes more urgent the necessity of this increase, and I repeat the recommendation of the last annual report.

# MILITARY ORGANIZATION OF EMPLOYÉS OF THE QUARTERMASTRR'S DEPART-MENT.

In the last annual report of this office I had the honor to report the services rendered, in the field, as soldiers, at Nashville, at Johnsonville, and at Washington city, by the quartermaster's volunteers, a military organization under your sanction, of the clerks, agents, and operatives of the Quartermaster's department at the principal depots. Since that report was written, the quartermaster's volunteers at Nashville, under the command of Brevet Brigadier General J. L. Donaldson, have again had the opportunity to render important service. Two brigades of these troops, 4,500 strong, were assigned a position in the operations of the 15th and 16th of December, 1864, the days of the decisive battle of Nashville, and so conducted themselves as to merit and receive the approval of their commanders.

The surrender of the rebel armies having made their services no longer necessary, the several brigades and regiments have been disbanded, and most of their members have, in the general reduction of the force employed, been discharged from service. The arms and equipments have been returned to the Ordnance department.

Colored men continued to the close of the war to be employed in connexion with the trains of the Quartermaster's department as laborers at depots, as pioneers with the marching columns. In all these positions they have done good service and materially contributed to that final victory which confirmed their

freedom and saved our place among nations.

I cannot close this report without calling your attention to the services rendered by the officers and agents of this department. Some of these officers had at the beginning of the war the advantage of previous experience in the Quartermaster's department during former wars, but by far the greater part of them were taken from the occupations of civil life, without military training or experience. Many of them as the war went on were promoted from the ranks of the volunteers. A very few have proved unfaithful, but the great body of them have served laboriously and zealously, successfully and honorably.

Whether in the field or at the depot, there is no intermission to the labor and the responsibility of a quartermaster. In the field he is expected to overcome the difficulties of the road cut up by the passage of troops and artillery, and to run the gauntlet of a hostile population in the rear of the armies—a population exasperated by the loss of property taken by foragers. Often insufficiently guarded, upon his vigilance and energy depend the safty of his train and of the indispensable supplies which it bears. Long after the troops are at rest in

their camps the quartermaster is upon the road.

At the depot of an army the reception, care, and distribution of the immense supplies of food, ammunition, and clothing, and all other equipment, all of which pass through the hands of the quartermaster, tax him night and day. He is hold to strict accountability for every item of the stores which pass

through his hands.

In the greater depots which have been during the war the centres at which the business of providing for the army has been concentrated, the officers in charge have borne the responsibility of disbursing millions of dollars, collecting, auditing, and settling the vouchers issued by officers at smaller depots and in the field, and purchasing the stores to be distributed to armies through wide districts. Some of these officers have transacted business to the amount of millions monthly. From officers of every rank, from those in charge of the great centres of manufacture and purchase at the principal cities, from those to whom has been committed only the care of the property and trains of a single brigade, I have received and I recognize cordial support and assistance in the business committed to this department.

It is well understood among soldiers, that upon the efficiency and integrity of the supply branches of the service, depends in a great degree, the power to

make long marches, the health and efficiency of the troops.

I have imperfectly set forth in this report, some of the more important operations of the Quartermaster's department during the past year. I hope at a future time to be able to present to you more complete and detailed information of the extent of the resources, in material and men and money, which, under your administration of the War Department, have been applied to support and sustain the armies in every part of the wide field of operation, during the past four years of war.

This information properly digested, if published, will stand before the world as an example and a warning of the power and resources of a free people, for any contest into which they heartily enter, and from it the soldier and statesman will be able to draw valuable lessons for use, in case it ever again becomes

necessary for this nation to put forth its strength in arms.

The merits and services of many of the officers of the department have been presented to you by myself, or by the generals under whom they have served in the field. I acknowledge the kindness with which their claims and my recommendations have been considered, and thank you for the recognition which has

been given by their promotion of the services of the department which I have had the honor to control.

I transmit, herewith, reports of officers, with many tables, giving in detail information of value in relation to the operations of the department. To these I respectfully call your attention.

All of which is respectfully submitted.

M. C. MEIGS.

Brevet Major General U. S. A., Quartermaster General. Hon. EDWIN M. STANTON. Secretary of War.

# No. 1.

| On the 30th June. 1864, the termination of the preceding fiscal balances in the hands of officers (after deducting the disbursen certained from accounts which had passed the required admin examination of this office) amounted, as stated in the last annual to  | nents as-<br>nistrative      |
|---|------------------------------|
| From which there is to be made a further deduction of the amount of disbursements, as ascertained from accounts for periods prior to and of the fiscal year ending June 30, 1864, which had been received and registered, but of which the required administrative examination had not been made, viz:  Prior to the fiscal year  |                              |
| During the fiscal year  | ), 494 47                    |
| Less amount shown to have been received from sales of   | 0,943 99<br>221,339,550 48   |
| Leaving an outstanding balance due June 30, 1864, of  | 75, 629, 318 88              |
| A large portion of this, although remitted during the fiscal year, could not have been received before its termina-   | 7,806 00                     |
| tion, and could not, therefore, be accounted for during that fiscal year; the greater portion had doubtless been accounted for direct to the proper accounting officer of the Treasury Department, as required by the act of Congress approved July 17, 1862.   |                              |
| 2d. Amount in the hands of officers, to be accounted for hereafter  | ,512 88                      |
| Of this latter amount, the sum of three million three hundred and seventy-eight thousand two bundred and seventy-nine dollars and eighty-seven cents was amount of requisitions drawn during the fiscal years 1862 and 183 in favor of officers, not taken up in their accounts received at this office, viz:  In the fiscal year 1862 \$1,579,471 87 In the fiscal year 1863 1,798,799 00  3,376 | 75, 629, 318 88<br>3, 270 87 |
| Of this amount, the sum of twenty million   | 3,849 <b>80</b>              |
| eight hundred and ninety-five thousand nine hundred and sixty-seven dollars and seventy cents was the amount of balances found due the government upon examination of the last accounts received in the fiscal year 1864 20, 895, 967 70 The balance, three million four hundred  |                              |
| and forty thousand eight hundred and eighty-two dollars and ten cents, was the amount of the receipts for advances made to officers for disbursement during the facal year 1864, not taken up in the accounts received at this office, as be-   |                              |
| fore stated   |                              |

| The greater portion of this had probably been accounted for direct to the proper accounting officers of the Treasury Department as required by the act of Congress before referred to. The remainder was distributed among the officers disbursing at the various posts and stations, and in the field, and was applicable to the payment of debts contracted during the year. It was |                                      |
|---|--------------------------------------|
| Total amount, as above  | 44, 311, 512 88                      |
| Balance for which the accounts had not received the required administrative examination of this office, as above reported.  To which are to be added—  1st. Remittances in July, 1864   | 296, 968, 869 36                     |

NOTE.—Appropriations for contingencies of the army, though included in the annual estimates of the Quartermaster General, have not of late years been expended under his direction; they are not, therefore, included in the summing up of the appropriations for the Quartermaster's department in this table.

# No. 2.

QUARTERMASTER GENERAL'S OFFICE, First Division, Washington, D. C. October 17, 1865.

GENERAL: In compliance with General Orders No. 39, Quartermaster General's Office, dated July 1, 1865, I have the honor to submit the following annual report, embracing the operations of this division for the fiscal year ending June 30, 1865, together with general statements of operations up to the present date, as required by circular from the Quartermaster General, of the 24th of July. 1865.

My annual report for the fiscal year ending June 30, 1864, was forwarded to the Quartermaster General, from this division, on the 27th of September, 1864.

During the last fiscal year, and up to the present time, I have been stationed at Washington, D. C., continuing to perform the duties of chief quartermaster of the Cavalry bureau, to which I had been assigned, by order of the War Department, on the 27th of December, 1863, relieving Lieutenant Colonel C. G. Sawtelle. In addition to these duties, I have, since the 2d of August, 1864, performed those pertaining to the office of colonel and brevet brigadier general in charge of the First Division of the Quartermaster General's Office, having been assigned, by order of the War Department, to these duties at the date just mentioned, under the act of Congress of July 4, 1864, to provide for the better organization of the Quartermaster's Department.

As chief quartermaster of the Cavalry Bureau, I was charged with the purchase and supply of all animals required for the cavalry branch of the service, under the immediate orders of Major General H. W. Halleck, chief of staff, and subsequently under those of Lieutenant General Grant. As the officer in charge of the First Division of the Quartermaster General's Office, I was charged with the purchase, procurement, and d sposition of horses and mules for cavalry, artillery, wagon and ambulance trains, and all other purposes for which horses and mules may be procured for the armies of the United States. The duties

of both these assignments I still continue to discharge.

It is a source of great satisfaction to me that, during the great campaigns immediately preceding the downfall of the rebellion, as indeed in preceding operations against the enemy, the Cavalry Bureau and this division were enabled, with the energetic co-operation of the various quartermasters and assistant quartermasters at the several purchasing depots under my direction, to meet promptly all requisitions for the supply of public animals to our gallant armies in the The animals thus furnished were generally of a very good quality. owing to the rigid character of the inspection made by the inspecting officers, who were governed in their actions by General Orders No. 43, of the Quartermaster General, series 1864. As the war progressed, those furnished to the armies of the Potomac and James especially were so superior as to elicit the commendation of Brevet Major General Rufus Ingalls, chief quartermaster, from whose indorsement of November 30, 1864, forwarding estimate of public animals required for these armies for the month of December, 1864, the following is an extract:

"The supply (of animals) is already very good, and it is proper to state that the artillery and cavalry horses sent to these armies during the past three months

have been the best we have received during the war."

Testimonials of a similar character were received during the past year from

chief quartermasters in the armies of the south and southwest.

The business of my office does not require the rendition of either of the statements called for in paragraphs 3, 5, 6, 7, 8, 9, 10, and 11, of General Orders No. 39, Quartermaster General's Office, current series.

It will be seen, by statement herewith, that under the immediate direction of the several officers in charge of purchasing depots within the control of the Cavalry bureau and First Division Quartermaster General's Office, there were purchased as follows, viz:

## CAVALRY HORSES.

| From January 1, 1864, to June 30, 1864, per last report<br>From January 1, 1864, to June 30, 1864, per reports subsequently | 48, 719                   |  |  |  |

| MULES.  |                           |  |  |  |
| From September 1, 1864, to December 31, 1864  | 20, 711<br>25, 210        |  |  |  |
| Total purchased from September 1, 1864, to May 9, 1865  | 45, 921                   |  |  |  |

There are no records on file in this office by which the number of animals purchased by the Cavalry Bureau, prior to January 1, 1864, can be determined. Reports to this office of purchases of artillery horses and mules date from

September 1, 1864.

During the fiscal year ending June 30, 1865, the prices paid for cavalry horses ranged from \$144 per head (the lowest contract price) to \$185 per head, (the highest market price) From September 1, 1864, to June 30, 1865, the prices paid for artillery horses ranged from \$161 to \$185 per head; and during the latter period the prices paid for mules ranged from \$170 to \$195 per head. The average (approximate) prices are given in the tabular statement herewith.

The following is a statement of the number of public animals sold and died

at the several depots since the 1st of January, 1864, viz:

### CAVALRY HORSES.

| Total died from September 1, 1864, to June 30, 1865                             | 7, 336           |

Of unserviceable stock received at depots for recuperation, the returns to this office are not sufficiently complete to enable me to pronounce the exact proportion restored to ability for service. Observations made at several depots during limited periods indicate sixty per cent. as about the proportion so restored. It is a matter of regret that although several attempts have been made by this office to procure returns of the destruction of animals in the field, such returns have not been obtained. Without doubt this destruction has been very great, especially in the army operating in the Shenandoah valley, under General Sheridan. The issues of cavalry horses to this force were at the rate of three remounts per annum.

Following this is the report of animals purchased and issued at the several depots referred to, and also statement of quartermasters' property, marked A.

Report of the purchase and issue of cavalry horses at depots under direction of the Cavalry Bureau, during the six months ending December 31, 1864.

### SALES OF PUBLIC ANIMALS.

As far as returns to this office indicate, there has been sold, since the 8th of May last, in accordance with General Orders No. 28, (Quartermaster General's office, current series,) the following number of animals, viz: 53.794 horses and 52,516 mules, for which the sum of \$6,107,618 14 was received. It is probable that when full returns shall have been received, the total amount of sales of animals from the 8th of May last, up to the present time, will be found to be upwards of seven millions of dollars.

As required by the provisions of General Orders No. 42, Quartermaster General's office, current series, these sales, with one or two exceptions, have been conducted by employes of this department, and this course has, in all cases, proved more advantageous to the government than the employment of the professional auctioneers of any one locality for sales in that locality. The prices obtained by employes are generally greater than those secured by local

auctioneers

The success of this division in supplying the armies in the field has been mainly attributable to the zeal and fidelity of the officers acting under its orders, among whom I would mention—

Brevet Colonel C. H. Tompkins, assistant quartermaster U. S. A. Washing

ton, D. C.

Captain Ingham Coryell, assistant quartermaster, late in charge at St. Louis, Missouri.

Captain L. Lowry Moore, assistant quartermaster, New York city.

Captain George T. Browning, assistant quartermaster, Giesboro', D. C.

Captain E. C. Wilson, assistant quartermaster, Buffalo, New York. Captain J. L. Trumbull, assistant quartermaster, St. Louis, Missouri.

Captain C. Hay, assistant quartermaster, Washington, D. C.

Captain D. W. McClung, assistant quartermaster, Cincinnati, Ohio.

Captain E. C. Reichenbach, assistant quartermaster, Harrisburg, Pennsylvania. Captain J. M. Bradshaw, assistant quartermaster, late at Chicago, Illinois.

Captain H. A. Dupuy, assistant quartermaster, Syracuse, New York.

Captain C. H. Gallagher, assistant quartermaster, Wilmington, Delaware. In the claim department I have had the valuable assistance of Brevet Major

J. T. Power, assistant quartermaster.

All these have served faithfully and energetically, and I take pleasure in

bearing this testimony to the Quartermaster General.

The following is a statement of public moneys received and disbursed by me during the fiscal year ending June 30, 1865:

| On hand July 1, 1864  | \$3, 254, 732 | 42 |
|---|---------------|----|
| Received from officers during the year                        | 373, 888      | 75 |
| Received from Treasury Department                             |               |    |
| Received from sales of property, &c                           | 20, 657       | 67 |
| Total   | 8, 501, 078   | 84 |
| 1 ransferred to omcers  | 8, 015, 033   | 85 |
| Remaining on hand June 30, 1865                               | 486, 044      |    |
| Deposited as follows: First National Bank, Washington On hand | 483, 192      | 28 |

486, 044 99

Estimates made by various quartermasters for the purchase of animals during the fiscal year, approved by me:

| For the purchase of horses | \$23, 600, 456 66<br>6, 434, 637 66 |
|----------------------------|-------------------------------------|
| Total                      | 30, 035, 094 32                     |

### CLAIMS.

The business in the claim branch of this division has been increasing rapidly since the passage of the act of Congress of July 4, 1864.

During the fiscal year ending June 30, 1865, the whole number of claims,

regular and miscellaneous, filed, amounts to 4,174.

| Number acted on |        |
|-----------------|--------|
| •               |        |
|                 | 4, 174 |
| •               |        |

Very little progress has been made in the adjustment of these claims, as, previous to January 1, 1865, only 800 had been filed; 3,374 having been filed

during the last six months.

Considering the many disadvantages under which officers of this department labored in the discharge of their duties in the field, and the necessity of intrusting important positions to acting quartermasters, I find claims for animals taken for public use by them to be comparatively easy of adjustment, as, with but few exceptions, the proper accountability has been rendered except in cases where records and papers have been captured or destroyed by the enemy: hence the great mass of claims filed is for property taken by unauthorized officers of the army, not accountable to this department.

The following difficulties are met with in the adjudication of these claims, viz:

First. Where memoranda receipts are given and the signatures of the officers certifying are unknown, and the only evidence the claimants can furnish that the officers took the property are the receipts themselves, great difficulty and embarrassment result from not being able to determine the genuineness of the signatures. Before the muster out of service of the troops it was the practice to communicate by letter with the officers themselves. The number of receipts given by irresponsible and unknown parties, in the name of officers, has attached suspicion to many claims, no doubt just and equitable, which I do not feel satisfied to pass upon without the verification of the officer's signature.

Second. Where memoranda receipts have not been given, I am of opinion that the interests of the government cannot be sufficiently protected by adjudicating these claims upon the ex parte evidence, which under present regulations can only be procured. As a general rule, just and equitable decisions cannot be given upon evidence presented by claimants, unless the department can adopt some practice of examining witnesses in the locality where the claims originate.

Proof of loyalty seems to be so easily procured, that from the records of this division it would seem that few have ever been disloyal, and I respectfully suggest that an additional guard be thrown around this kind of evidence; at least to require officers and witnesses to state their reasons for believing the claimants to have been loyal at the dates the claims originated.

The kind and character of evidence furnished in support of the great mass of these claims are insufficient to satisfy me that the property has been "actually received or taken for the use of, and used by," the United States army. As

the act is now construed, a very limited number of the claims on file will be allowed; and if a more liberal construction is given in regard to the phrase "proper officer," I would respectfully suggest that a board of officers be appointed in each military department to examine and report upon these claims.

In closing this report, I cannot but express to the Quartermaster General my high appreciation of the uniform kindness and courtesy he has extended toward me in the discharge of my official duties; and I feel grateful to that Providence who chooses the bounds of our habitations for having assigned me, during the prevalence of the great slaveholders' rebellion, to a department of mammoth proportions, and of great responsibility, under the guidance and direction of an officer of distinguished ability, with whom I have had such delightful personal and official intercourse.

I am, general, very respectfully, your obedient servant,

JAMES A. EKIN.

Brt. Brig. Gen., in charge First Division Q. M. G. O. Brevet Major General M. C. MEIGS,

Quartermaster General U. S. A., Washington, D. C.

## No. 3.

Statement of claims (regular and miscellancous) filed in the First Division of the Quartermaster General's office during the fiscal year ending June 30, 1865, and from July 1, 1865, to October 20, 1865, showing the number paid, referred, and recommended for settlement, the number rejected and suspended, and the number not acted on, with their respective amounts.

Many claims entered in the column of "rejected and suspended" have been rejected for want of evidence or accountability for the property, and may come before the department again; hence the impossibility of discriminating between "rejected" and "suspended." Many of the claims entered in the column of "not acted on" are under investigation.

Respectfully submitted;

JAMES A. EKIN,
Bet. Brig. Gen'l, in charge First Division Q. M. G. O.
First Division Quartermaster General's Office, Nocember 8, 1865.

## No. 4.

## QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., October 19, 1865.

GENERAL: In response to the circular of the Quartermaster General of July 24, 1865, requiring reports of the operations of the several divisions of the office during the fiscal year ending June 30, 1865, I have the honor to submit the following tabular statements collected from the tables submitted to this office, in conformity with orders therefrom based upon the circular above referred to:

Digitized by Google

1. Statement of number of articles on hand, and not transferred to the armies for issue, June 30, 1864, showing the points at which they were stored.

2. Statement of quantity of material purchased during the fiscal year ending June 30, 1865, showing the quantity and cost of each kind, and where

purchased; also total quantity and cost of all.

3. Statement of number of articles of clothing and equipage purchased and manufactured during the fiscal year ending June 30, 1865, showing the quantity and cost of each kind, where purchased or manufactured; also total quantity and cost of all.

4. Statement of number of articles on hand and not transferred to the armics

for issue, June 30, 1865, showing the points at which they were stored.

5. Statement showing the aggregate expenditure for the purchase of clothing. equipage, and material, at the purchasing depots of New York, Philadelphia, and Cincinnati, during the fiscal year ending June 20, 1865.

6. Statement showing quantity of material purchased at the depots of New York, Philadelphia, and Cincinnati, since May, 1861.

7. Statement showing the number of principal articles of clothing and equi page purchased at the depots of New York. Philadelphia, and Cincinnati, since May, 1861.

8. Statement showing the highest and lowest prices paid by the department

for articles of clothing and equipage during the past four years of war.

These tables present, in compact form, the operations of the clothing and equipage division during the fiscal year ending June 30, 1865; and, as far as the reports that have been received to date will permit, the operations during

the last four years of war.

The clothing and equipage supplied to the army during the last fiscal year have been procured by purchase and manufacture at the principal depots of Philadelphia, New York, and Cincinnati, and in relatively small quantities at St. Louis, Quincy, (Illinois,) Steubenville, (Ohio,) and at Milwaukie, where the work was distributed among the needy relatives of soldiers in the ranks of the

The material required for the manufacture of these large supplies has been drawn from our own markets, and has generally been made from native pro-

Although very large demands have been made on the department during the past year, they have in no case exceeded its ability to produce and issue with promptitude the supplies required for the army in its most extended operations. Perhaps the most prominent instance of the kind was the successful supply of Sherman's army after its triumphant march through the southern States to the seacoast, where it found, at the right time and in the right places, everything needed in this branch of the department.

The articles were shipped principally from the depot at New York, upon short notice, and it is due to your own foresight, and the promptness and energy of the officers in charge of the clothing and the transportation branches

at New York, that the success was so complete.

The tabular statements herewith will afford more precise knowledge upon the points referred to than could be given in narrative. The results are that there has been produced during the year material amounting to \$21,416,818 84; equipage, \$13,515,305 09; clothing, \$70,087,282 20—making the expenditures for all objects, including payment of rents, compensation to employes, &c., more than \$105,019,406 13.

The commencement of the war found the department prepared only for the supply of the old army—a force on paper of about 13,000 men, with an actual strength seldom exceeding 10,000. The supplies of clothing and equipage for this force had been drawn entirely from the Schuylkill arsenal, at Philadelphia, where they were manufactured under the supervision of the officers in charge,

from materials purchased for the purpose.

The sudden expansion of this small army to the great armies called into existence to quell the rebellion, rendered necessary corresponding changes in the administration and operations of the clothing branch of the Quartermaster's department. The manufacturing of clothing was increased to the greatest limit possible, employing from eight to ten thousand operatives at once. Yet this force was found unequal to the task before it, and it was soon evident that other sources must be called upon to assist in meeting the demands made upon the department.

Two other principal depots were established in the summer of 1861, at New York and Cincinnati respectively, and, under the charge of energetic and skilful officers, enabled the department to furnish supplies nearly as rapidly as required.

Both the manufacture and purchase by contract of the various articles required were pursued at Philadelphia, New York, and Cincinnati, the manufac-

ture alone not being of itself a sufficient source of supply.

Many of the regiments called into service were clothed and equipped through the agency of their State authorities. In some cases, where authority had been given them by the War Department, the States were reimbursed through the Quartermaster's department, after the examination of each account and its reference to the proper disbursing officer for settlement, as in the case of his own purchases. In other cases States were reimbursed by the United States through the Treasury Department, under a special act of Congress to that effect.

The necessity of resorting to this method of partial supply soon passed away with the more perfect organization of the department, and since the first year of the war the department has been able to meet with alacrity every call made

upon it.

Depots for the manufacture and purchase of army clothing and equipage, in addition to that at Schuylkill arsenal, have been established during the war, at New York, under General Vinton; at Cincinnati, under Captain J. H. Dickerson, but since his resignation it has been under the charge of Colonel W. W. McKim and Colonel C. W. Moulton; at Quincy, Illinois, for the benefit of suffering Union refugees and relatives of Union soldiers, under the charge of Captain N. Flagg, assistant quartermaster; and for similar objects at Steubenville, Ohio, under Captain Alexander Conn, assistant quartermaster. St. Louis, Missouri, was also, at an early date, made a prominent point for the manufacture of clothing, to give relief to impoverished operatives, friends of the Union cause in that city.

Purchases, except when specially authorized to be made in small quantities at other points, have only been made at the three depots of New York, Philadelphia, and Cincinnati. At all others the articles manufactured have been made from material sent from one of the three last-named, generally from Phila-

delphia.

The object for which these smaller depots were established seems to have been fully accomplished, and the department has been well and economically provided with good serviceable garments near the points at which they were wanted for issue.

The smaller depots above mentioned have, since the termination of hostilities in the field, been broken up, in compliance with orders from the Secretary of War, and the garments moved to the central depots of St. Louis and Cincinnati.

Colonel W. W. McKim, in charge of the Schuylkill arsenal, calls the attention of the department to the importance of substituting fire-proof buildings for the wooden structures now in use as storehouses at that depot.

The value of the property now stored there is about twenty millions of dollars,

and is in constant danger from fire; locomotives pass along the entire length of the wall on the northern side many times every day and night. Colonel McKim reports that he has rearranged the stores, endeavoring to place the most valuable in the brick buildings; but much of it still remains in the wooden

sheds, put up under pressing emergencies during the war.

I respectfully recommend that the brick buildings at present composing the permanent storehouses of the arsenal be enlarged and altered, so that they may be of sufficient dimensions to meet the increased wants of the service in this particular. No purchase of land would be necessary—simply the enlargement of the present buildings as they now stand, on ground owned by the government.

It is not deemed necessary to submit details, unless the general plan shall be adopted. The matter, however, is one of much importance, and I hope it

will meet with due consideration by the department.

The experience of the past war has developed the fact that exact uniformity of texture and quality of material and articles are in some respects not altogether practicable. The department will, however, from that experience, be enabled to arrive at exactly what the markets of the country can afford, and thereby determine such standards as are attainable by the majority of dealers, and at the same time equal to the requirements of the case. I recommend such modifications where they are necessary.

The quantity of clothing and equipage reported on hand June 30, 1865, being nearly the full supply preparatory to any demand that might possibly have been made during the past summer, is large, in view of the much-reduced forces. I am of the opinion, though, that were these articles forced upon the market for sale, being of that description for which there is no demand outside of the army, the sacrifice would be greater than any loss that may result from

damage while in store.

As to the material, much of it, I believe, might be sold to advantage, and I shall submit special reports recommending such disposition to be made of it.

The prices of clothing and equipage during the war were constantly advancing, and kept pace with the fluctuations of the government currency. I have submitted, in illustration of this fact, a statement showing the highest and lowest prices paid from the beginning to the end of the war. It will be observed that the prices of many important articles have more than doubled, and

in some instances they have even quadrupled their former value.

The complaints received from the armies as to inferior quality of clothing and equipage have been very few, and have principally been confined to articles of equipage, especially knapsacks and haversacks, which, being manufactured from painted cloth, are from their nature subject to great deterioration, particularly when packed together, as they necessarily must be for transportation and economy of storage. It is generally conceded that the supplies have been of the most serviceable quality, and furnished in plentiful quantities.

The tabular statements submitted herewith do not include the purchases made by State authorities, the accounts for which have generally been settled by the Treasury Department, under act of Congress, and from appropriation

therefor not estimated for by this department.

They will give, however, in condensed form, full information as to the operations of the division of clothing and equipage during the last fiscal year, as well as interesting information concerning its operations during the last four years of war.

Respectfully submitted:

ALEX. J. PERRY,

Colonel, Quartermaster in charge 2d Division.

Maj. Gen. M. C. MRIGS, Q. M. General U. S. A., Washington, D. C.

ALEXANDER J. PERRY, Col. Q. M. Dep't, in charge 2d Division.

## No. 16.

QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., August 31, 1865.

GENERAL: I have the honor to report for the fiscal year ending June 30, 1865, relative to the operations of the Third Division, in charge of the ocean and take transportation of the War Department, as follows:

During the first month of the year the office work of the division was nearly suspended by most of the employés being called into active service in the field to assist in repelling the rebel raid on Washington; nevertheless, sufficient steamers were promptly on hand at City Point for the transportation of the 6th army corps to Washington and Baltimore, rendering efficient service in driving back the invading force.

Also, in this month, the army of General Canby was moved from New Orleans to Mobile bay, co-operating with the navy in the reduction of the forts.

From August to December no large army movements requiring water transportation were made, but a great number of steamers were used to forward the supplies for the armies before Richmond

supplies for the armies before Richmond.

In December the approach of General Sherman's army to the Atlantic coast taxed the resources of the department to the utmost extent. The precise point of his advent was not known; it was a stormy season of the year, and only reliable ocean steamers could be used, with a proper regard for the lives of the passengers, and the property on board.

At this time some three hundred thousand men, including the armies of Grant and Sheiman, were dependent entirely for their supplies upon water transportation. The winter was unusually severe; storms swept the ocean, and ice blocked the bays and rivers. Notwithstanding, the troops were kept well supplied, and stores and forage were sent as far south as Pensacola, and a large number of light-draught river steamers and tugs were sent to Hilton Head, South Carolina, to be on hand for the navigation of the shoal rivers of the southern coast, all of which, fortunately, arrived in safety, and rendered efficient service after the fall of Savannah and Charleston.

When General Sherman's army left Savannah, in continuation of its victorious march through the southern States, a part was transported by sea to Beaufort, North Carolina, while the light fleet of steamers followed along the coast, ready again to meet and co-operate with the army at Wilmington and Morehead City. A large number of canal barges were sent via the Chesapeake and Al-

bemarle canal, to carry supplies up the North Carolina rivers.

On the 24th of this month, (December,) an eventful one in our history, the first attack on Fort Fisher was made, and ocean transportation was provided for the land forces from City Point, Virginia, and, when the expedition proved unsuccessful, brought the troops back to Fortress Monroe. In January another and successful expedition was sent to the Cape Fear river, resulting in the fall of Fort Fisher and the evacuation of Wilmington, North Carolina, by the rebels.

The department was much embarrassed at this time by the difficulty of procuring ocean steamers whose draught of water would allow them to enter Cape Fear river, and at Morehead City, which were not safe to attempt with a greater draught than twelve feet. Steamers had to lie at anchor on an open coast in

mid-winter, and discharge their cargoes in small vessels.

In this connexion, I would state, as worthy of remark, that during the last fiscal year only three vessels in the service of the War Department have been lost at sea. One of them, the North America, was a new, first class steamer; another, the General Lyon, took fire, and was burned; and the third one, the Admiral Du Pont, collided with a chip at sea, and was sunk. These were all chartered steamers, and the loss of life and property was not great.

From January to the surrender of General Lee, in April, the water transportation department continued faithfully to supply the two great armies of Grant and Sherman, and nearly every ocean steamer of any capacity in the country was

employed.

After the surrender of the rebel armies in the Atlantic States, and the virtual close of the war, every exertion was made to reduce the expenses of the department, and vessels belonging to the government were sold, and chartered

ones discharged as fast as the service would allow.

Of the first class, it is not supposed the government will realize a sum from their sale in proportion to their original cost. The requirements of the service were such that they were always under a severe strain; and notwithstanding frequent repairs, the close of the war found most of them in bad condition. Many ships were yet required to carry back the returning veterans, and, in addition, transportation had to be furnished for thousands of our own released prisoners, and for rebel released prisoners, refugees and freedmen, to the points nearest their homes.

In May a requisition was made upon the department for ocean transportation for the 25th army corps from City point, Va., to Texas. This corps numbered about twenty-five thousand men.

The enclosed tabular list will enable you to form an idea of the requirements

necessary for a large ocean expedition.

It comprised fifty-seven ocean steamers, (one of which made two voyages,) making the entire tonnage of the vessels employed amount to fifty-six thousand nine hundred and eighty-seven tons.

They were all provided for a twelve-days' voyage, allowing for the consumption of coal per day nine hundred and forty-seven tons, and for water fifty thousand gallons.

While all the vessels were employed, the expense of the expedition amounted to thirty-three thousand three hundred dollars and ninety-one cents per day.

Each vessel was fitted up suitably for the cargo to be carried. Bunks were constructed for the troops, and stalls for two thousand one hundred and thirty-nine animals, being part of the expedition.

The vessels were supplied with an ample quantity of coal and water, and were thoroughly inspected, so that in case of disaster no blame would attach to the department for sending unseaworthy vessels. They all arrived safely at their destination, no accident of any kind having been reported.

At the same time the Texas expedition was under way, seven thousand troops were sent by sea from Washington to Savannah, and three thousand released rebels from Point Lookout and Fort Delaware to Mobile.

With this closes the work of the ocean and lake transportation division for

the fiscal year ending June 30, 1865.

No mention has been made of transportation on the lakes, as none was required, except one small steamer used for the convenience of the prisoners on Johnson's island, between that and the main.

The enclosed tabular list of transportation employed by the division shows the number of vessels in service during the year, from which it appears the average daily expense of the division for the fiscal year amounts to \$92,414.

The average number of steamers employed, owned and chartered, 351;

tugs, 111.

The average amount of tonnage of the above, 171,081; tonnage of tugs, 13,262.

The average number of sail vessels employed, 89.

The average amount of tonnage of the above, 17,738.

The average number of barges employed, 168.

The average amount of the tonnage of the above, 22,903.

The total number of vessels employed, 719.

The total amount of tonnage employed, 224,984.

In closing my report, I would respectfully make some remarks relative to the duties of my division, and the transportation, by water, of the United States.

At the beginning of the rebellion we were found wanting in nearly every material preparation for the war, except an ample supply of ships and steamers, the importance of which was very great in a country like ours, penetrated in every direction by navigable rivers, and indented on the coast by deep and sheltered harbors.

Nothing contributed more to the success of our cause than this, enabling us, with the assistance of the navy, to concentrate rapidly and secretly large bodies of troops upon the weak points of the enemy, and in this way New Orleans, Hilton Head, Fort Fisher, City Point, Mobile, and the great Mississippi valley were cleared of the rebels. That they fully appreciated this is evident from their desperate and frantic efforts to destroy our shipping by the torch of the incendiary, torpedoes, or the more open attack by armored vessels.

In the first rush of troops to the war, by the inexperience of quartermasters, or the unfaithfulness of government agents, and not overpatriotic ship-owners, many unsuitable vessels were employed for the service and paid at high prices. This was remedied as soon as possible by the Quartermaster General, and a scale of prices fixed per ton for the guidance of quartermasters, and stringent orders issued that no vessel should be sent with troops to sea unless she had been properly constructed for such purpose.

All charters were made allowing the department to take possession of the vessel by paying 33 per cent. profit on the valuation, and the running expenses

and repairs, and be credited with the amount paid for charter. By this means a large number of vessels became the property of the government, and the higher the rate of charter, the sooner the vessel would pay for herself. The valuation was fixed by one or more officers of the navy, duly detailed for that duty.

It is important that quartermasters should inform themselves of the kind of

steamers suitable to carry troops by sea.

If a side-wheel steamer, in order that the paddle-wheels may be secure from the action of the waves, the projection in the side, called the sponcing, should be carried up so as to make that portion as solid as any other part of the ship. This is to be done by carrying timbers, curved according to the form necessary for admitting the water to the paddles, from the floor of the ship to the very outermost projection as well as within the paddles, deviating very little from

what would be the regular form of a sailing vessel.

According to the best authorities the following parts of a vessel of this kind should be increased in actual strength by one-fourth, viz: the keel, stern, apron or inner stern, futtocks, floor timbers, dead-wood, stern-post, transom, inner post, frame timbers, and filling timbers abreast of the engine, as should also the wales, the rudder and the rudder fastenings. The steamer should be provided with sufficient masts and sails, in case of accident to her motive power, which should not be less than a fore-and-aft sail to each mast, set upon a gaff, these being intended for the usual wants of the vessel; while there should also be a trysail to each mast, to be set in storms.

The weight of machinery should be well below the water-line; and quartermasters should not be deceived into employing, as ocean steamers, river or lake vessels boxed up to resemble a sea vessel, but having broad guards only a few feet from the water, and which the first storm at sea is liable to send to the

bottom.

Steamers for the transportation of troops by sea should be high between decks, and well ventilated by hatches, wind-sails and side-lights. Water-closet arrangements and temporary bath fixtures can easily be made which contribute greatly to the health and comfort of troops on shipboard. Dampness can be obviated by the use of drying-stoves.

I would respectfully recommend that the arms, baggage and knapsacks of the troops be taken, as they embark, and stowed in a convenient place, to be returned when about to leave the ship. Soldiers from sea-sickness, want of use to the motion of the ship, are unable to take care of their arms, which might be

damaged without the possibility of their preventing it.

When a steam vessel comes alongside of a wharf or other vessel, care should be taken that the gang-boards are properly fixed and attended by seamen before the troops are allowed to step on them, and they ought to be made to

march with regularity.

The senior officer in command of troops on board should cause a careful inspection to be made twice a day relative to their condition, and if any symptoms of a contagious disease should appear among the men, they should be immediately separated from their comrades until the character of the disease is known.

While a ewll-regulated ship is remarkable for health, one where proper precautions are not observed soon becomes a floating pest-house. A steamer for the transportation of troops should be well provided with boats ready to lower away at a moment's notice. She should be fitted with sufficient life-buoys, ready to be shipped or cast away if a person should fall overboard.

The troops on board should on no account be allowed to interfere with the management of the ship, and arrangements should be made in case of accidents

to prevent a rush to the boats.

If a boat is to be lowered, it should be done by the people of the ship, and not by soldiers unaccustomed to that kind of service, which often causes loss of life.

The commanding officer on board should only under extraordinary circumstances oblige the captain to put to sea, or cross a dangerous bar, to go into port, if the captain should protest against it as incurring risk of life and property. For the more particular guidance of quartermasters in charge of transportation I would refer to the excellent instructions embodied in the Revised Army Regulations of the War Department, page 20, article 37.

I have the honor to be, very respectfully, your obedient servant,

GEO. D. WISE.

Colonel, in charge Ocean and Lake Transportation.

Brevet Major General M. C. MEIGS.

Quartermaster General U. S. A., Washington, D. C.

GEORGE D. WISE, Colonel, in charge Third Division. No. 21.

QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., November 8, 1865.

GENERAL: From the best information that we have in my office, we had in service, supplying the armies of General Grant before Richmond in the spring of 1865, 190 steamers chartered and owned; 60 tugs chartered and owned; 40 sailing-vessels chartered and owned; 100 barges chartered and owned; in all 390 vessels, 120,000 tons, at a daily expense of \$48,000.

Very respectfully, your obedient servant,

GEO. D. WISE.

Colonel in charge Ocean and Lake Service.

Major General M. C. MEIGS,

Quartermaster General.

No. 22.

WASHINGTON, D. C., August, 1865.

GENERAL: In accordance with your orders I came to this city in November last to undertake the organization of the Fourth Division of your office, charged with the general management of rail and river transportation under the recent

law of Congress.

Finding in addition to pressing current duties that there was thrown upon the division millions of dollars of complex unadjusted accounts for services rendered in the early years of the war, and discovering that not only were government creditors justly complaining of delay in the settlement of their claims, but that these arrears were greatly interfering with the regular business of the office, I gave the subject prompt attention, and am glad to report that by the vigilant efforts of the division, not only have these arrears of business been brought up, but at my request all transportation accounts have been transferred from the general accounting office and are now being regularly audited in the Fourth Division. This change will, I think, in securing a more prompt and efficient investigation by experts, result in a decided improvement.

To perform this service properly, however, the clerical force should be so increased that an examination of all the accounts may be had within a month after their return, and thus errors be promptly detected, instead of continuing

for months or years without a remedy.

Until recently, as you are aware, there has been no uniform system in the mode of procuring transportation—in the forms used, or in settling for the same; each quartermaster acting independently, adopting such as best suited his views or convenience—some being good and others materially defective, in furnishing no proper checks, and resulting in irregularity, confusion and much

loss to the government.

Perceiving this, and convinced that a uniform system in a business so complex and important, even if not perfect, was better than none, or than many various and conflicting ones, and seeing no reason why such uniformity was not attainable and applicable to every section of the country; also satisfied that in no other way could the government be protected from loss, or its officers made familiar with their duties, it became a primary object with me to secure such system as, while it should remedy patent defects, would at the same time be satisfactory to the transportation interests of the country.

This end has been, I think, to a great extent attained by General Orders No. 17, March 16, 1865, in reference to passenger transportation; by General Orders

No. 29, May 9, 1865, as to freight transportation, and by General Order No. 18 March 16, 1865, in reference to the settlement of accounts, copies of which are herewith transmitted, together with the forms and blanks adopted and used under such orders. The system is now in general operation with most satisfactory results, and I believe meets not only with the general approbation of government officers, but also of railroad companies and others furnishing government transportation.

There are still some defects which can only be corrected by a change in the regulations, which will probably be made whenever a revision occurs. Experience will also doubtless suggest further improvements which should be adopted

as their importance becomes obvious.

A table of distances between all important points in the country has been prepared, and other improvements made, which will result in a large saving of labor

and expense.

For such particular tabular statements as you may desire, I beg leave to refer to my successor in charge of the division, as at the present time the required reports of various officers of the department have not been returned to enable me to collect and furnish the same.

In conclusion, I believe the duties of the division are being satisfactorily performed, and am pleased to report that the officers and clerks have labored not only harmoniously, but with the most commendable zeal and fidelity for the public interest. Some of them, I think, are fully entitled to advancement, which I trust may be given them. To Mr. Wallace, chief clerk of the railroad division, I am indebted for many suggestions and valuable improvements. His observation and experience in railroad business, combined with his energy and devotion to his duty, render him a valuable assistant.

Very respectfully,

LEWIS B. PARSONS,

Brig. Gen. and Chief of Fourth Division, Q. M. G. Office.

Brevet Major Gen'l M. C. MBIGS,

Quartermaster General.

A true copy:

JOHN V. FUREY, Capt. and A. Q. M.

## No. 24.

OFFICE OF DIRECTOR AND GENERAL MANAGER
MILITARY RAILROADS OF UNITED STATES,

Washington, D. C., October 31, 1865.

GENERAL: I have the honor to submit the following brief statement of operations of United States military railroads for the year ending June 30, 1865.

A more full and comprehensive report will be made as soon as the necessary statistics can be compiled.

These operations were conducted in six different fields, as follows:

- I. Virginia.
- II. Military Division of the Mississippi.
- III. Georgia.
- IV. North Carolina.
  - V. Missouri.
- VI. Arkansas

#### L-VIRGINIA.

## The following lines were in operation July 1, 1864:

| Name of line.                     | Terminal       | stations.       | th in            |
|-----------------------------------|----------------|-----------------|------------------|
| Name of fine.                     | From—          | То—             | Length<br>miles. |
| Alexandria and Washington         | Alexandria     | Washington      | 7                |
| Alexandria, Loudon, and Hampshire | Alexandria     | Vienna          | 10               |
| Orange and Alexandria             | Alexandria     | Springfield     | 8                |
| Norfolk and Petersburg            | Norfolk        | Suffolk         |                  |
| Seaboard and Roanoke              | Portsmouth     | Suffolk         | 18               |
| City Point and Petersburg         | City Point     | Near Petersburg | ಕ                |
| Winchester and Potomac            | Harper's Ferry | Halltown        | 6                |
| Total                             |                |                 | 80               |

During the year the railroads from Alexandria and Norfolk have not borne a prominent part in extended military operations, but were used almost entirely for local purposes.

In the vicinity of Petersburg thirteen miles of new railroad were built to sup-

ply the army of General Grant during his siege of that place.

Upon the surrender of Petersburg, Richmond, and the army of General Lee, the Richmond and Petersburg railroad, twenty-one miles long, was immediately opened, also the line from Petersburg to Burkeville, fifty-two miles.

# Statement of total number of miles operated during year ending June 30, 1865

| V CP.  | Terminal stations.  |  |   |  |  |  |  |  |
|--|---|--|---|--|--|--|--|--|
| Name of line.  | From  | То   | Length<br>miles.                                    |  |  |  |  |  |
| Alexandria and Washington Alexandria, Loudon, and Hampshire Orange and Alexandria Manassas Gap Norfolk and Petersburg Seaboard and Roanoke City Point and Army Southside Richmond and Danville Winchester and Potomac Richmond and Petersburg Clover Hill Branch | Alexandria Alexandria Manassas Norfolk Portsmouth Pitkin Station City Point Manchester Harper's Ferry | Washington Vienna Rappahannock Piedmont Suffolk Suffolk Humphrey Burkeville Danville Stevenson Manchester Coal Mines | 15<br>51<br>34<br>23<br>18<br>13<br>62<br>140<br>28 |  |  |  |  |  |
| Total  |   |  | 430   |  |  |  |  |  |

Excepting the Winchester and Potomac railroad, which is still operated by this department, all these roads were turned over to the original owners or to the board of public works during or previous to the month of August last.

The largest number of persons employed in any month during the year was 4,489, in April, 1865; and the least number per month was 3,268.

The expenses during the year amounted to four millions nine hundred thousand (\$4,900,000) dollars.

#### II.-MILITARY DIVISION OF THE MISSISSIPPI.

At the commencement of the year the lines in operation were as follows:

| N Clim                            | Terminal stations. |                |                  |  |  |  |  |
|-----------------------------------|--------------------|----------------|------------------|--|--|--|--|
| Name of line.                     | From               | То             | Length<br>miles. |  |  |  |  |
| Nashville and Chattanooga         | Nashville          | Chattanooga    | 151              |  |  |  |  |
| Nashville, Decatur, and Stevenson | ∣ Nashville        | Stevenson      | 200              |  |  |  |  |
| Nashville and Northwestern        |                    |                | 78               |  |  |  |  |
| Chattanooga and Knoxville         | Chattanooga        | Knoxville      | 112              |  |  |  |  |
| Chattanooga and Atlanta           | Chattanooga        | Big Shanty     | 107              |  |  |  |  |
| Cleveland and Dalton              | Cleveland          | Dalton         | 27               |  |  |  |  |
| Rome Branch                       | Kingston           | Rome           | 17               |  |  |  |  |
| Memphis and Charleston            | Memphis            | Grand Junction | 55               |  |  |  |  |
| Total                             | i                  |                | 74               |  |  |  |  |

In August and September, 1864, the Nashville and Clarksville railroad, sixty-two miles long, was opened by order of Major General Sherman, to reach another line of water supply for the depot of Nashville.

By the capture of Atlanta, in August, the entire Chattanooga and Atlanta line, one hundred and thirty-six miles long, was opened, and for a short time trains were run a few miles south of Atlanta on the road toward Macon, Georgia.

Upon the advance of General Sherman toward Savannah, in November, the Chattanooga and Atlanta line was abandoned south of Dalton, Georgia, until after the surrender of General J. Johnston's army, when it was re-opened by order of Major General Thomas.

Some forty miles of this road were destroyed by General Hood in his great raid of October, 1864, and about the same distance, by order of General Sherman, upon his leaving Atlanta. All this damage was repaired by the construction corps, as well as that caused during the December campaign to the railroad near Nashville, amounting in the aggregate to about one hundred and thirty miles of new track.

The Knoxville and Bristol line was opened in the spring of 1865 to Carter's Station, one hundred and ten miles from Knoxville, and to within twenty miles of the Virginia line.

In West Tennessee the railroad was extended from Grand Junction to Tallahatchie river, one hundred miles southeast from Memphis, in August, 1864.

This line was abandoned, partially re-opened, again abandoned, and again re-opened, and still once more abandoned and re-opened, unt l, on the 20th day of May, 1865, it was finally re-opened to Grand Junction, and June 30th to Pocahontas, seventy-five miles east of Memphis.

The Mobile and Ohio road was opened in May, 1865, from Columbus, Kentucky, to Union City, Tennessee, twenty-six miles.

The following table shows the lines and distances upon each, operated during the year:

| Name of line.   | Terminal stations.   |   | ice in  |
|---|--|---|---|
|   | From   | То  | Distance<br>miles.  |
| Nashville and Chattanooga Nashville, Decatur, and Stevenson Nashville and Northwestern Nashville and Clarksville Shelbyville Branch Chattanooga and Knoxville Knoxville and Bristol Cleveland and Dalton Chattanooga and Atlanta Rome Branch Atlanta and Macon Memphis and Charleston Mississippi Central Mobile and Ohio | Nashville Nashville Nashville Nashville Chattanooga Knoxville Cleveland Chattanooga Kingston Atlanta Memphis Grand Junction Columbus, Ky | Shelbyville Knoxville Carter's Station Dalton Atlanta Rome Rough and Ready Pocahontas Tallahatchie river Union City, Tenn | 200<br>75<br>62<br>9<br>112<br>110<br>27<br>136<br>17<br>11<br>75 |

The expenditures during the year for these roads, including labor, materials

and supplies, in round numbers were seventeen millions of dollars.

All the lines embraced in this military division, since merged in the "military division of the Tennessee," were turned over in September, 1865, to the companies owning them before the war, in obedience to the executive order of August 8, 1865.

## III.-GEORGIA.

In December, a force of the construction corps, with some transportation men, were ordered from Tennessee to Savannah, Georgia, to operate such roads as General Sherman should require.

Before this force reached Savannah, General Sherman had left, on his march to North Carolina, and it was turned back from Hilton Head about the 1st of

February and sent to Newbern, North Carolina.

A few miles of railroad at Savannah were operated until July, for local military purposes, when they were surrendered to the companies, by order of the department commander.

## IV .- NORTH CAROLINA.

The first instalment of railroad operatives arrived at Morehead city on the 6th of February, 1865. At that date the railroad toward Goldsborough was in running order forty-four miles. At various times, as the country was occupied by the Union armies, the roads were opened, and on the 19th of April trains entered Raleigh. At that date there were in operation, as military railroad lines, the following:

| Morehead city to Goldsborough.  Wilmington to Goldsborough.  Goldsborough to Raleigh | 95  | 66 |
|--|-----|----|
| T'otel   | 999 | "  |

In rebuilding these lines 2,991 lineal feet of bridging was constructed, consuming 779,510 feet, board measure, of timber.

A wharf was built at Morehead city at a cost of \$32,086, with an area of 53,682 square feet, and employing 700,000 feet, board measure, of timber.

All the railroads in this State have been returned to the original owners.

The expenditures in North Carolina from February 6 to June 30, 1365, amounted to \$967,847 53.

## V.-MISSOURI.

In October, 1864, orders were received to have the bridges rebuilt which had been destroyed by the rebels on the main line of the Pacific railroad of Missouri and its southwestern branch. This work was completed April 1, 1865, at a cost of \$170,564 65.

## VI.-ARKANSAS.

The only line used in this State for military purposes is a portion of the Memphis and Little Rock railroad, between Duvall's bluff, on White river, and Little Rock, forty-nine miles long.

This did not come under control of this office until May 1, 1865. At that time it was in exceedingly bad order, and required large expenditures to make it capable of doing the work required of it. At this date it is still operated as a

military railroad line.

In the foregoing statements it is shown there was in operation within the last fiscal year the following aggregate number of miles of military railroad lines:

| •                       | 0 00 0                                  | •                                       |       |        |
|-------------------------|---|---|-------|--------|
| In Virginia             |   |   | 430   | miles. |
| In military division of | the Mississippi                         | • | 1,062 | 66     |
| In North Carolina       | • |   | 228   | 66     |
| In Arkansas             |   |   | 49    | 44     |
|                         |   |   |       |        |
| Total                   |   |   | 1.769 | 44     |

On these lines was the following quantity of rolling stock, including that captured from the enemy:

| Division or State.   | Locomotives.                         | cars.                                      |
|--|--------------------------------------|--|
| Virginia.  Military division Mississippi, Nashville Military division Mississippi, Memphis Military division Mississippi, Columbus  North Carolina. Arkansas | 216<br>21<br>2<br>2<br>2<br>29<br>10 | 2, 424<br>200<br>37<br>2, 661<br>262<br>98 |
| Total  | 330                                  | 3, 652                                     |

The above does not include the locomotives and cars built in the fall and winter of 1864, which, owing to the close of the war, were never sent to the

mads, but sold at the manufacturers' or at points where stored.

Of these there were thirty-five (35) locomotives and four hundred and ninety-two (492) cars of five feet gauge, designed for the military division of the Missispipi and North Carolina; fifty (50) cars of four feet eight and a half inch gauge, for Virginia and North Carolina; and nine (9) cars of same gauge used on the western railroads to transport five-feet cars from the makers to the Ohio river, making in all five hundred and fifty-one (551) cars.

Very respectfully, your obedient servant,

D. C. McCALLUM,

But. Brig. Gen'l, Director and General Manager of Military Railroads, United States. Per H. K. COOPER, in charge.

Brevet Major General M. C. MEIGS,

Quartermaster General U. S. A., Washington, D. C.

ALEXANDER BLISS,
Breet Colonel and Assistant Quartermaster, in charge of Fourth Division.

#### No. 27.

#### WASHINGTON CITY, D. C., February 2, 1865.

SIR: I have the honor to inform you that, in accordance with your orders, the 23d army corps, Major General Schofield commanding, has been transferred from Clifton, on the Tenuessee, to the Potomac.

Under the instructions of the Hon. C. A. Dana, Assistant Secretary of War, I left this city on the 11th ultimo to take the general supervision of the move-

Anxious, if possible, to comply with the wishes of the department and those of the Lieutenant General, in making it to Parkersburg by water, yet knowing by experience the extreme uncertainties of winter navigation upon the Ohio, I telegraphed on my departure to several trustworthy gentlemen intimately connected with the management of western railroads, who met me while en route to Louisville, and with whom I arranged for a quiet concentration of machinery. so that, if necessary, there could be, on twelve to twenty-four hours' notice, at either Cairo, Evansville, Louisville, or Cincinnati, sufficient to move the corps as it should arrive at either of those points, and yet in such manner as not to prove detrimental to the interests of the different roads in case the machinery was not required.

Arrangements were also made, through the commissary department, by which the comfort of the troops should be cared for by supplying, as often as once in each hundred miles of railroad transportation, in addition to their ratious, an abundance of hot coffee.

On arriving at Louisville and not finding despatches from Generals Thomas or Schofield, as was anticipated, advising me as to the amount of transportation required, or the time when the troops would be ready to move, on consultation with General Allen, it was deemed best to order, without delay, the assembling at Paducah (the mouth of the Tennessee river) of transports amply sufficient to make the required movement. This being done, by telegraph, I left Louisville the same evening (14th) and reached Paducah the following night, where, learning that Major General Schofield had, but a few hours previously, passed down the river, I proceeded at once to Cairo, and the next day, learning from him, by telegraph, that only transportation for ten thousand (10,000) men would be required, in addition to the boats already at the river, I returned to Paducah that night, ordered the boats, with convoy, to be in readiness as soon as possible, and started the next morning, at daylight, up the Tennessee.

At about 5 o'clock the same evening, (17th,) meeting General McLean, with a division of the 23d army corps, coming down on transports greatly overloaded, on communication with him it was deemed best that I should return to Paducah, sending up the river the transports accompanying me, under care of

Captain Arthur Edwards, assistant quartermaster.

After largely increasing at Paducah the transportation for General McLean's command, rendering the condition of the troops entirely comfortable for a long trip, this portion of the corps proceeded up the Ohio on the following morning, (18th,) and on the evening of the same day, having completed all necessary arrangements for the remainder of the troops as they should reach that place, I left, via Cairo, for Louisville by rail, and arrived there on the morning of the 20th in advance of any of the transports.

During the previous night the weather suddenly changed from the mild and genial temperature with which we had hitherto been favored, and the morning brought the coldest weather as yet experienced during the winter, so that, on arriving at the Ohio, I found the river so full of floating ice as to give serious apprehensions of our ability to proceed by boats even to Cincinnati. On consultation, however, with Major General Schofield, General Allen, and the best advised river men, I ordered forward the boats to Cincinnati, and telegraphed, as previously arranged, for the collection, at that place, of the necessary cars and machinery to be ready on the following morning to receive the troops as they arrived.

The river having rapidly fallen, over twenty (20) feet, rendered it impossible for our larger boats to pass above the "falls," producing thereby considerable detention, as we were obliged to transfer the troops to a smaller class of boats,

which could pass through the canal.

Everything progressing satisfactorily, I again took the cars on the evening of the 20th, and reached Cincinnati the following morning in advance of the transports, where I found all necessary preparations made to receive the troops on their arrival. During the same day (21st) about three thousand (3,000) men were disembarked, loaded on the cars of the Little Miami railroad, and started eastward.

In the afternoon a fog arose so dense as for more than thirty (30) hours to entirely prevent any movement of boats, and resulting in the detention of a

large part of the fleet for that length of time.

On the 22d, about four thousand (4,000) more troops were transferred from the boats to the cars of the Hamilton and Dayton railroad, and left for their destination. During the evening of this day the weather again greatly moderated, and being advised, by telegraph from Wheeling and Parkersburg, of an immediate resumption of navigation, I directed, on the morning of the 23d, that boats, containing from six to eight thousand troops, should take on board, as soon as possible, an ample supply of fuel and be ready to move up the river.

This completed, it was arranged with General Couch, commanding, that the transports should start early in the evening, (23d,) and one had already departed when there was again so rapid a change in the weather as to render it unsafe proceeding, and a boat was immediately despatched to bring back the transport which was on its way to Parkersburg, and all were ordered to remain

until morning.

During the 23d the movement by land was continued, and about four thousand (4,000) additional troops had been disembarked and transferred to the cars of the Little Miami railroad. On the morning of the 24th, the weather having greatly increased in severity, and my despatches from Parkersburg advising me that the river was so full of ice as to render navigation impracticable, I ordered the remainder of the troops to disembark and proceed via the Little Miami railroad, which, excepting some of the artillery and animals, was effected

on that and on the following day.

Owing to the embarrassments and delays on the Ohio Central—resulting from broken rails and machinery, caused by the uncommon severities of the weather, and by which cars were repeatedly thrown from the track, and several narrow escapes from serious disaster encountered—as well as from the difficulties of crossing the Ohio; I remained on the line from Columbus to Bellaire until the 31st, taking personal supervision of the transfer of the troops until the last car was loaded on the Baltimore and Ohio railroad and on its way over the mountains, when, at 12 m., I took the train and reached this city on the night of the 1st instant, where, on the following day, I found, upon the banks of the Potomac, the 23d army corps safely encamped.

The distance transported is nearly fourteen hundred miles, about equally divided between land and water. The average time of transportation from the embarcation on the Tennessee to the arrival on the banks of the Potomac was not exceeding eleven days; and what is still more important is the fact that, during the whole movement, not a single accident has happened causing loss of life, limb, or property, except in the single instance of a soldier improperly jumping from the car under apprehension of danger, by which he lost his life,

when, had he remained quiet, he would have been as safe as were his comrades of the same car.

After so many days of anxiety and suspense—a suspense and anxiety. I know, fully shared by yourself and many others-may I not congratulate you upon the complete and entire success of a movement the like of which. I think, has neither its parallel in this eventful war, nor, indeed, in the history of warfare: the only similar movement being that of the transfer of the 12th and 13th army corps of twenty-two thousand (22,000) men. (General Hooker, commanding,) from the Potomac to Chattanooga, two hundred (200) miles less in distance, and effected in the mildest autumn weather, in about the same time. with days, if not weeks, of preparation, and in which case the route was distinctly understood before the movement commenced. The difference between a movement under such circumstances and one under which the 23d army corps has been transported, with the greatly multiplied dangers and difficulties attending it, are thoroughly understood by all familiar with winter navigation and land transportation. The transfer of so large an army, with ample time and preparation, for so great a distance, even in summer weather, would, of itself, be a marked event; but when it is understood that not beyond four or five days had elapsed after the movement was decided upon in Washington before the embarcation of the troops had actually commenced upon the banks of the Tennessee, nearly fourteen hundred miles distant, and that, within an average of eleven days from the time of its embarcation, so large an army, with its artillery and animals, was quietly encamped upon the banks of the Potomac, and that the transfer has been made along rivers obstructed by fog and ice, over mountains during violent snow-storms, and amid the unusual severities of midwinter in a northern climate, with all the doubts, constant uncertainties and changes herein mentioned as to routes and points of transfer-at a period of the year, too, when accidents upon railroads arising from the breaking of ma chinery or rails in ordinary transportation are of frequent occurrence, many of a serious and fatal character having occurred during this time on other roads and when it is known that the comfort of the troops has been so carefully provided for, and the police of the different roads so thoroughly organized that, during the whole movement, not the least injury of person or loss of property occurred, with the exception of the soldier above alluded to, and that the condition of the troops is to-day in all respects as good for meeting the enemies of their country as it was on the day of their departure from the banks of the Tennessee-under such circumstances am I not justified in characterizing this movement as an event remarkable in design and successful in execution, the like of which has never before occurred, and as being most illustrative of the great physical advancement and resources of our country even in its present desolated and distracted condition, and showing its resistless power when harmonious and united?

I should be failing in justice not to record and call special attention to the means by which your orders have been successfully executed: I refer to the

managers of our railroads and river transportation.

The earnest efforts of those controlling the different lines of railroads used in making this movement have been most conspicuous. How many valuable officers and soldiers have been furnished to our army from this department of business is well known to yourself—a business commanding, as it does, a greater number, in proportion, than any other of the most energetic and enterprising portion of our citizens—men well adapted to military service by habits of command and prompt obedience, hardened by exposure, fertile in resources, vigorous and energetic in action, and accustomed to danger where prompt decision is required.

It is to this class of men that the government is largely indebted for many of its brilliant triumphs, and without whose services your order for the movement of the 23d army corps could not have been executed. Few persons are aware of the superior ability, energy, and unceasing watchfulness necessary, even on ordinary occasions, to secure the movement of so large a force over a long line of railroad; and fewer still appreciate the great increase of difficulties and dangers during such extraordinary severe weather as we have had for the last month to insure safety from accident and disaster. And while nothing that I can say will add to the reputation of gentlemen so well known to the community as are most of those who have been engaged in this movement, yet it is but just to place upon record the fact that these private citizens have spared no labor and omitted no efforts to accomplish the desired object; that from the highest official to the lowest employé days of anxious toil and nights of sleepless vigilance have conclusively proved that all were fully awake to the importance of the duty devolving upon them, and felt that intense interest which men alone feel who are thoroughly conscious of their personal responsibility for the lives of thousands and the success of an important enterprise.

The gentlemen to whom I allude are Wm. H. Clement, president, and E. W. Woodward, superintendent of the Little Miami railroad; D. McLaren, superintendent of the Hamilton and Dayton railroad; Thos. Lough, superintendent of the Steubenville and Indiana railroad; Hon. H. J. Jewett, president, and D. W. Caldwell, superintendent of the Ohio Central railroad; Jno. W. Garrett, president, and Wm. Prescott Smith, master of transportation of the Baltimore and Ohio railroad; all of whom I think are justly entitled to the thanks of the

government for the services they have rendered.

The circumstances I think render it not invidious that I should especially refer to the management of the Baltimore and Ohio railroad, where indomitable will, energy, and superior ability have been so often and so conspicuously manifested, and where such invaluable services have been rendered to the government—a road nearly four hundred miles in length, so often broken and apparently destroyed, so constantly subjected to rebel incursions that, had it been under ordinary management, it would long since have ceased operation. Yet notwithstanding all the difficulties of the severe winter season, the great disorganization of employés incident to a road thus situated, its most extraordinary curves, grades, bridges, tunnels, and the mountain heights it scales, it has moved this large force in the shortest possible time with almost the exactness and regularity of ordinary passenger trains, and with a freedom from accident that I think has seldom if ever been paralleled.

Much credit is also due to the boatmen of the west, who, with scarcely a day's notice, promptly and cheerfully furnished over forty transports for this service, and who have so often and patiently submitted to the seizure of their transports and effectively assisted in securing the success of our armies during the last four years. It has often fallen to my lot to witness the cool bravery and acts of daring of this class of men in the passage of batteries or the sudden and unexpected attack of bands of guerillas while navigating our western rivers; and Generals Grant and Sherman, with many others, will bear witness that none have shown greater firmness and resolution in danger or more reckless daring and disregard of personal safety, and I doubt not many of their deeds will live in history and tradition along the lines of our western rivers as have the stories and deeds of partisan chiefs of former times. It was by the services of such men that the government was enabled so rapidly to concentrate re-enforcements at Donelson and Shiloh; that with seven days' notice it was enabled to embark forty thousand men under Sherman in mid-winter for the movement against Vicksburg, and subsequently precipitate the same force upon and capture the post of Arkansas. It was their courage that piloted our transports past the batteries of Island No. 10, Vicksburg, and numberless other places along our western waters; and all who have seen the unblanched cheek and steady arm by which the pilot at the wheel or the captain on the hurricane roof have discharged their duties in hours of danger cannot fail to acknowledge that they justly deserve a page in the history of the events of this war.

I also with pleasure acknowledge the valuable services of Lieutenant Colonel A. J. Mackay, now chief quartermaster of the department of the Tennessee, a most energetic officer, under whose direction the troops were embarked on the Tennessee; also the important aid rendered by Captain J. V. Lewis, assistant quartermaster, an able officer, recently in charge of transportation at Cincinnati, who, at my solicitation, though he had tendered his resignation and was relieved from duty, again assumed his former position, labored incessantly, and rendered most valuable assistance in effecting the transfer at Cincinnati in the movement by rail.

I am also indebted to Captain Arthur Edwards, assistant quartermaster; Captain J. H. Wilson, assistant quartermaster; Captain A. C. Woolfolk, assistant quartermaster, and Captain Gus. Artsman, assistant quartermaster, for valuable

assistance at their different posts of duty.

Herewith I transmit copies of all orders, instructions, communications, and reports of the superintendents of the several railroads, forming a complete record of the movement.

I have the honor to be, very respectfully, your obedient servant,
L. B. PARSONS.

Colonel and Chief of Rail and River Transportation.

Hon. Edwin M. Stan'ton, Secretary of War

#### No. 28.

WASHINGTON CITY, October 15, 1865.

GENERAL: I with pleasure comply with your request, before leaving the service, by furnishing a concise report of my connexion with the department, and the events of interest which have transpired under my own orders or observation, and also by making such suggestions as I think may be of service in the future.

I must, however, state that, owing to the mode of reporting the transactions and auditing the accounts of the department now required by law and army regulations, by which a full analysis of the same cannot be made for from one to two years, it will be impossible at present to give those tabular statements showing the large transactions of the transportation branch of the service which would be both interesting and instructive; and my report must consequently be general in its character, leaving details and most of the exhibits to be furnished at some future period, when peace has given time for a careful examination and classification of the great mass of reports and documents accumulated during the progress of the war.

The subject of transportation in the conduct of war has always been one of primary importance, and the application of steam to transportation has perhaps as much modified the art of war as it has the pursuits of peace, and should, through its ability for more rapid concentration of troops and supplies at distant points, give greater vigor to a campaign and vast advantage to the party having superiority in this respect. Not only has the world never before seen such vast armies so suddenly and so easily created, but never has it witnessed such rapidity in the transit of those armies for long distances with their vast munitions and supplies. It is now practicable, on twenty-four hours' notice, to embark at Boston or Baltimore a larger army than those with which Napoleon won some of his most decisive victorics, and landing within three days at Cairo,

twelve hundred miles distant, there embark it on transports, and within four days more time disembark it at New Orleans, a thousand miles further, or two thousand two hundred miles from the point of departure. Boats could easily be gathered at Cincinnati, Louisville, and St. Louis, which could within a week precipitate two hundred thousand troops with all necessary munitions and supplies upon Cairo or Memphis.

Hence and from statements of various expeditions hereinafter given, it will be easy to see the great importance of the best possible management of our river and railroad transportation in order to a successful campaign, especially

when the theatre of war is so expanded as has been the present.

On entering upon the duties to which I was assigned by my superior officer, Major (now Brevet Major General) Robert Allen, in November, 1861, as chief of rail and river transportation at St. Louis, my first object was to introduce, as far as possible, such system as should combine uniformity with responsibility, and efficiency with economy, not then existing, owing to the confusion generally prevailing at the commencement of the war and especially in the western department, it being the period between General Frémont's and General Halleck's administrations.

Under General Frémont's orders the entire river transportation was performed by chartering boats, nearly all of those within the department being so employed, though we then only commanded the river as far south as Cairo. Satisfied on a cursory examination that this mode of conducting the service was as wrong in principle as it was extravagant in practice, that a very small proportion of the boats then in service were actually required, (many of them being either idle or unprofitably engaged, according to the caprice of officers in command,) with the approval of General Allen, I made temporary contracts by the 100 pounds or by the piece for government transportation, and discharged all boats from charter, with the multitude of employes connected therewith. The result was that half the boats were at once out of service and lying idle at the levee, while government transportation was not only performed at a less cost, but in a much more prompt and satisfactory manner. Subsequently, by authority of General Halleck, upon whose staff I had been placed and whose command then extended over almost the entire country west of the Alleghany mountains, I prepared a few concise rules and regulations, producing checks, introducing responsibility, and giving information as to the duties of officers connected with transportation. The change was immediate, and favorable beyond my own expectation. soon arose out of confusion; officers who had been improperly furnishing transportation were made accountable. Railroads which, in their anxiety to serve the country, had honored thousands of orders, ignorant as to their propriety or whether compensation would be made therefor, were highly gratified, and the service greatly improved in all respects. Soon after I made formal contracts by the piece or 100 pounds for all government transportation required on the Missouri and Mississippi rivers, so far as our authority extended, and as our armics opened new territory, like contracts were made until the government transportation between nearly all points under our control was performed in the same manner, with continued improvement and satisfaction both to government officers and the steamboat interests. The latter became satisfied with the change, inasmuch as under the former system boats were paid alike, whether faithful in their service or not, while under the new mode the energetic and industrious secured the advantages to which they were justly entitled.

When, upon my report of December, 1863, you issued General Order No. 221, December 9, 1863, placing the Cumberland and Ohio rivers under my control, I determined immediately to abandon the charter system, which up to that time had prevailed on those rivers, and though there was a general combination of the steamboat interests of the Ohio against me, I succeeded, after much labor and perplexity, in the reform; the result of which was, if possible, more satisfactory than it

had been on the Mississippi, and instead of one hundred and twenty-three (123) steamers reported as in service on the Cumberland in supplying General Rosecrans's army in the winter of 1862-'63, only sixty-six (66) were reported as required in supplying in a more satisfactory manner the same army combined with the large armies of Generals Grant and Sherman during the winter of of 1863-'64. As illustrative, I would state that one of the largest government contractors, who for two years furnished most of the forage for the army of the Cumberland, and amounting to millions of bushels annually, subsequently informed me that the same boats he had loaded the year before, as chartered boats, carried more than double the cargo, and received, transported, and discharged it in half the time. To the same point I would respectfully refer to the following extract from the report of Brevet Major General J. L. Donaldson, supervising quartermaster of the department of the Cumberland, viz:

"Colonel L. B. Parsons, in charge of western river transportation, St. Louis, Missouri, having become satisfied that the charter system was a vicious one generally, abrogated it, and made contracts for the delivery of supplies at Nashville by the 100 pounds, at an average of about 50 cents per 100. He experienced great opposition in changing the system, as the per diem paid well, and whether boats were working, or laying up, delaying along the rivers, or hurrying back and forward, as they should do, the pay was the same, and it was too lucrative to be willingly yielded. Colonel Parsons, however, carried his point, after strong opposition, and although I have not the data at hand, as Captain Winslow, my officer in charge of river transportation, is now out of service, I am satisfied that, by the change from charter by the day to service by the hundred pounds, it can be easily shown that the government saved one to two millions of dollars in its operations in this department alone."

I also beg leave to refer to a report recently received from Captain F. S. Winslow, late assistant quartermaster, and a most efficient and valuable officer, to whom General Donaldson refers in his report above; a copy of which is herewith transmitted, and from which I make the following extract:

"The following condensed statement will show you the amount of work done during the season of navigation at Nashville, from February 1, to May 27, 1864:

| Months.                  | Number of steamboat arrivals                    | Amount, in tons, of freight discharged at Nashville. |
|--------------------------|---|--|
| February March April May | 178<br>213<br>158 and barges.<br>65 and barges. | 35, 860<br>62, 666<br>44, 029<br>15, 461             |
| Total                    | 614   | 158,016  |

<sup>&</sup>quot;Although the figures I shall now present will appear almost fabulous, yet I am honestly convinced they are too low. I wish to establish the difference of cost of the above 158,016 tons if it had been transported on chartered vessels instead of, as it was, on boats contracted at a given price per 100 pounds.

"From all data it is sufficiently established that freight carried on chartered boats never cost the government less than \$1 50 per hundred pounds.

<sup>&</sup>quot;The cost for transporting the above 158,016 tons would consequently have reached the sum of \$4,740,493. The contract price under which the stores were actually transported ranged at from fifty to sixty cents per 100 pounds. Taking the outside figure, the transportation cost the government the sum of

\$1,896,192. Consequently the change from the charter to the contract system saved the government the enormous sum of about three millions of dollars.

"At the same time the extra expense incurred by me in single cases, when want of levee-room compelled me to keep boats waiting above the time allotted them for discharging, amounted, during the whole season, and for all the boats, to  $50\frac{5}{34}$  days of demurrage, which, at an average of \$225 per day, amounts to \$11,300.

"To you belongs the credit of having accomplished such great results; to me the satisfaction of having supported you to the utmost of my ability; and I remain, with sincere considerations of respect.

"Truly, your obedient servant,

# "F. S. WINSLOW, "Late Captain and Assistant Quartermaster."

I would also call attention to this report, as illustrating the large transactions of this department, by showing the freight transportation service upon a small river, only generally navigable by a light class of boats for a brief period of the year, troops having been transported by the Louisville and Nashville railroad.

In further proof of the correctness of the policy I have pursued in performing the government business, so far as practicable, under contract with private parties, by the 100 pounds or the piece, I would respectfully refer to various contracts made by me, or under my instructions, during the war, copies of which I transmit herewith, and by which it will be seen that in the early part of the war the cost of the transportation of troops was only from two to three mills per man per mile, or an average of \$1 05 per man from St. Louis to Memphis—a distance of 450 miles: the cost of moving an army of 20,000 men, with its officers and baggage, the same distance, being not exceeding \$25,000, while the transportation of stores and animals was performed at like reduced rates. And it will also be seen, that even toward the close of the war, when gold was from 200 to 280, the cost of moving troops was, on an average, but about one-third of one cent per man per mile; the cost of moving a soldier from St. Louis to New Orleans, a distance of 1,250 miles, at the present time being but \$3 621, and that of an army of 20,000 men, with its officers and baggage, not exceeding \$85,000.

To one familiar with the large expense of transportation upon southern rivers and the danger constantly incurred in their navigation from rebel batteries and guerillas, I think these rates will be regarded as much lower than the service could ever have been performed by the government, and that there can be no doubt, as a general rule, that it is the policy of the government to secure its transportation by contract with private parties, rather than by attempting to perform it by its own boats and employés. When boats have been required for post service for a long period of time, I have, as a general rule, purchased them; and where large expeditions were to be organized for brief service, I have seized or chartered them, as the case might require, it being impossible to make contracts, owing to the indefiniteness of the service.

The extent and expense of the transportation of the Mississippi and its tributaries has been greater, I apprehend, than is generally supposed, engaging, as it has, a large portion of the three hundred and fifty steamers and hundreds of barges navigating those rivers; and though, for reasons already given, I cannot now furnish the exact figures, yet some idea of its magnitude may be seen from the following statement of the amount of transportation furnished at St. Louis,

Missouri, during the fiscal year ending June 30, 1863, as per report of Captain Charles Parsons, in charge of transportation at that point:

|   | Railroad.   | River.  | Total.  |
|---|---|---|---|
| Subsistence, ordnance, quartermaster, and medical stores pounds. Troops number. Horses and mules do. Cattle do. Wagons and ambulances do. Cannon and caissons do. Locomotives and railroad cars do. Bricks do. Lumber feet. Shingles M. | 153, 102, 100<br>193, 023<br>47, 963<br>2, 196<br>1, 873<br>196<br>178<br>8, 000<br>2, 314, 619 | 337, 912, 363<br>135, 909<br>34, 718<br>23, 353<br>2, 475<br>78 | *491, 014, 463<br>322, 932<br>82, 681<br>25, 540<br>4, 348<br>274<br>178<br>8, 000<br>2, 314, 619 |

\*Equal to 245, 507 tons and 463 pounds.

This, it must be borne in mind, however, is but the report of a single, though the most important, shipping point in the Mississippi valley. For a correct estimate we must add to this the transportation of each quartermaster at Pittsburg, Cincinnati, Louisville, Cairo, Memphis, New Orleans, and the many other points on the upper and lower rivers, and still further must be added all the transportation on boats owned by or under charter of the government, and at times numbering more than one hundred.

Again, its importance may be seen by considering that the large armies of Generals Grant, Sherman, Rosecrans, Banks, and Steele, on the lower rivers, and of Sully and Sibley, on the upper Missouri and Mississippi, have been almost exclusively dependent upon our river transports for their re-enforcements and

immense supplies.

On the 2d day of October, 1863, there were requisitions in Captain Parsons's office at St. Louis for the immediate transportation of over six thousand five hundred mules, horses, and cattle, six hundred wagons, and about one thousand tons of other freight, to General Banks's command, at New Orleans, twelve hundred and fifty miles distant; also, for over four thousand like animals to Memphis, Vicksburg, or Little Rock, more than three thousand tons of commissary and quartermaster stores to the same places, with considerable requisitions for Fort Leavenworth and other points on the upper Missouri and Mississippi. So pressing was the demand for General Banks, that he had detailed an officer to urge forward his requisitions that his movements might not be delayed, while the Memphis requisitions were urgently demanded in order to enable General Sherman to hasten to the support of General Rosecrans. To have transported these ten thousand five hundred animals, six hundred wagons, and four thousand tons of supplies, not to speak of ordinary daily requisitions for transportation, which were always large, required at the very low stage of the river from forty to fifty boats.

To appreciate the difficulties of performing this service, it should be remembered that a large proportion of this great network of twenty thousand miles of river navigation, watering the great States of this valley, was for a long period either entirely under the control of the enemy, or so situated that its navigation was

liable at any moment to be obstructed thereby.

From Brownsville, the head of navigation on the Monongalela, in the State of Pennsylvania, via Pittsburg, down the Ohio to Cairo, up the Mississippi to the Missouri, thence to Fort Benton, the head of navigation upon the Missouri, a distance of 3,500 miles, the south or west side of these rivers has, during the war, been constantly subject to incursions by the rebels or Indian savages,

instigated by them to hostility, while the 400 miles of the Tennessoe, 300 miles of the Cumberland, 350 miles of the White river, the 650 miles of the Arkansas to Fort Gibson, 150 miles of the Yazoo, 620 miles of Red river, and the 1,150 miles of the Mississippi below Cairo, were long under their entire control.

At the commencement of the war the government held no point south of Cairo, and all southern rivers were blockaded until the fall of Forts Henry and Donelson, in February, 1862, which opened the Tennessee and Cumberland and also the Mississippi to Island No. 10. The fall of Island No. 10 and Corinth, in the spring of 1862, led to the fall of Memphis and opened the river to that place; but it was not until July, 1863, after the capture of Vicksburg, that the Mississippi, from Cairo to New Orleans, was at all passable for our transports, and even to May last the enemy claimed to hold most of those rivers by his movable batteries and roving bands of guerillas, so as to prevent their navigation being of any practical advantage. It should further be recollected that the rebel government have had an extended and effective organization, under the direction of a cabinet officer, for the sole purpose of the destruction of our transports, offering unparalleled rewards for the success of miscreants in this nefarious business, which, with the facility of modern inventions, has often been effected with ease and impunity.

The means of transportation on all these rivers being of a similar character, have been generally available for service at any point. Those upon the Allegheny, the Illinois, the St. Peters, or the Yellowstone this week, might be upon the Cumberland, or the Tennessee, the Yazoo or Red rivers next week; those now loading at Pittsburg, Cincinnati, and Lonisville could, within a few days, be at St. Louis, Memphis, New Orleans, or Mobile, doing equally useful service,

though changed thousands of miles in their location.

The principal demand for water transportation during the war has been for the Cumberland, the Tennessee, lower Mississippi, White, Arkansas, and upper Missouri rivers, and for which the supply has been furnished almost entirely from St. Louis. Cincinnati, or Louisville.

In addition to the ordinary transportation of soldiers, their munitions and supplies, large expeditions have at various times been fitted out, to the most

important of which I will briefly allude.

The first movement by water after the commencement of hostilities on the western waters was that of about two thousand men, under the command of General Lyon, who embarked on four boats at St. Louis, on the 15th of June, 1861, and proceeded up the Missouri in pursuit of General Price, a pursuit resulting in the battle and victory of Boonville on the 17th of the same month.

On the 1st of August following, about four thousand troops embarked upon eight boats—"the great fleet," as it was termed in the papers of the day—under command of General Frémont, and proceeding down the river, landed at Cairo

and Bird's Point on the 3d.

On the 6th of November following, three thousand men, under the command of General Grant, embarked on board transports at Cairo, and proceeding down the Mississippi, landed on the following morning, attacked and fought the enemy at Belmont, opposite Columbus, and returned to Cairo the same day, having

accomplished the object of the expedition.

On the 2d and 3d of February, 1862, General Grant embarked fifteen thousand troops on transports at Cairo, proceeded to Paducah, and on the day following advanced up the Tennessee in connexion with the navy, under Commodore Foote, capturing Fort Henry on the 6th of the same month. Soon after six regiments, under the orders of General Grant, re-embarked, moved down the Tennessee and up the Cumberland a distance of 110 miles, where, with the troops proceeding overland from Fort Henry, they captured Fort Donelson on the 12th.

On the 13th of April, 1862, under instructions of General Halleck, I sent

about thirty transports, with numerous barges, to New Madrid, upon which the army of General Pope, sixteen thousand strong, including four regiments of cavalry, ten batteries of artillery, and their animals, (numbering in all nearly five thousand,) were embarked on the 15th and proceeded down the river opposite Fort Pillow, then in possession of the rebels, which place they left on the 18th, and passing up the Mississippi, Ohio, and Tennessee, a distance of 475 miles. arrived at Pittsburg landing on the 21st to re-enforce our army in its advance on Corinth.

Under like instructions from General Halleck, in April, 1862, I sent transports to Cape Girardeau, where the brigades of Generals Asboth and Jeff. C. Davis, consisting of over eight thousand troops, were embarked on their arrival from the interior of Arkansas, and two days thereafter reached Pittsburg landing, 335 miles distant, for a like re-enforcement of the army moving on Corinth.

On the 11th of December, 1862, I received orders from General Allen, at St. Louis, under a telegraphic despatch from General Grant, dated December 9, near Oxford. Mississippi, requiring sufficient transportation to be at Memphis by the 18th to move General Sherman's army of about 40.000 men, including cavalry, artillery, and animal transportation, for an attack on Vicksburg. being mid-winter, when there were not exceeding eight boats suitable for the purpose in the harbor of St. Louis, and during a period of great scarcity of fuel, it was deemed impossible to comply with the order; but by sending to various points, taking all boats arriving, and by seizing all private coal in the city, the necessary transportation of between seventy and eighty boats was secured and placed in readiness at Memphis, 450 miles from St. Louis, on the evening of the 18th. Within forty hours thereafter the army was embarked, the boats fuelled, and the fleet on the way to its destination, where, at the mouth of the Chicksaw bayou, on the Yazoo river, five miles in the rear of Vicksburg. the army rapidly disembarked on the 26th of December, 1862, and at once moved on the enemy's works.

After two days' gallant though unsuccessful fighting, on the orders of General Sherman I prepared eleven of the largest transports, by protecting the boilers and machinery with bales of hay, to move General Steele's command of thirteen thousand men for a night attack upon the strong fortifications at Haines's bluff, on the Yazoo. The order was executed and the command on board within twelve hours after it was given; but owing to a fog the movement was rendered impracticable, and the next evening, the 31st of December, 1862. at about four o'clock of one of the shortest days in the year, I was directed by General Sherman to embark the whole army in the shortest possible time, as it was under orders to leave its position three m les inland, march to the shore. and embark without delay. Many of the transports had at the time left their positions and were scattered for miles in procuring fuel, or were in use for hospital and other purposes; yet they were again brought together, arranged in proper order, and the whole army, with all its transportation and supplies, embarked before eight o'clock the next morning without the loss of a single animal, gun, or a pound of stores brought to the shore, and left the river free from accident or loss of a single life from the advancing enemy.

Of the work of such a night no one can have any proper conception who was not on the ground, or is not intimately familiar with similar military movements; and I question if a like speedy and safe embarcation of so large an army in the face of a victorious enemy was ever before effected under any commander.

On reaching the Mississippi the expedition, under Major General McClernand, who there assumed command, moved north to the mouth of White river, thence through the "Cut-off," up the Arkansas, at an extremely low stage of the river; and on the 9th of January, having moved nearly three hundred mi'es from the Yazoo, notwithstanding the great difficulties of procuring fuel, was again disembarked near Arkansas Post, and, in connexion with the navy, surrounded, at-

tacked, and carried the enemy's elaborate fortifications at that place, captured nearly seven thousand prisoners with all their supplies, destroyed their works, despatched the prisoners northward, re-embarked within five days from the time of landing, again moved southward, and soon after landed opposite Vicks-

burg to commence the celebrated siege of that place.

In the month of March, 1863, on the orders of General Grant, I despatched about thirty small boats to Helena for a movement upon the rear of Vicksburg. to be made by opening a passage during the high water of the Mississippi through the levec near Helena into an old channel termed "Yazoo Pass." troops composing the expedition—numbering about ten thousand men, under command of General Ross-entered the Pass upon twenty-two boats and proceeded through Moon lake, Coldwater and Sunflower rivers to near Fort Pemberton, on the Sunflower at its junction with the Yazoo—a distance of two hundred and seventy miles from the Mississippi. The expedition occupied about a month, and was one of the most difficult and dangerous of the war, owing to the extreme narrowness and irregularity of a channel constantly obstructed by overbanging or fallen trees, and often passing amid dense forests well adapted to the operations of guerillas. Through the cool bravery and energy, not more of our troops than of the officers and men connected with the transports, all the boats engaged in the expedition returned to the Mississippi, though many of them in a greatly damaged condition.

In 1863, the Indians being very troublesome on the Missouri and upper Mississippi, it was decided by the government to send thither the largest Indian expedition ever fitted out. The expedition consisted of about five thousand men, with several thousand tons of stores, under the immediate command of Generals Sully and Sibley—General Pope commanding the department—and were required to be transported nearly a thousand miles up the Mississippi and its tributaries, or from one thousand five hundred to two thousand two hundred miles up the Missouri and Yellowstone, which, considering the difficulties of navigation and the wilderness through which the expedition had to pass, was performed with great success. In the following year several tons of supplies

and a large number of troops were sent to the same destination.

Thus it will be seen that while the government was in a life-and-death struggle with millions of rebels at the south, it was at the same time carrying on the most vigorous and extensive Indian war in which it had ever been engaged, at a distance of thousands of miles to the northwest along the tributaries of the Mississippi and amid the wilderness of the upper Missouri, the supplies

and transportation for which were furnished from St. Louis.

In June, 1863, General Burnside, then in central Kentucky, being ordered with his army, consisting of ten thousand men, including artillery, to re-enforce General Grant before Vickeburg, was transported rapidly by rail through a part of Kentucky and Ohio, and across Indiana and Illinois to Cairo, where I had provided transports upon which his army embarked as it arrived, and within four days reached its point of destination over a thousand miles from the point of departure. After the fall of Vicksburg the same army corps, with about six thousand New England troops, whose term of service had expired, were returned to Cairo upon transports sent for that purpose, and proceeded east by rail, while at the same time our transportation facilities were largely taxed in the movement of about thirty thousand men of General Grant's army, who were proceeding to and from their homes on furlough.

In the autumn of 1863 the army of General Hooker, consisting of the 12th and 13th army corps, of about twenty-two thousand men, was moved from Washington through Maryland and Virginia by the Baltimore and Ohio rail-road; thence through Ohio and Indiana to Louisville, Kentucky; thence to Nashville and Chattanooga, a distance of twelve hundred miles, to re-enforce the army of General Grant at that place. The particulars of this movement I

cannot give, as I was not connected therewith, though it was conducted with

great rapidity and success.

In January, 1864, the command of General A. J. Smith, consisting of seven thousand troops, being embarked upon seventeen transports at Columbus, Kentucky, proceeded south six hundred miles to Vicksburg, where it joined the celebrated expedition to Meridian, Mississippi, under the command of General Sherman, and on its return, being increased to ten thousand men, was again embarked on eighteen transports and proceeded down the Mississippi and up Red river to Fort De Russey; after capturing which, the command re-embarked and proceeded to Alexandria, where it was soon after joined by the army of General Banks. Other boats were also sent up from New Orleans for the expedition of General Banks into the Red river country. For an account of both which last movements I would respectfully refer to the annual report of Captain Welch to the Quartermaster General, of date December 31, 1864, and also to the memorandum recently furnished me by Captain Welch; copies of which are herewith transmitted.

In the fall of 1864, during Price's last march into Missouri, the army of General Mower, consisting of seven thousand cavalry and light artillery, was, on the 4th of October, on their arrival at Cape Girardeau from the interior of Arkansas, embarked on forty small transports under the direction of Captain L. S. Metcalf, assistant quartermaster, and rapidly proceeded up the Mississippi and Missouri to Jefferson City, a distance of 325 miles. During the same time Captain Metcalf transported the 16th army corps, sixteen thousand men, Major General A J. Smith commanding, from Jefferson barracks to Jefferson City. Owing to the extreme low water of the Missouri these movements were made with great difficulty, but fortunately without loss of life or any serious accident.

Subsequently, after the retreat of General Price towards Arkansas, and on the advance of the rebel General Hood into Tennessee, the 16th army corps was rapidly embarked on twenty-seven steamers, by Captain Metcalf, and reached Nashville, a distance of 636 miles from Jefferson City, just in time to take a brilliant and important part in the great battle of Nashville. For the particulars of these movements I would respectfully refer to the report of

Captain Metcalf, a copy of which is herewith transmitted.

On the 5th and 6th of February last, the 16th army corps with its artillery, consisting of about sixteen thousand men, with five thousand of Wilson's cavalry, together with their horses, were embarked on the Tennessee river at Eastport, Mississippi, under the direction of Colonel A. J. Mackay, chief quartermaster of the department of the Cumberland, on forty-three transports and seven towboats, with barges, assembled there by Colonel Arthur Edwards. Leaving that point on the 7th, the fleet passed down the Tennessee, Ohio, and Mississippi to Vicksburg, the point of destination, where it arrived the 15th of the same month. Most of the army subsequently re-embarked on the 18th for New Orleans and reached that point on the 21st, a distance of 1,335 miles from the point of departure, and in fourteen days after embarcation on the Tennessee, including five days' detention. During the war there were numerous other expeditions by water, consisting of from one thousand to twenty thousand troops moving from different points, greater or less distances, on the Mississippi or its tributaries, to which I do not particularly allude, though some of them were important and interesting.

Early in January, 1865, General Grant desired the presence of the 23d army corps, then at Eastport. Mississippi, before making his great movement about Richmond. He hesitated ordering it, however, under the apprehension that owing to the period of the year and the severe weather, it would be impracticable to transport so large an army that distance through a northern climate, and over the mountains in sufficient time to answer his purpose, from forty to sixty days being considered as the shortest period in which the movement could safely be

effected. It was finally decided to make the attempt, and on the 11th day of January, under the orders of the Secretary of War, I proceeded to the Tennessee and took the general charge and supervision of the movement, which resulted in the transfer of the corps, consisting of twenty thousand men, with all its artillery, and over a thousand animals, from the Tennessee river to the city of Washington, a distance of nearly 1,400 miles, in the month of January, during the severest weather of the winter, and over rivers and mountains blocked with snow and ice, in an average time of eleven days, less than seventeen days having elapsed between the embarcation of the first troops on the Tennessee to the arrival of the last in Washington, without the loss of property or a single life—a movement characterized by the Secretary of War as the most remarkable and successful of its kind in history, and for a full account of which I would respectfully refer to my report to the Secretary of War on the subject, a copy of which is herewith transmitted.

I conclude this branch of the subject by referring to the great movement of troops from Washington on the disbanding of the armies after the capture of Richmond. By reference to the report of Captain Benjamin Burton, assistant quartermaster, a copy of which is herewith transmitted, it will be seen that during the months of June and July last 233,300 troops, 27,000 horses and mules, and over 2,000 tons of baggage were despatched northward, leaving Washington by the Baltimore and Ohio railroad alone. Of this number, it will be seen, by a report of Captain Hunt, assistant quartermaster, who was in immediate charge of the movement by river, a copy of which is herewith transmitted, that 96,796 of these troops and 9,896 animals, passing over the entire length of the Baltimore and Ohio railroad, a distance of over 400 miles, were embarked on the Ohio river at Parkersburg upon ninety-two boats within twenty-eight days, and at a period of extremely low water, the river not averaging on the bars over 26 to 34 inches. Of these troops, over 70,000 were transported by water from Parkersburg to Louisville, Ky., 440 miles; 7,000 to St. Louis, Mo., 1,043 miles; and the remainder to Cincinnati, Ohio, or its immediate vicinity, 300 miles. It will be further seen. from Captain Hunt's report, that this large shipment was made without a single accident or loss of life; and that the estimated cost of the movement by water was \$328,205, being an average cost of \$3 40 for each soldier.

In the autumn of 1863, after the battle of Chattanooga, it being deemed necessary for the protection of East Tennessee, and for the transportation of supplies, that a number of boats should be immediately placed on the upper Tennessee, and it being impracticable to procure them from the Ohio, owing to the impossibility of passing "Muscle Shoals," Captain (now Brevet Colonel) Arthur Edwards, assistant quartermaster, under your personal directions, opened a boatvard in the woods near Bridgeport, below Chattanooga, and rapidly constructed thirteen boats, four of which were partially iron-clad, and which, for lightness of draught and adaptability to the ends designed, have, I am confident, been nowhere surpassed during the war, and rendered most valuable and efficient service. When it is known that Colonel Edwards had neither mechanics nor material at hand, that all the machinery and most of the other material had to be manufact..red on the Ohio, or at St. Louis, and be transported six to eight hundred miles over military roads already greatly overtaxed, I think the construction of such a fleet in so short a time may well be regarded as worthy of record among the remarkable incidents of the war. For a particular account of this service I would respectfully refer to the report of Colonel Edwards, a copy of which is herewith transmitted.

I had hoped to be able to present herewith a statement of all boats and property destroyed or lives lost upon the western rivers during the last four years, but owing to the extent of the subject, the discrepancy in statements, and the failure to receive necessary reports from officers charged with boats or property destroyed, I have not been able to satisfactorily complete the record, and must

defer it to a future day for a supplementary report. Sufficient, however, has been ascertained to show that the destruction of life and property has, notwithstanding the war, been unprecedentedly small, the loss of government property amounting to an extremely light percentage of insurance upon the large amount of stores transported. For the first three years of the war, while I was in charge of river transportation at the west, there was no accident to any boat in government service resulting in any material loss of life.

The three principal accidents have occurred within the last six months of the

last fiscal year, as follows:

First. The steamer Eclipse, destroyed at Johnsonsville, Tennessee, January 27, 1865, by the explosion of her boilers, and resulting in the loss of twenty-seven soldiers killed, and seventy-eight more or less injured, which is believed

to have been occasioned by the use in an emergency of an unsafe boat.

Second. The destruction of the steamer Sultana on the Mississippi river, near Memphis, on the 27th of April last, also occasioned by the explosion of her boilers and burning of the boat, and resulting in the loss of over twelve hundred officers and soldiers—a loss greatly increased, I think, by an improper and unnecessary overloading of the boat. A strict investigation of the circumstances connected with this accident is now progressing under the direction of the Secretary of War.

Third. The sinking of the steamer Kentucky on the Red river, in the month of June last, which was attended with the loss of a number of paroled rebel soldiers, the exact number of which is not yet known, though believed not to

exceed thirty lives.

I would respectfully submit whether the adoption of a general rule, in the case of such accidents, that an immediate and strict examination by court-martial or military commission should be had, would not tend to produce a greater degree of caution on the part of officers having boats under their control, and be more satisfactory to the public by fixing the blame upon the parties responsible; or, if resulting from causes beyond the control of human agencies, by relieving the

officers and department from responsibility.

When we consider the great extent of western river navigation, the many dangers incident thereto, and the frequent occurrence of accidents from collisions, fires, and other causes in time of peace, often resulting in great loss of life; when, too, it is known that boats have been frequently ordered into service in great emergencies by officers ignorant of their safety or fitness for the duty required, and often greatly overloaded; still further, when it is recollected that thousands of miles of this navigation have been along rivers the banks of which, except at a few fortified points, have been in possession of the enemy, where batteries or guerilla bands were almost daily brought into action for the destruction of transports—I repeat, when these facts are considered, I think it will not only appear extraordinary that so few accidents and losses have occurred, but remarkable that navigation under such circumstances could be at all maintained.

Herewith I transmit a tabular statement of all boats, barges, and other means of transportation owned by the government on the 30th of June, 1865, on the Mississippi river and its tributaries, numbering one hundred and fourteen boats propelled by steam, and four hundred and eighty-six barges, nearly all of which have, under your orders, been already sold at very satisfactory rates, and a stop put to the large daily and unnecessary expense of keeping them in service. By the 1st of December next there will, I trust, be no government boats in service upon our western rivers.

Thus far I have spoken chiefly of river transportation, not because of its greater magnitude or importance, but because of the greater danger and difficulty attending its management. Our railroads being large established corporations, and generally controlled by men of superior business capacity, system and order were promptly introduced, and by the very liberal arrangements made with all the

roads of the country in May, 1861, by which it was agreed that the transportation should be performed at prices fixed quite below ordinary rates, and which have continued to the present time, notwithstanding the great advance in the cost of labor and general management, the business has progressed with an economy and promptness eminently satisfactory. I think it but just to say that no portion of the community have been more ready to respond to the wants of the government, more willing to make sacrifices, or labored with a greater earnestness and efficiency in the suppression of the rebellion, than have our railroad proprietors and managers. To them, I think, the acknowledgments of the government are justly due, and that it has during the present war been repaid many times over for all expenditures ever incurred in the construction of railroads. The amount of service performed has been enormous, and only equalled by the magnitude of the war, in all its aspects. The wonderful capacity of our railroads for great and speedy movement of large armies has been well tested in the movement of the 9th army corps, under General Burnside, from central Kentucky to Vicksburg: the transfer of the 12th and 13th army corps, under General Hooker, from Washington to Chattanooga; of the 23d army corps from the Tennessee to Washington, and the movement of over two hundred and thirty thousand (230,000) men from Washington on the recent disbanding of the armies in June and July last.

While thus generally acknowledging the valuable services of the railroads of the country, I do not think it invidious to especially allude to those roads which, though within the immediate seat of war, surrounded by enemies, and subject to constant destruction, have still continued their operations, and been managed with unparalleled energy and ability by the officers and companies controlling them, thereby rendering invaluable services to the government. I refer to the Baltimore and Ohio, the Kentucky Central, Louisville and Nashville, Iron Moun-

tain, Pacific, North Missouri, and Hannibal and St. Jo. railroads.

Nowhere have the irrepressible energy, will, and fearlessness of danger of our people been more clearly illustrated than in the conduct of those controlling

and operating these lines of railway.

I have made no allusion herein to the military railroads of the country, or rather those which have been captured from the enemy and operated directly by the government, the management of these roads having been placed by the Secretary of War under the special control of Brevet Brigadier General D. C. McCallum, whose eminent ability and success in the discharge of the duty are well known to the public, and who will, I suppose, make a report in reference thereto.

In this brief and unsatisfactory resume I trust I have said enough to show, to some extent, the duties devolving upon this branch of the service, and that the efforts made by its officers to discharge them have been attended with sufficient success to entitle them to a share of credit in the great results. It is at least grati-ying to know that it is on record from such high authority as Lieutenant General Grant, Major General Sherman, and Major General Allen, "that the administration of this branch of the service has been eminently successful; that no military movement in the west has failed or faltered for lack of transportation, and that the wants of the armies in the field have been anticipated and met with alacrity and despatch"

In conclusion, I take great pleasure in calling especial attention to the names of officers more particularly engaged in the transportation service, through whom your orders have been executed and these results attained; men who have been ever at their posts, prompt in the discharge of duty, and whose ability, integrity and efficiency have reflected credit on the department, and

honor upon the cause in which they have been engaged, viz:

Brevet Colonel Arthur Edwards, assistant quartermaster, who, since the execution of your orders on the upper Tennessee, has been engaged, as assistant, in the general supervision of the transportation of the west.

Digitized by Google

Captain Charles Parsons, assistant quartermaster, who for nearly two years conducted the vast and varied duties of the transportation office at St. Louis, with eminent success.

Captain L. S. Metcalf, assistant quartermaster, formerly in charge of trans-

portation at Louisville—now, and for the past year, at St. Louis.

Captain F. S. Winslow, assistant quartermaster, formerly in charge of transportation at Helena and Nashville.

Lieutenant Colonel G. L. Fort, assistant quartermaster, long in charge of transportation at the important posts of Vicksburg and Memphis.

Captain James Brooks, chief quartermaster for the ram fleet and marine

brigade.

Captain A. C. Woolfolk, assistant quartermaster, in charge of transportation at the important post of Cairo during nearly the whole war.

Captain J. V. Lewis, assistant quartermaster, for nearly two years in charge

of transportation at Memphis and Cincinnati.

Lieutenant Colonel H. T. Noble, assistant quartermaster, successor to Cap-

tain Winslow, in charge of transportation at Helena, Arkansas.

Lieutenant Q. J. Drake, acting assistant quartermaster 12th Illinois infantry, assistant officer of transportation at Paducah and St. Louis, and subsequently my assistant in the charge of the Fourth Division of the Quartermaster General's office.

Captain T. B. Hunt, assistant quartermaster, in charge of transportation at Cincinnati, Ohio.

Lieutenant S. H. Stevens, acting assistant quartermaster, in charge of transportation at Nashville during the last year.

Captain H. Raisin, assistant quartermaster, at Smithland, Kentucky.

Captain Benjamin Burton, assistant quartermaster of transportation at Washington city.

Captain F. W. Perkins, in charge of transportation at New Orleans.

Captain D. N. Welch, assistant quartermaster at St. Louis.

Captain L. S. Van Vleit, now quartermaster of transportation at Memphis.

Captain C. H. Gaubert, in charge of transportation at Duvall's bluff, Arkansas, for the last year.

Captain James R. Del Vecchio, assistant quartermaster at Louisville, Kentucky.

Captain N. J. Rusch, assistant quartermaster, in charge of transportation at Vicksburg.

Captain Frank Ernst, assistant quartermaster, recently in charge of transportation at Louisville, Kentucky.

Very respectfully,

L. B. PARSONS.

Brigadicr General, and Chief of Rail and River Transportation.

A true copy:

JOHN V. FUREY,

Captain and Assistant Quartermaster.

Brevet Major General M. C. MBIGS,

Quartermaster General, U. S. A.

No. 29.

[General Orders No. 17.]

QUARTERMASTER GRNERAL'S OFFICE, Washington City, March 16, 1865.

1st. For the purpose of producing uniformity in the transportation service, and guarding against abuses, blank books of transportation orders will hereafter be issued from this office to the chief quartermaster of each department, to be

Digitized by Google

by him immediately furnished to each officer under his order entitled to issue the same; after the receipt of which no other form will be used, unless in emergencies when the prescribed blank form cannot be had, and then the reason

for not using it must be stated in the order.

These blank orders will be numbered and registered in this office in such manner that there will never be two orders of the same number in circulation; they will be charged to the chief quartermaster to whom sent, who will receipt and be held responsible therefor, and who will, in like manner, charge and hold responsible his subordinate officers.

On exchange of posts, or on transfer to another officer, like receipts must be

taken and forwarded to the chief quartermaster of each department.

2d. Within five days after the end of each month, a concise report will be made to the department quartermaster of the number of orders issued, the number cancelled by error, (which must accompany the report,) and the number remaining on hand, with a statement of the amount of transportation furnished in the month; which report, in a condensed form, (accompanied by the orders cancelled,) will be by him immediately transmitted to the Quartermaster General, under envelope, indorsed on margin "rail and river transportation."

3d. The marginal register should contain the substance of the order issued, and will be preserved by the officer issuing for his own protection, or returned to the department quartermaster or this office, as may be hereafter required.

Care should be taken at all times to keep on hand a sufficient supply of these blank orders, which can be obtained upon application to the proper senior or

department quartermaster.

4th. Unless in extraordinary circumstances, all rail and river transportation, passenger and freight, at any post, will hereafter be under the control and management of a single officer, on whom requisitions will be made by other officers

requiring transportation.

5th. When more than five persons in one party are to be transported over one road, or a continuous line of roads, separate orders for transportation must be issued for each road to be passed over; these orders should be received on the train instead of tickets, and are to be receipted by the party named in the order, and given up on the cars, the officer or person in charge filling the receipt with the number actually carried. Five persons, or a less number, may be carried over a continuous line of roads upon a single order for transportation, and this order may be exchanged at the starting point for tickets over the entire route.

6th. Settlement should not be made nor vouchers given to railroads on orders for passenger transportation properly belonging to other roads, but the passenger accounts for each road should be made up separately in the name of the

roads to which they belong.

7th. Appleton's Railroad Guide for January, 1865, will be used as a standard for indicating routes and fixing distances, unless the actual distance is proved to be less, in which case settlement will be made on the basis of actual distance. Where this Guide cannot be more readily procured, it can be furnished from this office.

8th. When a number of troops are to be transported from any point to any other point on the same day or train, it should be done in squads as far as practicable. A single transportation order, or set of orders, should be given to the ranking officer, or most responsible person of the several detachments.

9th. Blank books of free transportation orders will also be furnished, to be used on boats belonging to, or in the service of, the Quartermaster's department, or on railroads operated by the government. The free passes in these books will be given to persons entitled to receive government transportation, and should not be issued without designating on the order the boat or road on or over which the person is to be transported. The marginal registers in these

books will also be preserved for return to the department quartermaster or to

this office, as may from time to time be required.

Should the route to be travelled be in part over roads or on boats belonging to the government, and in part on those owned by private parties or companies, care should be taken that free and pay orders are given, as the case may require, or such requisitions furnished as will enable the party entitled to transportation to procure it at points where pay transportation commences.

10th. To warrant the granting of transportation, except in cases specified by regulations or general orders, published for general information, the person demanding the same should show a requisition or order from competent authority requiring the movement by public conveyance in the performance of public duty

The original requisition for such transportation, when not necessarily required by the officer presenting it, should be retained by the officer furnishing the transportation; in other cases, a certified copy or necessary extract from the order should be furnished to, and preserved by, the officer granting transportation, as his proper authority therefor, and a certified copy of the same must be indorsed on the back of the order.

11th. When the cost of transportation is to be reimbursed to the government, as in the case of sick and furloughed soldiers, the required certificate should not only be made upon the furlough or order, but the transportation order should also be indorsed on the back substantially as follows: "The within transportation furnished under General Order ——, and the proper officers duly notified. ———————. A. O. M."

12th. When transportation is granted to persons not in the military service,

full explanation therefor should be given.

13th. Orders for transportation should give the name of the party to be transported, or, if there are several, then of the officer or person in charge, and state the number of men to be transported.

Orders for "one man," "ten men," and the like, without designating any

name, are improper.

14th. The receipts for transportation should be filled up in ink by the officer or person named in the order, before signing; and if he cannot write his name, there should be a witness to his mark.

Names and places should be written distinctly, in full, and not abbreviated. 15th. Duplicates of orders for passenger transportation should not be issued.

16th. When a requisition calls for transportation to any given point and return, the order should be issued to the place of destination, and the return transportation should be obtained at that point, provided it can there be procured.

17th. Upon the form of order now issued should be presented all the facts necessary to enable an auditing officer to decide as to the regularity or propriety of the order, so that it may be paid by any authorized disbursing officer.

18th. Erasures, interlineations, or alterations, if made against the interest of the government, should be explained on the order by the issuing or other competent officer; otherwise, the transportation should only be settled for in accord-

ance with the order before change or modification.

19th. Transportation by water, being generally the cheapest, should be selected when consistent with the interests of the service. All transportation should be furnished by the shortest practicable route, unless a different route is indicated in the order which directs the movement. Where there are two or more competing routes, without material difference in distance or time, the business should be divided in equitable proportion between them; the distance for which compensation is made being estimated by the shortest practicable route.

20th. In no case is subsistence furnished by the Quartermaster's department. 21st. The good of the service requiring that railroads should obey the requisitions of officers properly authorized to demand transportation, in case compensitions.

sation is made by the government for illegal or unauthorized transportation so required, the officer making the requisition or issuing the order will be charged therewith; or, if not paid by the government, the railroad will be entitled to recourse upon such officer.

By order of the Quartermaster General:

LEWIS B. PARSONS,
Colonel, and Chief of Rail and River Transportation.

No. 30.

[General Order No. 18.]

QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., March 16, 1865.

Accounts for rail, river, and stage transportation will hereafter be paid only at the following named points, viz: Boston, New York, Philadelphia, Baltimore, Washington, Cincinnati, Louisville, Chicago, Detroit, St. Louis, St. Paul, Fort Leavenworth, Davenport, Nashville, and New Orleans.

The proper senior or department quartermaster will immediately assign an officer to this duty at each of the above-named points which may be within his jurisdiction, and will at once report the name of such officer to the Quartermaster General.

As a general rule, accounts for railroad transportation should be settled in the State where the service is rendered, or at the point most convenient to the same. All the accounts of any one rail or stage company should be settled by a single officer, unless special reasons exist to the contrary.

A monthly statement will be forwarded to this office, by the fifth day of each month, of all payments made during the previous month, (indorsed on the mar-

gin of the envelope "Rail and River Transportation.")

The statement for rail and stage companies and steamboats will be made up separately, and will show to what company or steamboat the accounts were paid. The statement for rail transportation will show the proportionate amount for each company, based upon the sub-vouchers or bill of charges.

M. C. MEIGS,
Quartermaster General, Brevet Major General.

No. 31.

[General Orders No. 29.]

QUARTERMASTER GENERAL'S OFFICE, Washington City, May 9, 1865.

I. For the purpose of securing a uniform system in the transportation of public property, the annexed forms for requisitions and bills of lading will hereafter be adopted, and the accompanying instructions strictly observed.

No other forms will be used, except in cases of emergency, when the prescribed forms cannot be procured, and then the reasons for using others will be stated

upon the same.

II. The bill of lading should state where the freight is to be paid, and if the transportation is by water, or under contract varying from government rates, the rates should be specifically stated in the bill of lading; otherwise it should state that payment is to be made at government rates. Bills of lading issued for shipments to be forwarded on boats belonging to or in the service of the

Quartermaster's department, or on railroads operated by the government, should state that no payment will be made on the bills of lading.

III. Officers ordering transportation of wagons, ambulances, cannon, caissons, gun-carriages, &c., &c., will be particular to state in the bill of lading whether

they are to be transported whole or taken apart.

In shipments by rail, the number of animals, bales of hay and their weight, of pieces of lumber and measurement thereof, should be expressed in the bill of lading in numbers, in addition to the same in car-loads. The weight of different descriptions of goods must be given separately. When, in an invoice covering a variety of articles or a number of packages, the total weight only is expressed, the officer receiving the property must, in certifying to its correctness, write out the weight delivered in words as well as in figures.

IV. Erasures, interlincations, or alterations in bills of lading must be ex-

plained thereon by the issuing or other competent officer.

V. Officers making shipments will, at the time of shipping, furnish the carrier with the original bill of lading, which, upon the delivery of the property, will be receipted by the officer receiving the same, and returned to the carrier with such indorsement as may be necessary to insure settlement for the service.

The original bill of lading, receipted, alone will be received in settlement, and in no case will a second original bill of lading be issued for the same ship-

ment.

VI. Duplicate and triplicate copies of the bill of lading will be promptly transmitted by mail to the consignee, and, upon the receipt of the property, the duplicate will be receipted and returned by mail to the officer making the shipment. The triplicate will be retained by the officer receiving the property. A copy, or quadruplicate, will be retained in book form by the consignor for his information.

VII. In the absence or failure of any officer to receipt for property consigned to him, the officer signing should make a full explanation over his signature, showing that he is duly authorized to receive and receipt for the same, and why the consignee does not receipt therefor. Agents or clerks are not authorized to re-

ceipt bills of lading.

VIII. Loss and damage to government property will be deducted in settlement from the voucher issued to the carrier, and officers receipting for property must indorse on the bill of lading the kinds of property lost or damaged, and its full value, including transportation. When the amount of the damage to property cannot be readily ascertained, the receiving officer should promptly call a board of survey on the same, and duly notify the carrier that he may, if he desires, be present with witnesses to protect his interest.

The bill of lading should not be signed until the amount of damage is decided upon by the report of the board of survey, when an indorsement of their decision

should be made upon the bill of lading.

IX. Quartermasters will be governed in the settlement of claims for transfer and ferriage by existing instructions and decisions of the Quartermaster General.

X. Bills of lading for through shipments will only be settled with the last carrier entitled to payment. Quartermasters should exercise care that no second claim is presented by roads performing part of the through transportation. The last carrier will be held responsible for all loss or damage, and such loss or damage will be deducted in making settlement for the service.

XI. The distance by the shortest practicable route, whether over one or many roads, will govern the rate charged. Transportation by water, being generally the cheapest, should be used, when consistent with the interest of the service, and all transportation should be furnished by the shortest practicable route, un-

less a different one is designated in the order.

When transportation is specifically demanded by a proper officer by a longer route, the reason must be given in the bill of lading, and payment will be made

according to the length of the route designated, the officer being held to a strict

accountability for his requisition.

XII. Quartermasters will be governed in the settlement of claims for transportation, by railroad, by the rates and classification of the circular of the Quartermaster General, dated May 1, 1862, and all transportation must be settled at the points designated in General Orders No. 18, Quartermaster General's Office. March 16, 1865.

By order of the Quartermaster General:

LEWIS B. PARSONS, Brig. Gen. and Chief of Rail and River Transportation.

BENJAMIN C. CARD,.
Colonel, Quartermaster's Department, in charge of 9th Division.

No. 33.

# QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., May 10, 1865.

GENERAL: A very large number of troops will be sent within the next twenty days from this vicinity to their respective States, to be there mustered out of service. The several railway companies should be advised to prepare for the movement.

Troops for the west and southwest will probably move by the Baltimore and Ohio railroad to the Ohio river, which will be used as far as possible for transportation by steamboat of troops destined for the country bordering on the Ohio, and for points south of the Ohio.

Troops for St Louis, Missouri, and Kansas will probably go down the Ohio

to Lawrenceburg, and then take the Ohio and Mississippi railroad west.

Troops for central Ohio, Indiana and Illinois will go by Bell Air, Columbus, Indianapolis, and so on west.

Troops for the northwest, by Harrisburg, Pittsburg, Chicago, or Cleveland, Lake Erie, and Detroit.

Troops for central Pennsylvania and New York, by the Northern Central railway, to Harrisburg and Elmira.

Troops for eastern New York, New Jersey, and New England, by Balti-more, Philadelphia, New York, Albany, or New Haven, Hartford, and Spring-field.

The sound and river boats should be used wherever possible, as affording a relaxation and rest to the troops crowded in cars, and as being cheaper generally than railroad transportation.

Troops for the northeast will go by way of New York, and the most direct

routes thence to their respective destinations.

It is important that in this movement, which will be large and continue for some time, every possible precaution to insure the safety and comfort of the men should be observed.

For this purpose you will put yourself in communication with the several railroad lines. You will insist upon the orders of this department, requiring cars used for transportation of troops to be carefully fitted up and provided with water and other necessary conveniences, being fully observed and enforced.

Halts of the trains at proper points, to enable the soldiers to attend to the

calls of nature, should be arranged.

Proper stoppages for meals; in short, everything should be done to enable those soldiers who have survived the dangers of four years of warfare to reach their homes with the least inconvenience, fatigue, suffering, and danger.

A copy of memorandum of routes is with this. Orders for the movement will be given by the military commanders. It is desired that it be as rapid as is

consistent with safety.

I have recommended that troops going north and northeast be marched to Baltimore, believing that the single railroad from this point to Baltimore will be

fully occupied with the movement of troops going west from the Relay House, and that for any large body of troops the quickest movement for forty miles will be made on foot.

I am, very respectfully, your obedient servant.

M. C. MEIGS.

Quartermaster General, Brevet Major General.

Brevet Brigadier General D. C. McCallum,
Director and General Manager of Military Railroads U. S.

Through Colonel Parsons, Division of R. and R. Transportation.

QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., May 27, 1865.

GENERAL: The necessary general arrangements for the transportation of the troops of the armies of the Potomac and General Sherman to the points indicated by Circular 19, A. G. O., 1865, have been made.

In order, however, to avoid delay and confusion in this city, and insure prompt forwarding to destination, I request that the commanders of regiments, and larger commands, upon receiving orders to move, shall make their requisition at once upon Brigadier General Rucker, leaving their commands in camp until such time as, upon conference with General Rucker, shall be fixed for departure.

Five thousand (5,000) men for any one section of the country are as many as should go together; ten thousand (10,000) can go from here to Relay House per

day if necessary.

It is requested that a list of the commands ordered to move may be each day, and as early as possible, furnished this office.

Very respectfully, your obedient servant,

M. C. MEIGS,

Quartermaster General, Brevet Major General.

Brigadier General E. D. Townsend,

Assistant Adjutant General, Washington, D. C.

QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., May 27, 1865.

GENERAL: Enclosed are copies of General Order No. 94, and Circular No. 19, A. G. O., an estimate of troops to be mustered out of the armies of the Potomac and of General Sherman; also memoranda giving the routes to be taken by the troops of the several States to their points of destination respectively.

The troops will begin to move at once. Colonel Moulton, at Cincinnati, is prepared to provide river transportation from Parkersburg for those indicated to

go by that route.

Please give him timely notice of movements thither as they occur, that he may

have boats ready.

General Van Vliet, at New York, has been instructed to provide water transportation, where practicable, for forwarding from New York New England troops.

The troops of Michigan and Wisconsin will take boats at Cleveland for De-

troit, and those for Wisconsin again at Grand Haven for Milwaukie.

The quartermaster at these points especially should receive timely notice of

departure of troops to go by those routes, and at all points on the lines of railroads where change of cars must be made, ample notice should be given to the quartermasters and railroad companies concerned, that they may be prepared to receive and forward the troops at once.

Very respectfully,

M. C. MEIGS.

Quartermaster General, Brevet Major General.

Brigadier General D. H. RUCKER,

Depot Quartermaster, Washington, D. C.

#### [Enclosures.]

# Routes of troops returning home.

Troops of Missouri and Kansas: Baltimore and Ohio railroad to Bell Air, or Parkersburg, Ohio river to Lawrenceburg, Ohio and Mississippi railroad to St. Louis, thence rail to points of destination.

Troops of Kentucky, Tennessee, and northern Alabama: Baltimore and Ohio Railroad to Bell Air or Parkersburg, Ohio river to Covington and Louisville, and thence rail to destination.

Troops for Arkansas: Baltimore and Ohio railroad to Bell Air or Parkers-

burg, Ohio river, Memphis, Davall's bluff, Little Rock.

Troops for middle and southern Illinois: Baltimore and Ohio railroad to Wheeling, Ohio river to Lawrenceburg, Ohio and Mississippi and Illinois Central railroads, or Indianapolis, Terre Haute and Lafayette, according to points of destination.

Troops for Nebraska: Baltimore and Ohio railroad to Bell Air or Parkersburg, Ohio river to Lawrenceburg, Ohio and Mississippi railroad to St. Louis, thence by river or rail according to circumstances.

Troops for Michigan: Baltimore, Harrisburg, Pittsburg, Cleveland, Lake

Erie and Detroit.

Troops for northern Ohio and northern Indiana: Baltimore, Harrisburg, Pittsburg, Pittsburg Fort Wayne and Chicago railroad and connecting lines.

Troops for central Ohio: Baltimore and Ohio railroad, Bell Air, Columbus.

Troops for northern Illinois: Baltimore, Harrisburg, Pittsburg Fort Wayne and Chicago and connecting roads to points of destination.

Troops for Wisconsin: Baltimore, Harrisburg, Pittsburg, Cleveland, Lake Erie to Detroit, Grand Rapids, Milwaukie, and thence to different points of destination.

Troops for Iowa: Baltimore, Harrisburg, Pittsburg, Pittsburg Fort Wayne and Chicago railroad to Chicago, thence by rail to Prairie du Chien, Dubuque, Fulton. Burlington, Keokuk, thence to points of destination.

Troops for Minnesota: Baltimore, Harrisburg, Pittsburg Fort Wayne and Chicago railroad to Chicago, thence by rail to nearest points of destination on the Mississippi river, thence by steamer.

Troops for Pennsylvania: Baltimore, Harrisburg, Pittsburg, or Baltimore and

Philadelphia and connecting roads.

Troops for West Virginia: Baltimore and Ohio railroad.

Troops for New Jersey: Baltimore, Philadelphia and Trenton.

Troops for New York: Baltimore, Philadelphia, New York, Albany or Baltimore, Harrisburg and Elmira, to points of destination.

Troops for New England: Baltimore, Philadelphia, New York, thence by

rail or water to points nearest their destination.

In case of delay for want of boats at Bell Air or Parkersburg, troops to be sent so far as necessary by rail, ria Cincinnati.

A special officer to be detailed for Bell Air or Parkersburg. Quartermasters at other important points to be immediately advised of contemplated movements and instructed to make full preparation.

Troops for the north and east to march to Baltimore, thence take rail to Har-

risburg or Philadelphia.

Troops for the Baltimore and Ohio railroad to take the cars at Alexandria and go through by rail to the Ohio river.

#### [General Orders No. 94.]

WAR DEPARTMENT, ADJUTANT GRNBRAL'S OFFICE, Washington, May 15, 1865.

The following regulations are announced, and will be observed in discharging from service such volunteers as are hereafter to be mustered out with their regi-

mental or company organizations:

I. Army corps, or at least the divisions thereof, will be kept intact, and immediately upon receipt of an order directing any portion of the forces to be mustered out, commanding generals of armies and departments will order the said troops (if not already thereat) to one of the following rendezvous, viz:

1. Middle military division, and troops of other armics or departments arriving therein.—Defences of Washington, D. C.; Harper's Ferry, Va; and Cum-

berland, Md.

2. Military division of the James .- Richmond and Old Point Comfort, Va.

3. Department of North Carolina.—Newbern and Wilmington.

4. Department of the south.—Charleston, S. C., and Savannah, Ga.

5. Military division west Mississippi.—Mobile, Ala.; New Orleans, La.; and Vicksburg, Miss.

6. Military division of the Missouri.—Little Rock, Ark.; St. Louis, Mo.;

and Fort Leavenworth, Kansas.

- 7. Department of the Cumberland.—Nashville, Knoxville and Memphis, Tenn.
  - 8. Department of Kentucky.—Louisville.

9. Middle department.—Baltimore, Md.

Commanding generals of armies and departments are authorized to change

the aforesaid places of rendezvous should the public interest so demand.

For the departments of the east, Pennsylvania, northern, northwest, New Mexico, and Pacific, such special orders will be given from the Adjutant General's office, relative to the troops therein serving, as may be demanded by circumstances, as the time for discharge is approached.

II. In case of one or more regiments of a division being mustered out—the division remaining in the field—said regiment, or regiments, will be mustered out at the place where found serving at the time, and then placed en route to

the State, as hereinafter directed.

III. The Adjutant General of the army will designate places of rendezvous in the respective States, to which the regiments, after muster out, will be for-

warded for payment.

IV. Upon arrival at the rendezvous where the musters out are to take place, a critical examination of the regimental and company records, books, &c., will be made; and in case of omissions, the proper commanders will be made to supply them, and make all the entries as enjoined by the army regulations. At the same time the muster-out rolls will be commenced and prepared in accord-

ance with existing regulations, under the direction of the assistant commissaries of musters of divisions, superintended by the corps commissaries. Corps and department commanders will see that the work is pushed with energy and executed promptly, using to this end division and brigade commanders to superintend it and their respective staff officers, to aid the mustering officers in collecting the data for the muster-out rolls and discharge papers, as well as the preparation of the same. In framing the rolls, particular care must be exercised in stating balances of bounty payable. (See General Orders No. 84, current series, from this office.)

V. So soon as the rolls of a regiment are completed, the said command, with its arms, colors, and necessary equipage, will be placed en route to its State,

and to the rendezvous therein at or nearest which it was mustered in.

Ex route, and after arrival in the State, the following will be observed:

1. Immediately on arrival at the State rendezvous, the regiment will be reported to, and taken control of by, the chief mustering officer for the State, or his assistant at the point. The said officers will lend all needful assistance in their power to the paymasters, with the view to prompt payment of the troops.

2. The regimental officers will be held to a strict accountability for the dis-

cipline of their commands and preservation of public property.

3. The commissary of musters of the division to which the regiment belonged in the field will take possession of the copies of muster-out rolls intended for the field and staff, companies and paymaster, also the company and regimental records, with all surplus blank rolls, returns, discharges, &c., in possession of regimental and company commanders, or other officers, and after boxing them up, place them, whilst en route, under the special charge of a discreet and responsible officer of the regiment. The sole duty of said officer will be to care for and preserve said rolls and records whilst en route, and, on arrival at the State rendezvous where payment is to be made, to turn them over to the chief mustering officer, or his assistant at that place.

4. Paymasters will be designated by the pay department to meet regiments at the designated State rendezvous, and there make final payments, obtaining

for that purpose the rolls from the mustering officer thereat.

5. Whilst troops are awaiting payment, supplies will be furnished by the respective supply department, on the usual requisitions and returns, countersigned by the chief mustering officer or his assistant.

6. Until after payment and the final discharge of the troops, the chief mus

tering officer will look to their being kept together and under discipline.

7. The chief mustering officer will, under regulations to be established by himself, take possession of and carefully preserve the regimental and company records, also the colors with the respective regiments, and hold them subject to orders from the Adjutant General of the army.

8. As soon as practicable after arrival at the State rendezvous, the chief mustering officer or his assistant will see that the arms and other public property brought to the State by the troops are turned over to the proper officer of the

supply department thereat.

VI. In preparing the muster-out rolls, corrs, department, division, and brigade commanders will hold regimental officers to a strict accountability, in order to insure accurate and complete records of the enlisted men, and the better to establish the just claims of the non-commissioned officers and privates who have been wounded, or of the representatives of those who have died from discase or wounds, or been killed in battle.

VII. Prior to the departure of regiments from the rendezvous where mustered out, all public property (except arms, colors, and equipage required en

route) will be turned over to, and cared for by, the proper officers of the supply departments concerned.

VIII. What is prescribed in the foregoing for a regiment will be applicable

to a battery of artillery or an independent company.

IX. At the respective State rendezvous the following is ordered, viz:

1. The Paymaster General will be prepared to have a sufficient force of pay-

masters to insure prompt payments.

2. The Quartermaster General and Commissary General of Subsistence will be prepared to have a suitable number of officers of their respective bureaus to provide supplies, transportation, &c., and receipt for public property.

3. The Chief of Ordnance will arrange to have a suitable number of officers

of his bureau to receive the arms, accourrements, &c.

X. The attention of commanding generals of armies and departments is directed to the importance of regimental and company officers having their records so completed and arranged that, at any time, the muster-out rolls may be prepared without delay.

By order of the Secretary of War:

E. D. TOWNSEND. Assistant Adjutant General.

#### [Circular No. 19.]

# WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE. Washington, May 16, 1865.

I. Under paragraph III, General Orders No. 94, May 15, current series. from this office, the following State rendezvous, to which troops mustered out will be forwarded for payment, are announced, viz:

Maine.-Augusta, Portland, and Bangor. New Hampshire.—Concord and Manchester.

Vermont. - Montpelier, Brattleboro', and Burlington.

Massachusetts.—Boston, (Readville and Galloupe's island.) Rhode Island.—Providence.

Connecticut.-Hartford and New Haven.

New York.—New York city, (Hart's island,) Albany, Elmira, Buffalo, Rochester, Syracuse, Sackett's Harbor, Plattsburg, and Ogdensburg.

New Jersey.—Trenton.

Pennsylvania.—Philadelphia, Harrisburg, and Pittsburg.

Delaware.-Wilmington.

Maryland.—Baltimore and Frederick.

West Virginia.—Wheeling.

Ohio.—Cincinnati, (Camp Dennison,) Cleveland, (Camp Cleveland,) Columbus, (Camp Chase and Tod barracks.)

Indiana.—Indianapolis.

Illinois.-Springfield and Chicago.

Michigan.—Detroit and Jackson.

IVisconsin.—Madison and Milwaukie.

Minnesota.—Fort Snelling.

Iowa.—Davenport and Clinton.

Kansas.-Lawrence and Leavenworth.

Missouri.—St. Louis, (Benton barracks.)

Kentucky.—Louisville, Lexington, and Covington.

II. When the muster-out of a regiment has been completed, and it is ready to start for the State, (see paragraph 5, General Orders No. 94, current series, Adjutant General's office,) the assistant commissary of musters for the division to which it belonged will immediately report (by telegram when practicable) to the Paymaster General of the army, Washington, D. C., its numerical designation, number of commissioned officers, number of enlisted men, and rendezvous in the State where ordered to for payment and final discharge.

By order of the Secretary of War:

E. D. TOWNSEND,

Assistant Adjutant General.

WAR DEPARTMENT, Adjutant General's Office, May 30, 1865.

#### No. 34.

DIVISION OF REGULAR SUPPLIES, Q. M. GENERAL'S OFFICE, Washington, D. C., October 16, 1865.

GENERAL: In compliance with instructions received from the Quartermaster General, per circular July 24, 1865, I have the honor to submit the following report.

<sup>\*12</sup> companies of artillery and 4 companies of infantry.
†7 companies of artillery and 1 company of infantry.
NOTE.—This includes the army of the Potomac and General Sherman's army. The number from these two armies is 122,310. See estimate of May 18, 1865.

I was appointed as chief of the division of regular supplies of the Quartermaster General's office, September 7, 1864, at which time I was on duty in the city of New York as purchasing officer of forage for the entire armies of the east, together with depots on the sea-coast as far south as Mobile, Alabama, and in part the depot of New Orleans.

The importance of prompt supplies to the armies and depots above alluded to was deemed sufficient to justify my remaining in New York until January 1, 1865, at which time I assumed personally the supervision of the business of

this division.

From the date of my appointment as chief of this division, until January 1, 1865, Brevet Brigadier General Charles Thomas supervised the examination of contracts, and Colonel B. C. Card the examination of claims connected therewith.

Upon entering on duty in this office, I at once opened record-books of all existing contracts, carefully examining and entering all contracts made since, comparing prices therein with the market value of supplies at posts where the contracts were made, and directing the places at which contracts should be made, as the large demands upon certain markets rendered this necessary, to prevent holders of supplies from taking advantage of the wants of the government.

Records have been kept of the quantities delivered upon contracts from month

to month, cancelling each contract at time of its expiration.

Daily reports have been required from the principal depots of supply, and weekly reports from all others, showing the quantities on hand, affoat to be received, and quantities due on contracts, keeping this office constantly informed relative to the state of supplies at all posts; enabling the Quartermaster General to prevent the accumulation of large supplies, when posts might be abandoned.

The establishing of purchasing and contracting depots at prominent points where supplies are produced, or large accumulations are thrown upon the market, has greatly concentrated the business of this division, and the withdrawal of so many purchasing officers, destroying the competition created by them when seeking supplies in the same market, has been of great advantage to the interests of the government.

#### Claims.

The records of this division show that from January 1, 1865, to date, there have been received 6,852 claims, which have been acted on as follows:

| Settled 1,266 claims, amounting to | 552,623<br>428,649 | 95<br>07       |
|------------------------------------|--------------------|----------------|
| Total 6,852 claims, amounting to   | 2,549,451          | <del>7</del> 5 |

The examination of these claims, especially those presented under act of July 4, 1864, has been critical in relation to the following points:

1. As to the actual use by the army of stores for which payment is claimed.

2. As to the past and present loyalty of the claimants and witnesses.

3. Whether the signatures of the certifying officers were genuine.

After the above points have been considered, the claims have been generally referred to the provost marshals of the districts where the claimants reside, for all additional information which was thought auxiliary to a just decision in each case.

A very large number have been rejected on account of ascertained disloyalty of both claimants and witnesses.

The procurement of supplies for the fiscal year has been made principally by contract at all depots of supplies, except those procured in New York city, up to January 1, 1865, where the quantities required under the exigencies of the service were such as to render it necessary to purchase in open market.

Many purchases have been made by the officers in the field, to supply the demand on the march, of which this division has no information, nor can this information be obtained except by examination of all the official returns for-

warded to the Quartermaster General.

The quantities of stationery purchased and used by the army it is impossible to obtain, as all contracts for the same show only the prices of articles, the quantities in all cases to be delivered as required. The official reports of officers receiving the stationery, which are too numerous for examination, are the only data by which it can be gained.

. The schedule annexed shows the quantities of forage and fuel delivered on contract, in which the deliveries are specified, and purchases made in open market, not including those made by officers in the field, for the fiscal year ending

June 30, 1865.

The contracts at all large purchasing depots have been made, in most cases, for quantities to be delivered as required, at prices named. The quantity received on this class of contracts cannot be ascertained from the contracts at present, but the aggregate must be much greater than that arrived at in schedule A.

The reason for making contracts of this kind was the impossibility of knowing what quantity would be required for the army, depending on the place of purchase, as well as to prevent the accumulation of supplies at posts which could be supplied to advantage from other points.

Since the close of the war this mode of contracting has been adopted almost entirely, to prevent the accumulation of supplies at posts which would soon be

abandoned.

Very respectfully, your obedient servant,

S. L. BROWN,

Colonel, in charge regular supplies.

Major General M. C. MBIGS, Quartermaster General U. S. A., Washington, D. C.

## No. 35.

Division of Regular Supplies, Q. M. General's Office, Washington, D. C., Ociober 17, 1865.

GENERAL: In compliance with General Order No. 39, Quartermaster General's office, July 1, 1865, I have the honor to submit the following as my personal report for the year ending June 30, 1865:

My report for the fiscal year ending June 30, 1864, was transmitted to the

Quartermaster General November 28, 1864.

At the commencement of the fiscal year of 1864-'65 I was on duty in the city of New York, under my commission as captain and assistant quartermaster, engaged in the purchase, procurement, and shipment of forage.

September 7, 1864, in accordance with the law of July 4, 1864, reorganizing the Quartermaster's department, I was assigned to duty in charge of the Fifth Division of the Quartermaster General's office, with the rank of colonel, to date

from August 2, 1864.

September 8, 1864, Special Orders No. 298, A. G. O., directed that I should turn over my property and duties in New York city, under such instructions as might be given me by the Quartermaster General, and report in person to him, and enter upon my duties as chief of the Fifth Division of the

Quartermaster General's office.

The fact that I was supplying forage for the entire armies of the east and the Atlantic and Gulf sea-coast depots, and the importance of keeping up the supply, in the opinion of the Quartermaster General, justified my remaining in New York and giving my personal attention to these shipments until January 1, 1865, at which time I reported in person to the Quartermaster General, and entered upon my duties as chief of the division of regular supplies of the Quartermaster General's office.

Preparatory to my departure from New York city, Captain E. D. Chapman, assistant quartermaster, was, by Special Order No. 395, A. G. O., November 12, 1865, directed to repair at once to New York city—this order relieving him from duty at St. Louis, Missouri—and relieve me from my duties as forage officer; and I was by the same order directed, on being relieved, to report to the Quartermaster General in person.

December 20, 1864, I turned over to Captain Chapman all the quartermasters' property for which I was responsible, and, as before stated, entered upon my duties in charge of the Fifth Division of the Quartermaster General's office,

where I still remain.

The schedules "A," "C," "C C," "D," and "G," and the statement of pub-

lic moneys called for by General Order No. 39, are hereto attached.

No clothing, camp, and garrison equipage having been in my possession during the fiscal year, the schedule "B" has not been prepared. Schedules "E" and "F," of property captured from the enemy, are not furnished, no such property having come under my control.

My entire business as forage officer has been conducted by myself personally,

no officer having ever been detailed to assist me.

Very respectfully, your obedient servant,

S. L. BROWN, Colonel, Quartermaster's Department.

#### No. 42.

DIVISION OF REGULAR SUPPLIES, Q. M. GENERAL'S OFFICE, Washington, D. C., October 30, 1865.

GENERAL: As requested in your circular of July 24, 1864, I have the honor to submit the following report of the operations of the Quartermaster's department in the procurement of regular supplies during the past four years of war:

To obtain a complete statement of the quantity of forage, fuel, and stationery purchased, it will be necessary to make an analysis of the returns of all officers of the Quartermaster's department, which cannot be done at present.

Reports have been received from some of the most prominent officers engaged

in the purchase of forage and fuel.

The purchases of other officers by contract, where quantities to be delivered are stated, have been collected from the contracts on file.

The material thus obtained is collated in schedule "A," of which the following is a brief summary:

| ing is a brief summary:   |                     |    |
|---------------------------|---------------------|----|
| Corn, 22,816,271 bushels  | \$29, 879, 314      | 01 |
| Oats, 78,663,799 bushels  | 76, 362, <b>026</b> | 83 |
| Hay, 1,518,621 tons       | 48, 595, 872        | 00 |
| Straw, 21,276 tons        |                     |    |
| Wood, 551,436 cords       | 2, 757, 180         | 00 |
| Coal, 1,620,910 tons      | 13, 777, 735        | 00 |
| Stationery, (approximate) | 2, 571, 200         | 00 |
|                           |                     | _  |
| Total cost                | 174, 368, 847       | 84 |
|                           |                     |    |

Although this is an immense quantity of supplies, it does not cover the full consumption, as many contracts, especially for straw, wood, and coal, call for deliveries "as required;" hence, quantities purchased under these contracts are not included in schedule "A," nor are the quantities of forage and fuel purchased on the march included.

The stationery purchased could not be ascertained, and nothing but its ap-

proximate cost is stated in the schedule.

To show the operations of a single depot, the reports of General D. H. Rucker, showing issues of the depot of Washington during the war, are enclosed, marked "B" and "C," from which it appears that the issues of that depot from May 1, 1861, to October 1, 1865, were: Corn, 241,633,972 pounds, or 4,314,892 bushels; oats, 924,273,963 pounds, or 28,883,500 bushels; mixed grain, 19,049,151 pounds, or 432,935 bushels; hay, 982,163,849 pounds, or 491,081 tons; straw, 30,681,907 pounds, or 15,349 tons; coal, 877,992,141 pounds, or 391,900 tons; wood, 209,846 cords.

Very respectfully, your obedient servant,

S. L. BROWN, Colonel, in charge Regular Supplies.

Major General M. C. Meigs, Quartermaster General, Washington, D. C. No. 43.

A.—Approximate statement of purchases of regular supplies during four years of war ending June 30, 1865.

I certify that the above statement is as correct a compilation as can be made from reports received at this office, and papers which are now accessible at the depot.

D. H. RUCKER,

Brevet Major General and Chief Quartermaster, Depot of Washington.

## No. 46.

QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., October 16, 1865.

GENERAL: In compliance with your circular of July 24, 1865, desiring reports of the operations of the several divisions of this office during the fiscal year ending 30th June, 1865, &c., I have the honor to report as to the Sixth Division:

That the most costly structures which have been erected by the Quartermaster's department during the period above mentioned were for hospital purposes. The most important are hospitals at Indianapolis, Indiana; Newark, New Jersey; Worcester, Massachusetts; Manchester, New Hampshire; Baltimore, Maryland; Nashville, Tennessee, and enlargement of hospital at Hilton Head, South Carolina.

Under provisions of General Order No. 24, Quartermaster General's office, April 29, 1865, construction and extension of all barracks, hospital, and other buildings ceased. But few special cases were reported in which continuance of work was ordered under paragraph VII of above-mentioned order.

With the reduction of the troops, hospitals, barracks, &c. were from time to time reported upon as vacant by the chief quartermasters of departments or by duly authorized inspectors. Recommendations to the Secretary of War for the sale of such public buildings as were no longer required for the service have been made, and, when authorized, the buildings have been sold at public sale after due notice by advertisement. I proposed to present a tabular statement of the original cost and of the amount received from the sales of public buildings erected

during the war, but at present this office does not possess the requisite data to

prepare such a statement.

The attention of the chief quartermasters of military divisions has been called to the failure, on the part of some of their subordinates, to comply with the requirements of General Order No. 3. Quartermaster General's Office, 1864, and it is hoped that the material for a satisfactory and complete report of all hospitals, barracks, storehouses, &c., may soon be collected, from which an accurate statement of the number, cost, and proceeds of sale of such structures, as also of the amount of rents paid for buildings used for the public service, may be prepared. It was proposed to obtain this information, in part, from the investigations of the officers recommended to examine the accounts of officers of this department at the treasury.

The work connected with the consideration of claims and questions arising from the occupation of grounds and buildings for the purposes of the military service occupies the attention of my assistant, Brevet Colonel J. B. Howard, United States volunteers, and of four of the five clerks acting under my supervision. Since the organization of the Sixth Division, twenty-four hundred and seventy-nine claims of this character have been presented, amounting to \$1,587,181 47, of which seven hundred and fifty-one have been referred to the treasury, or to officers of this department, for settlement, amounting to \$183,452 30; ten hundred and fifty-four have been rejected, amounting to \$446,163 32; and claims (six hundred and seventy-four) to the amount of \$957.565 85 still await examination and final action.

Apart from the cost of construction and proceeds of sales of public buildings, the operations of this division can hardly be tabulated. The correspondence incident to its operations is extensive and varied, and the want of office room only prevents me from applying for, or employing on my own report of persons, several additional clerks for the more speedy disposition of current business.

The examination of reports of officers of this department relative to payment of commutation of fuel and quarters should, I think, be made in this division, as decisions on the validity of orders entitling officers to such allowance, together with the questions incident thereto, demand a special investigation.

A statement of the number of interments registered during the war, white and black, loyal and disloyal, so far as reports have been received at this office under General Order No. 40, Quartermaster General's Office, 1865, is respectfully sub-

mitted herewith.

Very respectfully, your obedient servant,

J. J. DANA,

Colonel, Quartermaster's Department U.S.A.

Brevet Major General M. C. MBIGS,

Quartermaster General United States Army.

## [General Orders No. 40.]

QUARTERMASTER GENERAL'S OFFICE, Washington, D. C., July 3, 1865.

Officers of the Quartermaster's department on duty in charge of the several principal posts will report to this office, without delay, the number of interments registered during the war, white and black, loyal and disloyal, to be separately enumerated.

All officers of the Quartermaster's department who have made interments on battle-fields during the war will report the number of the same, giving the localities, dates of battles, and dates of interments.

M. C. MEIGS,

Quartermaster General, Brevet Major General.

No. 47.—Statement of the number of interments registered during the war, white and black, loyal and disloyal, so far as reports have been received at this office, under General Orders No. 40, Quartermaster General's office, 1865.

No. 48—Extract from annual report of Captain J. M. Moore, assistant quartermaster United States army, for the year ending June 30, 1865.

Washington, D. C.

The charge of the national cemeteries and burial of deceased soldiers and others dying in the service of the United States in hospitals in and about Washington is under the jurisdiction of this office, and is probably the most important of my specialties. It was deemed advisable, at the expiration of the burial contract, December 31, 1863, for the government to manufacture all the coffins required for interments in the national cemeteries, as well as those needed for shipment to distant points. The coffins now issued cost less than one-half the price paid by contract, and are far superior. The hearses used for transportation to the graves are covered ambulances, painted black, and are well suited for the purpose. The tablets or headboards are principally of white pine, with the exception of some four thousand of black walnut, purchased more than two years ago. They are painted in white and lettered in black, with the name, company, regiment, and date of death. I would here remark that unless tablets are painted before lettering, the wood will absorb the oil in the paint and the rain soon wash off the lead in the lettering.

By much pains and labor I have succeeded in preparing a mortuary record for future reference, giving a succinct history of the deceased, every page of which has been compared with the records of hospitals, and up to the present date believed to be the most reliable register of the dead extant. Information is daily furnished to numerous friends respecting deceased soldiers, and frequently before it can be obtained elsewhere, as the record is always kept up to date, no

matter how great may be the mortality.

In accordance with Special Order No. 132, Headquarters Middle Military Di-

I certify that the foregoing is a correct abstract of reports received at this office under General Orders No. 40. Quartermaster General's office, 1865, and on special reports of Captain Moore.

J. J. DANA, Colonel, Q. M. D.

vision, Washington, D. C., June 7, 1865, I proceeded to the battle-fields of the Wilderness and Spottsylvania Court House, for the purpose of superintending the interments of the remains of Union soldiers yet unburied and marking their burial-places for future identification. This work was commenced on the 12th, and completed on the 24th of that month. Careful search was made over the above-mentioned battle-fields, and the remains of all soldiers, both Union and rebel, interred, and headboards, with name, rank, and regiment, placed at each grave, (with some exceptions in cases of rebels,) when it was possible to identify the deceased. The words "Unknown United States soldiers, killed May 10, 1864," on a neat tablet, mark the remains of our own soldiers that could not be identified.

On the battle-ground of the Wilderness two cemeteries are laid out, enclosed by a paling fence. Cemetery No. 1 is on the Orange Court House turnpike, about two miles from the Wilderness tavern, and contains the remains of one hundred and eight men. Cemetery No. 2 is on the Orange Court House plank road, about two and a half miles from the junction of the Orange Court House turnpike, and contains five hundred and thirty-four men. The sites are well adapted for the resting-places of those who fell in the vicinity, having been selected where the carnage appeared to be the greatest.

It was no unusual occurrence to observe the bones of our men close to the abatis of the enemy; and in one case several skeletons of our soldiers were found in their trenches. The bones of these men were gathered from the ground where they fell, having never been interred, and by exposure to the weather for more than a year all traces of their identity were entirely obliterated.

On the battle-field of Spottsylvania but few men were found unburied, many of them having been interred by a Mr. Sanford, who resides at Spottsylvania Court House, in compliance with an agreement to that effect with General Sherman while on his march to Washington city. Over seven hundred names were found in this battle-field, and tablets erected in memory of the deceased.

It was my intention to remove those partly buried to a suitable site for a cemetery, but the weather being exceedingly warm, and the unpleasant odor from decayed animal matter was so great as to make the removal impracticable. They were, however, carefully re-covered with earth and entirely hidden from view.

Hundreds of graves on these battle-fields are without any mark whatever to designate them, and so covered with foliage that the visitor will be unable to find the last resting-places of those who have fallen until the rains and snows of winter wash from the surface the light covering of earth and expose their remains.

The work on the cemetery in the vicinity of Old Soldiers' Home has been completed, the ground re-fenced; a neat and handsome lodge erected, a garden laid out, the graves sodded, the walks gravelled, and choice flowers and trees planted.

Great care and attention have also been paid to the Harmony Burial Ground, where all soldiers dying of infectious diseases, and contrabands, are interred.

The improvement of the national cemeteries has been a source of great gratification to all who visit them, and entirely dissipate the prevailing opinion of those living remote from Washington, that soldiers were irreverently or carelessly buried.

At Arlington Cemetery a new road has been made by levelling, in part, the hill on the south side of the mansion, by bridging small streams, and by grading and ditching from the mansion, where it commences, to the new lodge on the Alexandria road, where it ends. A large number of well-selected shade trees and choice flowers have been planted, the gardens on both sides of the mansion improved and re-fenced, and the graves sodded; indeed, the place so transformed as hardly to be recognized by persons who had previously visited it.

JOHN V. FUREY.

Captain and Assistant Quartermaster.

4,981

Assistant Quartermaster's Office, Depot of Washington, Washington, D. C., July 1, 1865.

GENERAL: In accordance with Special Orders No. 132, Headquarters Middle Military Division, Washington, D. C., June 7, 1865, I have the honor to report as follows:

On the evening of June 8 I left Washington, D. C., for Belle Plain, where I joined Colonel Bird, of the 1st regiment 1st army corps, and proceeded to the battle-fields of the Wilderness and Spottsylvania Court House for the purpose

of superintending the interments of the remains of Union soldiers yet unburied,

and marking their burial-places for future identification.

This work was commenced on the 12th, and completed on the 24th of that month. Careful search was made over the above-mentioned battle-fields, and the remains of all soldiers, both Union and rebel, interred, and headboards, with name, rank, and regiment, placed at each grave (with some exceptions in cases of rebels) when it was possible to identify the deceased. The words "Unknown United States soldiers, killed May 10, 1864," on a neat tablet, mark the remains of our own soldiers that could not be identified.

On the battle-ground of the Wilderness two cemeteries were laid out, enclosed by a paling fence. Cemetery No. 1 is on the Orange Court House turnpike, about two miles from the Wilderness tavern, and contains the remains of one hundred and eight men. Cemetery No. 2 is on the Orange Court House plank road, about two and a half miles from the junction of the Orange Court House

turnpike, and contains the remains of five hundred and thirty-four men.

The sites are well adapted for the resting-place of those who fell in the vicinity, having been selected where the scenes of carnage appeared to be the greatest. It was no unusual occurrence to observe the bones of our men close to the abatis of the enemy; and in one case several skeletons of our soldiers were found in their trenches. The bones of these men were gathered from the ground where they fell, having never been interred, and by exposure to the weather for more than a year all traces of their identity were entirely obliterated.

On the battle-field of Spottsylvania but few men were found unburied, many of them having been interred by a Mr. Sandford, who resides at Spottsylvania Court House, in compliance with an agreement to that effect with General Sherman while on his march to Washington city. Over seven hundred names were found on this battle-field, and tablets erected in memory of the deceased.

It was my intention to remove those partly buried to a suitable site for a cemetery; but the weather being exceedingly warm, and the unpleasant odor from decayed animal matter so great as to make the removal impracticable. They were, however, carefully re-covered with earth and entirely hidden from view.

Hundreds of graves on these battle-fields are without any marks whatever to distinguish them, and so covered with foliage that the visitor will be unable to find the last resting-places of those who have fallen until the rains and snows of winter wash from the surface the light covering of earth and expose their remains.

The accompanying list embraces the names of officers and men to whose graves headboards have been erected.

I am, general, very respectfully, your obedient servant,

JAS. M. MOORE,

Captain and Assistant Quartermaster United States Army.

Brevet Major General M. C. MBIGS, Quartermaster General U. S. A., Washington, D. C.

Graves of Union prisoners at Andersonville.—Report of Captain Moore.

WASHINGTON, Wednesday, October 18, 1865.

The following report of Captain J. M. Moore, assistant quartermaster, who was sent to Andersonville, Ga., to mark the graves of Union prisoners for future identification, contains valuable information, in which the people are interested, and will, doubtless, be appreciated by the relatives and friends of those who have given their lives to their country:

Assistant Quartermaster's Office, Department of Washington, Washington, D. C., September 20, 1865.

GENERAL: In accordance with Special Orders No. 19, Quartermaster General's office, dated June 30, 1865, directing me to proceed to Andersonville, Ga., for the purpose of marking the graves of Union soldiers for future identification, and enclosing the cemetery, I have the honor to report as follows:

I left Washington on the 8th of July last, with mechanics and materials, for

the purpose above mentioned.

On my arrival at Savannah I ascertained that there was no railroad communication whatever to Andersonville, the direct road to Macon being broken and that from Augusta via Atlanta also in the same condition. I endeavored to procure wagon transportation, but was informed by the general commanding the department of Georgia that a sufficient number of teams could not be had in the State to haul one-half of my stores, and as the roads were bad and the distance more than 400 miles, I abandoned all idea of attempting a route through a country difficult and tedious under more propitious circumstances.

The prospect of reaching Andersonville at this time was by no means favorable, and nearly one week had elapsed since my arrival at Savannah. I had telegraphed to Augusta, Atlanta and Macon almost daily, and received replies

that the railroads were not yet completed.

At length, on the morning of the 18th of July, the gratifying telegram from Augusta was received announcing the completion of the Augusta and Macon road to Atlanta, when I at once determined to procure a boat and proceed to Augusta by the Savannah river. The desired boat was secured, and in 24 hours after the receipt of the telegram alluded to was on my way with men and material for Augusta. On my arrival there I found the railroad completed to Macon, and that from Macon to Andersonville having never been broken, experienced little difficulty in reaching my destination, where I arrived July 25, after a tiresome trip, occupying six days and nights.

At Macon, Major General Wilson detailed one company of the fourth United States cavalry and one from the 137th regiment United States colored troops to assist me. A member of the former company was killed on the 5th of Au-

gust, at a station named Montezuma, on the Southwestern railroad.

The rolling stock of all the roads over which I travelled is in a miserable condition, and very seldom a greater rate of speed was obtained than twelve miles an hour. At the different stations along the route the object of the expedition was well known, and not unfrequently men, wearing the garb of rebel soldiers, would enter the cars and discuss the treatment of our prisoners at Anderson-ville, all of whom candidly admitted it was shameful, and a blot on the escutcheon of the south that years would not efface.

While encamped at Andersonville I was daily visited by men from the surrounding country, and had an opportunity of gleaning their feelings toward the government, and, with hardly an exception, found those who had been in the rebel army penitent and more kindly disposed than those who have never taken a part, and anxious to again become citizens of the government which they fought so hard to destroy.

On the morning of the 26th of July the work of identifying the graves, painting and lettering the headboards, laying out the walks, and enclosing the cemetery was commenced, and on the evening of August 16 was completed,

with the exceptions hereafter mentioned.

The dead were found buried in trenches, on a site selected by the rebels, about 300 yards from the stockade. The trenches were from two to three feet below the surface, and in several instances, where the rains had washed away the earth, but a few inches. Additional earth was, however, thrown on the graves, making them of a still greater depth.

So close were they buried, without coffins or the ordinary clothing to cover their nakedness, that not more than 12 inches was allowed to each man: indeed. the little tablets marking their resting-place, measuring hardly 10 inches in

width, almost touching each other.

United States soldiers, while prisoners at Andersonville, had been detailed to inter their companions, and by a simple stake at the head of each grave, which bore a number corresponding with a similar-numbered name upon the Andersonville hospital record, I was enabled to identify and mark with a neat tablet, similar to those in the cemeteries at Washington, the number, name, rank, regiment, &c, and date of death, of 12,461 graves, there being but 451 which bore the inscription "Unknown United States soldiers."

One hundred and twenty thousand feet of pine lumber was used in these

tablets alone.

The cemetery contains 50 acres, and has been divided by one main avenue, running through the centre and subdivided into blocks and sections in such a manner that, with the aid of the record, which I am now having copied for the superintendent, the visitors will experience no difficulty in finding any grave.

A force of men is now engaged in laying out walks and clearing the cemetery

of stumps, preparatory to planting trees and flowers.

I have already commenced the manufacture of brick, and will have a sufficient number by the 1st of October to pave the numerous gutters throughout the cemetery, the clay in the vicinity of the stockade being well adapted for the purpose of brick-making.

Appropriate inscriptions are placed through the ground, and I have endeavored, as far as my facilities would permit, to transfer this wide, unmarked and un-honored graveyard into a fit place of interment for the nation's gallant dead.

At the entrance the words "National Cemetery, Andersonville, Ga.," designate the city of the dead.

On the morning of the 17th of August, at sunrise, the stars and stripes were hoisted in the centre of the cemetery, when a national salute was fired, and

several national songs sung by those present.

The men who accompanied me, and to whom I am indebted for the early completion of my mission, worked zealously and faithfully from early in the morning until late at night, although suffering intensely from the effects of heat. Unacclimated as they were, one after another was taken sick with the fever incident to the country, and in a brief period my force of mechanics was considerably lessened, obliging me to obtain others from the residents in different parts of the State. All my men, however, recovered, with the exception of Mr. Eddy Watts, a letterer, who died on the 16th of July of typhoid fever, after a sickness of three weeks. I brought his body back with me and delivered it to his family in the city.

Several of the United States cavalry, detailed by General Wilson, died of

the same fever shortly after joining their command at Macon.

Anderson ville is situated on the Southwestern railroad, 60 miles from Macon. There is but one house in the place, except those erected by the so-called confederate government as hospitals, officers' quarters and commissary and quartermaster's buildings. It was formerly known as Anderson, but since the war the "ville" has been added.

The country is covered mostly with pines and hemlocks, and the soil is sandy, sterile and unfit for cultivation, and unlike the section of country a few miles north and south of the place, where the soil is well adapted for agricultural

purposes. Cotton as well as corn is extensively raised.

It is said to be the most unhealthy part of Georgia, and was probably selected as a depot for prisoners on account of this fact. At mid-day the thermometer in the shade reaches frequently 110°, and in the sun the heat is almost unbearable.

The inhabitants of this sparsely settled locality are, with few exceptions, of the most ignorant class, and from their haggard and sallow faces the effects of

chills and fever are distinctly visible.

The noted prison pen is 1,540 feet long and 750 feet wide, and containes 27 acres. The dead-line is 17 feet from the stockade, and the sentry boxes are 30 yards apart. The inside stockade is 18 feet high, the outer one 12 feet high, and the distance between the two is 120 feet.

Nothing has been destroyed. As our exhausted, emaciated, and enfeebled soldiers left it, so it stands to-day, as a monument to an inhumanity unparalleled

in the annals of war.

How men could survive as well as they did in this pen, exposed to the rays of an almost tropical sun by day and drenching dews by night, without the

slightest covering, is wonderful.

The ground is filled with the holes where they had burrowed in their efforts to shield themselves from the weather, and many a poor fellow, in endeavoring to protect himself in this manner, was smothered to death by the earth falling in upon him.

A very worthy man has been appointed superintendent of the grounds and cemetery, with instruction to allow no buildings or structures of whatever nature

to be destroyed, particularly the stockade surrounding the prison pen.

The stories told of the sufferings of our men, while prisoners here, have been substantiated by hundreds, and the skeptic who will visit Andersonville even now, and examine the stockade, with its oozy sand, the cramped and wretched burrows, the dead-line and the slaughter-house, must be a callous observer indeed if he is not convinced that the miseries depicted at this prison pen are no exaggerations.

I have the honor to be, general, your obedient servant,

JAMES M. MOORE.

Captain and Assistant Quartermaster U. S. A.

Brevet Major General M. C. MRIGS, Quartermaster General U. S. A., Washington, D. C.

## No. 49.

QUARTERMASTER GENERAL'S OFFICE, SEVENTH DIVISION, Washington, D. C., October 12, 1865.

GENERAL: I have the honor to submit, herewith, a report of the wagons, ambulances, carts, harness, &c., pertaining to the United States Quartermaster's department, purchased, captured, lost, and expended during the fiscal years ending on the 30th of June, 1864, and 30th of June, 1865, so far as shown by the reports received at this office up to the present date.

I am, general, very respectfully, your obedient servant,

BENJ. C. CARD.

Colonel, Quartermaster's Department, in charge of Division.

Brevet Major General M. C. Meigs, Quartermaster General U. S. Army.

Report of wagons, ambulances, carts, harness, &c., pertaining to the United States Quartermaster's Department, purchased, captured, lost, and expended, during the fiscal years ending on the 80th of June, 1864, and the 30th of June, 1865, as shown by reports received at the Quartermaster General's office up to the 12th of October, 1865.

I. Fiscal year commencing July 1, 1863, and ending June 30, 1864.

Very respectfully, your obedient servant,

BENJ. C. CARD,

Colonel, Quartermaster's Department, in charge of division.

Brevet Major General M. C. MRIGS,

Quartermaster General U.S. Army.

#### No. 51.

## [Special Orders No. 44.]

## HEADQUARTERS ARMIES OF THE UNITED STATES, City Point, Virginia, June 28, 1864.

I. The following orders, prescribing the means of transportation, camp and garrison equipage, for the armies in the field operating against Richmond, are published:

1. For the headquarters of the lieutenant general commanding the armies of the United States in the field, and major generals commanding separate armies, such wagons, light spring-carriages, saddle-horses, and camp equipage as may be deemed necessary from time to time, to be assigned by the chief quarter-master at general headquarters.

2. For the headquarters of an army corps, two wagons or eight pack-mules for baggage, &c., one two-horse wagon, one two-horse spring-wagon, and ten extra saddle-horses for contingent wants; two wall tents for the personal use and office of the commanding general; one wall tent for every two officers of his staff.

3. For the headquarters of a division, one wagon or five pack-mules for baggage, &c., one two-horse spring-wagon, one two-horse wagon, and five extra saddle-horses for contingent wants; one wall tent for the personal use and office of the commanding general; one wall tent for every two officers of his staff.

4. For the headquarters of a brigade, 1 wagon or 5 pack-mules for baggage, 1 two-horse spring-wagon, and 2 extra saddle-horses for contingent wants; one wall tent for the personal use and office of the commanding general; one wall tent for every two officers of his staff.

5. The allowance of wagons and pack-mules to officers detached: to every three company officers, when detached or serving without wagons, 1 pack-mule; to every twelve company officers, when detached, 1 wagon or 4 pack-mules; to every two staff officers, when not attached to any headquarters, 1 pack-mule; to every ten staff officers, when serving similarly, 1 wagon or 4 pack-mules.

6. These wagons and pack-mules will include transportation for all personal baggage, mess chests, cooking utensils, desks, papers, &c. The weight of officers' baggage, specified by army regulations, will be reduced so as to bring it within the foregoing schedule.

All excess of transportation, camp and garrison equipage, now with the army corps, divisions, brigades, regiments, or batteries, over the allowance herein prescribed, will be immediately turned into the Quartermaster's department, at the

general depot, now at City Point.

7. Commissary stores and forage will be transported in the supply trains. When they are not convenient of access, and when troops act in detachments, the Quartermaster's department will assign wagons or pack-mules for that purpose, but the baggage of officers or troops, or camp equipage, will not be carried in the wagons or on the animals so assigned.

8. For each regiment of infantry, cavalry, or battalion of heavy artillery: for baggage, camp equipage, &c., 2 wagons; 3 wall tents for field and staff; 1 shelter tent for every other commissioned officer; 1 shelter tent for every two

non-commissioned officers, soldiers, servants, and camp followers.

9. For each battery: for personal baggage, mess chest, cooking utensils, desks, papers, &c., 1 wagon; 2 wall tents for officers; shelter tents, same allow-

ance as for infantry and cavalry regiments.

10. For the artillery and small-arm ammunition train: the number of 12-pounder guns multiplied by 122 and divided by 112; the number of rifled guns multiplied by 50 and divided by 140; the number of 20-pounder guns by 2, and the number of  $4\frac{1}{2}$ -inch guns multiplied by  $2\frac{1}{2}$ , will give the number of wagons allowed.

The number of guns in horse batteries, multiplied by 100 and divided by

140, will give the wagons allowed.

For the reserve artillery, ammunition of 20 rounds to each gun in the armies, the number of wagons allowed will be obtained as follows: multiply the number of 12-pounders by 20 and divide by 112, and the number of rifled guns by 20 and divide by 140.

For every 1,000 men present, armed and equipped for duty, of cavalry, in-

fantry, and heavy artillery, for small-arm ammunition, 3 wagons.

For carrying fuzes, powder, and primers, with the reserve artillery ammuni-

tion train, 2 wagons.

11. For general supply train: to each 1,000 men, cavalry, infantry, and heavy artillery, for forage, subsistence, &c., 7 wagons, sufficient to carry eight days' supply; to each cavalry division, exclusively for forage, 50 wagons; to each battery, for its proportion of subsistence, forage, &c., 4 wagons; to each horse battery, for the same purpose, 4 wagons; to every 25 wagons of the artillery ammunition train, 5 wagons additional for the forage of the animals of the ammunition and additional wagons, baggage, camp equipage, and subsistence of wagon-masters and teamsters. Ammunition trains will be loaded exclusively with ammunition, so far as practicable. The baggage of the drivers will be carried in the additional wagons allowed for that purpose.

To each brigade of cavalry, infantry, and artillery, of not less than 1,500 men, for hospital supplies, 3 wagons; for every 1,000 men additional, 1 wagon.

To each army corps, except the cavalry, for intrenching tools, 8 wagons.

To each army corps headquarters, for subsistence, forage, and other stores

not provided for herein, 3 wagons.

To each division headquarters, for similar purposes, 2 wagons. To each brigade headquarters, for similar purposes, 1 wagon.

To each brigade of cavalry, infantry, and artillery, for commissary stores for sale to officers, 1 wagon.

For the ambulance train of each division, 2 wagons; for the ambulance train of an independent command less than a division, batteries excepted, 1 wagon.

To each division of cavalry and infantry, for armorers' tools, parts of muskets, extra arms, and accountrements, 1 wagon.

It is expected that each ambulance and wagon, except those of the artillery

ammunition train, will carry the necessary forage for its own teams.

12. The unit of organization for the supply trains of subsistence, ordnance, and forage, will be by division. Division quartermasters will be responsible for them. Brigade quartermasters will be responsible for the brigade baggage trains. Regimental quartermasters will be responsible for the regimental public property and baggage.

Quartermasters will attend in person to the drawing of necessary supplies at

depots, and will habitually accompany their trains on marches.

13. If corps, division, or brigade commanders take their guards or escorts from commands already furnished with the full allowance of transportation, a corresponding amount shall be taken by them to headquarters; but if they have not been provided for at all, then a proper number of wagons will be transferred by the depot quartermaster, on the requisition of the chief quartermaster, certified to and approved by the commanding general.

14. As a rule, quartermaster and commissary sergeants will not be allowed to ride public horses, nor will citizen or soldier clerks, except on the written order

of a corps or other independent commander setting forth the necessity.

15. It has been shown by experience that the advantage of keeping up regu-

larly organized pack-trains is not commensurate with the expense.

Two hundred pack-saddles will be carried in the wagon trains of each corps. Whenever it becomes necessary to pack officers' baggage, provisions, or ammunition for short distances, over rough roads and broken country, pack-trains will be made up temporarily by taking mules from the wagons, not to exceed two to any one wagon.

16. In the armies operating against Richmond, the maximum allowance of forage per day will be, for horses, ten pounds hay and fourteen pounds grain; for mules, ten pounds hay and eleven pounds grain; and when short forage only can be provided, the allowance will be, for horses fifteen pounds, for mules thirteen. On a march, however, the forage ration will be only ten pounds grain.

17. A report of all property captured from the enemy, or seized for the public service, will be made monthly to the chief of the department at these head-

quarters, to which it appertains.

By command of Lieutenant General Grant:

T. S. BOWERS,
Assistant Adjutant General.

## No. 52.

## QUARTERMASTER GENERAL'S OFFICE, EIGHTH DIVISION, Washington, D. C., October 10, 1865.

GENERAL: In consequence of my continued absence, on inspection duty, your circular of the 21st of July, 1865, requiring from the chief of each division a full report of the operations of his division during the fiscal year ending June 30, 1865, was not brought to my notice until yesterday; but I hope to be able to furnish all the important data in time to be embodied in your annual report to the honorable Secretary of War.

The act of Congress approved July 4, 1864, for the better organization of the Quartermaster's department, was promulgated by the War Department in

General Orders No. 231, July 18, 1865.

Section 1st of the act referred to sets forth that-

"The Eighth Division shall have charge of all inspections of the Quartermaster's department, and of all reports made by officers assigned to inspection duty,

analyzing and preserving the reports as received, and communicating, through the Quartermaster General, to the chief of the proper division, such portions of the reports as may be necessary for their information and use," with provisions for subsequent action upon such references.

On the 23d of July, 1864, the Quartermaster General submitted to the Adjutant General a list of names of officers for assignment to duty under the aforesaid

act.

On the 6th of August following, officers were assigned as chiefs of the divisions in the Quartermaster General's office, with two exceptions, the 7th and 9th divisions. Subsequently, on the 24th of August, 1864, I was assigned as chief

of the 8th (inspection) division.

Previous to this assignment I had had charge of the annual reports of officers; the duties connected with the assignment of officers of the Quartermaster's department to duty; the duties connected with their changes of station; the transmission of remarks on the accounts of officers; personal reports, and the distribution of orders and blanks.

Subsequent to my assignment as chief of the inspection division, I was relieved of the transmission of remarks on accounts of officers and the examination of monthly reports. The other duties referred to I still continue to per-

form.

Immediately after my assignment as above, to wit, on the 26th of August, 1864, I was ordered on special inspection duty for the War Department, and was absent from the Quartermaster General's office from that date until the 1st of October, 1864, when I was ordered to return to duty in the Quartermaster General's office.

During my absence Colonel H. Biggs, inspector, Quartermaster's department,

acted as chief of the inspection division.

On the 14th of October, 1864, I received verbal instructions from the Secretary of War to make a series of inspections in the department of Washington. I accordingly entered upon, and continued upon this duty until the 20th of October, 1864, at the same time performing the duties of my division of the Quartermaster General's office.

About the last of October, 1864, I was ordered to resume my inspection under orders of the War Department. Was absent about twenty days, and returned to duty in the Quartermaster General's office.

During this absence Colonel J. D. Bingham, inspector, Quartermaster's de-

partment, was in charge of the 8th division.

On the 19th of April, 1865, I left Washington on a leave of absence for thirty days. After enjoying ten days of my leave, I noticed in a newspaper, General Order No. 77, of the War Department, for the prompt reduction of expenses, &c. In view of which, and believing my services would be more important at that than at any other time, I telegraphed the Quartermaster General, proposing to enter upon duty at once, if required, and avail myself of the remainder of my leave some other time. He immediately ordered me upon inspection duty in the northern department, with a view to curtailing expenses.

I was engaged upon inspection duty and investigations from that time until the 20th of August, 1865, when I returned to duty in charge of the inspection

division.

During this absence Colonel Bingham officiated in charge of the inspection division.

On the 20th September, 1865, I was again ordered upon inspection duty in the department of the east. I returned to duty in the Quartermaster General's office on the 7th October, 1865.

Of the six inspectors provided for by act of Congress approved July 4, 1864, only four of the officers nominated by the Quartermaster General, on the 23d of July, 1864, for assignment to duty as inspectors of the Quartermaster's depart-

ment, were so assigned on the 6th of August, 1864. These four were Colonels Biggs, Bingham, Cruttenden and Owen. As soon as they were relieved from duty where they were serving at the time of such assignment, three of these were ordered upon inspection duty, and a large number of inspections have been made in different parts of the United States, resulting most beneficially to the department. Concerning these inspections I shall remark more in detail hereinafter.

Colonel Biggs was not ordered on inspecting duty, as he was detailed for

other duty until the tender of his resignation.

Upon my return to the Quartermaster General's office, October 1, 1864, Colonel Biggs was assigned to duty as depot quartermaster at Philadelphia, which position he held until February 15, 1865, when he was relieved, and shortly after tendered his resignation.

It was unofficially communicated to this office that his resignation had been accepted, and he was not therefore assigned to duty. It was subsequently as-

certained that his resignation had not been formally accepted.

The attention of the War Department was called to the matter, and information sought as to his status, whereupon his resignation was accepted on the 11th of October, 1865.

On the 24th of August, 1864, Captain George A. Pierce was assigned as an

inspector of the Quartermaster's department, with the rank of colonel.

He made several inspections in the departments of the south and the Gulf.

\* \* \* \* \* \* He was relieved from assignment as an inspector of the Quartermaster's department on the 13th of May, 1865.

On the 30th of August, 1864, Captain John C. Crane, assistant quartermaster, was assigned to duty as an inspector, Quartermaster's department, with the rank of colonel, but he has never performed inspection duty under orders of the Quartermaster General.

On April 30, 1865, Captain J. F. Rusling, assistant quartermaster, was assigned to duty as an inspector, Quartermaster's department, with the rank of colonel.

He made inspections in the department of Tennessee, and an investigation at Chicago, Illinois, after which—August 2, 1865—he was granted a leave of absence of thirty days; at the expiration of which time he was ordered by the Quartermaster General to return to Nashville on inspection duty, which order was revoked by order of the President, September 8, 1865, and Colonel Rusling ordered to report to him. The latter order is still in force so far as this office is advised.

On the 24th June, 1865, Captain R. Brinkerhoff, assistant quartermaster, was assigned to duty as an inspector, Quartermaster's department, but on the 24th August was ordered to report to the Secretary of War for special duty, upon which he is still engaged.

The following summary will show briefly the nature of the duties performed

by these inspectors.

Colonel J. D. Bingham, inspector, Quartermaster's department, transmitted to this office his first inspection report on the 10th of November, 1864, at which time he was engaged in certain investigations in the department of the east. Subsequently he returned to Washington, and was placed temporarily in charge of the inspection division during my absence on special duty.

On the 27th of November, 1864, he was ordered west in connexion with certain investigations, and was engaged on important duties there until the 20th of April, 1865, when he retured to Washington, and was again placed temporarily

in charge of the Eighth Division during my absence west.

On my return he was ordered to make inspections at Boston and New York city.

On the 24th of September he returned to the Quartermaster General's office, and assumed temporarily the duties of the Seventh and Ninth divisions, Quartermaster General's office, during the absence of Colonel B. C. Card, in charge of those divisions.

Upon Colonel Card's return he resumed his inspection duty in the department

of the east, and is now engaged upon these duties.

During the fiscal year he transmitted to this office reports of eight (8) inspections, and since the 1st of July, 1865, he has transmitted to this office the reports

of four (4) inspections.

The reports of Colonel Bingham have been complete, full, and satisfactory, and the prorupt, thorough, and intelligent manner with which he has performed the duties allotted to him is in the highest degree creditable to him as an officer of this department.

Colonel J. D. Cruttenden, inspector, Quartermaster's department, was directed on the 17th of September, 1864, to proceed to Duvall's bluff, Arkansas, and enter upon a series of inspections in the departments of Arkansas, Missouri,

Kentucky, Tennessee, Kansas, and Colorado.

He was continuously employed upon such duties until August 30, 1865, when he was granted a leave of absence by the War Department for fifteen days.

On the 20th of September, 1865, he was directed to proceed upon another

tour of inspections comprising the district of the Plains and Utah.

The total number of reports received from him during the fiscal year is fifteen, (15,) and since the close of said year seven, (7;) total, 22.

Colonel G. A, Pierce, while upon inspection duty, transmitted to this office reports of seventeen (17) inspections.

Colonel W. H. Owen was relieved from his assignment as inspector, Quartermaster's department, February 16, 1865. He made inspection in the department of Missouri, Ohio, and in the middle department. He transmitted to this office sixteen (16) reports.

Colonel James F. Rusling, inspector, Quartermaster's department, has made three reports; one of them during the fiscal year, the other two since the 1st of July, 1865.

Those reports are very voluminous, numbering in the aggregate 452 pages.

During the fiscal year I transmitted to the Quartermaster General's office reports of seventeen (17) inspections and investigations, and since the 1st of July, 1865, have added thirty-two (32) to that number—in all, 49.

These inspections and investigations have been made in the northern depart-

ment, in Kansas, Missouri, and in the department of the east.

In addition to the inspectors regularly assigned, and whose duties have been briefly stated above, other officers of the Quartermaster's department have been temporarily assigned to inspection duty, as the necessities of the service required. Particularly since active operations have ceased it has been necessary to call into requisition the services of such, and in many cases the results have been highly satisfactory, and productive of the greatest good in connexion with the retrenchment and reduction of force and expense.

The following list indicates the number of reports rendered by each of the officers who have been thus temporarily assigned during the fiscal year ending

June 30, 1865:

| Lieutenant Colonel J. G. Chandler, A. Q. M. Vols                     | 2  |

| Grand total   | -  | 70<br>287 |

216 inspection reports rendered by officers of the Quartermaster's department, under orders of the Quartermaster General, have been entered in the inspection division during the fiscal year ending June 30, 1865. Many of these reports contain 240 pages of foolscap paper. All of them have been thoroughly and carefully examined, extracts made and sent to the several divisions to which they had reference.

There have been received and entered in the inspection division, during the same time, 579 communications referring to inspections, investigations, and the

official character of officers of the Quartermaster's department.

The entries in the inspection book are in fact briefs of the original papers, and not merely skeletons. Every name of a person, however insignificant, occurring in these papers is alphabetically entered, so that one name being recollected, all the facts pertaining to the transaction can be at once ascertained.

#### INVESTIGATIONS.

Investigations involving the conduct of officers have generally been conducted by officers of this department with great thoroughness and efficiency, but some mistakes have been made in the mode of investigating by a want of shrewdness and propriety of action.

It was intended to give a summary of the recommendations by the several officers assigned to inspection duty, for reductions, and the amount saved to the government by these inspections; but my protracted absence and the little

time now left precludes the possibility of carrying out this design.

#### INVENTORY AND INSPECTION REPORTS.

| The number of inventory and inspection reports rendered by officers in compliance with paragraph 1,023 Revised Regulations, received from June 30, 1864, to July 1, 1865, is | 11, 193 |
|--|---------|
| Received, entered, and acted upon since July 1 to October 1, 1865  | 6, 302  |
| Total  | 17, 495 |
| BOARDS OF SURVEY.  |         |
| The number of reports of boards of survey received, entered, and acted   | i.      |
| upon from June 30, 1864, to July 1, 1865, is   | . 293   |
| Received, entered, and acted upon since July 1, 1865   | . 136   |
| Total  | 429     |
|  | ===     |

## OFFICERS' RECORD.

An officers' record has been compiled, comprising all officers of the Quarter-master's department, each officer occupying one page, showing at one view a condensed record of his appointment, movements, services, changes, recommendations, etc. For this purpose the books of the office have been consulted for over three years back. In proportion as this division has become more thoroughly organized, this record has been made more minute, and is kept up daily—almost hourly.

#### ANNUAL REPORTS.

The annual reports received during the fiscal year ending June 30, 1865, appertaining to the fiscal year ending June 30, 1864, was 591.

From July 1, 1865, to the present the number of annual reports received

appertaining to the fiscal year ending June 30, 1865, is 340.

From the latter tables have been prepared for the annual report of the Quartermaster General, showing the amount of supplies on hand July 1, 1864, received, purchased, manufactured, captured, &c., during the fiscal year; also the amount of public moneys received and expended during the fiscal year.

Extracts have been made from the narratives of officers, giving all the valuable information contained in them for the information of the Quartermaster

General.

The tables and statements referred to do not comprise all the operations of the Quartermaster's department, because of the fact that a large number of the officers have failed to render their reports as required by general orders; but these exceptions are officers whose duties were light, and, if their reports had been rendered, they would not swell, to any great extent, the lists prepared.

| OFFICIAL BONDS.   |   |

The total number of bonds on file July 1, 1864, and since received, a sent the sum of \$6,540,000, a sum considerably less than that frequently fided to the care and disposition of one officer of the Quartermaster's department of the Quarter | repre-  |
| The following is a summary of the operations of the several boards for examination of officers of the Quartermaster's department:  1. The examining board for the department of the Cumberland, Tennessee Ohio was organized by Special Orders No. 317, Adjutant General's Office, tember 23, 1865, and was composed of the following officers:  Lieutenant Colonel W. G. Le Duc, chief quartermaster 20th army corps; tenant Colonel A. J. Mackay, chief quartermaster 14th army corps; tenant Colonel H. Hayes, chief quartermaster 4th army corps.  Lieutenant Colonel Mackay's arduous duties in the field rendered it impeable for him to serve upon the board. He applied to be relieved from assignment, and by Special Order No. 57, Adjutant General's Office, Feb 4, 1865, he was relieved by Colonel R. C. Webster, chief quartermaster partment of Virginia.  By Special Order No. 173, Adjutant General's Office, April 17, 1865, tenant Colonel W. G. Le Duc, chief quartermaster 20th army corps, whileved by Captain J. F. Rusling, assistant quartermaster volunteers, and Colonel W. G. Le Duc, chief quartermaster volunteers, and Colonel W. G. Le Duc, chief quartermaster volunteers, and Colonel W. G. The number of officers still in service who have not been examined is 245.

Owing to the present status of the boards constituted by the orders above cited, it will be impossible to proceed with the examinations until further orders are issued by the Secretary of War in the premises.

On the 1st of July, 1864, there were in the regular army 76 officers of the

Quartermaster's department, as follows:

| Brevet major generals | 1  |
|-----------------------|----|
| Colonels              | 3  |
| Lieutenant colonels   | 4  |
| Majors                | 12 |
| Captains              |    |
| Military storekeepers | 9  |
|                       | _  |
|                       | 76 |

Of the lieutenant colonels there was: Colonel and aide-de-camp, 1.

Of the majors there were: Brigadier generals of volunteers, 3; brevet lieutenant colonel, 1; not on duty in the Quartermaster's department, but a major general of volunteers, 1; assigned to duty as lieutenant colonel and chief quartermaster in accordance with an act approved July 17, 1862, 1.

Of the captains there were: Colonels and aide-de-camps, 2; lieutenant colonel and aide-de-camp, 1; not on duty in the Quartermaster's department, but brigadier generals of volunteers, 3; not on duty in the Quartermaster's department, but colonels of volunteers, 2; assigned to duty as lieutenant colonels and chief quartermasters of corps under act of July 17, 1862, 6.

Awaiting orders: Lieutenant colonel, 1; captain, 1.

The effective force of the regular corps of the Quartermaster's department was, on the first of July, 1864, 68.

On the first of July, 1864, there were: Assistant quartermasters of volun-

teers, 549.

Of these there were: Colonels and aide-de-camps, 2; major and aide-de-

camp, 1; assigned to duty as lieutenant colonels and chief quartermasters of corps, under the act of July 17, 1862, 9: not on duty in the Quartermaster's department, 1: not on duty in the Quartermaster's department, but colonels of volunteers, 2: unknown, never having reported, nor replied to communications from this office, 41.

The effective force, therefore, of officers in the Quartermaster's department of the volunteer service was, July 1, 1864, 505.

On the 30th of June, 1865, there were 78 officers of the Quartermaster's department belonging to the regular corps, as follows:

| Brevet major general           | 1  |
|--------------------------------|----|
| Colonel                        | 1  |
| Majors                         | 11 |
| Captains Military storekeepers |    |
| •                              | _  |

Of the lieutenant colonels there were: Colonel and aide-de-camp, 1; assigned to duty as colonel under the act approved July 4, 1864, 1.

Of the majors there were: Brigadier generals of volunteers, 3; not on duty in the department, but a brevet major general of volunteers, 1; awaiting orders, 1; assigned to duty as colonels under the act approved July 4, 1864, 3; lieutenant colonel and aide-de-camp, 1.

Of the captains there were: Brigadier generals of volunteers not on duty in the Quartermaster's department, 3; colonels, 3; brevet brigadier generals, 2; colonels and aide-de-camps, 2; assigned to duty as colonels under the act approved July 4, 1864, 12; assigned to duty as lieutenant colonels under the act approved July 17, 1862, 5; not subject to orders, 2.

The effective force of the regular corps on the 30th of June, 1865, was 67. On the 1st of July, 1865, the number of assistant quartermasters of volunteers was 488.

Of these there were: Brigadier general, 1; brevet brigadier general, 1; colonel and aide-de-camp, 1; colonels assigned under act approved July 4, 1864, 25; lieutenant colonels assigned under act approved July 17, 1862, 13; brevet colonels, 5; brevet lieutenant colonel, 1; majors assigned under act approved July 4, 1864, 26; brevet majors, 3; major and aide-de-camp, 1.

During the fiscal year there were four hundred and sixty assignments of officers of the Quartermaster's department to duty by orders of the War Department, of which we have record; and from July 1, 1865, to October 1, 1865, there were seventy such assignments; in all five hundred and thirty, including changes of station.

#### PRESONAL AND CONSOLIDATED MONTHLY REPORTS.

Personal reports for the past year have been rendered more promptly. Also consolidated monthly reports have been rendered by the chief quartermasters of the different departments of all officers serving in the Quartermaster's department under their direction, as required by circular from this office, dated January 18, 1865.

From these reports much valuable information has been derived. They give the stations of officers and the various duties in which they have been engaged during the previous month, and exhibit all the changes and transfers within the departments during the month, accompanied by copies of department orders

pertaining to the Quartermaster's department.

#### DISTRIBUTION OF ORDERS.

This division has experienced much difficulty in supplying officers of the Quartermaster's department with the orders of the War Department, and of the Quartermaster General's office. Though they have been promptly and regularly sent to the chief quartermasters in quantities sufficient to supply their subordinates, the failure to receive them was frequently made the excuse for neglect of duty. To remedy to some extent this evil, a system was adopted to require a receipt from the officer to whom orders were transmitted. Had this been devised and adopted earlier, and had it been made a point to retransmit orders to officers doing important duties when receipts were not forthcoming, no doubt much irregularity in the rendering of accounts and in the general management of business would have been obviated.

### COMPILATION OF ORDERS, ETC.

A very general desire has been expressed that all the orders relating to this department should be collected, revised, and published in convenient form, and a reference made to the laws and regulations bearing upon the subject; the decisions of the Quartermaster General since the commencement of this war, to be embodied in the same work. This should be done under the sanction of the Quartermaster General, and published by authority of the War Department. The publication of any treatise of this kind without this sanction and authority

would not meet the wants of the department.

The several works which have lately appeared, though no doubt prompted by a commendable spirit, fail to meet the requirements, inasmuch as the subjects are not properly collated; and besides, an officer would hestitate to base a heavy disbursement upon a decision contained in an unofficial digest. The Book of Decisions of the Second Comptroller of the Treasury Department is the best I have seen, though some of his decisions as given are contrary to the regulations. I will cite as instances Article 1,234, Decisions of Second Comptroller, versus Paragraph 1,142 and Form 20 to Abstract "B," revised Army Regulations; and the last clause of Artice 1,265 and Article 1,266, Decisions of Second Comptroller, versus Paragraphs 1,082 and 1,083, revised Army Regulations, and laws of Congress.

The rank of officers of the Quartermaster's department not commensurate with the important service they have rendered in this war.

It is now a conceded fact that commanding generals owe much of their success to the untiring zeal and determined energy of officers of the Quartermaster's department.

At the eleventh hour they were ready to accord to officers of this department their just meed of praise for the faithful discharge of onerous and often difficult

Congress to this time has been unmindful of this indispensable enginery to the success of armies and has made no provision for proper reward. The distribution of "brevets," which has been judiciously done by the honorable Secretary of War, was all that was left for those who have taken or will soon take their place again as citizens. These marks of recognition of their services, if promptly ratified by the coming Congress, will cause great gratification and create the thought that those who have remained at home—in the rear—to enjoy the fruits of peace and plenty vouchsafed by victory, while it was being achieved by their constituents, under privations and hardship in the field—at the front—are not wholly incapable of appreciating the relative position of citizen and soldier.

#### OFFICERS ON DUTY IN THIS DIVISION.

Before closing this report I would respectfully invite the attention of the Quartermaster General to the merits of Captain H. A. Royce, assistant quartermaster of volunteers, my assistant in this division. He is a civil engineer by profession, and first entered the service July 20, 1861, as a quartermaster sergeant, 21st Massachusetts volunteers; he was commissioned regimental quartermaster 22d Massachusetts volunteers, November 29, 1861, and served with his regiment, subject to various details, till October 12, 1864, when he was mustered out of the service. He was appointed assistant quartermaster of volunteers March 11, 1865, received his commission May 6, 1865, and was assigned to duty in the Eighth Division of the Quartermaster General's office May 20, 1865. Captain Royce has a liberal education. His general qualifications for business, his excellent judgment and discrimination, and extensive experience in the field in the Quartermaster's department, eminently fit him to render, and he has rendered, most valuable services in this division. He is industrious, efficient, and possessed of all the elements requisite for the prompt discharge of official duties. Though he has served but a short time as an assistant quartermaster of volunteers, his services during the war in the Quartermaster's department entitle him to consideration and to promotion by brevet, a compliment which can be

bestowed without money and without price. I recommend him for appoint-

ment to the rank of lieutenant colonel by brevet.

Captain John V. Furey, assistant quartermaster of volunteers, has had in charge, under my direction, the annual report of officers, personal reports, the distribution of orders, &c. In the discharge of these and other duties he has proved himself faithful, efficient, and worthy of the kind consideration of the Quartermaster General, to which I commend him, and recommend that he be appointed a major by brevet.

#### CLERKS.

The clerks on duty in this division having access to, and employed upon, the books and papers—many of which are confidential—are gentlemen of a high order of qualification morally and educationally. They are punctual in their attendance and observe the utmost decorum during office hours. They have proved themselves worthy of the confidence and commendation of the Quartermaster General.

All of the foregoing is respectfully submitted.

I have the honor to be, very respectfully, your obedient servant, GEO. V. RUTHERFORD.

Colonel, Quartermaster's Department.

Brevet Major General M. C. MEIGS,

Quartermaster General U. S. A., Washington, D. C.

No. 63

Statement of clothing, camp and garrison equipage on hand July 1, 1864, purchased, manufactured, captured, gained, taken up, sold, lost, expended, and remaining on hand in the Quartermaster's department during the fiscal year ending June 30, 1865.

| }                                       |   |                    |                   |                                       | The first fifteen boats are owned by the government, and were the boats which composed the ram fieet and Mississippi marine brigade, and were turned over to quartermaster below when the marine brigade was mustered out, in August, 1864. The Lioness and T. D. Horner were got again in December, 1884, to tow coal. The Lioness was turned over to Col. Edwards in June, 1865, leaving in hand, as a tow-boat, the T. D. Horner. |

<sup>\*</sup> Raised in St. John river. Turned over to me May 1, 1865.

NOTE.—Under the head of "total earnings," amounting to \$237, 625-81, there is reported by officers \$117, 744-96 as pall for repairing, fuelling, &c., of these vessels; and the balance, amounting to \$119, 850-85, it is not stuted from what source it is derived. One (1) steamer and five (5) barges are reported purchased, and one (1) steamboat captured during the fiscal year.

<sup>†</sup> Never in service.

## employment of the Quartermaster's department, &c .- Continued.
